Subject: Comments on Qualifying Dual Use Agricultural Solar Tariff Generation Units Straw Proposal

CAUTION: This email originated from a sender outside of the Commonwealth of Massachusetts mail system. Do not click on links or open attachments unless you recognize the sender and know the content is safe.

The following are my comments on the proposal:

- Does Panel Height refer to minimum or maximum height? Seems it should be minimum.
- Is there research to show the requirements of at least 50% sunlight will actually support a variety of agricultural crops (other than tobacco!)?
