Paper returns will not be accepted.

# Form M-2220 Instructions

## General Information

### 2025 Massachusetts Tax Change

Massachusetts General Laws (MGL) ch 62, §§ 11 and 12 require C corporations to file their tax returns on or before the 15th day of the fourth month following the close of each taxable year (April 15 in the case of corporations filing on a calendar year basis). The filing due date for S corporation tax returns is the 15th day of the third month following the close of each taxable year. For more information, see TIR 17-5: 2017 Supplemental Budget: Conforming Massachusetts Partnership and C Corporation Tax Return Filing Due Dates to Federal Due Dates.

For calendar year filers, returns and estimated payments will be treated as timely if they are filed and/or paid on or before April 15, 2026.

### Expansion of Mandatory Electronic Filing for Corporate Excise Returns

Effective for tax periods ending on or after December 31, 2021, electronic filing and payment of tax will be required of all business corporations and financial institutions subject to tax under MGL ch 63, with no income threshold. For more information, see TIR 21-9: Expansion of Certain Electronic Filing and Payment Requirements.

### Who should use this form

Corporations taxed under Ch. 63 of the Massachusetts General Laws should use Form M-2220 to determine whether they paid the correct amount of estimated tax by the proper due date. If not, a penalty may be imposed on the underpayment amount.

**Short year.** Corporations are liable for estimated payments even if there was no return filed for 2024 or if a return filed for 2024 was for less than 12 months. Corporations meeting either of these conditions should enter the smaller of lines 2 or 3 in line 5. See 830 CMR 63B.2.2 for additional information.

**Large corporation.** Any corporation having \$1 million or more of federal taxable income in any of its three preceding taxable years (IRC § 6655(g)) may only use its prior year tax liability to calculate its first quarterly estimated payment. Any reduction in the first installment payment must be added to the second installment payment.

**Note:** New corporations in their first full taxable year with less than 10 employees have lower payment percentages — 30-25-25-20%; 55-25-20%; and 80-20%. New corporations should check the box in line 7 and use these percentage amounts to complete line 7.

## Line Instructions

**Line 3.** Multiply 2025 income measure of excise and non-income measure of excise (tangible property or taxable net worth) by 2024 apportionment factor. Then multiply the result by 2025 tax rate. Multiply that result by .90 (90%) and enter the result on line 3.

**Lines 7 through 12.** To determine the underpayment amount, complete lines 7 through 12 for each appropriate column. If line 11 shows an overpayment, that overpayment may first be used as a payment of any existing underpayment amount. Overpayments used as payments of prior underpayment amounts do not decrease the actual underpayment amount but serve to reduce instead the period of underpayment subject to penalty. If there are no existing underpayment amounts, the overpayment is applied as a credit against the next installment. If more than one payment is made for a given installment, attach separate computations for each payment.

**Line 35.** Enter the line 35 amount on the corresponding line item of the taxpayer's tax return as follows: Form 355, line 25a; Form 355U, line 41; Form 355S, line 28a; Form 355SC, line 21a; Form 355SBC, line 14; Form 63-F, line 25a; Form 63-20P, line 34a; Form 63-23P, line 41a; Form 63-29A, line 39a; or Form M-990T, line 36a.

**Note:** Payments made with a return, including extension payments, estimated tax payments and withholding, are considered to be paid on the last day prescribed for the filing of the return and/or the payment of the tax, without regard to any extensions. See MGL ch 62C, § 79. Therefore, any overpayment from a prior year return will be considered to be paid as of the prior year return due date. For example, if a calendar year C corporation reported an overpayment on its 2024 corporation excise tax return and elected to apply it as a credit to its 2025 estimated tax, the payment will be credited as of April 15, 2025, which is the 2024 return due date and about one month after the due date of the first estimated tax installment payment for the 2025 tax year.

To avoid underpayment penalties the first estimated tax installment should be paid on or before the first installment due date, not the return due date.

See TIRs 16-9 and 21-9 for more information.
