Be it enacted, etc., as follows:

SECTION 1. Declaration of Emergency. The general court hereby finds and declares that a serious public emergency exists in the town of Raynham with respect to the housing of a substantial number of the residents of said town, which emergency has been created by the excessive, abnormally high and unwarranted rental increases imposed by some owners of mobile home parks located therein, and by the potential discontinuance of the use of certain mobile home parks by certain owners of said mobile home parks; that unless mobile home park rents and eviction of tenants and discontinuances of the use of mobile home parks are regulated and controlled, such emergency and the further inflationary pressures resulting therefrom will produce serious threats to the public health, safety and general welfare of the residents of said town, and will produce a drastic loss of housing units, will increase homelessness, and will cause many residents loss of their life savings, especially the elderly; that such emergency should be met by the commonwealth immediately and with due regard for the rights and responsibilities of the town of Raynham.

SECTION 2. General Powers. The town of Raynham may, by by-law, regulate rents for the use or occupancy of mobile home park accommodations in said town, establish a rent board for the purpose of regulating rents, minimum standards for use or occupancy of mobile home park accommodations in the town and evictions of tenants therefrom and may, by by-law, require registration by owners of mobile home park accommodations, under penalty of perjury, or information relating to the mobile home park accommodations; provided, however, that any such by-law shall not apply to any mobile home park which is resident owned. Such rents, standards and evictions may be regulated by the rent board so as to remove hardships or correct inequities for both the owner and tenants of such mobile home park accommodations. The board of selectmen shall appoint, but not serve as, members of the rent board. The rent board shall have all powers necessary or convenient to perform its functions. It may make rules and regulations, require registration by owners of mobile home park accommodations, under penalty of perjury, of information relating to the mobile home park accommodations, sue and be sued, compel the attendance of persons and the production of papers and information, and issue appropriate orders which shall be binding on both the owner and tenants of such mobile home park accommodations. Violations of any by-law adopted pursuant to this act or any order of the rent board shall be punishable by a fine of not more than one thousand dollars for any one offense.

SECTION 3. Regulating Rents. In regulating such rents for such mobile home park accommodations, the rent board established under section two may make such individual or general adjustments, either upward or downward, as may be necessary to assure that rents for the mobile home park accommodations in said town are established at levels which yield to owners a fair net operating income for such units. Said town in its by-laws or said rent

board by regulations may establish further standards and rules consistent with this act. If the maximum rent is not otherwise established, it shall be established by the board. Any maximum rent may be subsequently adjusted under this act.

SECTION 4. Incorporation of Administrative Procedure Act. The provisions of chapter thirty A of the General Laws shall be applicable to the rent board, established under the provisions of section two, as if said rent board were an agency of the commonwealth, including those provisions giving agencies the power to issue, vacate, modify and enforce subpoenas, as well as those provisions relating to judicial review of any agency order.

SECTION 5. Conference of Jurisdiction. (*a*) The Taunton division of the district court department shall have original jurisdiction, concurrently with the superior court and the housing court departments, of all petitions for review brought pursuant to section fourteen of chapter thirty A of the General Laws;

(*b*) The superior court and the housing court departments shall have jurisdiction to enforce the provisions of this act, and by-law adopted thereunder, and may restrain violations thereof.

SECTION 6. Defense to Summary Process for Possession. The town of Raynham may by by-law regulate the evictions of tenants in mobile home parks, and the rent board, established under the provisions of section two, may issue orders which shall be a defense to an action of summary process for possession and such order shall be reviewable pursuant to sections four and five.

SECTION 7. The personnel of the rent board established pursuant to the provisions of section two shall not be subject to the provisions of section nine A of chapter thirty or chapter thirty-one of the General Laws.

Approved February 5, 1993.

Chapter 8. AN ACT PROVIDING FOR DISCONTINUANCE PERMITS FOR MOBILE HOME PARKS IN THE TOWN OF RAYNHAM.

Be it enacted, etc., as follows:

SECTION 1. The town of Raynham may by its by-laws regulating the discontinuance of the use of part or all of the land owned and licensed as a mobile home park:

(1) The provisions of this act regarding the discontinuance of the use of part, or all of the land owned and licensed as a mobile home park shall apply to all mobile home parks and mobile home park accommodations.

(2) When used in this act the term "discontinuance" shall include any change of use or discontinuance of the use of part, or all of the land owned and licensed as a mobile home park requiring a two-year notice pursuant to subsection (8) of section thirty-two L of chapter one hundred and forty of the General Laws. The term "discontinuance" shall include, but shall not be limited to, the licensee's conversion of the mobile home park, or part thereof, to

a condominium or cooperative corporation.

(3) It shall be unlawful for any person to discontinue the use of part or all of the land owned and licensed as a mobile home park without having first obtained a discontinuance permit from the board of selectmen subject to the provisions contained in this act.

(4) (*a*) The board of selectmen shall consider an application for a discontinuance permit for a mobile home park accommodation upon receipt of an application filed by the licensee or other authorized person. The board of selectmen shall forward said application within fourteen days to the rent board in the town of Raynham.

(*b*) The rent board shall schedule a public hearing within sixty-five days of receipt of the application. Notice of the time and place of such public hearing, or the subject matter, sufficient for identification, shall be published in a newspaper of general circulation in the town of Raynham once in each of two successive weeks, the first publication to be not less than fourteen days before the date of the public hearing and by posting such notice in a conspicuous place in town hall for a period of not less than fourteen days before the day of said hearing. The rent board shall also notify all tenants living in the affected mobile home park accommodations of the time, place and subject matter of the public hearing. No defect in the form of any notice under this section shall invalidate any grant or denial of a discontinuance permit unless such defect is found to be misleading.

(*c*) No vote by the board of selectmen to grant or deny a discontinuance permit shall be taken until a report with recommendations by the rent board has been submitted to the board of selectmen or twenty-one days after said hearing have elapsed without submission of such report. After such notice, hearing and report, or after twenty-one days shall have elapsed after such hearing without submission of such report, the board of selectmen may vote to grant or deny the discontinuance permit. If the board of selectmen fails to vote on the proposed discontinuance permit within ninety days after such hearing, no action shall be taken thereon until after subsequent public hearing is held with notice and report as above provided.

(*d*) No discontinuance permit may be granted except by a majority vote of the board of selectmen.

(*e*) Notwithstanding any other provision of this section, the rent board may, without holding a hearing, recommend the denial of a discontinuance permit if a decision has been made with regard to the discontinuance of a mobile home park accommodation within the preceding twelve months, and if the park licensee fails, in the new application, to allege a substantial change of circumstances since the previous hearing which would merit the rent board in hearing new evidence. In addition, the rent board may recommend denial of the discontinuance permit without holding a hearing if the application is not in conformance with the requirements of this section or other applicable regulations.

(5) In determining whether to recommend that the board of selectmen grant or deny a discontinuance permit the rent board shall consider the aggravation of the shortage of safe, decent and affordable mobile home park accommodations in the town of Raynham which may result from the discontinuance, especially for tenants of low and moderate income and handicapped or elderly persons on fixed incomes. In making such determination the rent

board shall make findings of the following factors:

(*a*) the benefits and detriments to the persons whom this act and this section seek to protect;

(*b*) the hardships imposed on the tenant residing in the mobile home park accommodations proposed to be discontinued;

(*c*) circumstances demonstrating hardship and inequity to the licensee seeking a discontinuance permit;

(*d*) the rate of vacancy of mobile home park accommodations in the town of Raynham at the time the licensee applies for a discontinuance permit and the average rental rates for said available accommodations;

(*e*) the availability of land zoned and otherwise suitable for development or expansion of mobile home parks.

The rent board, in its discretion, may also review other relevant factors in making its report and recommendations.

For the purposes of this act, the "vacancy rate" shall be defined as that percentage of the mobile home park accommodations which are empty of mobile homes and are offered for rental to mobile home tenants. Further, to be considered a "vacancy" the rental offer of the mobile home park accommodation must be without entrance fee; without restrictions as to the age, size or character of the mobile home; and, without a requirement that the prospective tenant purchase a mobile home from the park owner.

In its report, the rent board shall determine the current vacancy rate for comparable mobile home park accommodations in the town of Raynham. Any parties involved may submit evidence presented to the rent board at the public hearing.

(6) (*a*) The licensee or applicant seeking a discontinuance permit must make application to the board of selectmen for said permit within thirty days of serving the tenants with the notices required under the provisions of subsection (8) of section thirty-two L of chapter one hundred and forty of the General Laws.

(*b*) Notwithstanding the foregoing, no eviction certificate shall be issued by the rent board because of the discontinuance of the use of all or a part of a mobile home park unless a discontinuance permit has been issued by the board of selectmen.

SECTION 2. The provisions of this section shall not apply to mobile home parks which have sent out notices of a change of use or discontinuance under the provisions of subsection (8) of section thirty-two L of chapter one hundred and forty of the General Laws prior to the effective date of this act; provided, however, that the provisions hereof shall apply to any mobile home parks which send out new or amended notices of change of use or discontinuance pursuant to the provisions of said subsection (8) of said section thirty-two L subsequent to the effective date of this act.

Chapter 15. AN ACT FURTHERING THE ESTABLISHMENT OF A MULTI-PURPOSE ARENA AND TRANSPORTATION CENTER.

Whereas, The deferred operation of this act would tend to defeat its purpose, which is to immediately provide for the construction of a transportation center and multi-purpose arena, therefore it is hereby declared to be an emergency law, necessary for the immediate preservation of the public convenience.

Be it enacted, etc., as follows:

SECTION 1. It is hereby found and declared that the construction of a new transportation center and multi-purpose arena will substantially enhance the North Station area in the city of Boston and prevent the creation of any blighted open areas which would be detrimental to the safety, health, morals and welfare of the community.

It is hereby further found and declared that a new transportation center will: (1) significantly improve mass transportation services to and from the metropolitan Boston area as well as the commonwealth overall; (2) create a new state of the art regional transportation center including an enclosed train shed, passenger concourse, platform, ticketing facilities and train persons' facilities; (3) extend and improve the existing rapid transit system for the state's capital city and surrounding cities; (4) create a better linkage between the rapid transit system and the commuter rail system; and (5) provide or allow for

other significant structural improvements including a super platform for the rapid transit system.

It is hereby further found and declared that the construction of a multi-purpose arena will: (1) preserve the commonwealth's existing capacity to provide facilities open and available to large numbers of citizens for activities such as concerts, theatrical exhibitions, other cultural presentations, recreational activities including shows, expositions and professional and amateur athletic events; (2) expand the commonwealth's existing capacity by providing a larger year round facility which will provide greater access to the public for such activities and increase the commonwealth's ability to attract national and international amateur sporting and cultural events.

It is hereby further found and declared that: (1) the construction of a new multi-purpose arena and transportation center in the metropolitan Boston area is vital to the overall health and growth of the commonwealth's economy; (2) the commonwealth suffers from structural economic weaknesses which contribute to an unacceptable level of unemployment and underemployment; (3) between nineteen hundred and eighty-nine and nineteen hundred and ninety-two over ten percent of the total number of jobs in the commonwealth have been lost; (4) this lack of gainful employment puts additional pressure on the state's welfare programs and increases the cost of unemployment compensation; (5) construction of the multi-purpose arena and transportation center will promote the prosperity and general welfare of all the citizens of the commonwealth by increasing gainful employment, decreasing welfare and unemployment compensation costs, increasing the tax base of the commonwealth, encouraging economic development and stimulating investment within and around the capital city as well as the commonwealth overall.

It is hereby further found and declared that the multi-purpose arena and transportation center, and the resulting public benefits, would not occur by the operation of private enterprise and finance alone and public participation is hereby declared to be essential for the creation of such facilities.

construction by the Authority of the Green Line extension within the underground easement through the existing Boston Garden site for the Green Line extension, which would require additional expense, if any, to the Authority caused by the non-demolition of the existing Boston Garden to grade; provided, that the authority shall give reasonable notice of said construction; or make a full payment to the Authority of an amount equal to said additional expense, within sixty days of the commencement of said construction;

(h) Upon the transfer by said Authority to said Garden Corporation of the above-described property interests and easements, said New Boston Garden Corporation shall compensate said Authority for certain work performed by said Authority on behalf of said New Boston Garden Corporation for the new Boston Garden in the amount of five million, one hundred and twenty-six thousand dollars. The term "cash flow" as used herein shall have the same meaning as the term has in any loan agreements between said New Boston Garden Corporation and the lenders. To the extent the cash flow of said New Boston Garden Corporation in any year prior to the eleventh anniversary of the opening date is insufficient to make all or any portion of the annual installment of interest then due, additional interest on the unpaid amount as a result of such late payment shall accrue at a rate three percent greater than the interest rate of said note and be payable to the extent of available cash flow of said New Boston Garden Corporation in the succeeding years.

(4) Said note shall be secured by a lien upon the existing Boston Garden site and such property interests in said Parcels A3 and A4 as said Authority has granted to said Garden Corporation or said New Boston Garden Corporation pursuant hereto. Said Authority shall subordinate the obligation to pay principal and interest on said promissory note and the accompanying lien to the encumbrances held as security by any lender and the city of Boston. Said Authority shall not have any rights of recourse against the new Boston Garden for nonpayment of said note. Said note may be prepaid at any time without penalty.

(5) If said Garden Corporation or said New Boston Garden Corporation sells or refinances all or any portion or any interest therein of either the existing Boston Garden site or its interest in said Parcels A3 or A4, or transfers development rights in said properties, said Corporations shall prepay said promissory note by (1) applying the net proceeds of such sale after deductions for costs of sale, payment of prior liens and payment of taxes attributable to such transaction; or (2), if a refinancing, provides net proceeds after payment of any transaction costs and payment of all obligations due prior lien holders, applying such net proceeds.

(6) Nothing herein shall be deemed to proscribe the right of said Garden Corporation, New Boston Garden Corporation and their successors and assigns, from further alienating, either by deed, lease, mortgage or other form of conveyance, the property interests and rights acquired pursuant to sections thirty-one, thirty-one A and thirty-one B of chapter fifteen of the acts of nineteen hundred and eighty-eight and any other applicable provision of law and subject to the provisions and limitations of said sections thirty-one, thirty-one A and thirty-one B and any other applicable provision of law.

Any such revocation shall only be applied prospectively to deny certification to any projects located or to be located in such EOA and not certified prior to such revocation and shall not apply to, nor revoke any benefits due to or which may become due to, any certified project already in existence in said EOA, including but without limitation any benefits included in any plans and commitments incorporated with the municipal application for such designation; provided, however, that in no event shall a certified project receive any benefits arising from its status as a certified project for a period of longer than that specified by the EACC in its certification designation, including any renewals thereof, or twenty years, whichever period is of shorter duration. (iv) the project proposal contains documentation regarding an agreement, if any,

between the controlling business and area banking institutions by which said controlling business agrees to establish one or more accounts in said banks and said banks agree to commit a specified percentage of the funds deposited in said accounts for loans made thereby to businesses located within the project EOA pursuant to the Massachusetts capital access program established pursuant to section fifty-seven of chapter twenty-three A; and

(v) the project as described in the proposal, together with the municipal resources committed thereto, will, if certified, have a reasonable chance of increasing employment opportunities for residents of the project ETA as advanced in said proposal and will thereby reduce conditions of blight, economic depression and widespread reliance on public assistance; and

(c) receipt with such written approval by the municipality of a request for a designation of the project as a certified project for a specified number of years, which shall be not less than five years nor more than: (i) twenty years or (ii) the number of years remaining on the duration of the designation of the project EOA, whichever is less; and

(d) the following findings are made by the EACC, based on the project proposal, documents submitted therewith, the municipality's written approval decision, and such additional investigation as the EACC shall make, and incorporate in its minutes, that:

Any such revocation shall only be applied prospectively and shall not apply to, nor revoke any benefits due to the project which relate to years prior to the year in which the revocation determination is made, unless the EACC determines that the controlling business of said project made a material misrepresentation in its project proposal, in which case both the commonwealth and the municipality shall have causes of action against the controlling business for the value of any economic benefits received subsequent to the date on which such material misrepresentation was made.

(3) The EACC shall evaluate and either grant or deny any project proposal within ninety days of its project proposal date and failure to do so by the EACC will result in approval of such project for a term of five years.

by the Fund, if following the making of said qualified investment, the amount of the Fund shall be less than the minimum requirement established by the advisory committee pursuant to section eight D, unless the bank, at the time of making of such qualified investment, deposits in the Fund from the proceeds thereof or from any fees and charges imposed relative to the making of qualified investments, or otherwise, an amount which, together with the amount in the Fund, shall not be less than the minimum requirement; provided, however, that at no time shall the minimum requirement of the Fund established by the advisory committee be less than the greater of (i) the maximum amount of principal and interest becoming due in the current and succeeding fiscal year of the bank on all outstanding bonds and other obligations which are secured by the Fund or (ii) thirty percent of the aggregate amount of the Fund's outstanding liabilities and obligations under the qualified investments.

Chapter 30. AN ACT AUTHORIZING THE CITY OF BEVERLY TO AMORTIZE THE REVENUE DEFICIT OVER A PERIOD OF THREE YEARS.

Be it enacted, etc., as follows:

SECTION 1. Notwithstanding the provisions of any general or special law to the contrary, the city of Beverly is hereby authorized to capitalize certain sums, the amortization amount, and fund the amortization amount over a period starting with fiscal year nineteen hundred and ninety-three and not exceeding three years, except as provided in this act. Unless determined otherwise pursuant to the provisions of this act, the amortization amount shall be the projected revenue deficit of five million, four hundred seventy-six thousand and fifty-five dollars, notwithstanding that the undesignated fund balance deficit is seven million, eight hundred twenty-three thousand, nine hundred dollars. At such time as the commissioner of revenue certifies that no further amortization as provided for herein is necessary as a result of the full funding and elimination of the amortization amount, all powers, rights, duties, obligations and requirements arising exclusively pursuant to the provisions of this act

shall expire; provided, however, that the aforementioned amortization amount may be increased or decreased by said city of Beverly, with the approval of the commissioner of revenue, based upon financial information reported and certified by the city's independent certified public accounting firm. For fiscal year nineteen hundred and ninety-three, and fully subject to the provisions and limitations of section twenty-one C of chapter fifty-nine of the General Laws, the board of assessors of said city of Beverly, may, subject to the approval of the commissioner of revenue, deduct such portion of the amortization amount as the commissioner approves as consistent with the terms, requirements and purposes of the remedial plan provided for herein from the amount to be assessed pursuant to section twenty-three of said chapter fifty-nine. Under the conditions imposed herein, the assessors of said city of Beverly may similarly deduct for fiscal year nineteen hundred and ninety-four such portion of the amortization amount as the commissioner of revenue approves from the amount to be assessed for that fiscal year pursuant to said section twenty-three of said chapter fifty-nine. The deductions as are herein authorized for the fiscal years nineteen hundred and ninety-three and nineteen hundred and ninety-four shall be permissible only to the extent that said commissioner of revenue determines and approves in each of those fiscal years that such deduction is necessary and appropriate to achieving and maintaining fiscal stability in said city of Beverly.

As a condition of any amortization under authority of this act, said city of Beverly shall develop and adopt by vote of the board of aldermen with the approval of the mayor a three year remedial plan, acceptable to the commissioner of revenue, for implementing budgetary and fiscal initiatives to eliminate financial deficits and the recurrence thereof and restore fiscal stability in said city of Beverly. The plan shall contain a schedule of budgetary and operational actions and establish financial objectives and timetables to eliminate deficits and produce balanced budgets, and shall also include initiatives that will result in (*a*) improved budgetary and expenditure controls; (*b*) timely and supportable projections of anticipated revenues of all city departments and municipal enterprises for the ensuing fiscal year for use in the annual budget process; (*c*) monthly reporting by the city auditor/finance director for all city departments, boards and commissions of all receipts and expenditures of the month. All statements, reports, summaries or other financial information produced pursuant to the foregoing requirements shall be submitted to the mayor, board of aldermen and the city auditor/finance director, and upon a request therefor to the commissioner of revenue.

In the event that the remedial plan adopted by said city of Beverly fails to receive the commissioner of revenue's approval, or a plan approved by the commissioner is not adhered to, whether in whole or in part, or its financial objectives or goals are not achieved, such failure in and of itself shall be a sufficient basis for the commissioner to deny or suspend approval of any amortization or deduction authorized under this act. Notwithstanding the foregoing, an approved and accepted remedial plan may be altered, amended or changed by said city of Beverly provided that said commissioner of revenue approves each alteration, amendment or change.

Except as is expressly provided for herein, this act shall not authorize or permit any alteration in the maintenance of said city of Beverly's accounts nor in the procedures whereby the assessors annually determine the amount of taxes to be assessed.

The commissioner of revenue is further authorized to require, as a condition of his annual approval of the amortization and deductions as are provided for herein, that the city of Beverly:

(*a*) submit for said commissioner's review a copy of the proposed annual budget document as well as any supplemental appropriation orders as may from time to time be made. SECTION 3. Notwithstanding the provisions of any general or special law to the contrary, the division of capital planning and operations acting on behalf of the department of mental health and the department of mental retardation is hereby authorized to enter into thirty year lease-purchase agreements for the provision of community-based housing for clients of the said departments and pursuant to the recommendations of the special commission referred to in section one. Any such lease-purchase agreements shall be for a period of thirty years, with the option to extend such agreements for up to an additional ten years. Such agreements shall be entered into with the owners of such residences and provide for the transfer of title to the commonwealth upon the expiration of said agreements; provided, that said transfer of title shall not be required when mortgage amortization expenses for such residences are not paid directly or indirectly through reimbursements or rates paid by the commonwealth on behalf of clients of the said departments. Said agreements may be negotiated for a lesser period of time provided that said commissioner of capital planning and operations, in consultation with the applicable department, determines that the amortization of the lease-purchase agreement for a shorter period of time would be as cost-effective as a thirty year agreement.

Said lease-purchase agreements shall further require that the owners of properties which are the subject of such agreements impose restrictions on such properties, for the benefit of the said departments, running with the land, that restrict the use of said land to the purpose of providing housing or services to the mentally ill or mentally retarded and related uses; provided, that each such restriction shall be recorded in the registry of deeds or the registry district of the land court of the county in which the affected real property is located. Said restriction shall only be released when *(a)* a written determination by the secretary of health and human services, the secretary of administration and finance and the commissioner of the department on whose behalf said division originally entered into said agreement is recorded stating that there is no longer a need to maintain and use such real property for the purpose of providing such housing or services and that any outstanding principal or interest due to the commonwealth pursuant to the community-based housing loan attached to said real property has been paid in full; or *(b)* in the event of foreclosure on said property by a

primary mortgagee, said secretary certifies the inability to find another purchaser or manager for said property capable of maintaining the restricted use of the property; provided, that failure by said secretary to find another purchaser or manager for said property capable of maintaining the restricted use of the property within sixty days of foreclosure shall constitute automatic certification of the inability to find said purchaser or manager, and shall release said land use restriction.

The commissioners of the said departments, in consultation with the secretary of communities and development, may recommend to the division the extension of a thirty year lease-purchase agreement for up to ten years in order to satisfy repayment of any community-based housing loan issued pursuant to the provisions of item 4000-8200 of section two of this act. The said commissioners may further recommend that at the time for title reversion to the commonwealth, said title may be transferred to the provider of housing or other services at a community-based residence provided said provider agrees to maintain the restriction on use of the real property provided by this section and agrees not to sell or lease said real property to another owner or occupant or for another purpose.

The process for entering into such thirty year lease-purchase agreements shall be consistent with the recommendations of the special commission and shall comply with the provisions of sections forty G, forty H, and forty J of chapter seven of the General Laws and requirements established by this act. Any community-based housing services procured pursuant to this section shall meet all applicable state and federal health and safety laws and regulations.

Any agreement for the provision of community-based housing not consistent with the requirements of this section shall be for a term not to exceed five years, consistent with law governing the selection of and contracting for such services; and may not require the inclusion of title reversion and restrictive use provisions.

Notwithstanding the provisions of any general or special law to the contrary, until such time as the commonwealth acquires title, the construction, development, financing, management and leasing of said community-based residences, and any contract for construction and design services for or relating to the construction, development or leasing of said community-based residences shall be exempt from the provisions of section thirty-eight ½ to thirty-eight O, inclusive, of chapter seven, section thirty-nine M of chapter thirty and sections forty-four A to forty-four J, inclusive, of chapter one hundred and forty-nine of the General Laws.

SECTION 4. If any provisions of this act would preclude the use of federal funds that will assist in meeting the goals of the said program, the secretary of communities and development is hereby authorized to modify, waive or negotiate such modifications to said rules as may be required to allow the use of said federal funds; provided, however, that the interests of the commonwealth remain protected; and provided, further, that in no event, shall the term exceed a maximum of forty years for any loan issued pursuant to this act for which such modification or waiver may be allowed.

SECTION 5. Requests for proposals issued by the division of capital planning and operations pursuant to this act shall be subject to the underwriting and competitive selection

regulations as may be required by the agencies participating in this process; provided, however, that sixty-five percent of all proposals approved statewide for projects of the department of mental retardation for inclusion under this section shall require new construction for the development of community-based housing and that thirty-five percent of such approved applications shall require the acquisition and rehabilitation of existing structures; provided, further, that twenty percent of all proposals approved statewide for projects of the department of mental health for inclusion under this act shall require new construction for the development of community-based housing and that eighty percent of such approved applications shall require the acquisition and rehabilitation of existing structures. In no event shall the needs of the client be compromised by the aforementioned selection criteria nor shall the cost of the selected application be uncompetitive with other proposals under consideration. The executive office of communities and development and the executive office of health and human services shall jointly submit to the house and senate committees on ways and means on a quarterly basis, reports detailing all financial activities, including, but not limited to, loan agreements, expenditures, encumbrances, debt issuances, and debt service due pursuant to item 4000-8200 of section two of this act.

SECTION 6. The commissioner of the department of mental health is hereby authorized to lease, purchase or otherwise contract for inpatient bed capacity from such private and public hospitals as may respond to a request for proposals and at such rates as may be negotiated by the department. The commissioner may seek to affiliate with and operate under the license of such hospitals. Any such lease, purchase, contract or affiliation agreement shall be consistent with the recommendations of the special commission. The conversion of any such inpatient bed capacity from an existing use to a use established pursuant to an agreement with the commissioner shall be exempt from the provisions of sections twenty-five C to twenty-five G, inclusive, of chapter one hundred and eleven of the General Laws or any other general or special law requiring a determination of need, so-called; provided, however, that said conversion shall not result in a net increase in bed capacity in a health service area of the commonwealth; and provided, further, that the costs and revenues generated by the operation of such capacity pursuant to such lease, purchase, contracts or affiliation agreement shall be treated as if a determination of need had been granted for the purposes of establishing rates and charges under chapter six A of the General Laws. For the purpose of calculating the hospital maximum allowable cost and gross patient service revenues under said chapter six A, the costs of staffing such units shall be treated as a cost to the hospital.

SECTION 7. The commissioner of the division of capital planning and operations is hereby authorized, subject to the provisions of sections forty E to forty J, inclusive, of chapter seven of the General Laws, to lease for a term of up to thirty years to an individual or entity, a parcel of land not exceeding three and forty-six one hundredths acres in size to be identified by said commissioner within the boundaries of the Danvers State Hospital.

Said lease shall be in accordance with such terms and conditions as the commissioner shall prescribe; provided, however, that the property shall be used primarily for the purpose of providing alcohol detoxification programs for the department of public health, and that

all interests in said property shall revert to the commonwealth in the event that said property ceases to be used for such purpose.

SECTION 8. To meet the expenditures necessary in carrying out the provisions of section two of this act, the state treasurer shall, upon the request of the governor, issue and sell bonds of the commonwealth, in an amount specified by the governor from time to time, not exceeding fifty-four million one hundred thousand dollars. All bonds issued by the commonwealth, as aforesaid, shall be designated on their face, Human Services Consolidation Capital Outlay Loan, Act of 1993, and shall be issued for a maximum term of twenty years, as the governor may recommend to the general court pursuant to Section 3 of Article LXII of the Amendments to the Constitution of the Commonwealth; provided, however, that all such bonds shall be payable no later than June thirtieth, two thousand and nineteen. All interest and payments on account of principal of such obligations shall be payable from the General Fund. Bonds and interest thereon issued under the authority of this section shall be general obligations of the commonwealth.

SECTION 9. The state treasurer may borrow from time to time on the credit of the commonwealth such sums of money as may be necessary for the purpose of meeting payments authorized by section two of this act and may issue and renew from time to time notes of the commonwealth therefor, bearing interest payable at such time and at such rates as shall be fixed by the state treasurer. Such notes shall be issued and may be renewed one or more times for such term, not exceeding one year, as the governor may recommend to the general court in accordance with Section 3 of Article LXII of the Amendments to the Constitution of the Commonwealth, but the final maturities of the notes, whether original or renewal, shall not be later than June thirtieth, nineteen hundred and ninety-nine. Notes and interest thereon issued under the authority of this section shall be general obligations of the commonwealth. All interest and payments on account of principal of such obligations shall be payable from the General Fund.

SECTION 10. Section 35 of chapter 75 of the General Laws is hereby amended by adding the following paragraph:-

The trustees are hereby authorized to acquire, lease, operate or affiliate with, to the extent said relationship is determined by said trustees to be in the best interests of or to further the educational mission of the medical school or the teaching hospital, satellite clinics, physicians offices, ambulatory care centers, mental health programs or facilities, health care facilities, outpatient diagnostic or treatment centers, home health care programs, long term care facilities, rehabilitation facilities, clinical laboratories, fitness centers and similar health care or related programs or facilities; provided, that said relationship shall be subject only to such other state or local authority as may be required pursuant to any general or special law governing such non-governmental health care institutions, facilities or program.

This bill was returned on May 21, 1993 by the Governor to the House of Representatives where said bill originated with his objections to Section 10. The remainder of the bill approved May 21, 1993.

These profiles shall be in a form readily comprehensible by the general public and shall permit meaningful comparisons among individual schools and school districts. The board also shall identify those schools and school districts that are particularly successful in improving the performance of the students whom they serve and shall undertake to analyze and publish the strategies employed by such schools and districts for the purpose of recognizing the efforts of the educators involved and of encouraging the replication, where appropriate, of their successful strategies. In producing said profiles and review of successful strategies, the board shall have access to all information gathered by the secretary of education and the

joint committee on education of the general court, which may be relevant to the production of said profiles and review. The board shall release its report annually on or before the thirtieth day of June, and shall make said report available to the public.

The board may withhold state and federal funds from school committees which fail to comply with the provisions of law relative to the operation of the public schools or any regulation of said board authorized in this section.

The board shall see to it that all school committees comply with all laws relating to the operation of the public schools and in the event of noncompliance the commissioner of education shall refer all such cases to the attorney general for appropriate action to obtain compliance.

The board shall establish the standards for the recognition of high achievement by students and school districts.

The board shall establish the process and standards for declaring a school or school district to be "under-performing" or "chronically under-performing" in accordance with the provisions of this chapter.

The board shall review and approve federal grant applications for public early childhood, elementary, secondary and vocational-technical schools and may develop guidelines as needed for the disbursement of such funds in accordance with law. The board shall be the approving authority for all federal educational grants and programs to be undertaken by public early childhood, elementary, secondary and vocational-technical schools in the commonwealth. The board shall be the state education agency for purposes of federal law.

The board shall establish guidelines for establishing systems of personnel evaluation, including teacher performance standards. Public school districts in the commonwealth shall be encouraged to develop programs and standards which provide for a more rigorous and comprehensive evaluation process. Said guidelines shall be reviewed at least every other school year.

The board shall seek, accept, establish and administer grants, gifts, awards, and trusts for public early childhood, elementary, secondary and vocational-technical education from foundations, corporations, individuals and federal agencies, and develop guidelines as needed for the disbursement of such funds in accordance with applicable law and pursuant to the terms of the grant, gift, award or trust.

The board shall establish the criteria to define areas with a high number of low-income children for purposes of the school breakfast program, the early childhood program and any other program focused on low-income children.

The board shall encourage the collaboration between local school districts, vocational-technical school districts, and regional employment boards to prepare students for the employment needs of the region.

The board shall establish a policy to ensure that, so far as practical, school districts distribute financial resources equitably among all schools in the district.

The board shall establish maximum pupil-teacher ratios for classes in public elementary and secondary schools.

The board shall establish the permissible and mandatory ages for school attendance and shall consider the advisability of raising the minimum age for attendance in the first grade to the national average age for such attendance.

The board shall carry out its responsibilities with a view toward increasing the accountability and effectiveness of public early childhood, elementary, secondary and vocational-technical schools and school districts for the performance of the students they serve.

The board shall establish such other policies as it deems necessary to fulfill the purposes of this chapter and chapters fifteen, seventy, seventy-one A, seventy-one B, and seventy-four. In accordance with the provisions of chapter thirty A, the board may promulgate regulations as necessary to fulfill said purposes. Said regulations shall be promulgated so as to encourage innovation, flexibility and accountability in schools and school districts.

The board shall establish an executive committee and such other committees as it may from time to time deem necessary.

Section 1C. The board shall establish minimum nutritional standards for all school food services in all public early childhood, elementary, secondary, and vocational-technical schools. The board shall require all public schools to make lunches available to children. Standards and regulations of the board promulgated pursuant to this paragraph shall be adopted in the following manner. A copy of such regulations and standards shall be filed by the board with the clerk of the house of representatives and of the senate who shall refer such regulations and standards to the joint committee on education, arts and humanities of the general court for review. Within thirty days after such filing, said committee shall hold a public hearing on the regulations and standards, shall issue a report, and file a copy thereof with the board of education. The board shall adopt final regulations and standards making such revisions in the interim regulations and standards as it deems appropriate in view of such report and shall forthwith file a copy of the regulations and standards with chairpersons of said committee of the general court and not earlier than thirty days after the date of such filing, the board shall file the final regulations and standards with the state secretary and the said regulations shall thereupon take effect.

The board shall further require all public schools which draw their attendance from areas with a high number of needy children, as defined by the board, to make school breakfast programs available to children, and to operate such programs in accordance with the federal laws and regulations pertaining to school breakfast programs. Such breakfast programs shall be made available to children who do not qualify for free or reduced price breakfast under federal income eligibility guidelines at a price to each such child which is

not less than the cost to the school of making such breakfast available to such child. The commonwealth shall reimburse each city or town required by this paragraph to make school breakfast programs available to children who qualify for free or reduced price meals pursuant to federal income eligibility guidelines, at a uniform rate determined pursuant to the following paragraph, which rate shall provide for the payment by the commonwealth of the reasonable costs of making breakfast available to such children, reduced by the amount of revenue received by the city or town from federal reimbursements or any other source with respect to the provision of such breakfasts. The department shall make said reimbursements in accordance with the same schedule as federal reimbursements are made to the city or town with respect to such breakfast programs.

The secretary for administration and finance shall convene a working committee made up of his own designee, a designee of the Massachusetts school committee association and a designee of the Massachusetts school business managers association, a designee of the commissioner of education and a designee of the local government advisory committee to establish guidelines for the purposes of reimbursing cities and towns for the reasonable costs associated with the implementation of school breakfast programs pursuant to the preceding paragraph. Such guidelines shall be filed by the working committee with the clerk of the house of representatives and senate only upon approval of said committee. Reimbursements of costs made pursuant to such guidelines shall constitute complete satisfaction of the obligation of the commonwealth to assume such costs pursuant to any general or special law.

Section 1D. The board shall establish a set of statewide educational goals for all public elementary and secondary schools in the commonwealth.

The board shall direct the commissioner to institute a process to develop academic standards for the core subjects of mathematics, science and technology, history and social science, English, foreign languages and the arts. The standards shall cover grades kindergarten through twelve and shall clearly set forth the skills, competencies and knowledge expected to be possessed by all students at the conclusion of individual grades or clusters of grades. The standards shall be formulated so as to set high expectations of student performance and to provide clear and specific examples that embody and reflect these high expectations, and shall be constructed with due regard to the work and recommendations of national organizations, to the best of similar efforts in other states, and to the level of skills, competencies and knowledge possessed by typical students in the most educationally advanced nations. The skills, competencies and knowledge set forth in the standards shall be expressed in terms which lend themselves to objective measurement, define the performance outcomes expected of both students directly entering the workforce and of students pursuing higher education, and facilitate comparisons with students of other states and other nations.

The standards shall provide for instruction in at least the major principles of the Declaration of Independence, the United States Constitution, and the Federalist Papers. They shall be designed to inculcate respect for the cultural, ethnic and racial diversity of the commonwealth and for the contributions made by diverse cultural, ethnic and racial groups to the life of the commonwealth. The standards may provide for instruction in the funda-

mentals of the history of the commonwealth as well as the history of working people and the labor movement in the United States. The standards may provide for instruction in the issues of nutrition, physical education, AIDS education, violence prevention, and drug, alcohol and tobacco abuse prevention. The board may also include the teaching of family life skills, financial management and consumer skills, and basic career exploration and employ-ability skills. The board may also include in the standards a fundamental knowledge of technology education and computer science and keyboarding skills; the major principles of environmental science and environmental protection; and an awareness of global education and geography. The board may set standards for student community service-learning activities and programs. The board may also institute a process for drawing up additional standards in other areas of education.

Academic standards shall be designed to avoid perpetuating gender, cultural, ethnic or racial stereotypes. The academic standards shall reflect sensitivity to different learning styles and impediments to learning. The board shall develop procedures for updating, improving or refining standards, but shall ensure that the high quality of the standards is maintained. A copy of said standards shall be submitted to the joint committee on education, arts, and humanities at least sixty days prior to taking effect. The standards shall also include criteria for three determinations or certificates as follows:

(i) The "competency determination" shall be based on the academic standards and curriculum frameworks for tenth graders in the areas of mathematics, science and technology, history and social science, and English, and shall represent a determination that a particular student has demonstrated mastery of a common core of skills, competencies and knowledge in these areas, as measured by the assessment instruments described in section one I. Satisfaction of the requirements of the competency determination shall be a condition for high school graduation. If the particular student's assessment results for the tenth grade do not demonstrate the required level of competency, the student shall have the right to participate in the assessment program the following year or years. Students who fail to satisfy the requirements of the competency determination may be eligible to receive an educational assistance plan designed within the confines of the foundation budget to impart the skills, competencies and knowledge required to attain the required level of mastery. The parent, guardian or person acting as parent of the student shall have the opportunity to review the remedial plan with the student's teachers. Nothing in this section shall be construed to provide a parent, guardian, person acting as a parent or student with an entitlement to contest the proposed plan or with a cause of action for educational malpractice if the student fails to obtain a competency determination.

(ii) The "certificate of mastery" shall be based upon a determination that the recipient has demonstrated mastery of a comprehensive body of skills, competencies and knowledge comparable to that possessed by accomplished graduates of high school or equivalent programs in the most advanced education systems in the world. The criteria for a certificate of mastery may incorporate a number of factors which may include, but not be limited to, any of the following: high school graduation standards, superior performance on advanced placement tests administered by the educational testing service, and demonstrated

excellence in areas not reflected by the state's assessment instruments, such as artistic or literary achievement. Eligibility for potential receipt of a certificate of mastery shall extend to all secondary students residing in the commonwealth.

(iii) The "certificate of occupational proficiency" shall be awarded to students who successfully complete a comprehensive education and training program in a particular trade or professional skill area and shall reflect a determination that the recipient has demonstrated mastery of a core of skills, competencies and knowledge comparable to that possessed by students of equivalent age entering the particular trade or profession from the most educationally advanced education systems in the world. No student may receive said certificate of occupational proficiency without also having acquired a competency determination.

Nothing in this chapter shall prohibit a student from beginning a program of vocational education before achieving a determination of competency. Such vocational education may begin at grade nine, ten or eleven. No provision of law shall prohibit concurrent pursuit of a competency determination and vocational learning. There shall be no cause of action for a parent, guardian or student who fails to obtain a competency determination, a certificate of mastery or a certificate of occupational proficiency.

Subject to appropriation, the board shall establish a grant program which shall award grants to school districts for the costs associated with establishing advanced placement courses. The board shall promulgate regulations defining the standards of eligibility and other implementation guidelines.

Subject to appropriation, the board shall establish an advanced placement test fee grant program which shall award grants to school districts for the reimbursement of application fees for students based on financial need in order to assist students with paying the fee for advanced placement tests. The board shall promulgate regulations defining the standards of eligibility and other implementation guidelines for this program.

Section 1E. The board shall direct the commissioner to institute a process for drawing up curriculum frameworks for the core subjects covered by the academic standards provided in section one D. The curriculum frameworks shall present broad pedagogical approaches and strategies for assisting students in the development of the skills, competencies and knowledge called for by these standards. The process for drawing up and revising the frameworks shall be open and consultative, and may include but need not be limited to classroom teachers, parents, faculty of schools of education, and leading college and university figures in both subject matter disciplines and pedagogy. In drawing up curriculum frameworks, those involved shall look to curriculum frameworks, model curricula, content standards, attainment targets, courses of study and instruction materials in existence or in the process of being developed in the United States and throughout the world, and shall actively explore collaborative development efforts with other projects, including but not limited to the national New Standards Project. The curriculum frameworks shall provide sufficient detail to guide and inform processes for the education, professional development, certification and evaluation of both active and aspiring teachers. They shall provide sufficient detail to guide the promulgation of student assessment instruments. They shall be constructed to guide and assist teachers, administrators, publishers, software

developers and other interested parties in the development and selection of curricula, textbooks, technology and other instructional materials, and in the design of pedagogical approaches and techniques for early childhood programs and elementary, secondary and vocational-technical schools. The board may review and recommend instructional materials which it judges to be compatible with the curriculum frameworks.

Frameworks shall be designed to avoid perpetuating gender, cultural, ethnic or racial stereotypes. The frameworks shall reflect sensitivity to different learning styles and impediments to learning. The board shall develop procedures for updating, improving or refining said curriculum frameworks. A copy of said frameworks shall be submitted to the joint committee on education, arts and humanities at least sixty days prior to taking effect.

Section 1F. The board shall set standards for vocational-technical education and programs for school-to-work transition. The board shall give particular emphasis for setting standards for the integration of academic and vocational education and to the progress in educating students for all aspects of a chosen industry.

The board shall assess progress in the areas of integration of academic and vocational education, and education for all aspects of an industry by assessing curriculum plans, staffing patterns, and other factors the board deems pertinent to said assessment.

The board shall, subject to appropriation, establish demonstration grants to develop alternative education program models. Said grants shall be awarded to public or public/private entities in an effort to design programs for students who may be identified as having difficulty achieving a certificate of initial mastery, and which assist students in achieving said certificate or moving directly into the work force.

The board shall, subject to appropriation, establish a grant program to create job compacts for communities to coordinate summer and after school employment opportunities for students. Eligible districts shall demonstrate private sector participation in the compact which helps to provide work opportunities for students.

The board shall, with the assistance of the higher education coordinating council and subject to appropriation, establish grants for technology preparation programs. Said grants shall be available to all public secondary schools in the commonwealth and public institutions of higher education for the purposes of improving collaboration between secondary and post-secondary technology programs.

The board shall, with the assistance of the higher education coordinating council and subject to appropriation, establish four demonstration grants to consortia of vocational schools, comprehensive secondary schools, and community colleges to promote further collaboration between grades nine through twelve and higher education institutions.

Section 1G. The board shall establish the minimum length for a school day and the minimum number of days in the school year.

Section 1H. Notwithstanding any general or special law to the contrary, the department, in coordination with other state agencies, shall develop a comprehensive system, subject to appropriation, for the delivery of adult basic education and literacy services that will ensure opportunities leading to universal basic adult literacy and better employment opportunities. Said system shall be designed to strengthen, enhance, and where needed, to

create intensive community based literacy programs for AFDC recipients and other unemployed and marginally employed adults who need a foundation of basic skills to qualify for further education, job training and employment. These trainees shall include parents of young child-ren who need strong basic skills to move their families out of poverty and raise the education-al aspirations of their children.

Said system shall also include instruction for immigrants, migrants, and refugees who need English language and literacy skills to function effectively at home and in the workplace. Instruction to the aforesaid populations will emphasize instruction at the lowest grade levels.

Said system shall further include instruction for young persons, aged sixteen through twenty-four, who have dropped out of school without sufficient skills to qualify for employment. Instruction shall be designed with emphasis on linking education with vocational training and supported work.

The department shall distribute grants, subject to appropriation, to provide comprehensive literacy services, including support services, in the context of adults' daily lives in their communities, including, but not limited to, public housing, schools, the work place, correctional institutions, community-based organizations, community colleges, libraries, and in social and cultural organizations.

The department shall endeavor to develop the following objectives: (1) a full continuum of services that take an adult from the lowest level of literacy or English language proficiency through high school completion leading to advanced education and training; (2) a network of self-trained, full-time adult literacy and English as a second language professional instructors, qualified to provide high quality effective services; (3) a strong documentation and evaluation capacity that will enable the state to determine what methods of instruction and what means of service delivery are most effective in educating adults; and (4) coordinated accountability mechanisms that simplify existing reporting and refunding processes.

Section 1I. The board shall adopt a system for evaluating on an annual basis the performance of both public school districts and individual public schools. With respect to individual schools, the system shall include instruments designed to assess the extent to which schools and districts succeed in improving or fail to improve student performance, as defined by student acquisition of the skills, competencies and knowledge called for by the academic standards and embodied in the curriculum frameworks established by the board pursuant to sections one D and one E in the areas of mathematics, science and technology, history and social science, English, foreign languages and the arts, as well as by other gauges of student learning judged by the board to be relevant and meaningful to students, parents, teachers, administrators, and taxpayers.

The system shall be designed both to measure outcomes and results regarding student performance, and to improve the effectiveness of curriculum and instruction. In its design and application, the system shall strike a balance among considerations of accuracy, fairness, expense and administration. The system shall employ a variety of assessment instruments on either a comprehensive or statistically valid sampling basis. Such instruments shall be

criterion referenced, assessing whether students are meeting the academic standards described in this chapter. As much as is practicable, especially in the case of students whose performance is difficult to assess using conventional methods, such instruments shall include consideration of work samples, projects and portfolios, and shall facilitate authentic and direct gauges of student performance. Such instruments shall provide the means to compare student performance among the various school systems and communities in the commonwealth, and between students in other states and in other nations, especially those nations which compete with the commonwealth for employment and economic opportunities. The board shall take all appropriate action to bring about and continue the commonwealth's participation in the assessment activities of the National Assessment of Educational Progress and in the development of standards and assessments by the New Standards Program.

In addition, comprehensive diagnostic assessment of individual students shall be conducted at least in the fourth, eighth and tenth grades. Said diagnostic assessments shall identify academic achievement levels of all students in order to inform teachers, parents, administrators and the students themselves, as to individual academic performance. The board shall develop procedures for updating, improving or refining the assessment system.

The assessment instruments shall be designed to avoid gender, cultural, ethnic or racial stereotypes and shall recognize sensitivity to different learning styles and impediments to learning. The system shall take into account on a nondiscriminatory basis the cultural and language diversity of students in the commonwealth and the particular circumstances of students with special needs. Said system shall comply with federal requirements for accommodating children with special needs. All potential English proficient students from language groups in which programs of transitional bilingual education are offered under chapter seventy-one A shall also be allowed opportunities for assessment of their performance in the language which best allows them to demonstrate educational achievement and mastery. For the purposes of this section, a "potential English proficient student" shall be defined as a student who is not able to perform ordinary class work in English; provided, however, that no student shall be allowed to be tested in a language other than English for longer than three consecutive years.

The commissioner is authorized and directed to gather information, including the information specified herein and such other information as the board shall require, for the purposes of evaluating individual public schools, school districts, and the efficacy and equity of state and federal mandated programs. All information filed pursuant to this section shall be filed in the manner and form prescribed by the department.

Each school district shall maintain individual records on every student and employee. Each student record shall contain a unique and confidential identification number, basic demographic information, program and course information, and such other information as the department shall determine necessary. Said records shall conform to parameters established by the department.

Each school district shall file a report with the department every year by a date and in a format determined by the board. Said report shall include, but not be limited to, the following:

(j) multi-cultural education training for students and teachers; and
(k) global education.

Each school district shall furnish to the department in a timely manner such additional information as the department shall request.

Each school district required to provide a program in transitional bilingual education pursuant to chapter seventy-one A shall file the following information with the department every year:
(a) the type or types of transitional bilingual education programs provided;
(b) with regard to children of limited English speaking ability (i) the number enrolled in each type of transitional bilingual education program; (ii) the number enrolled in English as a second language courses who are not enrolled in a program in transitional bilingual education; (iii) the results of basic skills, curriculum assessment, achievement and language proficiency testing, whether administered in English or in the native language; (iv) the absentee, suspension, expulsion, dropout and promotion rates;

Said information shall be filed in the form of the total for the school district as well as categorized by school, grade and language.

Section 1J. The board shall establish regulations defining when a school or school district has chronically failed to improve the educational program provided to students served by the school or district. Such regulations shall be consistent with the goals and standards adopted by the board and the basis for the determination of chronic failure shall include, but not be limited to, the evaluations performed pursuant to section one I. The regulations adopted by the board shall take into account the turnover of students in particular schools and districts.

Schools that have consistently failed to improve the academic performance of their students shall be deemed under-performing, in accordance with the board's regulations. Upon determination that a school is under-performing, the commissioner shall immediately appoint an independent fact-finding team which shall forthwith assess the reasons for the under-performance and the prospects for improvement and report its findings to the commissioner and the district in which the school is located no later than ninety days from the date of its appointment. No more than six months after the determination that a school is under-performing, the district in which the school is located shall present to the board a remedial plan that shall set forth specific goals for improvement, specific means for attaining such goals, and a timetable, not to exceed twenty-four months, for carrying out the plan. The district shall implement said remedial plan, with such changes or amendments as the board shall direct. During the period of implementation, the commissioner shall provide to the school technical assistance for the improvement of the educational program provided to the students served therein.

If the school fails to demonstrate significant improvement as dictated by its remedial plan within twenty-four months after the approval of its remedial plan, the board may declare the school to be chronically under-performing. Upon a determination that a school is chronically under-performing, the following steps may be taken:

(1) The principal of the school shall be immediately removed and shall not be assigned to the school for the following school year unless the board finds that the principal did not play a significant role in the under-performance of the school;

(2) The superintendent may designate a new principal for the school. Any principal of a chronically under-performing school shall have such extraordinary powers, including the power to dismiss, in accordance with paragraph (4), any teacher or other employee assigned to the school without regard to the procedures set forth under sections forty-one and forty-two of chapter seventy-one or the provisions of any collective bargaining agreement. Such dismissed teachers shall otherwise retain such rights as may be provided under law or any applicable collective bargaining agreement, except that they shall not have the right to displace any teacher in any other school;

(3) In order to recruit and retain talented personnel, the commissioner may make available funds, subject to appropriation, to permit the superintendent during the period of remediation to increase the salary of any principal or teacher assigned to the school by not more than one percent for every ten percent of the enrollment of the chronically under-performing school comprised of low-income students, as that term is used in chapter seventy;

(4) If the school does not receive funding from the district at least equal to the average per pupil funding received for students of the same classification and grade level in the district, the district shall provide additional funding sufficient to bring funding for that school to such level;

(5) Such other actions determined by the board of education, to be reasonably calculated to increase the number of students attending the school who satisfy the student performance standards.

A principal appointed to a chronically under-performing school may dismiss a teacher with professional teacher status for good cause, provided that the teacher has received five school days written notice of the decision to terminate. The teacher with professional teacher status may seek review of a termination decision within five school days after receiving notice of his termination by filing a petition for expedited arbitration with the commissioner. An arbitrator shall be selected according to the procedures set forth in section forty-two of chapter seventy-one. In reviewing dismissal decisions, the arbitrator shall consider the chronic under-performance of the school to the degree that such under-performance is not due to factors beyond the control of the teacher, and the arbitrator shall consider any report from the fact-finding team that evaluates the teacher's performance. The arbitrator's decision shall be issued within ten school days from the completion of the hearing.

Section 1K. Upon a determination by the board pursuant to regulations adopted by the board that a school district has consistently failed to improve the performance of students attending school in the district, the commissioner shall appoint an independent fact-finding team to assess the reasons for the under-performance and the prospects for improvement.

Upon review of the conclusions of the fact-finding team, the board may declare the district chronically under-performing. Following such a declaration, the board shall designate a receiver for the district with all the powers of the superintendent and school committee. The receiver shall report directly to the commissioner.

If a municipality has failed to fulfill its fiscal responsibilities to education under chapter seventy, the commissioner shall recommend to the board that the district be declared chronically under-performing. The municipality's mayor or chairman of the board of selectmen shall have the opportunity to present evidence to the board. A vote by the board that a school district is chronically under-performing for fiscal reasons shall authorize the commissioner to petition the commissioner of revenue to require an increase in funds for the school district, alleging that the amount necessary in said community for the support of public schools has not been included in the annual budget appropriations. The commissioner of revenue shall determine the amount of any deficiency pursuant to the sums required under chapter seventy, if any, and issue an order compelling the community to provide a sum of money equal to such deficiency. If the community does not provide a sum of money equal to such deficiency, the commissioner of revenue, in accordance with his powers in section twenty-three of chapter fifty-nine, shall not approve the tax rate of the community for the fiscal year until the deficiency is alleviated. This section shall not be construed to create a cause of action for educational malpractice by students or their parents, guardians or persons acting as parents.

At any time after the imposition under this section or section one J of extraordinary measures at any school or of a receiver for any district, the school committee of the affected district, acting on the recommendation of the superintendent, may petition the commissioner for a determination whether such measures or receivership should be modified or eliminated and whether the school or school district is no longer chronically under-performing. A school district may seek review by the board of any adverse determination. The determination of the board shall be subject to judicial review in accordance with the provisions of section fourteen of chapter thirty A.

Section 1L. Subject to appropriation, the board shall establish a comprehensive interdisciplinary health education and human service discretionary grant program. Funds for this program may be appropriated from the Health Protection Fund established by section two T of chapter twenty-nine. Proposals which describe linkages with other health and human service agencies and existing programs under chapter one hundred and eighty-eight of the acts of nineteen hundred and eighty-five which provide matching funds from local, federal and private sources shall be given priority.

Each school committee shall appoint an advisory council consisting of parents, junior and senior high school students, teachers, school counseling professionals, health and home economic educators, health professionals, school administrators, and representatives of community or regional health or social service agencies and representatives of local religious organizations.

Funds may be granted to a school district to provide for program coordinators, in-service training and program materials. It shall not be the primary focus of programs to finance various school-based clinics.

If the board rejects a proposal of a school committee under this section, then the board shall provide the respective school committee with a written explanation for rejection. The written explanation for rejection shall state the reasons for the rejection and suggest recommendations for resubmission.

No more than ten percent of said funds shall be allocated for state administration of the program.

Notwithstanding any general or special law to the contrary, any grant funds distributed under this program shall be deposited with the treasurer of the city, town or regional school district and held in a separate account and shall be expended by the school committee without further appropriation.

The board, through the department, shall administer the discretionary grant program, provide technical assistance to school districts, including information about model programs and agency services, provide for program review and evaluation, and, in consultation with

"Wage adjustment factor", an adjusted difference between the average annual wage for all jobs in the labor market area in which a municipality is located and the average annual wage in the commonwealth. Average annual wage figures shall be published annually by the division of employment and training. The wage adjustment factor shall be the sum of one plus a fraction, the numerator of which shall be the product of one-third and the difference resulting from subtracting the average annual wage in the commonwealth from the average annual wage of the community; and the denominator of which shall be the average annual wage in the commonwealth.

For the purposes of this section, the average annual wage of the community shall be the sum of:

(a) eight-tenths multiplied by the average annual wage for all jobs in the labor market area in which the municipality is located; plus

(b) two-tenths multiplied by the average annual wage of the municipality; provided, however, that in any community in which the percent of total foundation enrollment represented by the low-income enrollment is greater than the total percent of low-income students in the state, the wage adjustment factor shall not be less than one.

Section 3. For the school district in each municipality, for each regional school district, and for each independent vocational school in the commonwealth, there is hereby established a foundation budget.

The board of education is authorized to adopt regulations furnishing interpretive guidelines for the determination of foundation budgets. Said regulations shall be filed with the house and senate committees on ways and means not less than thirty days before said regulations become effective.

Following fiscal year nineteen hundred and ninety-four, the foundation budget shall be calculated using foundation enrollments for the respective fiscal years as estimated by the department according to the procedures outlined in section two. The monetary factors used in calculating the foundation budget in these years shall be the monetary factors employed in section two to define the foundation payroll, foundation non-salary expenses, and the professional development allotment, expanded program allotment, extraordinary maintenance allotment, book and equipment allotment, multiplied by the ratio of the implicit price deflator for state and local government services as published by the United States department of commerce for the third quarter of the prior calendar year to the same deflator for the third quarter of nineteen hundred and ninety-two. For any fiscal year, the adjusted amounts shall not exceed those in the immediately preceding fiscal year by more than four and one-half percent.

Section 4. Not later than July first, nineteen hundred and ninety-four, and every three years thereafter, the governor shall appoint a foundation budget review commission to review the way in which foundation budgets are calculated and to make recommendations to the general court regarding such changes in the formula as may be appropriate. The

commission shall consist of fifteen members and shall be broadly representative of the racial and ethnic diversity of the commonwealth. Members shall receive no compensation for their services but may receive reimbursement for their reasonable expenses incurred in carrying out their responsibilities as members of the commission. The department shall furnish reasonable staff and other support for the work of the commission.

It shall not constitute a violation of chapter two hundred and sixty-eight A for any person employed by a school district in the commonwealth to serve on this commission or to participate in the commission deliberations that will or may have a financial impact on the district employing such person or on the rate at which such a person may be compensated. The commission may establish procedures to ensure that such persons not participate in commission deliberations that may either directly affect the school districts employing such persons or directly affect the rate at which such persons are compensated.

The commission's recommendations shall be filed with the clerks of the senate and house of representatives, who, with the approval of the president of the senate and the speaker of the house of representatives, shall refer such recommendations to appropriate committees of the general court. Within thirty days after such filing, the said committee shall hold a public hearing on the recommendations.

Section 5. Beginning in fiscal year nineteen hundred and ninety-four and for every fiscal year thereafter, the following shall apply to any municipality receiving overburden aid: the overburden aid amount for said municipality shall be reduced by an amount equal to seventy-five percent of any increase over the prior year in its lottery and additional assistance local aid.

Section 6. In addition to amounts appropriated for long-term debt service, school lunches, adult education, student transportation, and tuition revenue, each municipality in the commonwealth shall annually appropriate for the support of public schools in the municipality and in any regional school district to which the municipality belongs an amount equal to not less than the sum of the minimum required local contribution, federal impact aid, and all state school aid and grants for education but not including equity aid, for the fiscal year. Based on the amounts specified in section twelve, the allotments described in section thirteen, and the definitions and other provisions in this chapter, the commissioner shall estimate and report such amounts to each municipality and regional school district as early as possible, but no later than March first for the following fiscal year. The commissioner shall file with the house and senate committees on ways and means, not less than thirty days before said reports are transmitted to each municipality and regional school district, copies or a document reporting all of the information contained in said reports. Notwithstanding the terms of any regional school district agreements to the contrary, no new regional school district shall be required to submit a budget to its member municipalities before receiving the estimate by the commissioner concerning the amount of state school aid payable through the member municipalities to the regional school district for the following fiscal year. Notwithstanding the provisions of any regional school district agreement, each member municipality shall increase its contribution to the regional district each fiscal year by the amount indicated in that district's share of the municipality's minimum regional con-

tribution in that fiscal year. The district shall appropriate the sum of the minimum regional contributions of its member districts as well as all state school aid received on behalf of member municipalities. The district may choose to spend additional amounts; such decisions shall be made and such amounts charged to members according to the district's required agreement.

Section 7. If there is appropriated in any fiscal year a sum smaller than the amount of state school aid specified in section twelve, any school appropriations based on the commissioner's estimate shall be reduced without further action by the school committee, town meeting, or city council by an amount equal to the value that state school aid and minimum required local contribution for the district are below the amount estimated by the commissioner unless the district or the member municipalities take specific actions to the contrary. For the purposes of this section the amount of state school aid appropriated to a city or town shall be the amount appropriated by the annual appropriation act without regard to any deductions pursuant to subsection (f) of section twelve B of chapter seventy-six.

Section 8. Except as required by General Law, each school district may determine how to allocate any funds appropriated for the support of public schools without regard to the categories employed in calculating the foundation budget.

Section 9. School districts shall report each fiscal year to the commissioner of education on the amounts spent for extraordinary maintenance, extended programming, professional development, and books and instructional equipment. To the extent that the amounts spent for these purposes fall short of the allotments defined in this chapter, the superintendent shall explain the reasons for the shortfall.

School districts shall report each fiscal year to the commissioner of education on the amounts spent for administrative expenses. To the extent that the amounts spent for these purposes exceed the allotments defined in this chapter, the superintendent shall explain the reasons for the additional costs.

Section 10. Subject to appropriation, the amount of state aid to be paid to each municipality in each fiscal year under this chapter shall be the sum of the base aid, the overburden aid, minimum aid, foundation aid and equity aid to which the municipality may be entitled under the provisions of this chapter. The amount of aid paid to each district shall be identified separately for each municipality that is a member of the district.

Section 11. If in any fiscal year a district's actual expenditures for public education is less than the amount required to be appropriated for public education pursuant to this chapter, the difference, up to five percent of the amount required to be appropriated, shall be spent in the following fiscal year without affecting the amount of state school aid payable the following fiscal year; provided, however, that the amount required to be appropriated for public education in said following year shall be increased by said difference, up to five percent; provided, further, that the amount of state school aid for the following fiscal year shall be reduced by the amount said difference exceeds five percent of the amount required to be appropriated; provided, further, that in any year in which additional money is required to be appropriated pursuant to this section due to a spending deficiency in the prior year, if a district's actual expenditure for public education is less than the amount required to be appro-

priated, state school aid in the following year shall be reduced by the entire difference between said amounts. The board shall promulgate regulations to enforce the provisions of this section.

Section 12. (a) Subject to appropriation, beginning in fiscal year nineteen hundred and ninety-four and for all subsequent fiscal years, the amounts appropriated for state school aid in any given year shall be equal to the sum of the adjusted prior year amount and the education improvement amount.

(b) The adjusted prior year amount for state school aid shall be the amount of state aid appropriated in the previous fiscal year, multiplied by an annual adjustment factor equal to the ratio of (i) the implicit price deflator for state government services as published by the United States department of commerce for the third quarter of the prior year to (ii) the same deflator one year earlier; provided, however, that the annual adjustment factor utilized in fiscal year nineteen hundred and ninety-four shall be equal to one. In no case shall the annual adjustment factor exceed one hundred and four percent.

(c) The education improvement amount shall be an amount of additional state school aid as hereinafter described for the fiscal years nineteen hundred and ninety-four to two thousand, inclusive: in fiscal year nineteen hundred and ninety-four, an additional one hundred and forty million dollars; in fiscal year nineteen hundred and ninety-five, an additional one hundred and fifty million dollars; in fiscal year nineteen hundred and ninety-six, an additional one hundred and fifty million dollars; in fiscal year nineteen hundred and ninety-seven, an additional one hundred and fifty million dollars; in fiscal year nineteen hundred and ninety- eight, an additional one hundred and fifty million dollars; in fiscal year nineteen hundred and ninety-nine, an additional one hundred and eighty million dollars; and in fiscal year two thousand, an additional one hundred and eighty million dollars. The dollar amounts specified in this subsection shall be adjusted for inflation by multiplying the amounts for fiscal year nineteen hundred and ninety-five and subsequent years by the ratio of the value of the implicit price deflator for state government services in the third quarter of the prior calendar year to the value of that same deflator in the third quarter of nineteen hundred and ninety-three. In no case shall this adjustment factor be greater than what would be derived by a four percent annual adjustment compounded on a yearly basis.

Section 13. (a) The funds appropriated for state school aid shall be allocated among municipalities as set forth in this chapter. If said amount appropriated is less than the total base aid amount, each municipality's allotment of base aid shall be reduced by a constant amount per student that shall be determined by dividing the difference between the total base amount and said appropriation amount by the total foundation enrollment in the state.

(b) If the amount appropriated is more than the base amount, funds shall first be allocated to ensure that state school aid for each municipality equals the base aid amount.

(c) Any additional funds shall be allocated to cover minimum aid. If the amount appropriated for state school aid is insufficient to permit full funding of the base aid and minimum aid, funds in excess of the amount needed to fund base aid shall be allocated on a proportional basis reflecting the ratio of a particular municipality's minimum aid to the sum of minimum aid amounts of all municipalities for that fiscal year.

(d) All remaining funds shall be allocated to cover foundation aid, equity aid, and overburden aid.

(e) The allocation to each municipality that received foundation aid of more than the minimum aid amount above the base amount shall be reduced by an amount that is the lesser of (1) the minimum aid amount and (2) the positive difference, if any, between its foundation aid and minimum aid. The funds available from this reduction shall be allocated to all municipalities such that each one receives the same proportion of this aid as was received in paragraph (d). These increments shall be considered part of foundation aid, equity aid, and overburden aid.

Section 14. For any district in which fewer than twenty percent of the students scored below the state average on the assessment tests required by chapter sixty-nine, the city or town, or all cities and towns comprising a regional school district, may exempt the district from the provisions of this chapter by accepting this section in the manner prescribed by section four of chapter four. Any district so exempted shall continue to receive fiscal year nineteen hundred and ninety-three base aid, but shall not receive any additional state aid and shall not be required to meet the local obligation requirements of this chapter.

If, in any future year, a district so exempted fails to meet the assessment standards described above, or for any other reason is not exempt from this chapter, it shall, in that and future years, be subject to the same obligations and entitled to the same aid under this chapter in each year as districts that were never so exempted.

Section 15. This chapter shall apply to all cities, towns, and regional school districts, notwithstanding section twenty-seven C of chapter twenty-nine, and without regard to any acceptance or appropriation by a city, town or regional school district or to any appropriation by the general court.

SECTION 33. Chapter seventy A of the General Laws is hereby repealed.

SECTION 34. Section 16D of chapter 71 of the General Laws, as appearing in the 1990 Official Edition, is hereby amended by adding the following three subsections:-

(e) Notwithstanding the foregoing provisions of this section, for the fiscal year ending on June thirtieth, nineteen hundred and ninety-four, regional schools shall receive the same amount of state aid that they received in the fiscal year ending on June thirtieth, nineteen hundred and ninety-three; provided, however, that any regional school that received in the fiscal year ending on June thirtieth, nineteen hundred and ninety-three less than seventy-six percent of the amount of state aid that it would have been entitled to pursuant to the foregoing provisions of this section if the full amount had been appropriated for such state aid in said fiscal year nineteen hundred and ninety-three shall receive an additional state aid payment in fiscal year nineteen hundred and ninety-four such that the total state aid for each regional school pursuant to this section shall be no less than seventy-six percent of the amount of state aid that it would have been entitled to pursuant to the foregoing provisions of this section if the full amount had been appropriated for such state aid in said fiscal year nineteen hundred and ninety-three; provided, further, that any regional school district that is newly established pursuant to section fifteen subsequent to June thirtieth, nineteen hundred and ninety-two but prior to July first, nineteen hundred and ninety-three shall receive

seventy-six percent of the amount it would otherwise have been entitled to receive for fiscal year nineteen hundred and ninety-four expenses pursuant to the foregoing provisions of this section.

(f) For fiscal years nineteen hundred and ninety-four and subsequent fiscal years, the amount of state aid distributed as base aid pursuant to chapter seventy shall be deemed to be in full satisfaction of the provisions of subsection (e).

(g) Notwithstanding the foregoing provisions, regional bonus aid, but no other aid pursuant to this section, shall be paid to any regional school district formed after fiscal year nineteen hundred and ninety-three for the immediate five fiscal years following the establishment of said regional school district. Regional bonus aid shall be payable in an amount equal to fifty dollars per foundation enrollment, in the first fiscal year following the establishment of said regional school district; forty dollars per foundation enrollment in the second fiscal year following the establishment of said regional school district; thirty dollars per foundation enrollment in the third fiscal year following the establishment of said regional school district; twenty dollars per foundation enrollment in the fourth fiscal year following the establishment of said regional school district; and, ten dollars per foundation enrollment in the fifth fiscal year following the establishment of said regional school district.

SECTION 35. Said chapter 71 is hereby further amended by striking out section 37, as so appearing, and inserting in place thereof the following section:-

Section 37. The school committee in each city and town and each regional school district shall have the power to select and to terminate the superintendent, shall review and approve budgets for public education in the district, and shall establish educational goals and policies for the schools in the district consistent with the requirements of law and statewide goals and standards established by the board of education.

SECTION 36. Said chapter 71 is hereby further amended by striking out section 37H, as amended by section 430 of chapter 133 of the acts of 1992, and inserting in place thereof the following section:-

Section 37H. The superintendent of every school district shall publish the district's policies pertaining to the conduct of teachers and students. Said policies shall prohibit the use of any tobacco products within the school buildings, the school facilities or on the school grounds or on school buses by any individual, including school personnel. Copies of these policies shall be provided to any person upon request and without cost by the principal of every school within the district.

Each school district's policies pertaining to the conduct of students shall include the following: disciplinary proceedings, including procedures assuring due process; standards and procedures for suspension and expulsion of students; procedures pertaining to discipline of students with special needs; standards and procedures to assure school building security and safety of students and school personnel; and the disciplinary measures to be taken in cases involving the possession or use of illegal substances or weapons, the use of force, vandalism, or violation of other student's civil rights. Codes of discipline, as well as procedures used to develop such codes shall be filed with the department of education for informational purposes only.

In each school building containing the grades nine to twelve, inclusive, the principal, in consultation with the school council, shall prepare and distribute to each student a student handbook setting forth the rules pertaining to the conduct of students. The school council shall review the student handbook each spring to consider changes in disciplinary policy to take effect in September of the following school year, but may consider policy changes at any time. The annual review shall cover all areas of student conduct, including but not limited to those outlined in this section.

Notwithstanding any general or special law to the contrary, all student handbooks shall contain the following provisions:

(a) Any student who is found on school premises or at school-sponsored or school-related events, including athletic games, in possession of a dangerous weapon, including, but not limited to, a gun or a knife; or a controlled substance as defined in chapter ninety-four C, including, but not limited to, marijuana, cocaine, and heroin, may be subject to expulsion from the school or school district by the principal.

(b) Any student who assaults a principal, assistant principal, teacher, teacher's aide or other educational staff on school premises or at school-sponsored or school-related events, including athletic games, may be subject to expulsion from the school or school district by the principal.

(c) Any student who is charged with a violation of either paragraph (a) or (b) shall be notified in writing of an opportunity for a hearing; provided, however, that the student may have representation, along with the opportunity to present evidence and witnesses at said hearing before the principal.

After said hearing, a principal may, in his discretion, decide to suspend rather than expel a student who has been determined by the principal to have violated either paragraph (a) or (b); provided, however, that any principal who decides that said student should be suspended shall state in writing to the school committee his reasons for choosing the suspension instead of the expulsion as the most appropriate remedy. In this statement, the principal shall represent that, in his opinion, the continued presence of this student in the school will not pose a threat to the safety, security and welfare of the other students and staff in the school.

(d) Any student who has been expelled from a school district pursuant to these provisions shall have the right to appeal to the superintendent. The expelled student shall have ten days from the date of the expulsion in which to notify the superintendent of his appeal. The student has the right to counsel at a hearing before the superintendent. The subject matter of the appeal shall not be limited solely to a factual determination of whether the student has violated any provisions of this section.

(e) When a student is expelled under the provisions of this section and applies for admission to another school for acceptance, the superintendent of the sending school shall notify the superintendent of the receiving school of the reasons for the pupil's expulsion.

SECTION 37. Section 37L of said chapter 71, as appearing in the 1990 Official Edition, is hereby amended by adding the following three paragraphs:-

In addition, any school department personnel shall report in writing to their

immediate supervisor an incident involving a student's possession or use of a dangerous weapon on school premises at any time.

Supervisors who receive such a weapon report shall file it with the superintendent of said school, who shall file copies of said weapon report with the local chief of police, the department of social services, the office of student services or its equivalent in any school district, and the local school committee. Said superintendent, police chief, and representative from the department of social services, together with a representative from the office of student services or its equivalent, shall arrange an assessment of the student involved in said weapon report. Said student shall be referred to a counseling program; provided, however, that said counseling shall be in accordance with acceptable standards as set forth by the board of education. Upon completion of a counseling session, a follow-up assessment shall be made of said student by those involved in the initial assessment.

A student transferring into a local system must provide the new school system with a complete school record of the entering student. Said record shall include, but not be limited to, any incidents involving suspension or violation of criminal acts or any incident reports in which such student was charged with any suspended act.

SECTION 38. Section 38 of said chapter 71, as so appearing, is hereby amended by striking out the first and second paragraphs.

SECTION 39. The third paragraph of said section 38 of said chapter 71, as so appearing, is hereby amended by striking out, in line 33, the word "committee" and inserting in place thereof the following word:- district.

SECTION 40. Said section 38 of said chapter 71, as so appearing, is hereby further amended by striking out the fifth paragraph and inserting in place thereof the following two paragraphs:-

The superintendent, by means of comprehensive evaluation, shall cause the performance of all teachers, principals, and administrators within the school district to be evaluated using any principles of evaluation established by the board of education pursuant to section one B of chapter sixty-nine and by such consistent, supplemental performance standards as the school committee may require, including the extent to which students assigned to such teachers and administrators satisfy student academic standards or, in the case of a special education student, the individual education plan, and the successful implementation of professional development plans required under section thirty-eight Q; provided, however, that such principles and standards be consistent with the anti-discrimination requirements of chapter one hundred and fifty-two B. The superintendent shall require the evaluation of administrators and of teachers without professional teacher status every year and shall require the evaluation of teachers with professional teacher status at least once every two years. The procedures for conducting such evaluations, but not the requirement for such evaluations, shall be subject to the collective bargaining provisions of chapter one hundred and fifty E.

Performance standards for teachers and other school district employees shall be established by the school committee upon the recommendation of the superintendent, provided that where teachers are represented for collective bargaining purposes, all teacher

performance standards shall be determined as follows: The school committee and the collective bargaining representative shall undertake for a reasonable period of time to agree on teacher performance standards. Prior to said reasonable period of time, the school district shall seek a public hearing to comment on such standards. In the absence of an agreement, after such reasonable period, teacher performance standards shall be determined by binding interest arbitration. Either the school district or the teachers' collective bargaining representative may file a petition seeking arbitration with the commissioner of education. The commissioner shall forward to the parties a list of three arbitrators provided by the American Arbitration Association. The school committee and the collective bargaining representative within three days of receipt of the list from the commissioner of education shall have the right to strike one of the three arbitrators' names if they are unable to agree upon a single arbitrator from among the three. The arbitration shall be conducted in accordance with the rules of the American Arbitration Association to be consistent with the provisions of this section. In reaching a decision, the arbitrator shall seek to advance the goals of encouraging innovation in teaching and of holding teachers accountable for improving student performance. The arbitrator shall consider the particular socioeconomic conditions of the student population of the school district. Both the parties and the arbitrator may adopt performance standards established by state or national organizations. The performance standards shall be incorporated into the applicable collective bargaining agreement; provided, however, that any subsequent modification of the performance standards shall be made pursuant to the procedures set forth in this section.

SECTION 41. Said chapter 71 is hereby further amended by striking out section 38G, as amended by chapter 151 of the acts of 1991, and inserting in place thereof the following section:-

Section 38G. (a) The board of education shall have authority to grant upon application provisional and standard certificates, as provided in this section, to teachers, guidance counselors and directors, school psychologists, school librarians, school nurses, audio-visual media specialists, unified media specialists, school business administrators, principals, supervisors, directors, assistant superintendents of schools and superintendents of schools. Any certificate issued by the board may be revoked for cause, pursuant to standards and procedures established by the board. The board shall promulgate regulations to carry out the provisions of this section; provided, however, that such regulations shall not require a masters degree as a condition precedent to the attainment of a standard certification in instruction; provided, further, that a masters degree may be required as a condition precedent to the attainment of a certificate of eligibility with advanced standing.

(b) To be eligible for a provisional certification, the candidate shall (1) hold a bachelor's degree in arts or sciences from an accredited college or university with a major course of study appropriate to the instructional field; (2) pass a test which shall consist of two parts: (A) a writing section which shall demonstrate the communication and literacy skills necessary for effective instruction and improved communication between school and parents; and (B) the subject matter knowledge necessary for the teaching specialization endorsement or the general subject matter knowledge for the elementary endorsement; and

(3) be of sound moral character. Candidates who complete the requirements in this paragraph shall be issued certificates of eligibility which will permit them to seek provisional employment in teaching positions requiring instructional certification.

(c) Certificates of eligibility with advanced standing shall be issued to all persons who meet the test requirement pursuant to subsection (b) and who have completed one of the following programs of teacher preparation: (1) a college program, graduate or undergraduate, approved by the department of education for the preparation of teachers; (2) a college preparation program included in the alternative certification reciprocity system of the National Association of State Directors of Teacher Education and Certification (NASDTEC); (3) an out-of-state teacher education program approved by the National Council for the Accreditation of Teacher Education (NCATE); or (4) an out-of-state teacher education program not approved by the NCATE or NASDTEC but approved by the board of education.

(d) To be eligible for the standard certificate in instructional fields, except as indicated in subsection (e), the candidate shall (1) possess a provisional certificate pursuant to paragraph (b); and (2) complete a state-approved district or private school training program pursuant to subsection (g) while employed provisionally in a position requiring the relevant endorsement to the instructional certificate.

(e) Candidates who hold standard instructional certificates shall be issued additional standard instructional endorsements where they meet provisional certification requirements without having to meet the requirements in subsection (d).

(f) A standard certification shall be issued for a term of five years. Teachers who have been granted permanent certificates prior to June first, nineteen hundred and ninety-three shall be granted standard instructional certificates by the board.

(g) Each public school district seeking to hire a provisional teacher shall submit a plan to the department of education and receive approval in accordance with the same procedures used for initial approval of collegiate preparation programs. No district shall be authorized to employ a provisional teacher unless it has submitted a plan and received the approval of the commissioner of education. The department of education shall issue a standard training program plan which districts may implement in lieu of developing an original plan.

Each plan shall describe the key elements of the proposed training program in accordance with guidelines established and published by the department of education. Districts shall show evidence of joint sponsorship of training programs with colleges or universities.

Each approved district training plan shall provide essential knowledge and skills to provisional teachers through the following phases of training: (1) a full-time seminar and practicum of no less than twenty days' duration which takes place prior to the time at which the provisional teacher takes the full responsibility for a classroom. The seminar and practicum shall provide the format instruction in the essential areas for professional study listed in subsection (h). It should introduce basic teaching skills through supervised teaching experiences with students. The seminar and practicum components of the experience shall

be integrated and shall include an orientation to the policies, organization and curriculum of the employing district. This requirement shall not apply to provisional teachers who are holders of certificates of eligibility with advanced standing; (2) a period of intensive on-the-job supervision beginning the first day on which the provisional teacher assumes full responsibility for a classroom and continuing for a period of at least ten weeks. During this time, the provisional teacher shall be visited and critiqued by members of a professional support team and shall be observed and formally evaluated at the end of ten weeks by the appropriately certified member of the team. At the end of the ten-week period, the provisional teacher shall receive a formal written progress report from the chairperson of the support team; and (3) an additional period of continued supervision and evaluation of no less than twenty weeks duration. During this period, the provisional teacher shall be visited and critiqued at least four times and shall be observed formally and evaluated at least twice. No more than two months shall pass without a formal observation. Opportunities shall be provided for the provisional teacher to observe the teaching of experienced colleagues.

(h) Approximately two hundred hours of formal instruction in the following topics shall be provided in all three phases of this program combined. This requirement shall not apply to provisional teachers who are holders of certificates of eligibility with advanced standing.

(1) Curriculum and the curriculum frameworks established by the board.

(2) Student development, student diversity and learning at all levels.

(3) The classroom, the school and the home.

(i) Training and supervision of provisional teachers in state-approved alternative programs shall be provided by a professional support team comprised of a school principal, a mentor teacher, a college faculty member and a curriculum supervisor. District schools which do not employ curriculum supervisors or have been unable to establish a relationship with a college or university shall provide for comparable expertise on the team. The school principal shall serve as the chairperson of the team.

(j) The department of education shall coordinate the training efforts of districts and shall establish regional programs for provisional teachers. The department shall also provide orientation programs for support team members.

(k) Provisional teachers shall be observed and evaluated by appropriately certified support team members. Evaluation of provisional teachers shall be shared by at least two, but no more than three members of the support team. The department of education shall devise standardized criteria and forms for a final comprehensive evaluation of each provisional teacher, conducted at the end of the provisional period by appropriately certified support team members.

(l) At the conclusion of the state-approved district training program, the chairperson of the support team shall prepare a comprehensive evaluation report of the provisional teacher's performance. This report shall be submitted by the chairperson directly to the department of education and shall contain a recommendation as to whether or not a standard certificate should be issued to the provisional teacher. The final comprehensive evaluation report on each provisional teacher shall be made on forms provided by the department of education.

Said report shall include one of the following recommendations: (1) Approved: recommends issuance of a standard certificate; (2) Insufficient: recommends that a standard certificate not be issued but that the candidate be allowed to seek entry on one more occasion in the future into a state-approved district training program; or (3) Disapproved: recommends that a standard certificate not be issued and that the candidate not be allowed to enter into a state-approved district training program.

The support team chairperson shall provide the provisional teacher with a copy of the provisional teacher's written evaluation report and certification recommendation before submitting it to the bureau of teacher preparation and certification.

If the provisional teacher disagrees with the chairperson's recommendation, the provisional teacher may, within fifteen days, submit to the chairperson written materials documenting the reasons why the provisional teacher believes standard certification should be awarded or a recommendation of insufficient granted. The chairperson shall forward all such documentation to the bureau of teacher certification along with the evaluation report and recommendation concerning certification. The provisional teacher may contest the unfavorable recommendation with the board of education.

Candidates who receive a recommendation of "disapproved" or two or more recommendations of "insufficient" may petition the board of education for approval of additional opportunities to seek provisional employment in districts other than those in which they received unfavorable recommendations. The candidate shall be responsible for demonstrating why he would be likely to succeed if granted the requested opportunity.

(m) All applications for certificates shall be accompanied by a fee to be determined annually by the commissioner of administration under the provisions of section three B of chapter seven. Said fees shall be established so as to allow the department's bureau of teacher certification to operate at no cost to the commonwealth.

No person shall be eligible for employment by a school committee as a teacher, principal, supervisor, director, guidance counselor and director, school psychologist, school nurse, school librarian, audio-visual media specialist, unified media specialist, school business administrator, superintendent of schools or assistant superintendent of schools unless he has been granted by the board a certificate with respect to the type of position for which he seeks employment; provided, however, that nothing herein shall be construed to prevent a school committee from prescribing additional qualifications; provided, further, that a school com-mittee may upon its request be exempt by the board for any one school year from the requirement in this section to employ certified personnel when compliance therewith would in the opinion of the board constitute a great hardship in securing teachers for the schools of a town. During the time that such a waiver is in effect, service of an employee of a school committee to whom the waiver applies shall not be counted as service in acquiring pro-fessional teacher status or other rights under section forty-one.

For the purposes of certifying provisional teachers, the board may approve programs at colleges or universities devoted to the preparation of teachers and other educational personnel. A college or university offering such an approved program shall certify to the board that a student has completed the program approved and shall provide the board with

a transcript of the record.

This section shall not apply to trade, vocational, temporary substitute teachers, exchange teachers, regionally licensed or certified teachers or to teaching or administrative interns; provided, however, that approval for the employment of such personnel shall be granted by the board under such rules and regulations as it may adopt. As used in this section, a "temporary substitute" shall be one employed for less than a school year to take the place of a regularly employed teacher who is absent by reason of illness or by reason of educational leave, maternity leave, military leave, sabbatical leave or other leave. As used in this section, a "teaching or administrative intern" shall be a student who has completed his student teaching requirements and seeks additional experience in teaching or administrative positions. As used in this section a "regionally licensed or certified teacher" shall be an applicant for a teacher's certificate in the commonwealth who has been granted a regional license or certificate by another state jurisdiction under terms of a contract entered into pursuant to chapter seven hundred and forty-eight of the acts of nineteen hundred and sixty-eight, the Interstate Agreement on Certification of Educational Personnel.

The board shall have authority from time to time to make, amend and rescind such rules and regulations as may be necessary to carry out the provisions of this section.

Except as otherwise specifically provided in this section, no rights of any employees of a school district under the provisions of this chapter shall be impaired by the provisions of this section.

Any person, who teaches children diagnosed as having autism, in a school approved by the department of education pursuant to the provisions of chapter seventy-one B who is legally present in the United States and possesses legal authorization to work, and who meets all other requirements of certification, shall not be denied certification solely because he is not a citizen of the United States.

Anyone granted either a provisional or permanent certificate under this section or currently holding such certification shall be required to maintain the development of professional skills and the knowledge of subject matter pertinent to the areas of certification. Teachers who were authorized, permitted or approved under policies of the department of education to teach in a subject or area for which there was no certification standard before September first, nineteen hundred and eighty-two, shall acquire and maintain the development of the skills and training required of persons certified to teach in said subject or area after that date.

It shall be one of the objectives of all school districts' professional development plans to satisfy the professional development plan required of this section; provided, however, that this requirement shall not be construed to require that a school district or the commonwealth provide funding for the fulfillment of the professional development requirements of this section and section thirty-eight Q beyond the foundation budget.

The board shall establish policies and guidelines designating requirements for any continuing education units, in-service seminars, projects, courses and other activities which would be deemed sufficient to maintain the development of professional skills and the knowledge of subject matter pertinent to particular certificates. The board shall establish for

each certification area alternate methods for fulfilling the professional development requirement, at least one of which shall be provided at no cost to persons employed by a school district who are engaging in such activity for the purpose of satisfying the professional development requirements of this section. The board may also develop methods of assessing an individual's teaching skills and knowledge. In developing these policies, guidelines and assessment methods, the board shall obtain the input of teachers, administrators and educational experts. Such policies shall provide that a teacher who is to be employed in a position in an area of certification in which he is not currently employed, nor currently certified, but for which he held a certificate which had been valid within the three years immediately preceding the starting date of employment in this position, shall be given a reasonable period, as determined by the board, to fulfill a professional development plan which demonstrates his currency in the relevant subject matter knowledge, and requalifies him for certification in said area.

The board shall, in establishing said policies and criteria for professional development, give special consideration to the unique financial or time constraints these policies may require. The board may also develop methods of assessing an individual's teaching skills and knowledge. In developing these policies, guidelines and assessment methods, the board shall obtain the input of teachers, administrators and educational experts.

All permanent certificates shall have a term of five years and shall be renewable for additional terms of five years. All applications for renewal shall be accompanied by a fee to be determined annually by the secretary of administration under the provisions of section three B of chapter seven. Applicants for renewal shall submit documentation demonstrating their fulfillment of the professional development requirements established by the board for the certificates they seek to renew.

SECTION 42. Said chapter 71 is hereby further amended by inserting after section 38P the following section:-

Section 38Q. Every school district in the commonwealth shall adopt and implement a professional development plan for all principals, teachers and other professional staff employed by the district, to include the professional support teams established pursuant to section thirty-eight G, and annually shall update such plans and set forth a budget for professional development within the confines of the foundation budget. Said plan shall include training in the teaching of new curriculum frameworks and other skills required for the effective implementation of this act, including participatory decision making, and parent and community involvement. Said plan shall also include training for members of school councils, pursuant to section fifty-nine C. Said plan may include teacher training which addresses the effects of gender bias in the classroom.

The commissioner of education for the commonwealth shall prepare each year a plan for providing statewide assistance in the preparation and implementation of professional development plans. The commissioner shall consult with the secretary of education and the higher education coordinating council in developing said plan. This plan shall evaluate the feasibility of obtaining assistance from institutions of higher education and private service providers. The plan shall be submitted to the board of education for approval. A copy of

said plan shall be submitted to the joint committee on education, arts, and humanities of the general court.

SECTION 43. Section 41 of said chapter 71, as appearing in the 1990 Official Edition, is hereby amended by striking out the first paragraph and inserting in place thereof the following three paragraphs:-

For the purposes of this section, a teacher, school librarian, school adjustment counsellor, or school psychologist who has served in the public schools of a school district for three consecutive years shall be considered a teacher, and shall be entitled to professional teacher status as provided in section forty-two. The superintendent of said district, upon the recommendation of the principal, may award such status to any teacher who has served in the principal's school for not less than one year or to a teacher who has obtained such status in any other public school district in the commonwealth. A teacher without professional teacher status shall be notified in writing on or before June fifteenth whenever such person is not to be employed for the following school year. Unless such notice is given as herein provided, a teacher without such status shall be deemed to be appointed for the following school year.

School principals, by whatever title their positions may be known, shall not be represented in collective bargaining. School principals may enter into individual employment contracts with the districts that employ them concerning the terms and conditions of their employment.

Except as provided herein, section forty-two shall not apply to school principals, assistant principals or department heads, although nothing in this section shall deny to any principal, assistant principal or department head any professional teacher status to which he shall otherwise be entitled. A principal, assistant principal, department head or other supervisor who has served in that position in the public schools of the district for three consecutive years shall not be dismissed or demoted except for good cause. Only a superintendent may dismiss a principal. A principal, assistant principal, department head or other supervisor shall not be dismissed unless he has been furnished with a written notice of intent to dismiss with an explanation of the grounds for the dismissal, and, if he so requests, has been given a reasonable opportunity within seven days after receiving such notice to review the decision with the superintendent at which meeting such employee may be represented by an attorney or other representative to present information pertaining to the basis for the decision and to such employee's status. A principal, assistant principal, department head or other supervisor may seek review of a dismissal or demotion decision by filing a petition with the commissioner for arbitration. Except as provided herein, the procedures for arbitration, and the time allowed for the arbitrator to issue a decision, shall be the same as that in section forty-two. The commissioner shall provide the parties with the names of three arbitrators who are members of the American Arbitration Association. The arbitrators shall be different from those developed pursuant to section forty-two. The parties each shall have the right to strike one of the three arbitrator's names if they are unable to agree upon a single arbitrator from amongst the three.

SECTION 44. Said chapter 71 is hereby further amended by striking out section 42,

as so appearing, and inserting in place thereof the following section:-

Section 42. A principal may dismiss or demote any teacher or other person assigned full-time to the school, subject to the review and approval of the superintendent; and subject to the provisions of this section, the superintendent may dismiss any employee of the school district. In the case of an employee whose duties require him to be assigned to more than one school, and in the case of teachers who teach in more than one school, those persons shall be considered to be under the supervision of the superintendent for all decisions relating to dismissal or demotion for cause.

A teacher who has been teaching in a school system for at least ninety calendar days shall not be dismissed unless he has been furnished with written notice of intent to dismiss and with an explanation of the grounds for the dismissal in sufficient detail to permit the teacher to respond and documents relating to the grounds for dismissal, and, if he so requests, has been given a reasonable opportunity within ten school days after receiving such written notice to review the decision with the principal or superintendent, as the case may be, and to present information pertaining to the basis for the decision and to the teacher's status. The teacher receiving such notice may be represented by an attorney or other representative at such a meeting with the principal or superintendent. Teachers without professional teacher status shall otherwise be deemed employees at will.

A teacher with professional teacher status, pursuant to section forty-one, shall not be dismissed except for inefficiency, incompetency, incapacity, conduct unbecoming a teacher, insubordination or failure on the part of the teacher to satisfy teacher performance standards developed pursuant to section thirty-eight of this chapter or other just cause.

A teacher with professional teacher status may seek review of a dismissal decision within thirty days after receiving notice of his dismissal by filing a petition for arbitration with the commissioner. The commissioner shall forward to the parties a list of three arbitrators provided by the American Arbitration Association. Each person on the list shall be accredited by the National Academy of Arbitrators. The parties each shall have the right to strike one of the three arbitrators' names if they are unable to agree upon a single arbitrator from amongst the three. The arbitration shall be conducted in accordance with the rules of the American Arbitration Association to be consistent with the provisions of this section. The parties each shall have the right to strike one of the three arbitrators' names if they are unable to agree upon a single arbitrator from amongst the three. The board of education shall determine the process for selecting arbitrators for the pool. The fee for the arbitration shall be split equally between the two parties involved in the arbitration.

At the arbitral hearing, the teacher and the school district may be represented by an attorney or other representative, present evidence, and call witnesses and the school district shall have the burden of proof. In determining whether the district has proven grounds for dismissal consistent with this section, the arbitrator shall consider the best interests of the pupils in the district and the need for elevation of performance standards.

The arbitrator's decision shall be issued within one month from the completion of the arbitral hearing, unless all parties involved agree otherwise, and shall contain a detailed statement of the reasons for the decision. Upon a finding that the dismissal was improper

under the standards set forth in this section, the arbitrator may award back pay, benefits, reinstatement, and any other appropriate non-financial relief or any combination thereof. Under no circumstances shall the arbitrator award punitive, consequential, or nominal damages, or compensatory damages other than back pay, benefits or reinstatement. In the event the teacher is reinstated, the period between the dismissal and reinstatement shall be considered to be time served for purposes of employment. The arbitral decision shall be subject to judicial review as provided in chapter one hundred and fifty C. With the exception of other remedies provided by statute, the remedies provided hereunder shall be the exclusive remedies available to teachers for wrongful termination. The rules governing this arbitration procedure shall be the rules of the American Arbitration Association as pertains to arbitration.

Neither this section nor section forty-one shall affect the right of a superintendent to lay off teachers pursuant to reductions in force or reorganization resulting from declining enrollment or other budgetary reasons. No teacher with professional teacher status shall be laid off pursuant to a reduction in force or reorganization if there is a teacher without such status for whose position the covered employee is currently certified. No teacher with such status shall be displaced by a more senior teacher with such status in accordance with the terms of a collective bargaining agreement or otherwise unless the more senior teacher is currently qualified pursuant to section thirty-eight G for the junior teacher's position.

SECTION 45. Section forty-two A of said chapter seventy-one is hereby repealed.

SECTION 46. Said chapter 71 is hereby further amended by striking out section 42B, as appearing in the 1990 Official Edition, and inserting in place thereof the following section:-

Section 42B. The provisions of this chapter relating to school personnel granted certificates in accordance with section thirty-eight G shall apply to all such school personnel employed by regional school districts. Any such school personnel who have professional teacher status or other rights under section forty-one in a particular school district, whose positions are superseded by reasons of the establishment and operation of a regional school district, shall be employed with the same status by the regional school district.

All such school personnel employed by regional school districts shall initially be placed on the salary schedule of the district so that compensation to be paid to such school personnel shall not be less than the compensation received by such school personnel while previously employed with the same status.

Such school personnel shall also be given credit by the regional school district committee for all accumulated sick leave and accumulated sabbatical leave years of service while employed with such status and for terminal compensation due such school personnel on the termination of such service.

All such personnel without such status in a city or town in the district whose positions are superseded by reason of the establishment and operation of a regional school district shall be elected to serve in such district by the regional school district committee; provided, however, that there is an available position which such person is certified to fill. All such personnel employed by regional school district committees shall initially be placed

on the salary schedule of the regional school district so that the compensation paid to such school personnel shall not be less than the compensation received by such school personnel while previously employed by a local school committee. Such school personnel shall also be given credit by the regional school district committee for all accumulated sick leave, accumulated time towards service with such status, and accumulated sabbatical leave years of service, and for terminal compensation due such school personnel on the termination of such service.

Any employee subject to the provisions of chapter thirty-one, employed by the school committee of a town, whose position is superseded by reason of the establishment and operation of a regional school district shall be employed by the regional school district without loss of any civil service or other rights previously acquired by him.

This section shall also apply to all school personnel with such status of local trustees for vocational education, and any such school personnel whose positions are superseded by reason of the establishment and operation of a regional school district shall be employed by the regional school district with the same status.

Any such school personnel, employed by a regional school district, whose position is abolished or eliminated by reason of the disestablishment and discontinuance of the regional school district or the withdrawal of a member community from such district shall be employed by one of the withdrawing city or town school committees, and if any such personnel have such status, such personnel shall be employed by such city or town, school committee with the same status. In the event that there are not sufficient teaching positions available in the withdrawing city or town school systems, such personnel shall be offered the available positions for which they are currently certified in the order of their seniority in the regional school district. All such personnel so employed by a city or town school district shall initially be placed on the salary schedule of such city or town school district so that the compensation paid to such school personnel shall not be less than the compensation received by such school personnel while previously employed by the regional school district. Such school personnel also shall be given credit by the city or town school committee for all accumulated sick time, accumulated time towards service with such status, and accumulated sabbatical leave years of service, and for terminal compensation due such school personnel on the termination of such service.

SECTION 47. Said chapter 71 is hereby further amended by striking out section 42D, as so appearing, and inserting in place thereof the following section:-

Section 42D. The superintendent may suspend any employee of the school district subject to the provisions of this section. The principal of a school may suspend any teacher or other employee assigned to the school subject to the provisions of this section. Any employee shall have seven days written notice of the intent to suspend and the grounds upon which the suspension is to be imposed; provided, however, that the superintendent may, for good cause, require the immediate suspension of any employee, in which case the employee shall receive written notice of the immediate suspension and the cause therefor at the time the suspension is imposed. The employee shall be entitled (i) to review the decision to suspend with the superintendent or principal if said decision to suspend was made by the

principal; (ii) to be represented by counsel in such meetings; (iii) to provide information pertinent to the decision and to the employee's status.

No teacher or other employee shall be suspended for a period exceeding one month, except with the consent of the teacher or other employee, and no teacher or other employee shall receive compensation for any period of lawful suspension.

No teacher shall be interrogated prior to any notice given to him relative to the suspension unless the teacher or other employee is notified of his right to be represented by counsel during any such investigation. A suspended teacher or other employee may seek review of the suspension by following the arbitration procedures set forth in section forty-two. Nothing in this section shall be construed as limiting any provision of a collective bargaining agreement with respect to suspension of teachers or other employees.

SECTION 48. Said chapter 71 is hereby further amended by striking out section 43, as so appearing, and inserting in place thereof the following section:-

Section 43. The salary of no teacher employed with professional teacher status in any city or town except Boston shall be reduced without his consent except by a general salary revision affecting equally all teachers of the same salary grade in the town or except in connection with a reduction in status from full-time to part-time pursuant to a reduction in force resulting from declining enrollments or other budgetary reasons or pursuant to reorganizations for academic or budgetary reasons. Nothing in this section or in any other section of this chapter shall be construed to prevent a school district from entering into an individual annuity contract for such employee or from reducing the salary or compensation of such employee pursuant to such agreement for the purpose of such purchase as authorized by section thirty-seven B.

SECTION 49. Sections forty-three A and forty-three B of said chapter seventy-one are hereby repealed.

SECTION 50. Section 47A of said chapter 71, as appearing in the 1990 Official Edition, is hereby amended by striking out, in line 1, the word "committee" and inserting in place thereof the word:- superintendent.

SECTION 51. Said chapter 71 is hereby further amended by striking out section 48, as so appearing, and inserting in place thereof the following section:-

Section 48. The principal at each school, subject to the direction of the superintendent, shall, at the expense of the school district, purchase textbooks and other school supplies, and consistent with the district policy, shall loan them to the pupils attending such school free of charge. If instruction is given in the manual and domestic arts, the principal may so purchase and loan the necessary tools, implements and materials. The principal shall also, at like expense, procure such apparatus, reference books and other means of illustration, as may be needed. Said purchases shall be made in accordance with chapter thirty B and within the purchasing guidelines adopted by the municipality where such purchases are made if such guidelines exist.

SECTION 52. Section 59 of said chapter 71, as so appearing, is hereby amended by striking out the second sentence and inserting in place thereof the following four sentences:- A superintendent employed under this section or section sixty or sixty-three

shall manage the system in a fashion consistent with state law and the policy determinations of that school committee. Upon the recommendation of the superintendent, the school committee may also establish and appoint positions of assistant or associate superintendents, who shall report to the superintendent, and the school committee shall fix the compensation paid to such assistant or associate superintendents. The school committee shall approve or disapprove the hiring of said positions. Such approval by the school committee of the recommendation shall not be unreasonably withheld; provided, however, that upon the request of the superintendent the school committee shall provide an explanation of disapproval.

SECTION 53. Said chapter 71 is hereby further amended by striking out section 59B, as so appearing, and inserting in place thereof the following three sections:-

Section 59B. The superintendent of a school district shall appoint principals for each public school within the district at levels of compensation determined in accordance with policies established by the school committee. Principals employed under this section shall be the educational administrators and managers of their schools and shall supervise the operation and management of their schools and school property, subject to the supervision and direction of the superintendent. Principals employed under this section shall be responsible, consistent with district personnel policies and budgetary restrictions and subject to the approval of the superintendent, for hiring all teachers, instructional or administrative aides, and other personnel assigned to the school, and for terminating all such personnel, subject to review and prior approval by the superintendent and subject to the provisions of this chapter. This section shall not prevent one person from serving as the principal of two or more elementary schools or the use of teaching principals in such schools.

It shall be the responsibility of the principal in consultation with professional staff of the building to promote participatory decision making among all professional staff for the purpose of developing educational policy.

The school superintendent of a city or town or regional school district including vocational-technical schools, may also appoint administrators and other personnel not assigned to particular schools, at levels of compensation determined in accordance with policies established by the school committee.

Section 59C. At each public elementary, secondary and independent vocational school in the commonwealth there shall be a school council consisting of the school principal, who shall co-chair the council; parents of students attending the school who shall be selected by the parents of students attending such school who will be chosen in elections held by the local recognized parent teacher organization under the direction of the principal, or if none exists, chosen by a representative process approved by the school committee. Said parents shall have parity with professional personnel on the school councils; teachers who shall be selected by the teachers in such school; other persons, not parents or teachers of students at the school, drawn from such groups or entities as municipal government, business and labor organizations, institutions of higher education, human services agencies or other interested groups; and for schools containing any of the grades nine to twelve, at least one such student; provided, however, that not more that fifty percent of the council shall be non-school members. The principal, except as otherwise provided herein, shall have the

responsibility for defining the composition of and forming the group pursuant to a representative process approved by the superintendent and school committee and for convening the first meeting no later than forty days after the first day of school, at which meeting a co-chairman shall be selected. School councils should be broadly representative of the racial and ethnic diversity of the school building and community. For purposes of this paragraph the term "non-school members" shall mean those members of the council, other than parents, teachers, students and staff of the school.

Nothing contained in this section shall require a new school council to be formed if an existing school council fulfills the intent of this section, the parent and teacher members thereof were selected in a manner consistent with the provisions of this section and the membership thereof complies with the aforesaid fifty percent requirement.

Meetings of the school council shall be subject to the provisions of sections twenty-three A, twenty-three B and twenty-three C of chapter thirty-nine.

The school council shall meet regularly with the principal of the school and shall assist in the identification of the educational needs of the students attending the school, in the review of the annual school budget, and in the formulation of a school improvement plan, as provided below.

The principal of each school, in consultation with the school council established pursuant to this section shall adopt educational goals for the schools consistent with the goals and standards including the student performance standards, adopted by the board pursuant to section one D of chapter sixty-nine, and consistent with any educational policies established for the district, shall assess the needs of the school in light of those goals, and shall formulate a school improvement plan to advance such goals, to address such needs and to improve student performance. The plan shall include an assessment of the impact of class size on student performance, and shall consider student to teacher ratios and other factors and supportive adult resources, and may include a scheduled plan for reducing class size. The plan shall address professional development for the school's professional staff, the allocation of any professional development funds in the annual school budget, the enhancement of parental involvement in the life of the school, safety and discipline, the establishment of a welcoming school environment characterized by tolerance and respect for all groups, extracurricular activities, the development of means for meeting the diverse learning needs of as many children as possible, including children with special needs currently assigned to separate programs, within the regular education programs at the school, and such further subjects as the principal, in consultation with the school council, shall consider appropriate. In school districts with language minority student populations the professional development plan under this section shall specify how the plan will address the need for training and skills in second language acquisition and in working with culturally and linguistically diverse student populations. Each school improvement plan shall be submitted to the school committee for review and approval every year. If said school improvement plan is not reviewed by the school committee within thirty days of said school committee receiving said school improvement plan, the plan shall be deemed to have been approved.

Nothing contained in this section shall prevent the school committee from granting

a school council additional authority in the area of educational policy; provided, however, that school councils shall have no authority over matters which are subject to chapter one hundred and fifty E.

Section 59D. Superintendents and principals in every school district in the commonwealth shall pursue opportunities to establish school-community partnerships that may advance policy development, staff development, curriculum development, instructional enrichment and may provide material and financial support. The commissioner of education shall assist in and facilitate with the establishment of school-community partnerships. Subject to appropriation, the board shall establish a grant program to assist school districts in developing and implementing such partnerships.

SECTION 54. Section 67 of said chapter 71, as so appearing, is hereby amended by adding the following paragraph:-

A school district shall neither (i) employ a member of the immediate family of a superintendent, central office administrator, or school committee member, nor (ii) assign a member of the immediate family of the principal as an employee at the principal's school, unless written notice is given to the school committee of the proposal to employ or assign such person at least two weeks in advance of such person's employment or assignment. As used in this section, "immediate family" shall have the meaning assigned by subsection (e) of section one of chapter two hundred and sixty-eight A.

SECTION 55. Said chapter 71 is hereby further amended by adding the following section:-

Section 89. A charter school shall be a public school, operated under a charter granted by the secretary of education, which operates independently of any school committee and is managed by a board of trustees. The board of trustees of a charter school, upon receiving a charter from the secretary of education, shall be deemed to be public agents authorized by the commonwealth to supervise and control the charter school.

The purposes for establishing charter schools are: (1) to stimulate the development of innovative programs within public education; (2) to provide opportunities for innovative learning and assessments; (3) to provide parents and students with greater options in choosing schools within and outside their school districts; (4) to provide teachers with a vehicle for establishing schools with alternative, innovative methods of educational instruction and school structure and management; (5) to encourage performance-based educational programs and; (6) to hold teachers and school administrators accountable for students' educational outcomes.

Persons or entities eligible to submit an application to establish a charter school shall include, but not be limited to, a business or corporate entity, two or more certified teachers or ten or more parents. Said application may be filed in conjunction with a college, university, museum or other similar entity. Private and parochial schools shall not be eligible for charter school status.

The secretary of education shall establish the information needed in an application for the approval of a charter school; provided, however, that said application shall include the method for admission to a charter school. There shall be no application fee for admission

to a charter school.

Applications to establish a charter school shall be submitted each year by February fifteenth. The secretary of education shall review the applications no later than March fifteenth.

The secretary of education shall make the final determination on granting charter school status and may condition charters on the charter school's taking certain actions or maintaining certain conditions. No more than twenty-five charter schools shall be allowed to operate in the commonwealth at any time. Of these, no more than five shall be located in the city of Boston; no more than five shall be located in the city of Springfield; and no more than two shall be located in any other city or town. Under no circumstances shall the total number of students attending charter schools in the commonwealth be allowed to be greater than three-quarters of one percent of the total number of students attending public schools in the commonwealth.

A charter school established under a charter granted by the secretary shall be a body politic and corporate with all powers necessary or desirable for carrying out its charter program, including, but not limited to, the following:

(a) to adopt a name and corporate seal; provided, however, that any name selected must include the words "charter school";

(b) to sue and be sued, but only to the same extent and upon the same conditions that a town can be sued;

(c) to acquire real property, from public or private sources, by lease, lease with an option to purchase, or by gift, for use as a school facility;

(d) to receive and disburse funds for school purposes;

(e) to make contracts and leases for the procurement of services, equipment and supplies; provided, however, that if the board intends to procure substantially all educational services under contract with another person, the terms of such a contract must be approved by the secretary, either as part of the original charter or by way of an amendment thereto; provided, further, that the secretary shall not approve any such contract terms, the purpose or effect of which is to avoid the prohibition of this section against charter school status for private and parochial schools;

(f) to incur temporary debt in anticipation of receipt of funds;

(g) to solicit and accept any grants or gifts for school purposes;

(h) to have such other powers available to a business corporation formed under chapter one hundred and fifty-six B that are not inconsistent with this chapter.

Charter schools shall be open to all students, on a space available basis, and shall not discriminate on the basis of race, color, national origin, creed, sex, ethnicity, sexual orientation, mental or physical disability, age, ancestry, athletic performance, special need, or proficiency in the English language, and academic achievement. Charter schools may limit enrollment to specific grade levels or areas of focus of the school, such as mathematics, science or the arts.

A charter school may establish reasonable academic standards as a condition for eligibility for applicants. Preference for enrollment in a charter school shall be given to stud-

dents who reside in the city or town in which the charter school is located. If the total number of students who are eligible to attend and apply to a charter school and who reside in the city or town in which the charter school is located, or are siblings of students already attending said charter school is greater than the number of spaces available, then an admissions lottery shall be held to fill all of the spaces in that school from among said students. If there are more spaces available than eligible applicants from the city or town in which said charter school is located and who are siblings of current students, and more eligible applicants than spaces left available, then a lottery shall be held to determine which of said applicants shall be admitted. There shall be no tuition charge for students attending charter schools.

A student may withdraw from a charter school at any time and enroll in a public school where said student resides. A student may be expelled from a charter school based on criteria determined by the board of trustees, and approved by the secretary of education, with the advice of the principal and teachers.

A charter school may be located in part of an existing public school building, in space provided on a private work site, in a public building, or any other suitable location. A charter school may own, lease or rent its space.

A charter school shall operate in accordance with its charter and the provisions of law regulating other public schools; provided, however, that the provisions of sections forty-one and forty-two shall not apply to employees of charter schools. Charter schools shall comply with the provisions of chapters seventy-one A and seventy-one B; provided, however, that the fiscal responsibility of any special needs student currently enrolled in or determined to require a private day or residential school shall remain with the school district where the student resides.

Students in charter schools shall be required to meet the same performance standards, testing and portfolio requirements set by the board of education for students in other public schools.

The board of trustees, in consultation with the teachers, shall determine the school's curriculum and develop the school's annual budget.

Employees of charter schools shall be considered public employees for purposes of tort liability under chapter two hundred and fifty-eight and for collective bargaining purposes under chapter one hundred and fifty E. The board of trustees shall be considered the public employer for purposes of tort liability under said chapter two hundred and fifty-eight and for collective bargaining purposes under said chapter one hundred and fifty E. Teachers employed by a charter school shall be subject to the state teacher retirement system under chapter thirty-two and service in a charter school shall be "creditable service" within the meaning thereof.

Each local school district shall be required to grant a leave of absence to any teacher in the public schools system requesting such leave in order to teach in charter schools. A teacher may request a leave of absence for up to two years.

At the end of the two year period, the teacher may make a request to the superintendent that such leave be extended for an additional two years, and approval for said request shall not be unreasonably withheld or he may return to his former teaching position. At the

end of the fourth year, the teacher may either return to his former teaching position or, if he chooses to continue teaching at the charter school, resign from his school district position.

Notwithstanding section fifty-nine C, the internal form of governance of a charter school shall be determined by the school's charter.

A charter school shall comply with all applicable state and federal health and safety laws and regulations.

The children who reside in the school district in which the charter school is located shall be provided transportation to the charter school by the resident district's school committee on the same terms and conditions as transportation is provided to children attending local district schools. Students who do not reside in the district in which the charter school is located shall be eligible for transportation in accordance with section twelve B of chapter seventy-six.

Each charter school shall submit to the secretary, to each parent or guardian of its enrolled students, and to each parent or guardian contemplating enrollment in that charter school an annual report. The annual report shall be issued no later than August first of each year for the preceding school year. The annual report shall be in such form as may be prescribed by the secretary of education and shall include at least the following components:

(a) discussion of progress made toward the achievement of the goals set forth in the charter;

(b) a financial statement setting forth by appropriate categories, the revenue and expenditures for the year just ended.

Individuals or groups may complain to a charter school's board of trustees concerning any claimed violation of the provisions of this section by the school. If, after presenting their complaint to the trustees, the individuals or groups believe their complaint has not been adequately addressed, they may submit their complaint to the secretary of education who shall investigate such complaint and make a formal response.

A charter granted by the secretary of education shall be for five years. The secretary of education may revoke a school's charter if the school has not fulfilled any conditions imposed by the secretary of education in connection with the grant of the charter or the school has violated any provision of its charter. The secretary may place the charter school on a probationary status to allow the implementation of a remedial plan after which, if said plan is unsuccessful, the charter may be summarily revoked.

The secretary shall develop procedures and guidelines for revocation and renewal of a school's charter.

Notwithstanding the foregoing, no school building assistance funds, so-called, shall be awarded to a charter school for the purpose of constructing, reconstructing or improving said school.

Charter schools shall be funded as follows: If a student attending a charter school resides in a community with a positive foundation gap, the district of the city or town in which said student resides shall pay to the charter school an amount equal to the average cost per student in said district. If a student attending a charter school resides in a community that does not have a positive foundation gap pursuant to chapter seventy, the district of the

city or town in which said student resides shall pay to the charter school an amount equal to the lesser of: (i) the average cost per student in said district; and (2) the average cost per student in the district in which the charter school is located.

(b) Notwithstanding the provisions of section twelve, or any other special or general law to the contrary, any child may attend a public school, in a city or town where he does not reside; provided, however, that the receiving district shall be paid by the commonwealth a tuition rate as established in subsection (f).

(c) Not later than May first of every year, the school committee of each city, town or regional school district shall submit a report to the department stating:

(1) The capacity of each school in said city, town or regional school district for the following academic year.

(4) The number of additional seats therefore available to non-resident students reduced by the number of students enrolled under the program for the elimination of racial imbalance as provided in section twelve A, in said charter school or each school in said city, town or regional school district. The board may require every district to update this report in whatever manner is required to effectuate the objectives of this section.

(d) Each city, town or regional school district shall enroll non-resident students at the school of such non-resident student's choice; provided, however, that such receiving district has seats available as stated in said report; provided, however, that this obligation to enroll non-resident students shall not apply to a district for a school year in which its school committee, prior to June first, after a public hearing, adopts a resolution withdrawing from said obligation, for the school year beginning the following September. Any such resolution of a school committee shall state the reasons therefor, and such resolution with said reasons shall be filed with the department of education; provided, however, that said department shall have no power to review any such decision by a school committee. If the city, town

or regional school district operates an intra-district choice plan, non-resident students may apply for schools on the same basis as resident students, but the intra-district choice plan may give preference to resident students in assigning students to schools.

(e) Not later than the first day of July, each city, town or regional school district shall each year submit a non-resident attendance report to the board and to the state treasurer, certifying the number of non-resident applicants for each available seat in each school, the disposition of their applications, how many of said applicants will be attending the district in the next school year, the identity of the sending districts for those students, the annual amount of tuition for each such child and the total tuition owed to the district based on full or partial attendance, itemized by the amount attributable to each city or town of residence. The board may review said certification to determine that the amount of the individual tuition charged for each child is in accordance with the provisions of this section and shall inform the state treasurer of any errors. The department may also, on a post-audit basis, verify the admission and attendance of the number of children certified by each school district. In addition to the foregoing, all said districts shall, on October first and April first, report to the board and certify to the state treasurer accurate and up to date reports of all the information required in the non-resident attendance report. If the total number of students admitted to receiving districts pursuant to this section is greater than the state school choice limit, the board shall notify all districts that no more students may be accepted pursuant to this section.

(f) For each student enrolling in a receiving district, there shall be a school choice tuition amount. Said tuition amount shall be equal to seventy-five percent of the actual per pupil spending amount in the receiving district, but not more than five thousand dollars; provided, however, that for special education students whose tuition amount shall remain the expense per student for such type of education as is required by such non-resident student. The state treasurer is hereby authorized and directed to deduct said school choice tuition amount from the total education aid, as defined in chapter seventy, of said student's sending district, prior to the distribution of said aid. In the case of a child residing in a municipality which belongs to a regional school district, the school choice tuition amount shall be deducted from said chapter seventy education aid of the school district appropriate to the grade level of the child. If, in a single district, the total of all such deductions exceeds the total of said education aid, this excess amount shall be deducted from other aid appropriated to the city or town. If, in a single district, the total of all such deductions exceeds the total state aid appropriated, the commonwealth shall appropriate this excess amount; provided, however, that if said district has exempted itself from the provisions of chapter seventy by accepting section fourteen of said chapter, the commonwealth shall assess said district for said excess amount.

(g) The state treasurer is further directed to disburse to the receiving district an amount equal to each student's school choice tuition as defined in subsection (f).

Said information shall include the school profiles, so-called, developed pursuant to section one B of chapter sixty-nine. The board may include information regarding regional choice initiatives as deemed appropriate. The system shall have as its primary goal to ensure that all parents have an equal opportunity to participate in the program of interdistrict choice. The board of education, when disseminating this information shall encourage the parent and student to make at least one visit to the school of choice as part of the application procedure.

(i) Subject to appropriation, the board of education shall develop and administer a school choice transportation reimbursement program for the purpose of providing reimbursement for the transportation of pupils enrolled under the provisions of this section. Pupils eligible for said reimbursement must be eligible to receive free or reduced cost lunches under eligibility guidelines promulgated by the federal government under 42 USC section 1758. The board may limit said reimbursement to a yearly amount. The types of transportation to be reimbursed pursuant to said program shall include, but need not be limited to, the following: (1) transportation by school buses provided by the sending or receiving district; (2) transportation provided by the parent or guardian of the child; (3) transportation provided by public transportation. All eligible pupils who attend a school district contiguous to the school district of residence of such pupil shall be eligible for said reimbursement. If cost-effective transportation alternatives exist for pupils who attend districts not contiguous to the school districts of residence of such pupil, the board may provide a transportation reimbursement. Said reimbursements may be paid to the district in which the pupil is enrolled, the district of residence of the student, or the parent, guardian or person acting as guardian of the student; provided, however, that said district or parent provide documentation of the transportation expenditure. The board of education shall promulgate regulations for the program to be placed on file with the joint committee on education, arts and humanities of the general court. The board of education shall disseminate information to parents and school systems detailing the availability of said transportation reimbursements. A full description of said school choice transportation reimbursement program shall be submitted to the house and senate committees on ways and means and shall not become effective until ninety days after said submission. Notwithstanding the second paragraph of section one, nothing in this section shall confer upon any student attending a private school any right to transportation or reimbursement therefor.

(j) School committees may establish terms for accepting non-resident students; provided, however, that if the number of non-resident students applying for acceptance to said district exceeds the number of available seats, said school committee shall select students for admission on a random basis; provided, further, that said school committee shall conduct said random selection twice: one time prior to July first and one time prior to November first; provided, further, that no school committee shall discriminate in the admission of any child on the basis of race, color, religious creed, national origin, sex, age, sexual orientation, ancestry, athletic performance, physical handicap, special need or academic

performance or proficiency in the English language. The Massachusetts commission against discrimination, established by section fifty-six of chapter six, shall have jurisdiction to enforce the provisions of this section; provided, however, that all students described in subsection (m) shall be entitled to remain in the receiving districts they are attending or have been accepted to attend. Any school committee that accepts non-resident students under the provisions of this section shall notify each district from which it has accepted a non-resident student of its acceptance of that student; provided, however, that a school committee may not publicly release the names of students leaving or entering a district under the provisions of this section.

(k) Any child accepted to attend a public school in a community other than the one in which he resides pursuant to this section shall be permitted to remain in that school system until his high school graduation, unless there is a lack of funding of the program as authorized by said sections.

(l) Notwithstanding the provisions of this section or any general or special law to the contrary, any school district which admitted children on a private tuition basis prior to June thirtieth, nineteen hundred and ninety-one may continue, on that basis, to admit any child who attended its school system prior to that date, as well as any sibling or step-sibling of such child and any foster child residing in the home of such child.

(m) Any student who, pursuant to the provisions of this section, has been attending or has been admitted to attend a public school of a city or town in which he does not reside and for whom the commonwealth has been paying tuition or, in the case of a student recently admitted, would be required to pay tuition in the coming year, shall be deemed to be a student admitted pursuant to paragraph (j), and shall be subject to all of the provisions of this section; provided, however, that said students shall be allowed to remain in said school notwithstanding any determination of capacity or decision by the receiving district to withdraw made pursuant to this section.

(n) Subject to appropriation, any sending district for which the provisions of subsection (f) result in a reduction in state aid shall be eligible to apply for a school choice reimbursement from the commonwealth. If said sending district does not have a positive foundation gap, as defined in chapter seventy, the amount of said reimbursement shall be the above foundation reimbursement amount for that fiscal year. If said sending district does have a positive foundation gap, the amount of said reimbursement shall be equal to one hundred percent of the positive difference, if any, between (i) the amount transferred pursuant to subsection (f), and (ii) the product of the number of students leaving the sending district and the average per pupil expenditure in the sending district; provided, however, that if any district has exempted itself from the provisions of said chapter seventy by accepting section fourteen of said chapter seventy, the district shall be ineligible for a reimbursement under this subsection; provided, further, that if any district that does not have a positive foundation gap becomes a sending district for the first time in fiscal year nineteen hundred and ninety-five or any year thereafter, the reimbursement amount for that district in the first year that it is a sending district shall be the fiscal year nineteen hundred and ninety-four reimbursement amount; the reimbursement amount for that district in its second year as a

sending district shall be the fiscal year nineteen hundred and ninety-five reimbursement amount. Said reimbursement application shall be submitted to the department of education on or before October first of each year together with an educational corrective action plan containing information, recommendations, and suggestions relative to (1) areas needing improvement within the school system of the applicant, (2) methods of improvement to be employed, (3) goals and objectives of said improvement, (4) evaluation and control methods to be used, (5) personnel to be engaged in such improvement, (6) results intended to be accomplished within one year from the date of application, and (7) methods of increasing parental involvement to be employed; provided, however, that any community or regional school district that has a previously approved plan need not refile said plan; provided, further, that approval of said plan by said board shall act as a condition precedent to the distribution of said reimbursement to the applicant community or regional school district. Under no circumstances shall the total amount expended pursuant to subsections (h) and (i) and to reimburse sending districts, pursuant to this paragraph, be greater than twenty million dollars. If, in any year, the total amount that would be required to reimburse said cities at said rates would be greater than twenty million dollars, then the reimbursement rates shall be reduced proportionately to those rates at which the total cost does not exceed twenty million dollars.

(o) The commonwealth and the school committee of any town may accept funds from the federal government for the purposes of this section. Any amounts received by the school committee of any town from the federal government, from the commonwealth or from a charitable foundation or private institution shall be deposited with the treasurer of such town and held as a separate account, and may be expended by said school committee without further appropriation, notwithstanding the provisions of section fifty-three of chapter forty-four. Whenever such funds are received after the submission of the annual school budget, all or any portion thereof may be expended by the school committee without further appropriation, but shall be accounted for in the next annual school budget.

SECTION 83. Notwithstanding the provisions of chapter thirty-two of the General Laws or any other general or special law to the contrary, any city, town, regional school committee, independent vocational school, county agricultural school or educational collaborative which accepts the provisions of this section in the manner hereinafter provided shall, in cooperation with and upon the prescribed notification to the teacher's retirement board established under the provisions of section twenty of chapter thirty-two of the General Laws, establish and implement an early retirement incentive program for members of the teachers' retirement system and teachers employed by the city of Boston; provided, however, that in order to be deemed eligible for any of the benefit options under such program, a member (*i*) shall be employed by a city, town, regional school committee, independent vocational school, county agricultural school or educational collaborative which has accepted the provisions of this section in a timely manner as specified in this section; (*ii*) shall be eligible to receive a superannuation retirement allowance in accordance with the

provisions of subdivision (1) of section five or subdivision (1) of section ten of said chapter thirty-two upon the effective retirement date specified in his written application to the teachers' retirement board or to the retirement board of the city of Boston; (*iii*) shall have by the date of his retirement twenty years of creditable service as a teacher in the teachers' retirement system, as a teacher in the Boston retirement system, as provided by subdivision (4) of section three of said chapter thirty-two, or in any combination thereof; and (*iv*) shall have filed a written application during one of the application periods specified in this section.

The early retirement incentive program authorized by this section may be offered to teachers by any accepting city, town, regional school committee, independent vocational school, county agricultural school or educational collaborative in either nineteen hundred and ninety-three or nineteen hundred and ninety-four, but not in both years, as provided herein. Said retirement incentive shall be limited to two thousand five hundred eligible employees in nineteen hundred and ninety-three and to two thousand five hundred eligible employees in nineteen hundred and ninety-four. The annual cost to the state of the additional benefits payable in accordance with the retirement incentive program established by this section shall not exceed twenty million dollars after the second enrollment period. The teachers' retirement board, with the cooperation of the Boston employees' retirement board, if necessary, shall calculate the cost to the state of the additional benefits payable in accordance with said retirement incentive program for the first year of the incentive program and the projected cost to the state of the additional benefits payable in accordance with said retirement incentive program for the second year of the incentive program and shall report on the total actual and projected state cost of said additional benefits to the secretary of administration and finance, the joint committee on public service, and the house and senate committees on ways and means no later than December thirty-first, nineteen hundred and ninety-three. If the report finds that the actual and projected annual state cost of the additional benefits payable in accordance with said retirement incentive program will exceed twenty million dollars, the secretary of administration and finance shall recommend corrective legislation to reduce the cost of the second year of the retirement incentive to bring the cost to the state of said retirement incentive under twenty million dollars.

In order to offer the early retirement incentive program in nineteen hundred and ninety-three, any such city, town, regional school committee, independent vocational school, county agricultural school or educational collaborative must accept this section on or after the effective date of this act but no later than thirty days after the effective date of this act. The application period in nineteen hundred and ninety-three for retirement under this program shall commence on July first, nineteen hundred and ninety-three and end on July thirty-first, nineteen hundred and ninety-three. Teachers retiring pursuant to this program in nineteen hundred and ninety-three shall be retired for superannuation as of August thirty-first, nineteen hundred and ninety-three.

In order to offer the early retirement incentive program in nineteen hundred and ninety-four, any such city, town, regional school committee, independent vocational school, county agricultural school or educational collaborative must accept this section on or after

January first, nineteen hundred and ninety-four but no later than April thirtieth, nineteen hundred and ninety-four. The application period in nineteen hundred and ninety-four for retirement under this program shall commence on June first, nineteen hundred and ninety-four and end on June thirtieth, nineteen hundred and ninety-four. Teachers retiring pursuant to this program in nineteen hundred and ninety-four shall be retired for superannuation as of August thirty-first, nineteen hundred and ninety-four.

This section shall be accepted only in the following manner: in a city, by vote of the school committee and the city council, with the approval of the mayor or city manager; in a town, by vote of the school committee, the selectmen, and the town meeting; in a regional school district or for an independent vocational school, by vote of the regional school committee; for a county agricultural school, with the approval of the county advisory board or other county legislative body and of the county commissioners or other county executive authority, but in Barnstable, Nantucket and Suffolk counties, by the county commissioners only; for an educational collaborative, by vote of its board of directors, with the approval of the city councils and town meetings in all member municipalities. Any fiscal oversight board or fiscal control board established by a special act, which consists of at least the secretary of administration and finance or his designee and the commissioner of revenue or his designee, must also approve a municipality's acceptance.

If, in either year of the retirement incentive, the total number of applications exceeds two thousand five hundred, the teachers' retirement board shall proportionately reduce the number of accepted applications from each city, town, regional school committee, independent vocational school, county agricultural school or educational collaborative accepting the provisions of this section in the particular year by limiting the total number of acceptable applications in each such jurisdiction to an amount calculated by multiplying two thousand five hundred by a fraction that is equal to the number of teachers who are members in-service of the teachers retirement system or the city of Boston retirement system, if applicable, in each jurisdiction divided by the total number of teachers who are members in-service of the teachers retirement system or the city of Boston retirement system, if applicable, in the total number of accepting jurisdictions for the particular year.

After the application deadline of June thirtieth, the teachers' retirement board may adjust said limits by totalling the amount of unused authorized applications in accepting jurisdictions where the total applications are less than the authorized limit. The total unused authorized applications may then be redistributed to accepting jurisdictions where the number of applications exceeded the limit. The number redistributed to any such jurisdiction shall be proportional to the ratio of total applications in the jurisdiction to the total of all applications in the accepting jurisdictions where applications exceeded the application limit; provided, however, that the adjusted limit, which equals the sum of the number of reallocated authorized applications and the amount of the original limit, shall not exceed the total number of actual applications in a jurisdiction. Within each such city, town, regional school committee, independent vocational school, county agricultural school or educational collaborative, if the number of applications exceeds the adjusted limit, the teachers' retirement board and the city of Boston retirement board, if applicable, shall prioritize and

award acceptable applications on the basis of length of creditable service as a public school teacher.

For the purposes of this section, words shall have the same meanings as in chapter thirty-two of the General Laws, unless otherwise expressly provided or unless the context clearly requires otherwise; provided, however, that the meaning of "teacher" shall be as defined in section one of said chapter thirty-two without the exclusion in said definition of a teacher in the public schools in the city of Boston. An employee who retires and receives an additional benefit in accordance with the provisions of this section shall be deemed to be retired for superannuation under the provision of said chapter thirty-two and shall be so subject to any and all provisions of said chapter thirty-two; provided, however, that a teacher in the city of Boston retirement system retired under the provisions of this section shall be subject to the provisions of said chapter thirty-two only to the extent that he would have been if his retirement had not been in accordance with the provisions of this section.

The total normal yearly amount of the retirement allowance, as determined in accordance with the provisions of section five of said chapter thirty-two, of any employee who retires and receives an additional benefit under the retirement incentive program in accordance with the provisions of this section shall not exceed four-fifths of the average annual rate of his regular compensation received during any period of three consecutive years of creditable service for which the rate of compensation was the highest or of the average annual rate of his regular compensation received during the periods, whether or not consecutive, constituting his last three years of creditable service preceding retirement, whichever is greater.

For any married employee who retires and receives an additional benefit under the provisions of this act, an election of a retirement option under the provisions of section twelve of said chapter thirty-two shall not be valid unless (*i*) it is accompanied by the signature of the member's spouse indicating the member's spouse's knowledge and understanding of the retirement option selected, or (*ii*) a certification by the teachers' board of retirement or the retirement board of the city of Boston, if applicable, that such spouse has received notice of such election as hereinafter provided. If any member who is married files an election which is not so signed by his spouse, the teachers' board of retirement or the retirement board of the city of Boston, if applicable, shall within fifteen days notify the member's spouse by registered mail of the option election, and the election shall not take effect until thirty days following the date on which such notification is sent, and such election may be changed by the member at any time within thirty days, or at any other time permitted under said chapter thirty-two. Nothing in this section shall be deemed to affect the effective date of any retirement allowance, but in the event of any election having been filed which is not so accompanied, the payment of any allowance so elected shall not be commenced earlier than thirty days after the sending by the appropriate board of retirement of the notice required hereunder.

The teachers' board of retirement or the retirement board of the city of Boston, if applicable, shall provide retirement counseling to employees who choose to consider retiring or who choose to retire under the retirement incentive program established by this section. SECTION 4. The state treasurer shall make advance payments for some or all of periodic local reimbursement or assistance programs to any city, town, or regional school district that demonstrates an emergency cash shortfall, as certified by the commissioner of revenue and approved by the secretary of administration and finance, pursuant to guidelines established by said secretary.

SECTION 5. Notwithstanding the provisions of sections thirty-one of chapter eighty-one of the General Laws or any other special law to the contrary, the portion of the Highway Fund allocated for reimbursements to cities and towns for costs actually incurred in constructing, maintaining and policing city or town streets or roads, as appropriated in item 6005-0017 of section two of this act, shall be distributed in fiscal year nineteen hundred and ninety-four proportional to the fiscal year nineteen hundred and ninety-three distribution of said Highway Fund reimbursements.

SECTION 6. All sums appropriated under the provisions of this act shall be expended in a manner reflecting and encouraging a policy of nondiscrimination and equal opportunity for members of minority groups, women, and handicapped persons. All officials and employees of any agency, board, or division of the commonwealth receiving monies under section two of this act shall take affirmative steps to ensure equality of opportunity in the internal affairs of state government, as well as in their relations with the public, including those persons and organizations doing business with the commonwealth.

Each agency, board, or division, in spending appropriated sums and discharging its statutory responsibilities, shall adopt measures to ensure equal opportunity in the areas of hiring, promotion, demotion or transfer, recruitment, layoff or termination, rates of compensation, in-service or apprenticeship training programs, and all terms and conditions of employment. Such affirmative action program shall include any action necessary to guarantee equal opportunity for members of minority groups, women and handicapped persons.

The secretary of administration and finance shall conduct an ongoing review of affirmative action steps taken by various agencies, boards, or divisions, to determine whether such agencies are complying with the intent of this section. Whenever such noncompliance is determined by the commissioner, he shall hold a public hearing on the matter and report his resulting recommendations to the head of the particular agency, board or division, to the governor, and to the Massachusetts commission against discrimination.

SECTION 7. Notwithstanding the provisions of any general or special law to the contrary, the appropriations made by this act shall constitute complete satisfaction of all the financial obligations of the commonwealth for fiscal year nineteen hundred and ninety-four pursuant to chapter seventy-one of the acts of nineteen hundred and ninety-three.

SECTION 8. If the commissioner of the department of social services determines that funds made available pursuant to items 4800-0016, 4800-0017, 4800-0030 and 4800-0041 of section two of this act are insufficient to fund the services for which said items may be expended, said commissioner may, after submitting such written determination and giving thirty days prior notice to the house and senate committees on ways and means and

the secretaries of administration and finance and health and human services, reallocate fifteen percent of the amount appropriated for each of said items among said items as deemed necessary in conformance with said notice.

The department of social services shall file with house and senate committees on ways and means quarterly family-based services reports. Said reports shall indicate the number of clients of said department who have been transferred from the foster care and group care caseloads to family-based services provided by the department. Said reports shall be filed no later than fifteen days after the end of each quarter of the fiscal year beginning July first, nineteen hundred and ninety-three.

SECTION 9. Notwithstanding the provisions of any general or special law to the contrary, if the department of social services receives non-tax revenues in excess of the estimated amount of non-tax revenue receipts for said department in section one B of this act, said department may retain and expend said excess revenues for the purposes of implementing the recommendations of the Special Commission on Foster Care; provided, however, that the department shall not expend said excess revenues until the General Court approves a supplemental budget request authorizing such expenditures.

SECTION 10. Notwithstanding the provisions of any general or special law to the contrary, any agency, department, division, or commission within the executive office of consumer affairs and business regulation which is authorized to assess a regulated entity for the cost of the operation and general administration of such agency, department, division or commission shall add to such assessment so much of the operating costs of said executive office as are attributable to said agency, department, division or commission.

SECTION 11. The group insurance commission is hereby directed to develop a rational and equitable chargeback plan, which takes into account true health insurance costs per employee, to replace the system of agency chargebacks most recently in use. The commission is shall examine the possibility of developing incentives, either as part of said chargeback plan or otherwise, to encourage employees to enroll in more cost-effective health insurance plans. The commission shall submit a report of its plan, as well as draft legislation to implement such plan, if necessary, to the house and senate committees on ways and means, and to the secretary of administration and finance, no later than October thirty-first, nineteen hundred and ninety-three.

SECTION 12. The secretary of administration and finance shall annually on or before February first submit to the house and senate committees on ways and means the following information for each state authority as defined by section one of chapter twenty-nine of the General Laws and for each regional transit authority which has debt authorized, but unissued, or currently outstanding, whether or not such state or regional transit authority receives a periodic appropriation from the commonwealth: (1) a statement of authorized, but unissued, and currently outstanding bonds and notes of the authority as of the end of the preceding state fiscal year; (2) an estimate of the amounts of said bonds and notes to be authorized, but unissued and currently outstanding at the end of the current state

fiscal year; and (3) an estimate of the amount of said bonds and notes, including the amounts to be sold, retired, or refinanced, at the end of the subsequent state fiscal year; and (4) a summary, by sources, of revenues to finance said bonds and notes including any dedicated funding or any other financial assistance from the commonwealth, including but not limited to guarantees, contract assistance, or other such assistance.

Notwithstanding the provisions of any general or special law to the contrary, every chief executive officer of each such state or regional transit authority is hereby authorized and directed to provide the necessary information to the secretary of administration and finance to ensure his timely compliance with the provisions of this section.

SECTION 13. Notwithstanding the provisions of any general or special law to the contrary, the secretary of administration and finance is hereby authorized and directed to charge all agencies for the commonwealth's share of the health insurance costs incurred on behalf of any employees of that agency who are on leave of absence for a period of more than one year. The amounts received in payment for such charges shall be credited to the General Fund.

SECTION 14. Notwithstanding the provisions of any general or special law to the contrary, the secretary of administration and finance is hereby authorized and directed to charge agencies as hereinafter provided for workers' compensation costs incurred on behalf of the employees of said agencies. The commissioner of the division of public employee retirement administration shall notify agencies within ten days of the effective date of this act as to the change in calculation of workers' compensation chargebacks from fiscal year nineteen hundred and ninety-four.

The commissioner of the division of public employee retirement administration shall notify agencies not later than fourteen days after the effective date of this act as to the amount of their estimated workers' compensation costs for the fiscal year beginning July first, nineteen hundred and ninety-four, and shall require all agencies to encumber funds that are sufficient to meet the estimated annual charges. The estimated workers' compensation costs for each agency shall be not less than the amount of the actual workers' compensation costs incurred by said agency during the fiscal year ending June thirtieth, nineteen hundred and ninety-three and may include such additional sums as are deemed necessary by regulations promulgated pursuant to this section. Said commissioner shall revise the estimated workers' compensation costs for each agency on the first day of each quarter of the fiscal year commencing July first, nineteen hundred and ninety-four. Within thirty days after the effective date of this act, for any agency that fails to encumber funds sufficient to meet the annual estimated charges, the comptroller is hereby authorized and directed to encumber funds that are sufficient to meet the annual charges on behalf of such agency.

The comptroller shall charge each agency's workers' compensation costs to the agency's appropriation amount and shall transfer said amount to item 1108-6201 of section two of this act for the purposes of workers' compensation paid to public employees for any costs incurred during the fiscal year. The division of public employee retirement administration may expend an amount so collected for all agencies under this section not to

exceed seventy-two million four hundred and ninety-nine thousand and seventy-nine dollars, to pay for hospital, physician, benefits, and other costs without further appropriation.

By not later than fourteen days after the effective date of this act, and on the first day of each succeeding quarter during the fiscal year, the division of public employee retirement administration shall bill agencies for twenty-five percent of said agency's annual estimated workers' compensation costs. Each agency shall be credited or billed for any differences between the previous quarter's estimated costs and actual costs incurred by said agency.

The commissioner of the division of public employee retirement administration is authorized to establish regulations and procedures to implement this section; provided, however, that all regulations and procedures to further implement this section and amendments thereto shall be filed with the house and senate committees on ways and means prior to implementation. Said secretary shall file a quarterly report, which shall include the annual estimated charge, and the quarterly actual charge, and explanations for any unpaid charges with the house and senate committees on ways and means.

SECTION 15. Notwithstanding the provisions of any general or special law to the contrary, no funds of the state employees' retirement system, the state teachers' retirement system, or the Pension Reserves Investment Trust Fund shall be loaned or pledged to the commonwealth, or used for the purchase of any bond, note or other obligation of the commonwealth without the prior approval of the investment committee established under paragraph (a) of subdivision (1) of section twenty-three of chapter thirty-two of the General Laws or of the pension reserves investment management board, as applicable, and the prior written notification of the house and senate committees on ways and means; provided, that the requirements of this section shall be in addition to and not in lieu of any other requirements established under any general or special law for the investment and use of such funds, and shall not be construed to affect any other obligations of said systems or said fund.

SECTION 16. The secretary of communities and development is hereby authorized and directed to expend funds appropriated in item 3100-0200 of section two of this act to develop and implement a program of competitive municipal management grants designed to promote economy, efficiency and effectiveness in the delivery of local services by cities and towns. Such a program shall include, but not be limited to, an emphasis on sound fiscal management, innovative programs, service cost savings, regionalization, privatization, shared services, collaborative purchasing and professional management, including equipment and hardware; provided, however, that the program guidelines and selection criteria shall allow all thirteen of the commonwealth's designated regional planning agencies the right to directly apply for municipal incentive grants inasmuch as said agencies are, by definition, composed of local governments; provided, further, that the secretary may allow the Southeastern Massachusetts Partnership or any other collaborative established pursuant to law comprising two or more municipalities to participate in the program authorized by this section; provided, further, that the secretary shall monitor the expenditure of grant funds by said agencies to ensure the compliance by each agency with its plan of activities and shall withdraw approval of any grant to a regional planning agency found not to be in compliance

Nothing in this section shall preclude an appropriate public authority from agreeing to establish a health and welfare trust fund under section fifteen.

Any such contract or contracts with any one or more health insurance carriers shall be in conformity with an agreement reached by an appropriate public authority and a public employee committee. Such election by the appropriate public authority may be renewed in conformity with any successor agreement reached with a public employee committee.

The public employee committee shall be composed of a representative of each collective bargaining unit in the governmental unit and a retiree. The retiree representative shall be a designee of the Retired State, County and Municipal Employees Association. The retiree representative shall have a ten percent vote. The remaining ninety percent vote shall be divided as follows: each collective bargaining unit represented on the public employee committee shall have a weighted vote equal to the proportion which the number of employees eligible for health insurance under this chapter employed in the bargaining unit he represents bears to the total number of employees eligible for health insurance in all bargaining units of the governmental unit. Any agreement with the public authority must be approved by seventy percent of votes cast by the representatives on the public employee committee.

For the purposes of this section, a health carrier shall include any insurance company organized pursuant to chapter one hundred seventy-five, hospital service corporation organized pursuant to chapter one hundred seventy-six A, medical service corporation organized pursuant to chapter one hundred seventy-six I, or, in the case of a governmental unit which is partially or fully self-insured with respect to health coverage, any third party administrator selected by the governmental unit, which may include but is not limited to any health carrier.

An agreement so approved under this section shall be binding on all active and retired employees for whom health coverage is being purchased; shall supersede any conflicting provisions of all collective bargaining agreements and shall itself not be subject to supercedence in any statutory impasse proceeding under chapter one hundred and fifty E. Any dispute arising over the interpretation or application of the public employee committee agreement under this section may be submitted to binding arbitration under the labor arbitration provisions of the American Arbitration Association upon request of the public employee committee. Any request must be approved by seventy percent of votes cast by the representatives on the public employee committee.

A governmental unit which elects to provide health coverage to subscribers under this section shall be deemed in full compliance with any other provisions of this chapter regulating the procurement of health insurance.

A governmental unit which elects to provide health coverage under this section pursuant to an agreement approved by a public employee committee, may provide such coverage either as a single governmental unit or, pursuant to section twelve, through joint purchase with other governmental units or, with multiple governmental units, through a risk-sharing pool, trust or health carrier or third party administrator, or by making payments to a health and welfare trust fund to provide health coverage under this section either as a single governmental unit or together with multiple governmental units.

The appropriate public authority may contract with a health carrier for direct coverage of subscribers for whom the carrier's geographic service area provides appropriate access and coverage for other subscribers in accordance with subsection (d) herein.

(b) Nothing in this section shall be deemed to require, preclude or permit any change in any aspect of health coverage for active employees authorized by this section except where an agreement to provide for such change is reached by an appropriate public authority and a public employee committee in an agreement entered into or modified subsequent to the effective date of this subsection. In the absence of a successor agreement approved under this section the prior agreement of the public employee committee and the appropriate public authority regarding the provision of health insurance shall remain in effect.

(c) Nothing in this section shall be construed so as to relieve any governmental unit from providing health coverage to any employee, retiree, surviving spouse or dependent to whom it has an obligation to provide coverage under any other provision of this chapter.

(d) The agreement reached between an appropriate public authority and the public employee committee shall provide for those subscribers who, by reason of residence or domicile, cannot be appropriately served within the service area of the health carrier or carriers included in said agreement, subject to the provisions set forth in the paragraph below.

Coverage for active employees under this subsection shall be pursuant to and in conformity with the agreement required by this section and shall conform to all requirements of this section. The agreement reached between an appropriate public authority and the public employee committee shall provide that any subscriber who for reasons of residency

is not eligible for enrollment in any such plan offered by a governmental unit shall be covered under a plan offered pursuant to chapter one hundred and seventy-six I, if any such plan is provided for under said agreement; provided, that any such subscriber who lives ten miles or more from the nearest primary care physician providing care under said plan shall have out-of-pocket payments and medical deductibles limited to the amount that he would have paid had he utilized the network of medical services of the plan offered pursuant to chapter one hundred and seventy-six I. If the agreement reached between the appropriate public authority and the public employee committee provides for only health maintenance organizations or other health carriers that limit enrollment to a particular geographic area, then, notwithstanding any general or special law to the contrary, health maintenance organizations or other health carriers shall provide for the coverage of services provided or arranged for all subscribers who do not reside within the geographic service area of said carriers in the following manner: Any subscriber not eligible for direct coverage due to his residency shall have the same benefit schedule and premium contribution provided to subscribers residing within the carrier's geographic service area, including but not limited to covered services, out-of-pocket payments and medical deductibles for any and all medical services provided for or arranged pursuant to such agreement.

(e) Where an agreement reached by an appropriate public authority and the public employee committee covering the public employee committee of the governmental unit executed or modified subsequent to the effective date of this subsection so provides, the appropriate public authority shall, for a period of time specified by regulation of the group insurance commission transfer to said commission all subscribers for whom it provides health coverage. The regulations of said commission shall permit the governmental unit, upon agreement reached by the appropriate public authority and the public employee committee pursuant to this section, to withdraw from such transfer to said commission after a period of not less than three years following such transfer consistent with the provisions of subsection (f).

(f) Said commission shall negotiate and purchase health coverage for subscribers transferred pursuant to subsection (e) and shall promulgate regulations for coverage of such subscribers so transferred. The schedule of benefits available to such transferred subscribers shall be determined by said commission in accordance with chapter thirty-two A. Said commission shall offer such subscribers at least the same choice as to health carriers as is made available to state employees, subject only to the agreement reached between the appropriate governmental unit and the public authority committee. The governmental unit's contribution to the cost of health coverage for such subscribers, shall be as determined under this section, and shall not be subject to the provisions on contributions in said chapter thirty-two A. Said commission shall require the governmental unit to collect and forward to the said commission the full premium or cost of coverage, including the subscriber's contribution, if any; provided, that the commission shall require any governmental unit so transferring subscribers under this section, notwithstanding any general or special law to the contrary, to forward to the commission the full cost of at least one month's but not more than

three month's premiums for such transferred subscribers thirty days prior to the effective date of said transfer. For the purpose of determining the cost to subscribers transferred pursuant to subsection (d), the dollar amount payable by said subscribers shall be the same as the dollar amount paid by subscribers covered by the plan offered by the appropriate governmental unit, distinguishing only by the type of plan, individual, family or optional medicare extension plan, in which the subscriber enrolls. Said commission may also charge the governmental unit an administrative fee, to be determined by said commission, which shall be paid by the governmental unit and shall not be considered as part of the cost of coverage for purposes of determining the contributions of the governmental unit and its employees to the cost of health coverage. Any such administrative fee charged hereunder shall be used by said commission to pay any personnel or other costs associated with the administration of said plans.

(g) Any agreement reached between the governmental unit and the public employee committee shall provide that within the same health coverage plan the percentage contributed by the governmental unit to the premium or cost of health coverage shall be the same for all subscribers covered under this section. Said payments shall differ only by the type of coverage elected under the plan, individual, family, optional medicare extension or other; provided, however, that the percentage contributed by the governmental unit may vary among the different health coverage plans offered under the agreement reached between the governmental unit and the public employee committee. The agreement reached hereunder shall provide that the percentage contributed by said governmental unit to the premium or cost of at least one medicare extension plan available to all eligible subscribers shall be no less than the minimum percentage contributed by said governmental unit to any other health coverage plan offered pursuant to the agreement reached hereunder. Any governmental unit that accepts this section shall establish by agreement with the public employee committee a contribution by said governmental unit to said premium or cost of health coverage that provides for a minimum of fifty percent but not more than ninety-nine percent.

(c) A carrier that withdraws from the market on or after the effective date of this act may not participate in the market in the commonwealth for five years from the date of withdrawal, unless the commissioner finds that such re-entry shall be permitted earlier than said five years due to a compelling public interest.

Section 3. (a) No carrier participating in the market shall, at any time, deny or condition the issuance of any policy for medicare supplement insurance or medicare select insurance or a policy issued pursuant to a risk or cost contract available for sale in the commonwealth, nor discriminate in the pricing of such a plan, to any eligible person because of the age, health status, claims experience, receipt of health care, medical condition of the eligible person, or any other factor which the commissioner may specify by regulation.

(b) No policy for medicare supplement insurance or medicare select insurance or a policy issued pursuant to a risk or cost contract may contain any waiting period or pre-existing condition limitation or exclusion.

(c) No carrier participating in the market shall deny or condition the issuance of any policy for medicare supplement insurance or medicare select insurance or a policy issued pursuant to a risk or cost contract available for sale in the commonwealth, nor discriminate in the pricing of such a policy, to an eligible person when an application for such a policy for medicare supplement insurance or medicare select insurance or a policy issued pursuant to a risk or cost contract is submitted during the six month period beginning at the time the eligible person became initially eligible for coverage.

(d) Every carrier that participates in the market shall offer a policy for medicare supplement insurance or medicare select insurance or a policy issued pursuant to a risk orcost contract during an open enrollment period for eligible persons commencing on February first and ending on March thirty-first of each year, for coverage to be effective June first of that year or no later than Medicare coverage is first effective, whichever is later. Every carrier that participates in the market shall make available during the required open

enrollment period to every eligible person all policies for medicare supplement insurance or medicare select insurance or a policy issued pursuant to a risk or cost contract which that carrier is authorized to issue pursuant to section four.

(e) A carrier may offer, sell, issue, deliver, or otherwise make effective or renew a policy for medicare supplement insurance or medicare select insurance or a policy issued pursuant to a risk or cost contract to an eligible person at any other time of the year, provided said carrier complies with the requirements of this chapter.

(f) A health maintenance organization shall not be required to accept applications from or offer coverage to an eligible person if: (i) the eligible person does not reside in the health maintenance organization's approved service area; or, (ii) within said area, the health maintenance organization demonstrates to the satisfaction of the commissioner that it will not, within said area, have the capacity in its network of providers to deliver services adequately to new eligible persons because of obligations to existing enrollees; provided that a health maintenance organization that makes such a demonstration to the satisfaction of the commissioner may not offer coverage in such applicable area to any other new enrollees or groups until the later of ninety days after each such refusal or the date on which the carrier notifies the commissioner that it has regained capacity to deliver services to eligible persons for policy for medicare supplement insurance or medicare select insurance or a policy issued pursuant to a risk or cost contract coverage.

(g) Any carrier shall make available all its policies for medicare supplement insurance or medicare select insurance or policies issued pursuant to a risk or cost contract to any eligible person of the commonwealth whose coverage under a policy issued pursuant to a risk or cost contract has been canceled because the health maintenance organization's contract with Medicare has been terminated. Such coverage shall comply with all provisions of this chapter, and shall become effective on the date that coverage under the risk or cost contract ends.

(h) The commissioner may by regulation waive provisions of this section for policies for medicare supplement insurance or medicare select insurance or policies issued pursuant to a risk or cost contract issued in the commonwealth prior to the effective date of OBRA 90, or such other date as the commissioner may specify by regulation in order to comply with the provisions of OBRA 90 or for any other compelling interest which the commissioner finds does not significantly affect the market for such policies or contracts in the commonwealth.

Section 4. (a) The commissioner shall, to the extent permitted by OBRA 90, promulgate by regulation the plans for medicare supplement insurance and medicare select insurance, and the benefits for those plans, which may be offered, sold, issued, or delivered, or renewed by a carrier on or after a date set by the commissioner by regulation.

(b) Any policy issued pursuant to a risk or cost contract shall comply with the requirements of chapter one hundred seventy-six G and any regulations promulgated thereunder, provided however, that each policy issued pursuant to a risk or cost contract shall

provide prescription drug coverage that meets or exceeds minimum standards determined by the commissioner pursuant to regulation. The minimum prescription drug coverage required in any policy issued pursuant to a risk or cost contract shall be comparable to that required in plans for medicare supplement insurance and medicare select insurance.

On or after a date established by the commissioner by regulation pursuant to this chapter, no carrier may offer, sell, issue, or deliver any policy for medicare supplement insurance or medicare select insurance or a policy issued pursuant to a risk or cost contract unless it complies with the benefit designs set forth in the commissioner's regulations. The provisions of this section shall also apply to all policies for medicare supplement insurance or medicare select insurance or a policy issued pursuant to a risk or cost contract renewed by any carrier during and after the first calendar quarter of nineteen hundred and ninety-four. Except as authorized by this chapter, as of the end of the first calendar quarter of nineteen hundred and ninety-four, all policies for medicare supplement insurance or medicare select insurance or policies issued pursuant to a risk or cost contract in force in the commonwealth shall comply with the requirements of this chapter. The commissioner shall promulgate regulations to implement and enforce this section.

Section 5. Any eligible person who applies on or after a date set by the commissioner pursuant to regulation for a policy for medicare supplement insurance or medicare select insurance or a policy issued pursuant to a risk or cost contract from any carrier participating in the market in the commonwealth, during the six month period beginning at the time the person became initially eligible for coverage shall have the right to any of the policies for medicare supplement insurance or medicare select insurance authorized in the commissioner's regulations from any carrier that provides policies issued pursuant to a risk or cost contract and shall have the right to the policy issued pursuant to a risk or cost contract authorized in the commissioner's regulations from any carrier that provides a policy issued pursuant to a risk or cost contract. The commissioner may require every carrier that participates in the market for medicare supplement insurance to offer more than a single type of benefit plan to an eligible person.

Notwithstanding any provision of this chapter concerning guaranteed renewability, the commissioner may by regulation establish a process for the conversion of every carrier's business in force as of a date established in such regulations into the policy for medicare supplement insurance or medicare select insurance authorized by section four. The commissioner may by regulation require that this conversion process be completed by the end of the first calendar quarter of nineteen hundred and ninety-four and implemented through a required special open enrollment period prior to nineteen hundred and ninety-four, during which period eligible persons may enroll without a surcharge for late enrollment and upgrading.

Every policy for medicare supplement insurance or medicare select insurance or policy issued pursuant to a risk or cost contract authorized to be offered, sold, issued, delivered, or otherwise made effective, or renewed on or after a date established by the commissioner pursuant to this chapter shall be a guaranteed renewable plan with respect to

an eligible person at the option of the eligible person. A carrier that participated in the market may, however, in its discretion and to the extent permitted by OBRA 90, refuse to offer, sell, issue, deliver, or otherwise make effective, or renew a medicare supplement insurance policy, medicare select insurance policy, or a policy issued pursuant to a risk or cost contract, or upon reasonable notice, cancel such a plan of any person due to non-payment of premium or material misrepresentation, or because the person does not live in or has moved out of the health maintenance organization service area, or has not resided in the commonwealth for the past six months, or for any other cause which may be approved by the commissioner.

Section 6. A carrier shall not participate in the market unless the policy form or certificate form has been filed with and approved by the commissioner.

(c) As of February first, nineteen hundred and ninety-four, a carrier may apply a surcharge to the premium for a policy for medicare supplement insurance or medicare select insurance or a policy issued pursuant to a risk or cost contract to an eligible person who upgrades coverage or is a late enrollee and may discount the premium for a policy for medicare supplement insurance or medicare select insurance or a policy issued pursuant to a risk or cost contract for an person who has enrolled during the six month period beginning at the time the person became initially eligible for coverage. For purposes of this section, an eligible person "upgrades coverage" if the policy for medicare supplement insurance or medicare select insurance or a policy issued pursuant to a risk or cost contract under which the eligible person is covered at the time of application for new coverage is of lesser actuarial value than the new coverage, as determined in accordance with standards promulgated by the commissioner. Any surcharge applied to the premium of an eligible person who upgrades coverage or is a late enrollee may not exceed fifteen percent annually, and may not be charged for more than three years from the date it is first imposed by the carrier. Any discount applied to the premium of an eligible person who has enrolled during the six month period beginning at the time the person became initially eligible for coverage may not exceed fifteen percent and may not be applied for more than three years from the date such person first receives coverage under this chapter. The commissioner may promulgate regulations to enforce the provisions of this paragraph.

(d) After a date established by the commissioner pursuant to regulation and subject to the provisions of subsection (g), every carrier desiring to increase or decrease premiums

for any policy for medicare supplement insurance or medicare select insurance or a policy issued pursuant to a risk or cost contract, or desiring to set the initial premium for a new policy for medicare supplement insurance or medicare select insurance or a policy issued pursuant to a risk or cost contract shall file a rate filing or application with the commissioner at least thirty days before the proposed effective date of such new rates. The commissioner may disapprove the proposed rates if they are excessive, inadequate or unfairly discriminatory or do not otherwise comply with the requirements of this chapter.

Such filings shall be deemed to be approved by the commissioner not earlier than thirty days after the date of filing, provided that:

(i) the filing complies with the anticipated minimum loss ratio standards of subsection (e); and

(ii) the carrier submits, as part of such filing, an actuarial opinion and a legal opinion that the carrier is in compliance with the provisions of this chapter. The commissioner may by regulation specify such other information which shall be included in any such filing.

Such filing shall not be disapproved by the commissioner except after a hearing conducted pursuant to chapter thirty A within thirty days after such filing. Any increase in premium rates shall continue in effect for not less than twelve months, except that an increase in benefits or decrease in rates may be permitted at any time.

(e) The anticipated minimum loss ratio shall be:

(f) A carrier shall annually report to the commissioner no later than May first, the actual loss ratio calculated for each policy for medicare supplement insurance or medicare select insurance or a policy issued pursuant to a risk or cost contract for the previous calendar year. In each case where the loss ratio for policies for medicare supplement insurance or medicare select insurance or policies issued pursuant to a risk or cost contract fails to comply with the minimum loss ratio requirements of this chapter, the carrier shall

issue a refund or credit against future premiums to insureds. The instructions and format for calculating and reporting loss ratios and issuing dividends and credits shall be prescribed by the commissioner by regulation, and shall be consistent with the requirements of OBRA 90.

(g) If a carrier files for an increase in premium of ten percent or more than the premium previously charged, or if a carrier files an initial premium request that is ten percent or more than the average premium for the same policies for medicare supplement insurance or medicare select insurance or a policies issued pursuant to a risk or cost contract offered by carriers in the same class under subsection (e), such carrier's rate, in addition to being subject to all other provisions of this chapter, shall be subject to the prior approval of the commissioner as set forth in this subsection. Any requested premium increase in excess of ten percent for a medicare supplemental insurance plan shall be communicated to the insureds at least ninety days prior to the effective date of such increase, or as the commissioner may direct.

Such requested premium increase or initial premium request shall be filed no later than ninety days prior to the requested effective date of such rate. No such rate shall be effective until after a public hearing conducted by the commissioner, and advertised in newspapers in Boston, Brockton, Fall River, Pittsfield, Springfield, Worcester, New Bedford, and Lowell, or by notifying such newspapers of said hearing, and held within thirty days of the filing of such rate with the commissioner pursuant to subsection (d). The commissioner shall approve or disapprove such rate within thirty days following the conclusion of the public hearing, to be effective not earlier than thirty days subsequent to such approval. No such rate shall be approved if the benefits provided therein are unreasonable in relation to the rate charged, nor if the rates are excessive, inadequate or unfairly discriminatory or do not otherwise comply with the requirements of this chapter.

(h) Every carrier, as a condition of doing business under the authority of this chapter, shall file annually with the commissioner an actuarial opinion and legal opinion that certifies that the carrier's rating methodologies and rates comply with the requirements of this chapter and regulations promulgated under authority of this chapter. Every carrier shall maintain at its principal place of business for inspection by the commissioner a complete and detailed description of its rating practices and such other information as the commissioner may by regulation require.

(i) The supreme judicial court shall have jurisdiction in equity upon the petition of the commissioner and upon a summary hearing, to enforce all lawful orders of the commissioner.

Any subscriber, non-profit hospital service corporation, non-profit medical service corporation or other person aggrieved by any action, order, finding, or decision of the commissioner under this section may, within twenty days from the filing of such memorandum thereof in his office, file a petition in the supreme judicial court for the county of Suffolk for a review of such action, order, finding, or decision. An order of notice returnable not later than seven days from the filing of such petition shall forthwith issue and

be served upon the commissioner. Within ten days after the return of said order of notice, the petition shall be assigned for a speedy and summary hearing on the merits. The action, order, finding, or decision of the commissioner shall remain in full force and effect, pending the final decision of the court unless the court or a justice thereof after notice to the commissioner shall by a special order otherwise direct. The court shall have jurisdiction in equity to modify, amend, annul, reverse or affirm such action, order, finding or decision and shall uphold the commissioner's action, order, finding, or decision if supported by the weight of evidence. The court may make any appropriate order or decree. The court may make such order as to costs as it deems equitable. The court shall make such rules or orders as it deem proper governing proceedings under this section to secure prompt and speedy hearings and to expedite final decisions thereon.

(j) The commissioner shall annually conduct a public hearing to monitor the overall condition of the commonwealth's market so as to improve access by individuals to coverage under this chapter, to encourage aggregation of risk pools through product selection and to promote long-term access by individuals to coverage through continued stability and financial viability of all carriers in the market, particularly commercial carriers.

The commissioner shall annually summarize all claims arising under this chapter experience and loss ratio data from all insurers covered by this chapter and submit such information to the committee on insurance. The commissioner shall also file with the committee on insurance any recommendations for legislation to improve the accessibility and affordability of coverage in the market.

(k) The commissioner may promulgate regulations to facilitate the administration and enforcement of this chapter and to govern hearings and investigations thereunder, and he may issue such orders as he finds proper, expedient or necessary to enforce and administer the provisions of this chapter and to secure compliance with any rules and regulations made thereunder.

The party states, desiring by common action to fully utilize and improve their institutional facilities and provide adequate programs for the confinement, treatment and rehabilitation of various types of offenders, declare that it is the policy of each of the party states to provide such facilities and programs on a basis of cooperation with one another, thereby serving the best interests of such offenders and of society and effecting economics in capital expenditures and operational costs. The purpose of this compact is to provide for the mutual development and execution of such programs of cooperation for the confinement, treatment and rehabilitation of offenders with the most economical use of human and material resources.

As used in this compact, unless the context clearly requires otherwise, the following terms shall have the following meanings:-

"State", a state of the United States of America; a territory or possession of the United States; the District of Columbia; the Commonwealth of Puerto Rico.

"Sending state", a state party to this compact in which conviction or court commitment was had.

"Receiving state", a state party to this compact to which an inmate is sent for confinement other than a state in which conviction or court commitment was had.

"Inmate", a male or female offender who is committed, under sentence to or confined in a penal or correction institution.

"Institution", any penal or correctional facility, including but not limited to a facility for the mentally ill or mentally defective, in which inmates may lawfully be confined.

(a) Each party state may make one or more contracts with any one or more of the other party states for the confinement of inmates on behalf of a sending state in institutions situated within receiving states. Any such contract shall provide for:

(1) Its duration;

(2) Payments to be made to the receiving state by the sending state for inmate maintenance, extraordinary medical and dental expenses, and any participation in or receipt by inmates of rehabilitative or correctional services, facilities, programs or treatment not reasonably included as part of normal maintenance;

(3) Participation in programs of inmate employment, if any; the disposition or crediting of any payments received by inmates on account thereof; and the crediting of proceeds from or disposal of any products resulting therefrom;

(4) Delivery and retaking of inmates; and

(5) Such other matters as may be necessary and appropriate to fix the obligations, responsibilities and rights of the sending and receiving states.

(b) The terms and provisions of this compact shall be a part of any contract entered into by the authority of or pursuant thereto, and nothing in any such contract shall be inconsistent herewith.

The appropriate officials of any state party to this compact shall have access, at all reasonable times, to any institution in which it has a contractual right to confine inmates for the purpose of inspecting the facilities thereof and visiting such of its inmates as may be confined in the institution.

Inmates confined in an institution pursuant to the terms of this compact shall at all times be subject to the jurisdiction of the sending state and may at any time be removed therefrom for transfer to a prison or other institution in which the sending state may have a contractual or other right to confine inmates, for release on probation or parole, for discharge, or for any other purpose permitted by the laws of the sending state; provided that the sending state shall continue to be obligated to such payments as may be required pursuant to the terms of any contract entered into under the terms of subsection (3).

All inmates who may be confined in an institution pursuant to the provisions of this compact shall be treated in a reasonable and humane manner and shall be treated equally with such similar inmates of the receiving state as may be confined in the same institution. The fact of confinement in a receiving state shall not deprive any inmate so confined of any legal rights which said inmate would have had if confined in an appropriate institution of the sending state.

Any hearing or hearings to which an inmate confined pursuant to this compact may be entitled by the laws of the sending state may be had before the appropriate authorities of the sending state, or the receiving state if authorized by the sending state. The receiving state shall provide adequate facilities for such hearings as may be conducted by the appropriate officials of a sending state. In the event such hearing or hearings are had before officials of the receiving state, the governing law shall be that of the sending state and a record of the hearing or hearings as prescribed by the sending state shall be made. In any and all proceedings had pursuant to the provisions of this paragraph, the officials of the receiving state shall act solely as agents of the sending state and no final determination shall be made in any matter except by the appropriate officials of the sending state.

Any inmate confined pursuant to this compact shall be released within the territory of the sending state unless the inmate, and the sending and receiving states, shall agree upon release in some other place. The sending state shall bear the cost of such return to its territory.

Any inmate confined pursuant to the terms of this compact shall have any and all rights to participate in and derive any benefits or incur or be relieved of any obligations or have such obligations modified or his status changed on account of any action or proceeding in which he could have participated if confined in any appropriate institution of the sending state located within such state.

The parent, guardian, trustee, or other person or persons entitled under the laws of the sending state to act for, advise, or otherwise function with respect to any inmate shall not be deprived of or restricted in his exercise of any power in respect of any inmate confined pursuant to the terms of this compact.

Nothing contained in this compact shall be construed to abrogate or impair any agreement or other arrangement which a party state may have with a nonparty state for the

confinement, rehabilitation or treatment of inmates nor to repeal any other laws of a party state authorizing the making of cooperative institutional arrangements.

The provisions of this compact shall be liberally construed and shall be severable. If any phrase, clause, sentence or provision of this compact is declared to be contrary to the constitution of any participating state or of the United States or the applicability thereof to any government, agency, person or circumstance is held invalid, the validity of the remainder of this compact and the applicability thereof to any government, agency, person or circumstance shall not be affected thereby. If this compact shall be held contrary to the constitution of any state participating therein, the compact shall remain in full force and effect as to the remaining states and in full force and effect as to the state affected as to all severable matters.

All employees of the said department who are allocated to the division of medicaid shall be so transferred without impairment of civil service status, without interruption of services within the meaning of chapter thirty-one of the General Laws, without impairment of seniority, retirement or other rights of employees, without reduction in compensation or salary grade, and without change in union representation, notwithstanding any change in title or duties resulting from such transfer. Nothing in this section shall be construed to confer upon any employee any right not held immediately prior to the date of such transfer, or to prohibit any reduction of salary or grade, transfer, reassignment, suspension, discharge, layoff or abolition of position not prohibited prior to such date.

All other duly existing rights, obligations and responsibilities of said department which relate to medical assistance and which are in force immediately prior to the effective date of this section shall be transferred to the division reasonably and equitably in the manner described above.

Any orders, rules, and regulations duly made, and all licenses, permits, certificates, and approvals duly granted, by the said department which arise from or relate to medical assistance and which are in force immediately prior to the effective date of this section shall remain in force and effect unless and until superseded, revised, rescinded, or canceled in accordance with law by the said division. Such study shall also include a breakdown of the total dollar amount of benefits used by each recipient and the amount of money reimbursed to each provider in each year, by the category of medical care or services provided. Said commissioner is expected to offer recommendations for methods of reducing over-utilization and inappropriate use as discovered by such study.

"Commissioner", the commissioner of the department of public health.

The provisions of this section shall not apply to any municipality or the commonwealth or any department, agency or subdivision thereof when in the performance of official duties relating to conducting procedures necessary for safety tests to determine the presence of lead or other compounds.

The manufacturer of a cleansing product used primarily in industrial manufacturing, production and assembling processes or any user of the product may apply to the commissioner to have the product excluded from regulation under this chapter. Such appli-

"Financial institution", banking corporation or institution, trust company, savings bank, cooperative bank, savings or loan association, insurance company or related corporation partnership, foundation or other institution engaged primarily in lending or investing funds.

"Incorporators", Winthrop Farwell, David Curtis, John K. Holmgren, Gerald J. Kelleher, George W. Baldwin, and James W. Burke.

SECTION 2. It is hereby declared that unused, underused or underdeveloped areas exist in parts of the city of Brockton including, but not limited to, the downtown business district, Campello business district and Montello business district; that each such area constitutes a serious and growing menace, injurious and inimical to the safety, health, morals and welfare of the residents of said city; that each such area constitutes an economic liability, substantially impairs or arrests the sound growth of said city and retards the economic well-being of the commonwealth; that each such area has decreased the value of private investments and threatens the sources of public revenue; that redevelopment of each such area in accordance with an economic development plan for the elimination of such substandard conditions and prevention of their recurrence is necessary to retain existing commercial enterprises, to attract new commercial development and to promote the sound economic growth of said city; that the existence of said unused, underused or underdeveloped areas renders persons unwilling to do business in said city; that the menace of such unused, underused or underdeveloped areas is beyond remedy and control solely by regulatory process in the exercise of the police power and cannot be dealt with effectively by the ordinary operation of private enterprise without the aids herein provided including, but not limited to preventing recurrence of such conditions in each such area, improving sites for commercial uses and disposing of property for redevelopment incidental to the foregoing; that the exercise of powers by the corporation and any assistance that may be given by said city or other public body in connection therewith are public uses and purposes for which public money may be expended; and that the acquisition, planning, clearance, development, rehabilitation or rebuilding of such unused, underused and underdeveloped areas for commercial purposes are public benefits for which private property may be regulated by wholesome and reasonable order, law and direction and for which public funds may be expended for the welfare of said city and the commonwealth.

derutilized or vacated, thereby creating additional underemployment; that such obsolescence and abandonment of existing facilities are causing serious injury to the economy of said city; that the commercial sector of the economy provides one of the best opportunities for jobs at higher wages for the inhabitants of said city; that new commercial sites are required to attract and house new commercial development and to retain existing commercial operations in need of expansion space; that the unaided efforts of private industry have not provided and cannot provide the necessary commercial sites within the urban environment due to the problems encountered in the assembly of suitable building sites, the provision of adequate public services, the unavailability of private capital for development and the inability of private enterprise alone to plan, finance and coordinate commercial development projects.
