

Dear Bob:

As we discussed, we are seeking the backup for the numbers appearing in Verizon's compliance filing regarding the FLC Development, in Part G-10. Verizon has presented a calculation based on numbers that are supposed to represent Verizon's recalculation of forward-looking investment, but no backup for those numbers was provided. The numbers at issue are in the Collocation, Switch, Loop & IOF, SS7, Misc. Other, and Support Investments tabs of the electronic filing (pages 5-11 of the paper version). Those tabs consist of spreadsheets with numbers that appear to have been derived elsewhere (judging from the many decimal points appearing in the numbers), but the underlying documentation was not provided.

Thank you for agreeing to track down this documentation, assuming it exists, and getting it to us ASAP. Please let me know if it will take more than one day (i.e. by the end of the day tomorrow) to get this backup to us. Thank you.
