

# WMGLD Municipal Action Plan 2020

Submitted by Massachusetts Municipal Wholesale Electric Company (MMWEC) on behalf of Wakefield Municipal Gas & Light Department (WMGLD)

## Program Budget Data

For the most recent reporting (calendar) year, please provide:

Reporting year	2019
Gross annual Retail Revenue (\$)	\$28,975,010
Annual RCS budget threshold (must be at least .25% of gross annual retail revenue)	\$72,438

\_\_\_ Check here if seeking a waiver in accordance with 225 CMR 4.08(3).

## RCS Assessment Data

For the most recent reporting year (per the PA's Annual Return, filed with the DPU pursuant to 220 CMR 79.02), please provide:

	The time period reported in 01/01/2019 – 12/31/2019		
	<b>Data Description</b>	<b>Amount in DPU reported units (MWh, therms)</b>	<b>Units</b>
4	Total Residential* Electric Sales (MWh)	77,839	MWh
5	Number of residential* electric customers	11,021	Accounts
6	Total Residential* Gas Sales+	447,210	e.g. therm, mcf, etc.
7	Number of residential* gas customers+	6,368	Accounts

\*Including market rate and low income

+Only applicable to gas municipal PAs

## Municipal RCS Roadmap

Please provide a detailed RCS program planned budget for 2020, showing categories of RCS Program activities and their corresponding budget amounts. At a minimum, provide budget amounts (even if the amount is zero) for the categories shown below. If the RCS program budget includes other significant costs or budget categories, include them here.

Budget Category	2019 Dollar Amount	2019 Volume (include units)	Planned Dollar Amount	Planned Volume (include units)
Audits	\$31,605	147 audits	\$32,250	150 audits
Instant Savings Measures provided during audit	\$882	441 LED bulbs	\$900	450 LED bulbs
Additional Customer Incentives /Rebates	\$58,097	462 rebates	\$50,000	400 rebates
Administration	\$28,157	N/A	\$32,000	N/A
Marketing	\$6,500	N/A	\$6,500	N/A
MLP Solar Rebate (MLP Portion)	\$56,313	11 projects	\$39,003	7 projects
Free EV Charger Program	\$2,500	5 chargers	\$1,800	3 chargers
<b>Total</b>	<b>\$184,054</b>		<b>\$162,203</b>	

## Program Summary/Description

### Home Energy Assessments

WMGLD offers Home Energy Assessments (HEA) to customers in single family homes and condominiums (with separate metering and heating systems) who heat their homes with electricity, oil, propane, or other non-natural gas fuels. These HEAs are free to the customer when performed no sooner than 3 years prior to the last HEA of that home.

In 2019 and prior, Hancock Software provided the audit software and reporting that were used, however, in 2020, the program changed software provider to Snugg Pro. The Snugg Pro audit software provides both a more customer-friendly report and provides greater detail on recommendations. Current conditions are listed for multiple areas of concern throughout the home and suggested goals for each area are given, based on observable current conditions and generally accepted residential energy efficiency standards. The report provides estimated costs, savings and Savings to Investment Ratios (SIRs) for each recommendation, allowing the customer to prioritize projects in a way that is best for them. The DOER Scorecard is included in the Snugg Pro report and MLP will provide updated scorecards following upgrades.

Each recipient of an HEA receives three (3) LED bulbs as part of the audit.

Product	Description	Requirement
Lighting	(3) 9 watt LED bulbs	Receive HEA and have some non-LED lighting in use in home

### Rebates and Incentives

As a participant in both the MMWEC Home Energy Loss Prevention Services (HELPS) and WMGLD Programs, WMGLD offers a wide range of rebates and incentives to encourage customers to make their homes more efficient (WMGLD Incentive Rebate Program) and purchase and use energy efficient heating and cooling systems and heat pumps (WMGLD Heating and Cooling Rebate Program), and appliances (WMGLD Residential Appliance Rebate Program), and Wi-Fi thermostats (WMGLD Wi-Fi Smart Thermostat Program). Customers can apply for these rebate programs on line. Additionally, WMGLD offers incentives to customers for scheduled charging of electric vehicles, installation of PV solar systems (MLP Solar Rebate Program), and, starting in Q2 of 2020, the use of Wi-Fi-enabled smart devices for demand reduction programs (Connected Homes). Additionally, WMGLD residential customers may also qualify for a low interest heating system or heat pump loan from a local lender. Descriptions of each program follow:

#### WMGLD Residential Appliance Rebate Program

Product	Description/Requirements	Incentive Amount
Clothes Washer	ENERGY STAR	\$50
Dehumidifier	ENERGY STAR	\$50
Dishwasher	ENERGY STAR	\$25
Refrigerator	ENERGY STAR	\$50
Room Air Conditioner	ENERGY STAR; EER >10	\$50

Heat Pump Water Heater	ENERGY STAR (UF >3.0)	\$500
Electric or Gas Water Heater	ENERGY STAR ( $\leq 55$ gal, EF $\geq 2.0$ ; >55 gal, EF $\geq 2.2$ )	\$100

#### WMGLD Incentive Rebate Program

Product	Description/Requirements	Incentive Amount
Insulation and Air Sealing	Must be recommended by HEA	50% of cost; max \$1,500
Windows	ENERGY STAR and U-factor <0.2 Must be recommended by HEA	\$50 each; max \$500

#### WMGLD Heating and Cooling Rebate Program

Product	Description/Requirements	Incentive Amount
Oil or Gas Heating Systems	ENERGY STAR; HEA required	50% of cost, max \$500
Central Air Conditioner	ENERGY STAR; HEA required	50% of cost, max \$100
Ground Source Heat Pump		50% of cost, max \$1,000
Single-Zone Ductless Mini-Split Heat Pump	SEER $\geq 18$	Up to \$1,000
Multi-Zone Ductless Mini-Split Heat Pump	SEER $\geq 18$	Up to \$1,000

In addition to the PMLD rebate on Mini Split Heat Pumps, HELPS has negotiated additional manufacturer purchase price discounts.

#### WMGLD Wi-Fi Thermostat Program

Product	Description/Requirements	Incentive Amount
Wi-Fi Smart Thermostat		50% of cost; max \$125

#### HELPS Electric Vehicle Scheduled Charging Program

Customers with either fully electric or plug in hybrid vehicles can receive a level 2 charger (a \$650 value) free of charge in return for allowing SHEL (through HELPS) to curtail charging between 5:00 and 9:00 PM each non-holiday weekday for 3 years. Customer must maintain Wi-Fi access to charger to remain in program.

Product	Description/Requirements	Incentive Amount
Full Electric Vehicle	Fully Electric Vehicle	Free Charger
Tier I PHEV	$\leq 15$ KWH Battery Capacity	\$200
Tier II PHEV	$\geq 15$ KWH Battery Capacity	\$300

#### MLP Solar Rebate Program

As a participant in the MLP Solar Rebate Program, SHEL provides funding on eligible home based solar Photovoltaic installations up to 10 kW. MLP funds up to 60 cents per watt and DOER provides another 60 cents per watt. Some limitations on SHEL funding levels do apply, and the rebate budget is fixed. This Program began in late 2019 and continues into 2020. As of the end of 2019, seven projects had reached completion.

#### HELPS Electric Vehicle Scheduled Charging Program

Customers with either fully electric or plug in hybrid vehicles can receive a level 2 charger (a \$650 value) free of charge in return for allowing MLP (through HELPS) to curtail charging between 5:00 and 9:00 PM each non-holiday weekday for 3 years. Customer must maintain Wi-Fi access to charger to remain in program.

Product	Description/Requirements	Incentive Amount
Full Electric Vehicle	Fully Electric Vehicle	Free Charger
Tier I PHEV	≤15 KWH Battery Capacity	\$200
Tier II PHEV	≥15 KWH Battery Capacity	\$300

### MLP Solar Rebate Program

As a participant in the MLP Solar Rebate Program, WMGLD provides funding on eligible home based solar photovoltaic installations up to 10 kW. MLP funds up to 60 cents per watt and DOER provides another 60 cents per watt. Some limitations on WMGLD funding levels do apply, and the rebate budget is fixed. This Program began in late 2019 and continues into 2020. As of the end of 2019, 11 projects had reached completion.

### HELPS Connected Homes Program

HELPS Connected Homes is an innovative new program offered to customers that own select Wi-Fi-enabled smart devices to leverage the technology of smart appliances and devices into cost savings for the light department and its customers. By enrolling a smart device in the Connected Homes Program, customers agree to allow WMGLD to make brief, limited adjustments to their devices during times of peak electric demand. Customers will be informed of possible adjustments in advance via email and will be given the choice to opt out. Customers who decide to participate in adjustments will be given an incentive check or bill credit

Product	Eligible Manufacturers	Monthly Incentive
Battery	Sonnen	\$15
EV Charger	Chargepoint	\$10
Smart Electric Water Heater	GE and Rheem	\$5
Mini Split Controller	Sensibo	\$5

### Ancillary Services

WMGLD markets and promotes its entire suite of energy efficiency, distributed generation and demand response programs (including audits, rebates and other incentives) in a number of ways: on the MLP website, bill stuffers, distribution at the Light Plant Office, and social media. WMGLD does not focus this marketing to specific customer demographics.

The program has always been able to link HEI rebates to HEAs since the HEI rebates require the HEA. The link between other rebates and the HEA has been harder to establish. The new Snugg Pro HEA software will allow a closer linking of improvements and HEAs since they include the DOER Scorecard. Since customers that have had an HEA can request an updated Scorecard after improvements have been made, we will have the opportunity to both be sure that customers are aware of any rebates or incentives that they may be eligible for, and that even if the improvement is not linked to a rebate, the connection between the improvement and the HEA can be established.

And due to the marketing and increase in knowledge of the Scorecard by home buyers and real estate professionals, the program anticipates an increased interest in the Scorecard by new home buyers; the program will be able to provide new buyers the Scorecard as requested.

WMGLD does not target low/moderate income, multi family, or ESL households. There are very few customers who speak English as a second language in Wakefield, so that is not a significant concern for WMGLD. However, WMGLD is very interested in developing an income-tailored rebate structure to assist lower income customers.

The program does not currently recommend contractors or provide any sort of approved or participating contractor lists. The HEA process does include information given to the customer on how to choose a contractor, including information essentially similar to that found on the Commonwealth of Massachusetts website.
