

ENGINEERING DIRECTIVE

Patricia A. Leavenworth, P.E. (signature on original)

CHIEF ENGINEER

June 2014 Construction Standard Details

The purpose of this Engineering Directive is to formally issue the June 2014 online edition of the [*MassDOT Highway Division Construction Standard Details*](#) for use on MassDOT Highway Division projects.

The *June 2014 Construction Standard Details* supersedes and replaces the *March 2012 Construction Standard Details* previously issued under Engineering Directive E-12-006.

The *June 2014 Construction Standard Details* shall be referenced in the plans and other contract documents of all MassDOT Highway Division projects advertised after July 31, 2014.

The June 2014 version of the *Construction Standard Details* is not significantly different than the March 2012 version of the same document. Most of the changes involve adjustments to labels for better clarity and consistency, and the removal of redundant references to material specifications that are better contained solely in the contract specifications for each item.

In continuance of the procedure established in 2012, the *June 2014 Construction Standard Details* is available in electronic format (PDF) on MassDOT's public website and on MassDOT's internal TransNET. MassDOT will not print and distribute hard copies of the *June 2014 Construction Standard Details*. MassDOT will handle future updates to the *Construction Standard Details* in the same manner as this update by posting complete, current, online PDF versions of the document for use until further notice. MassDOT will also post superseded PDF versions of the *Construction Standard Details* online for public reference. The Highway Design Engineer will retain printed copies of each superseded version of the document for archiving purposes.
