Martha's Vineyard Airport (MVY) Terminal Expansion

Commercial Service Airport Expanding Terminal Space

3

- \$52M federal project to expand Terminal Space at Martha's Vineyard Airport (MVY) with a MassDOT Aeronautics share of over \$1M
- Expansion includes multiple compliance improvements for ADA accessibility, security screening, and baggage handling
- These improvements are critical for MVY to meet commercial airline service demand

Lawrence Municipal Airport – Stream Restoration Project

Drainage Improvements and Environmental Restoration

4

- The drainage stream and stormwater retention area required restoration
- The project required a Notice of Intent to obtain environmental permits for the project
- 225 LF of stream channel restoration and 550 LF of fence were completed

Airport Master Record Training – Seattle, Washington

Enhancing Skills to Make Aviation Safer

5

- Aeronautics Facilities Inspector Sean Benners and Senior Engineer Dan Dragani attended the FAA Airport Master Record training In Seattle, WA
- Sessions included airport inspection modules, FAA Based Aircraft and Wildlife, Regulatory Information and Obstruction Data
- Aeronautics inspects the state's 34 public use airports and heliports providing essential safety information for the flying public

MA State House 3D Model & Thermal Assessment

Preserving a National Historic Landmark

6

- Created 3D Model of Massachusetts State House
- Collected thermographic imagery for the Commonwealth's Division of Capital Asset Management and Maintenance (DCAMM)
- Provided a site energy assessment for historic preservation
- Work performed in-house – savings of \$80,000 for the Commonwealth

Thank You
