I am opposed to the new rules which would allow dozens of polluting biomass power plants across New England to qualify for ratepayer subsidies through Massachusetts Renewable Energy Portfolio Standard (RPS).

Regarding categories from your website: Category A, the biomass amendments proposed last April, is sensible, as is Category C, the renewable energy procurement standards reflecting the changes required under the 2021 Climate Roadmap Law enacted by the MA Legislature.

Category B (Biomass changes including those that exempt biomass plants from environmental justice siting requirements) flies in the face of what should be expected from our state..

Nancy Husbands, 960 Waltham Street, Lexington MA 02421
