Ladies & Gentlemen:

The Division of Marine Fisheries has determined that **bivalve shellfish** from areas OC2 through OC5 defined below **no longer contain biotoxins (Paralytic Shellfish Poisoning - (PSP))** from the phytoplankton *Alexandrium* (spp.) in excess of established standards. Area OC6, Salt Pond in Eastham, remains **closed** to all shellfish harvesting. All areas OC2 through OC6 remain closed to the harvesting of **all species of carnivorous snails**.

Therefore, under authority of Massachusetts General Laws, Chapter 130, sections 74A, the PSP closures for **bivalve shellfish** issued on March 19, 2024, **will be rescinded at sunrise on Thursday, June 13, 2024**, in areas OC2 through OC5 (area **OC6, Salt Pond** in Eastham, remains closed to all shellfish harvesting). Bivalve shellfish in areas currently classified as APPROVED and placed in the "open" status may now be harvested for direct human consumption subject to local rules and regulations under authority of Massachusetts General Laws Chapter 130, section 52. Similarly, those areas classified as CONDITIONALLY APPROVED may be placed in the "open" status subject to Conditional Area Management Plan conditions. All areas OC2 through OC6 remain closed to the harvesting of **all species of carnivorous snails**.

Status: Open to Bivalve Shellfish Harvesting.

These areas remain closed to the harvesting of all carnivorous snails.
