July 21, 2008

Mr. William Adler, Executive Director
Mass. Lobstermen's Association, Inc.
8 Otis Place
Scituate, MA 02066-1323

Dear Bill,

Thank you for your continued publication of DMF's fall trawl survey station locations to promote cooperation with Massachusetts' lobstermen and other fixed gear fishermen. DMF's trawl survey provides information for many uses including environmental reviews and groundfish assessments. It is critical to the integrity of the survey that we maintain access to sampling sites.

We ask that all fixed gear fishermen review the attached table of station location details and the accompanying figures which plot the locations of all selected sample sites from north of Cape Ann to east of Cape Cod. We request that all fixed gear be kept clear of station locations (1.5 n. mi. diameter circle as shown in figure - center point reported in table) for the indicated periods. We will make every attempt to complete stations during the assigned period to minimize inconvenience to fixed gear fishermen. Fishermen can contact the R/V Gloria Michelle on VHF channels 13 or 16 to determine the updated daily schedule. In the event of a delay due to weather, we will resume our schedule as soon as working conditions are safe.

The DMF Director is prepared to attach restrictions to permit renewals (under 322 CMR 7.01 (7)) mandating that fixed gear not be set on designated trawl survey sites for the announced dates. It remains our hope that this action will be unnecessary.

Personnel aboard the NOAA R/V Gloria Michelle (65' western rigged steel stern trawler with a blue hull and white deckhouse) will carefully check each site for marked gear by cruising along a selected tow path at least once before the net is set. Undertaken at 2.5 knots, twenty-minute tows cover approximately 0.8 n mi., generally along a depth contour. We encourage communicating helpful information to the R/V officers (via channels 13 or 16).

Sincerely,

A handwritten signature in blue ink, appearing to read "Jeremy King".

Jeremy King

Senior Marine Fisheries Biologist
