## 2. Fraud Alert

You may want to consider placing a fraud alert on your credit report. An initial fraud alert is free and will stay on your credit file for at least 90 days. The alert informs creditors of possible fraudulent activity within your report and requests that the creditor contact you prior to establishing any accounts in your name. To place a fraud alert on your credit report, contact any of the three credit reporting agencies identified above.

## 3. Security Freeze

You have the right to put a security freeze on your credit file. A security freeze prevents potential creditors from accessing your credit report without your consent. As a result, using a security freeze may interfere with or delay your ability to apply for any service that requires a credit check. You must separately place a security freeze on your credit file with each credit reporting agency. To place a security freeze, you may be required to provide the consumer reporting agency with information that identifies you including your full name, Social Security number, date of birth, current and previous addresses, a copy of your state-issued identification card, and a recent utility bill, bank statement, or insurance statement. There is no charge to request a security freeze or to remove a security freeze.
