Board of Registration in Pharmacy

Policy 2020-14: COVID-19 Testing

This policy authorizes pharmacists and pharmacy interns licensed by the Massachusetts Board of Registration in Pharmacy ("Board") to order, administer, process, read, and report the results of FDA-authorized COVID-19 tests, and is intended to align with the Secretary of Health and Human Services' Declaration under the PREP Act.

Also, in accordance with the PREP Act, the policy authorizes qualified pharmacy technicians to administer and process FDA-authorized COVID-19 tests. Qualified pharmacy technicians must be certified by a Board-approved national certifying body (i.e., ExCPT or PTCB) or have worked at least 500 hours after being licensed as a pharmacy technician.

Please note carefully, certain allowances and requirements of this policy will terminate when the emergency declaration under the PREP Act terminates. After termination, policy details will be reevaluated.

In order to participate, the following requirements must be satisfied:

- Pharmacy licensees must have a license in good standing.
- Pharmacy interns and qualified pharmacy technicians may only perform testing under the direct, on-site supervision by a Massachusetts licensed pharmacist.
- The decision to order a test must be based on the Massachusetts Department of Public Health ("DPH") guidance:
<https://www.mass.gov/doc/covid-19-pui-criteria/download>
- Pharmacists and pharmacy interns may order, administer, process, read, and report test results to patients but may not engage in interpretation of any test results.
- Qualified pharmacy technicians may only administer and process COVID-19 tests.
**Please note that any pharmacy technician or pharmacy technician trainee may observe the collection of self-administered COVID-19 tests provided that they are duly trained and under the supervision of a Massachusetts licensed pharmacist.

- Policies and procedures for the ordering of tests must be developed and maintained.
- Policies and procedures must be in place to notify the patient of the results, in accordance with DPH guidance:
<https://www.mass.gov/info-details/covid-19-testing-guidance#testing-guidelines->
- If the pharmacist or pharmacy intern orders the test, the pharmacist is responsible for notifying the patient of the results and provide instructions for follow-up care.
- All test results must be reported to DPH in accordance with 105 CMR 300.000. For guidance and a reporting template, please request via email:
ISIS-ImmediateDiseaseReporting@mass.gov
- Any reporting requirements of the local Board of Health must also be completed.
- Board-licensed pharmacies planning to engage in the ordering, administering, processing, reading, and reporting of FDA-authorized COVID-19 tests must have an active CLIA certificate. Review the DPH Clinical Laboratory Program website for any additional requirements that may apply:
<https://www.mass.gov/clinical-laboratory-program>
- No aspects of testing (including machine-processing of specimens), may be conducted within a pharmacy's licensed prescription area, including the service counter.
- Any testing locations must comply with local Board of Health requirements. Please review the following helpful links:
<https://www.mass.gov/doc/space-on-clinic-premises-for-covid-19-testing/download>
<https://www.cdc.gov/coronavirus/2019-ncov/lab/point-of-care-testing.html>
- Pharmacy licensees must institute risk mitigation strategies, including utilizing proper personal protective equipment ("PPE"), to minimize the spread of disease in accordance with the Centers for Disease Control and Prevention ("CDC"), Occupational Safety and Health Administration ("OSHA"), and / or local Board of Health requirements.
