Ladies & Gentlemen:

The Division of Marine Fisheries has determined that all bivalve shellfish from the below-defined areas **no longer contain biotoxins (Paralytic Shellfish Poison-(PSP))** from the phytoplankton *Alexandrium* (spp.) in excess of established standards. These areas remain closed to the harvesting of **Moon snails (*Polinices duplicatus and Lunatia heros*)** under previous closures.

Therefore, under authority of Massachusetts General Laws, Chapter 130, sections 74A and 75 and 322 CMR sections 7.01 (7), 7.02 and 10.00, the PSP closure of April 14, 2007 **will be rescinded at sunrise on July 4, 2007** in the below-defined areas. Shellfish, **except Moon snails (*Polinices duplicatus and Lunatia heros*)**, in areas currently classified as APPROVED and in the "open" status may now be harvested for direct human consumption subject to local rules and regulations under authority of Massachusetts General Laws Chapter 130, section 52. Similarly, those areas classified as CONDITIONALLY APPROVED and in the "open" status are subject to the classification conditions.

Status: Open to Shellfish Harvesting, except Moon snails (*Polinices duplicatus and Lunatia heros*)
