Local Telephone Competition: Status as of June 30, 2005

Industry Analysis and Technology Division
Wireline Competition Bureau
April 2006

This report is available for reference in the FCC's Reference Information Center, Courtyard Level, 445 12th Street, SW, Washington, DC. Copies may be purchased by contacting Best Copy and Printing, Inc., 445 12th Street, SW, Room CY-B402, Washington, DC 20554, telephone (800) 378-3160, or via their website at www.bcpweb.com. The report can also be downloaded from the Wireline Competition Bureau Statistical Reports Internet site at www.fcc.gov/wcb/stats.

Local Telephone Competition: Status as of June 30, 2005

We present here summary statistics of the latest data on local telephone service competition in the United States as reported in the Commission's local competition and broadband data gathering program (FCC Form 477).¹ The summary statistics provide a snapshot of local telephone service competition based on switched access lines in service and state-specific mobile telephony service subscribers as of June 30, 2005.²

All incumbent local exchange carriers (ILECs) and competitive local exchange carriers (CLECs) were required to report to the Commission basic information about their local telephone service, and all facilities-based mobile telephony providers were required to provide information about their subscribers, as of June 30, 2005. The FCC previously (i.e., as of December 31, 1999 and each succeeding June 30 and December 31 through the end of 2004) collected data from carriers with at least 10,000 switched access lines, or mobile telephony subscribers, in service in a particular state. Small carriers, many of whom serve rural areas with relatively small populations, were therefore underrepresented in the earlier data.³ The number of ILEC and CLEC holding companies and unaffiliated carriers that reported local telephone service information for June 2005 was triple the number that reported six months earlier, while the number of reporting facilities-based mobile telephony providers doubled.⁴

The data as of June 30, 2005 include, for the first time, information about the extent to which the carrier providing the end-user switched access line is also the presubscribed interstate long distance carrier for that line.

Based on the latest information now available, readers can draw the following broad conclusions:

¹ *Local Competition and Broadband Reporting*, CC Docket No. 99-301, Report and Order, 15 FCC Rcd 7717 (2000); *Local Telephone Competition and Broadband Reporting*, WC Docket No. 04-141, Report and Order, 19 FCC Rcd 22340 (2004). During this data gathering program, qualifying providers file FCC Form 477 each year on March 1 (reporting data for the preceding December 31) and September 1 (reporting data for June 30 of the same year). An updated FCC Form 477, and instructions for that particular form, for each specific round of the data collection may be downloaded from the FCC Forms website at www.fcc.gov/formpage.html.

² Statistical summaries of the earlier Form 477 data collections appeared in previous releases of the *Local Telephone Competition* report, available at www.fcc.gov/wcb/latd/comp.html.

³ As of June 30, 2005, filers with fewer than 10,000 switched access lines in a state (including entities that previously filed on a voluntary basis) reported about 4.2 million lines (about 1.9 million ILEC lines and about 2.3 million CLEC lines). By contrast, the data filed for December 2004 included about 0.6 million lines filed on a voluntary basis (about 0.2 million ILEC lines and about 0.4 million CLEC lines). Mobile telephony service providers with fewer than 10,000 subscribers in a state reported about 389,000 subscribers as of June 30, 2005. Such filers reported (on a voluntary basis) about 69,000 subscribers six months earlier.

⁴ The nationwide number of CLEC holding companies and unaffiliated entities reporting local telephone service information increased from 149 to 325, and the number of ILEC entities increased from 190 to 753. See Tables 3 and 4. The number of entities reporting mobile telephony subscribers increased from 76 to 154.

- End-user customers obtained local telephone service by utilizing approximately 144.1 million ILEC switched access lines, 34.1 million CLEC switched access lines, and 191.3 million mobile telephony service subscriptions. See Tables 1 and 13.
- CLECs reported 34.1 million (or 19.1%) of the approximately 178.2 million nationwide end-user switched access lines in service at the end of June 2005, compared to 32.9 million (or 18.5%) of the 177.9 million lines reported for December 2004. See Table 1.
- Reported CLEC end-user switched access lines increased by about 1.2 million lines during the first half of 2005, from 32.9 million to 34.1 million lines. See Table 1.
- About 49% of switched access lines in service to CLEC end users served residential customers whereas 70% of switched access lines in service to ILEC end users served residential customers. See Table 2.
- CLECs reported providing about 27% of their end-user switched access lines over their own local loop facilities, about 56% by using unbundled network elements (UNEs) that they leased from other carriers, and about 17% through resale arrangements with unaffiliated carriers.⁵ See Table 3.
- CLECs reported using about 19.2 million total UNEs as of June 30, 2005, while ILECs reporting providing about 18.9 million. See Tables 3 and 4.
- ILECs reported providing about 12% fewer UNE loops with switching (referred to as the UNE-Platform) to unaffiliated carriers at the end of June 2005 than they reported six months earlier (14.6 million compared to 16.5 million) and about 2% more UNE loops without switching (4.3 million compared to 4.2 million). See Table 4.
- About 4.6 million end-user switched access lines were provided by CLECs over coaxial cable connections. These lines represent about 50% of the 9.1 million end-user switched access lines that CLECs reported providing over their own local loop facilities, about 13% of all end-user switched access lines that CLECs reported, about 27% of CLEC lines to residential end users, about 3% of total end-user switched access lines, and about 4% of total residential switched access lines. See Tables 2, 3, and 5.
- ILECs were the presubscribed interstate long distance carrier for about 49% of the switched access lines they provided to end users. For CLECs, the percentage was 74%. See Table 6.

⁵ CLEC “resale” lines should include lines that the CLEC provides by using special access lines or other facilities that it obtains from unaffiliated ILECs or CLECs as tariffed services or under commercial agreements.

- The Commission's data collection program collates information about CLEC local telephone service lines (and the CLEC share of total local telephone service lines) in individual states. Relatively large numbers of CLEC lines are associated with the more populous states.⁶ With respect to the calculated CLEC share of switched access lines in service, however, some less populous states, such as Nebraska, New Hampshire, Rhode Island, South Dakota, and Utah had larger CLEC shares than some more populous states, such as California, Florida, and Ohio. See Tables 7 - 10.⁷
- Among the 50 states, there were fewer than 10 reporting CLECs only in Alaska and Hawaii. See Table 13.
- Mobile telephony service providers reported 191.3 million subscribers, compared to 181.1 million six months earlier. About 6% of these subscribers were billed by mobile telephony service resellers.⁸ See Table 14.
- At least one CLEC was serving customers in 83% of the nation's Zip Codes at the end of June 2005. About 98% of United States households resided in those Zip Codes. Moreover, multiple carriers reported providing local telephone service in the major population centers of the country. See Table 15 - 17, and the map that follows Table 19.

As other information from FCC Form 477 becomes available, it will be routinely posted on the Commission's Internet site. We invite users of the information presented in this statistical summary to provide suggestions for improved data collection and analysis by:

- Using the attached customer response form,
- E-mailing comments to James.Eisner@fcc.gov,
- Calling the Industry Analysis and Technology Division of the Wireline Competition Bureau at (202) 418-0940, or
- Participating in any formal proceedings undertaken by the Commission to solicit comments for improvement of FCC Form 477.

⁶ The largest numbers of CLEC lines are reported for California, the most populous state, followed by New York and Texas, the third and second most populous states, respectively.

⁷ CLEC shares appearing in Table 8 are based on CLEC and ILEC lines in Tables 9 and 10.

⁸ The mobile "resale" percentage should not include any subscribers that the facilities-based provider serves on a pre-paid basis. For reporting purposes, a "facilities-based" mobile telephony service provider serves subscribers using spectrum licenses that it has obtained or manages.

Table 1
End-User Switched Access Lines Reported

Date	ILEC Lines	CLEC Lines	Total	CLEC Share
Dec 1999	181,202,853	8,194,243	189,397,096	4.3 %
Jun 2000	179,648,725	11,557,381	191,206,106	6.0
Dec 2000	177,561,022	14,871,409	192,432,431	7.7
Jun 2001	174,752,275	17,274,727	192,027,002	9.0
Dec 2001	171,912,202	19,653,441	191,565,643	10.3
Jun 2002	167,320,031	21,644,928	188,964,959	11.5
Dec 2002	164,373,862	24,863,691	189,237,553	13.1
Jun 2003	158,259,718	26,985,345	185,245,063	14.6
Dec 2003	153,140,062	29,775,438	182,915,500	16.3
Jun 2004	147,972,254	32,033,915	180,006,169	17.8
Dec 2004	144,935,483	32,891,892	177,827,375	18.5
Jun 2005	144,065,156	34,114,396	178,179,552	19.1

Only LECs with at least 10,000 lines in a state were required to report through December 2004. Beginning with the June 2005 data all LECs are required to report. Some data have been revised.

Demographic data are from Demographic Power Pack, Current Year Update (2000), MapInfo Corporation. Only LECs with at least 10,000 lines in a state were required to report through December 2004. Beginning with the June 2005 data all LECs are required to report. Figures may not add to 100% due to rounding.

Reporting CLECs by ZIP Code
(As of June 30, 2005)

Customer Response

Publication: *Local Telephone Competition: Status as of June 30, 2005*

You can help us provide the best possible information to the public by completing this form and returning it to the Industry Analysis and Technology Division of the FCC's Wireline Competition Bureau.

1. Please check the category that best describes you:

- ☐ press
- ☐ current telecommunications carrier
- ☐ potential telecommunications carrier
- ☐ business customer evaluating vendors/service options
- ☐ consultant, law firm, lobbyist
- ☐ other business customer
- ☐ academic/student
- ☐ residential customer
- ☐ FCC employee
- ☐ other federal government employee
- ☐ state or local government employee
- ☐ Other (please specify)

2. Please rate the report: Excellent Good Satisfactory Poor No opinion

- | | | | | | |
