

# Audi Q4 e-tron

SUV incl. Sportback, as of 2021

**Note:** The illustration shows the maximum possible range of equipment.

	Airbag		Stored gas inflator		Seat belt pretensioner		SRS control unit		Pedestrian protection active system
	Automatic rollover protection system		Gas strut / Preloaded spring		High-strength zone		Zone requiring special attention		
	Battery low voltage		Ultra capacitor, low-voltage		Fuel tank		Gas tank		Safety valve
	Battery pack, high-voltage		High voltage power cable		High voltage device that disconnects high voltage		Fuse box disabling high voltage		High voltage ultra-capacitor
	Low voltage device that disconnects high voltage		Fuse box disabling high voltage to low voltage		High voltage component				

# Audi Q4 e-tron

SUV incl. Sportback, as of 2021

## 1. Identification / recognition

The electric motor is silent. The display on the left of the instrument cluster (power meter) indicates whether the electric drive is switched "OFF" or "READY" for operation.

Logo

e-tron

Charging socket

Engine compartment

Q4 e-tron

Q4 e-tron Sportback

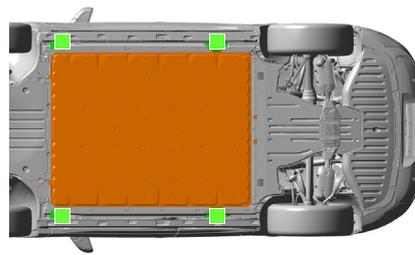

## 2. Immobilization / stabilization / lifting

Immobilize the vehicle

Press the Park button "P".

Lifting points

Suitable lifting points

High voltage battery

## 3. Disable direct hazards / safety regulations

Turn off the ignition (power meter display "OFF")

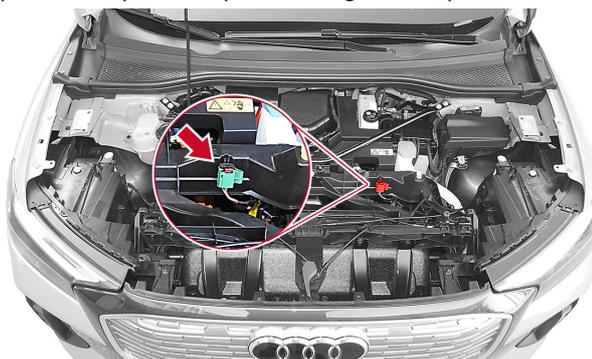

Press the START-STOP button without depressing the brake pedal.

Deactivating the high voltage system

Option 1: Separation point in engine compartment

① Pull out red tab

② Pull out black connector

# Audi Q4 e-tron

SUV incl. Sportback, as of 2021

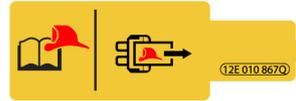

## Option 2: Fuse in passenger compartment

Left-hand drive vehicle  
(Next to the steering column) Remove the cover

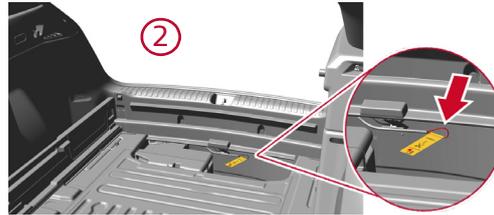

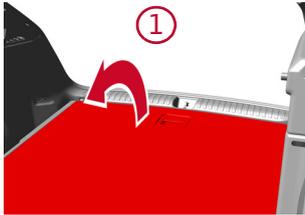

Pull out fuse

## Option 3: Separation point on rear end panel in trunk

Remove the loading floor

Separate the cable at the yellow label

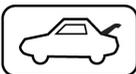

Do not touch, cut, or open the high voltage battery and components.  
Wear suitable safety equipment.

In the event of an accident in which the airbags are deployed, the high-voltage system will be automatically deactivated. The high-voltage system is de-energized approx. 20 seconds after deactivation.

## Disconnect the lithium-ion battery (in the engine compartment)

Disconnect the negative terminal (refer to the graphic on page 1 for the battery position)

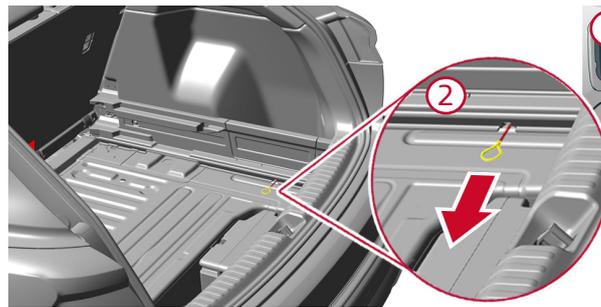

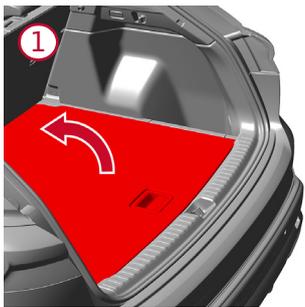

## Disconnect from charging station (emergency release in the boot on the right-hand side of the vehicle)

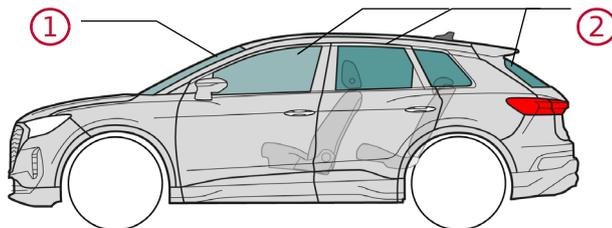

Remove the loading floor

Pull the yellow loop

Disconnect the charging connector

## 4. Access to the occupants

### Glass types:

- ① Composite safety glass
- ② Single-layer safety glass

## 5. Stored energy / liquids / gases / solids

LI ION

400 V

# Audi Q4 e-tron

SUV incl. Sportback, as of 2021

12 V

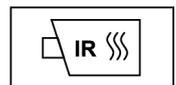

There is a risk of a thermal reaction in the high-voltage battery if coolant escapes from the battery cooling system. Monitor the temperature of the high-voltage battery.

## 6. In case of fire

Lithium-ion batteries can self-ignite spontaneously, sometimes several hours after an event causing damage or the result of incorrect use, and can re-ignite after a fire has been suppressed. Wear suitable safety equipment.

## 7. In case of submersion

After recovering the vehicle from the water, deactivate the high-voltage system (see Section 3) and allow the water to drain off. Wear suitable safety equipment.

## 8. Towing / transportation / storage

Lithium-ion batteries can self-ignite, or re-ignite after a fire has been extinguished.

If the vehicle has been involved in an accident or if the HV battery is damaged or appears to be damaged: Deactivate the high-voltage system (see Section 3). Park the vehicle at a safe distance, at least 5 m, from buildings and other vehicles (quarantine area).

Do not tow a vehicle that has been involved in an accident on its drive axles.

## 9. Important additional information

## 10. Explanation of pictograms used

Flammable	Explosive	Caustic, skin irritant	Hazardous to human health	Environmental hazard	Electric vehicle	Warning, Electricity	General warning sign
	<b>LI ION</b>						
Use water to extinguish the fire	Lithium-ion battery	Dangerous voltage	Release the bonnet	Release boot	Use thermal Infrared camera	Remove smart key
