No Biomass in Mass!

I am writing to object to biomass, which is a dirty, carbon-releasing fuel source, being subsidized in Massachusetts. This is not a green or clean fuel source. It is counterproductive to all effort to fight climate change and support clean air in Massachusetts. In fact, a megawatt of electricity produced by burning wood releases more carbon dioxide into the atmosphere than a megawatt generated from coal. It's outrageous that the DOER would consider supporting this unpopular and unscientific idea.

Sincerely,
Vivian Hood
Maynard, MA
