Dear DOER,

I am writing today in strong opposition to the proposed biomass regulation update.

Our state should take bold steps to transition to truly clean “renewable” energy - Wind and solar. Burning wood is not renewable on a time scale that matters. Trees take a long time to grow.

In addition, the air pollution from burning wood causes adverse health impacts to people living in the surrounding area.

There is no reason to subsidize wood-burning other than benefit a few who have a financial interest in biomass. Our communities and the climate are worse off by promoting biomass as fuel. Please take biomass out of our RPS.

Thank you,
Hewon Hwang
Concord, MA
