### Substance Use Trends

#### Primary Substance of Use

At admission, clients identify a "primary drug" of use, which is the substance for which they seek treatment. Table 1 shows the percent distribution by primary drug.

**Table 1**  
**Primary Drug Trend: FY 2008 - FY 2017**

	Total Admissions *	Alcohol	Crack/Cocaine	Heroin	Marijuana	Other	Other Opioids	Other Sedatives/Hypnotics	Other Stimulants

*\* Number of total admissions may be different than the reported number on the first page due to missing/unknown values for primary drug*

#### Past Year Substance Use

Upon entering treatment, clients are asked to report ALL substances used in the year (12 months) prior to admission. It is possible to report using more than one substance within the past year. Therefore, percentages may total more than 100%. Table 2 shows the distribution of past year drug use for all substances. It only includes those admissions that did report past year substance use.

**Table 1**  
**Past Year Substance Use Trend: FY 2008 - FY 2017**

*\* Number of total admissions may be different than the reported number on the first page due to missing/unknown values and due to the fact that the table above does not include those admissions who did not report past year use*

*To protect client confidentiality, categories with 5 or fewer admissions are suppressed*

*In 2014, a new system of reporting was adopted for Methadone treatment providers. Due to this system change, the reported enrollment numbers for FY 2014 may vary from the actual number of enrollments and future reports on FY 2014 data may differ from the current report*

*Clients of all ages are included in these statistics*

*Homelessness at enrollment is determined based on the client's housing disposition at the time of enrollment.*

*Missing/Unknown values are excluded from the data*
