Background

The Massachusetts Department of Public Health (DPH) requires licensed health care facilities, including ambulatory surgical centers, dialysis centers, clinics, rest homes, nursing homes, adult day health centers, and non-acute hospitals to report influenza vaccine coverage among employees.^{1,2} Health care personnel (HCP) are at high risk for influenza exposure and may be a source of influenza virus transmission in health care settings. Annual immunization is the most effective method of preventing influenza and potentially serious complications.³

In 2008, DPH mandated that all licensed health care facilities offer personnel free, annual influenza vaccine. Facilities must document and report receipt of vaccine by personnel, whether administered within or outside the facility, and all declination of immunization. This report presents data on influenza vaccine coverage of non-acute health care facility personnel for 2017-18. Health care facilities included in this report are ambulatory surgical centers, dialysis facilities, and non-acute hospitals. These facility types are required to report health care personnel influenza data through the National Healthcare Safety Network (NHSN) of the Centers for Disease Control and Prevention (CDC).

This report also presents data on influenza vaccine coverage of health care facility personnel working in clinics, nursing homes, rest homes, and adult day health centers. These facilities do not report through NHSN, but rather directly to DPH.

Data describing influenza vaccination of health care personnel in acute care hospitals during the 2017-2018 influenza season has been incorporated in the hospital specific health care associated infection data summaries available at the following link:

<http://www.mass.gov/eohhs/gov/departments/dph/programs/hcq/healthcare-quality/health-care-facilities/flu-vac-hc-personnel/flu-vaccination-reports.html>

While the CDC's Advisory Committee on Immunization Practices recommends annual influenza vaccination for all health care personnel, Massachusetts is one of only a handful of states that mandates reporting of health care personnel influenza vaccination data in order to understand coverage rates and use this information to promote vaccination. To estimate influenza vaccination coverage among HCP in the United States during the 2016–17 influenza season, CDC conducted an opt-in Internet panel survey of 2,438 HCP in the spring of 2017. Overall, 78.6% of survey respondents reported receiving vaccination during the 2016–17 season, similar to reported coverage in the previous three influenza seasons.⁴ Figure 1 illustrates reported vaccination coverage by care setting.

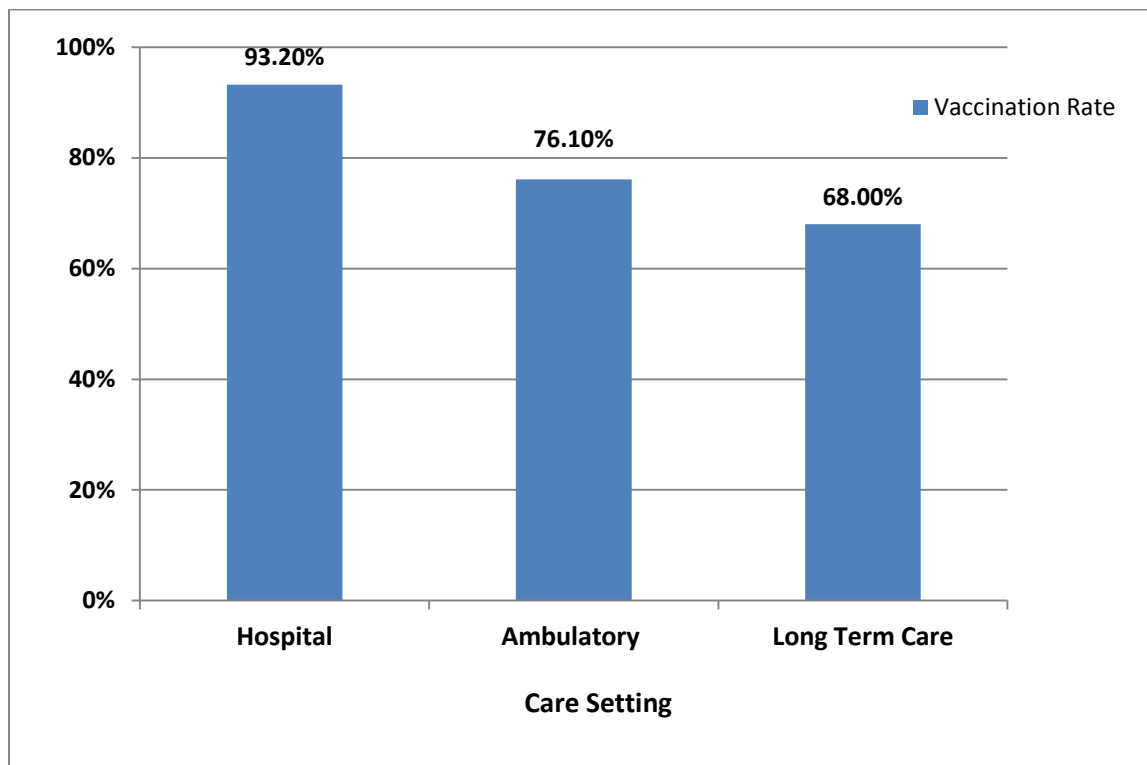

¹ See 105 CMR 140.150 for the influenza vaccination reporting requirements for clinics and dialysis centers; 105 CMR 130.325 for the reporting requirements for non-acute hospitals and 105 CMR 158.030(L)(*) for reporting requirements for Adult Day Health Centers. Note that the requirements under 105 CMR 140.150 apply to dialysis centers licensed under 105 CMR 145.000 pursuant to 105 CMR 145.900.

Methodology: Ambulatory Surgical Centers, Dialysis Centers, and Non-Acute Hospitals

NHSN is a secure, web-based system managed by the CDC that enables DPH and health care facilities to track and analyze data on health care associated infection and prevention practices to determine their incidence, identify trends and guide improvement. Participating health care facilities are required to report data according to the NHSN definitions and protocols to ensure uniform reporting, consistent over time within a healthcare facility and comparable across facilities.

Consistent with NHSN protocols, DPH required Ambulatory Surgical Centers, Dialysis Centers and Non-Acute Hospitals to offer personnel influenza vaccines, and collect data for HCP working in the facility for at least one day between October 1 through March 31 of the influenza season, regardless of clinical responsibility or patient contact. Data is reported separately for three categories of HCP: employees on payroll, licensed independent practitioners (i.e. physicians, advanced practice nurses, physician assistants and other therapists affiliated with the facility but not on payroll), and adult students/trainees and volunteers aged 18 or older. For each HCP group in each facility, the total numbers of HCP vaccinated in and outside the facility, HCP who declined vaccine, HCP with a documented medical contraindication to the vaccine, and HCP with unknown vaccine status was to be compiled and submitted to NHSN.

Methodology: Clinics, Nursing Homes, Rest Homes, and Adult Day Health Centers

The DPH Healthcare Associated Infection (HAI) Prevention Program provided an electronic survey to licensed non-acute health care facilities, for the purpose of capturing HCP influenza vaccination data. The required data elements included

the total number of employees employed between October 1, 2017 and March 31, 2018; the total number of employees receiving seasonal influenza vaccination provided by the health care facility or administered outside the health care facility between August 1, 2017, and March 31, 2018; the total number of HCPs who declined vaccination, those with a documented medical contraindication, and those with unknown vaccination status. Facilities were required to submit data via the survey by April 15, 2018. DPH distributed guidance to all facilities at the beginning of the influenza season.

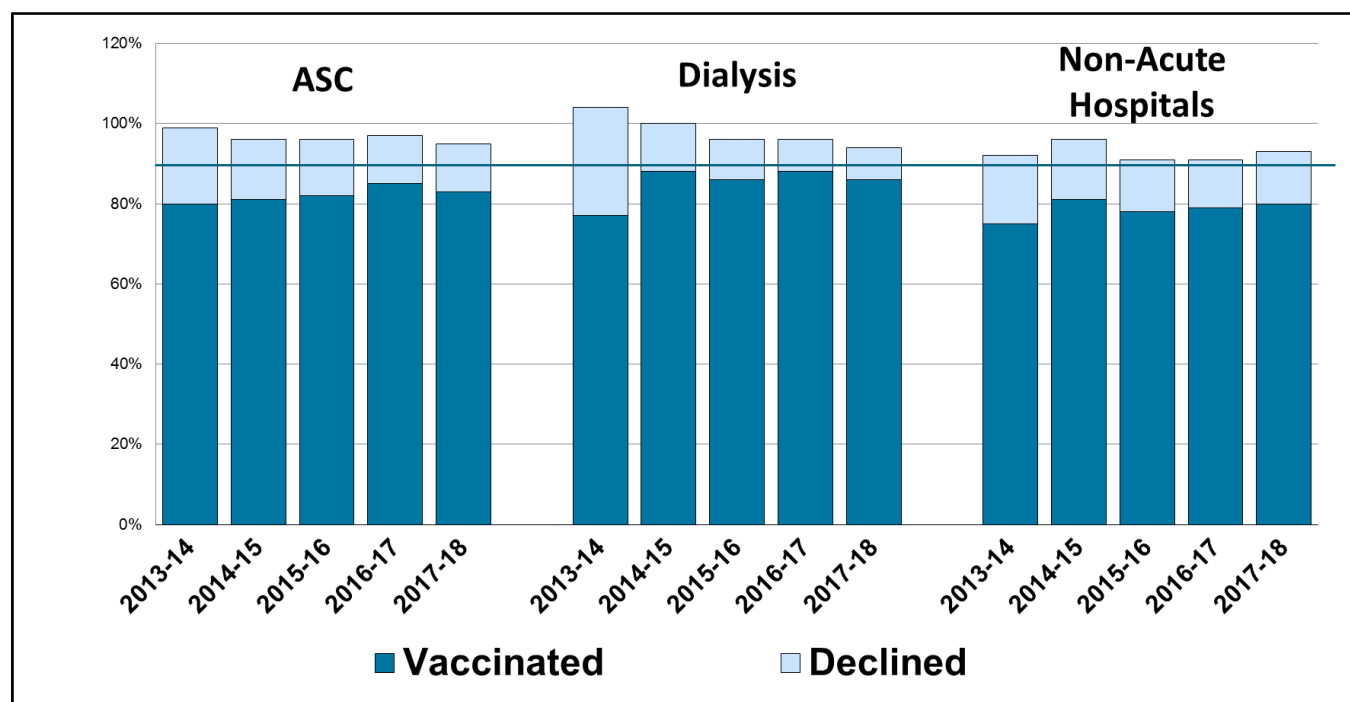

The facility vaccination rate was calculated by dividing the number of facility personnel vaccinated by the total number of facility HCPs. The overall mean percentage of HCPs vaccinated by facility type was calculated as the mean of all facility vaccination rates.

Health care personnel are defined as “individuals, both full-time and part-time employees, who worked at the healthcare facility for at least 1 day between October 1, 2017 and March 31, 2018.” This includes, but is not limited to: physicians; nurses; interns/residents; fellows; physician assistants; physical, occupational, respiratory, and speech therapists; laboratory and operating room technicians; central supply staff; pharmacists; maintenance/environmental services staff; dietary staff; attendants/orderlies; secretarial and administrative staff; and contract staff whether or not such individuals provide direct patient care. Due to the fluctuation in number of staff on payroll over the course of the fall and winter, it is possible for the number of immunizations and declinations documented to exceed 100% of the employees identified.

Results: Ambulatory Surgical Centers, Dialysis Centers, and Non-Acute Hospitals

Figure 2 depicts trends in influenza vaccination rates in ambulatory surgical centers, dialysis centers, and non-acute hospitals in Massachusetts over the most recent five flu seasons: from the 2013-14 flu season through the 2017-18 season. Overall, only non-acute facilities reported similar or slightly improved mean vaccine coverage rates in 2017-18 when compared to 2016-17. No facility type reached the United States Department of Health and Human Services Healthy People 2020 90% coverage goal; however, dialysis centers were close with 86% coverage. Facilities that achieved this goal or had greater than 90% coverage are indicated in the appendix with an asterisk.

Figure 2. Mean Percent of HCP Receiving and Declining Influenza Vaccination: 2013-2018

Ambulatory Surgical Centers

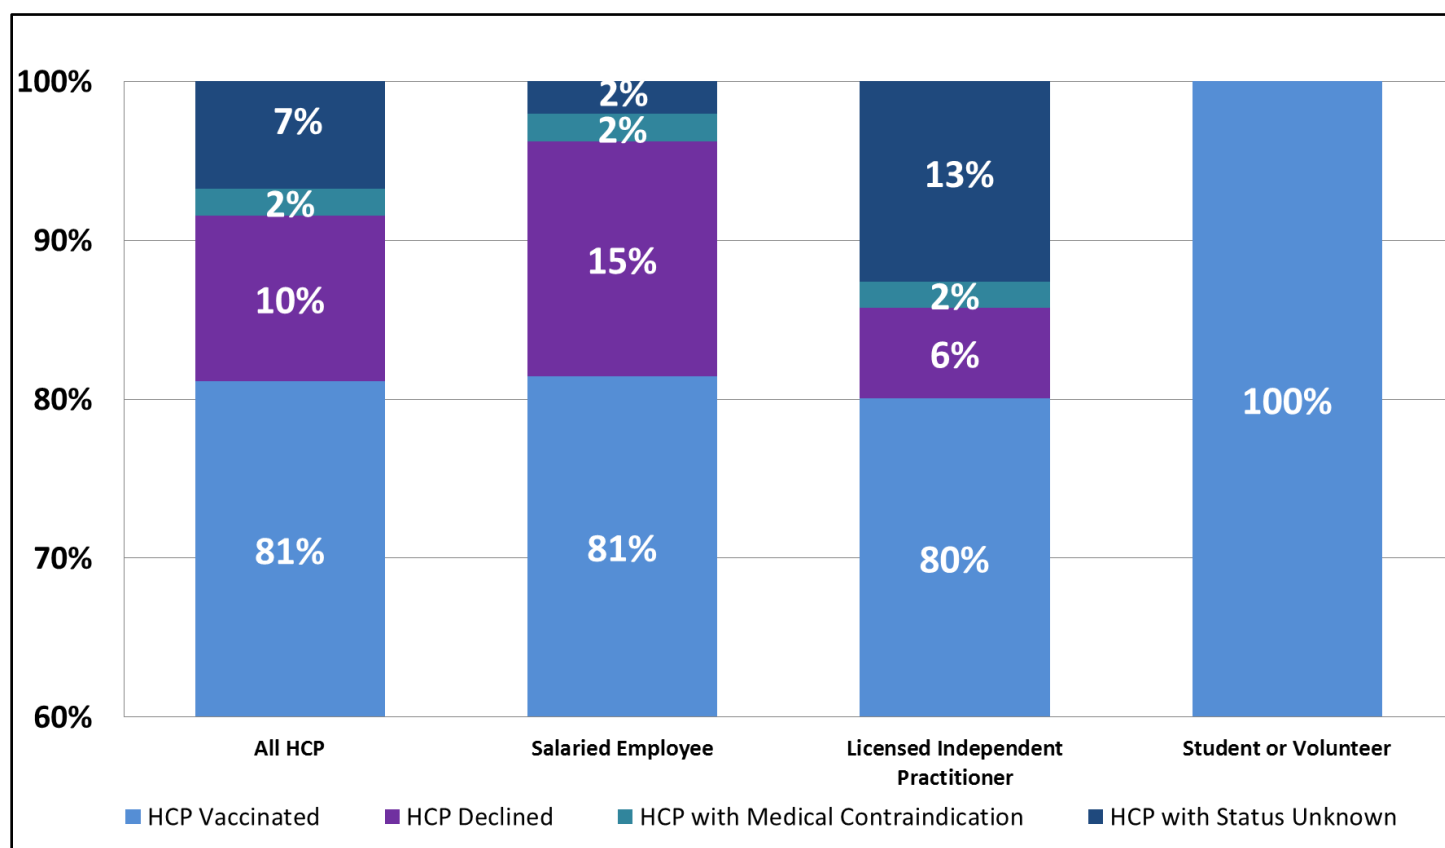

Forty-eight ambulatory surgical centers provided information on influenza vaccine coverage for 2017-18. On average, facilities reported 83% of HCP were vaccinated against influenza and 12% declined vaccination (Table 1). This was a slight decline from the 85% influenza vaccine coverage reported in 2016-17 (Figure 2). Seventeen Massachusetts ambulatory surgical centers, representing 35% of reporting facilities, achieved a vaccination rate of 90% or greater in 2017-18 which is a decrease from 48% in 2016-17. Facilities reported an average of forty-six percent of employees receiving their vaccinations at their place of employment, and on average reported 37% were vaccinated elsewhere.

Table 1. Mean Percent of HCP at Ambulatory Surgical Centers Vaccinated Against Influenza During 2017-2018 (N=48)

	MEAN % VACCINATED	RANGE
Total Vaccinated	83%	(38-100%)
Vaccination Declination Rate	12%	(0-62%)
HCP With Unknown Status	4%	(0- 53%)
HCP With Medical Contraindication	2%	(0-10%)
Location Vaccinated		
At Place of Employment	46%	(0-97%)
Outside Place of Employment	37%	(0-100%)

In addition to influenza vaccination and declination, data on medical contraindications and unknown vaccine status were also collected, with specifics for salaried employees, licensed independent practitioners, and students and volunteers. Overall, 81% of all HCPs at Ambulatory Surgical Centers (ASC) received the vaccine and 10% declined (Figure 3). Vaccine coverage across the three HCP groups ranged from 80% to 100%, and salaried employees had the highest declination rate at 15%. Medical contraindications were rare, and unknown vaccine status ranged from 0% to 13%, with licensed independent practitioners reporting unknown status most frequently.

Figure 3. Overall Ambulatory Surgical Center Vaccination of HCP by Type 2017-2018

Dialysis Centers

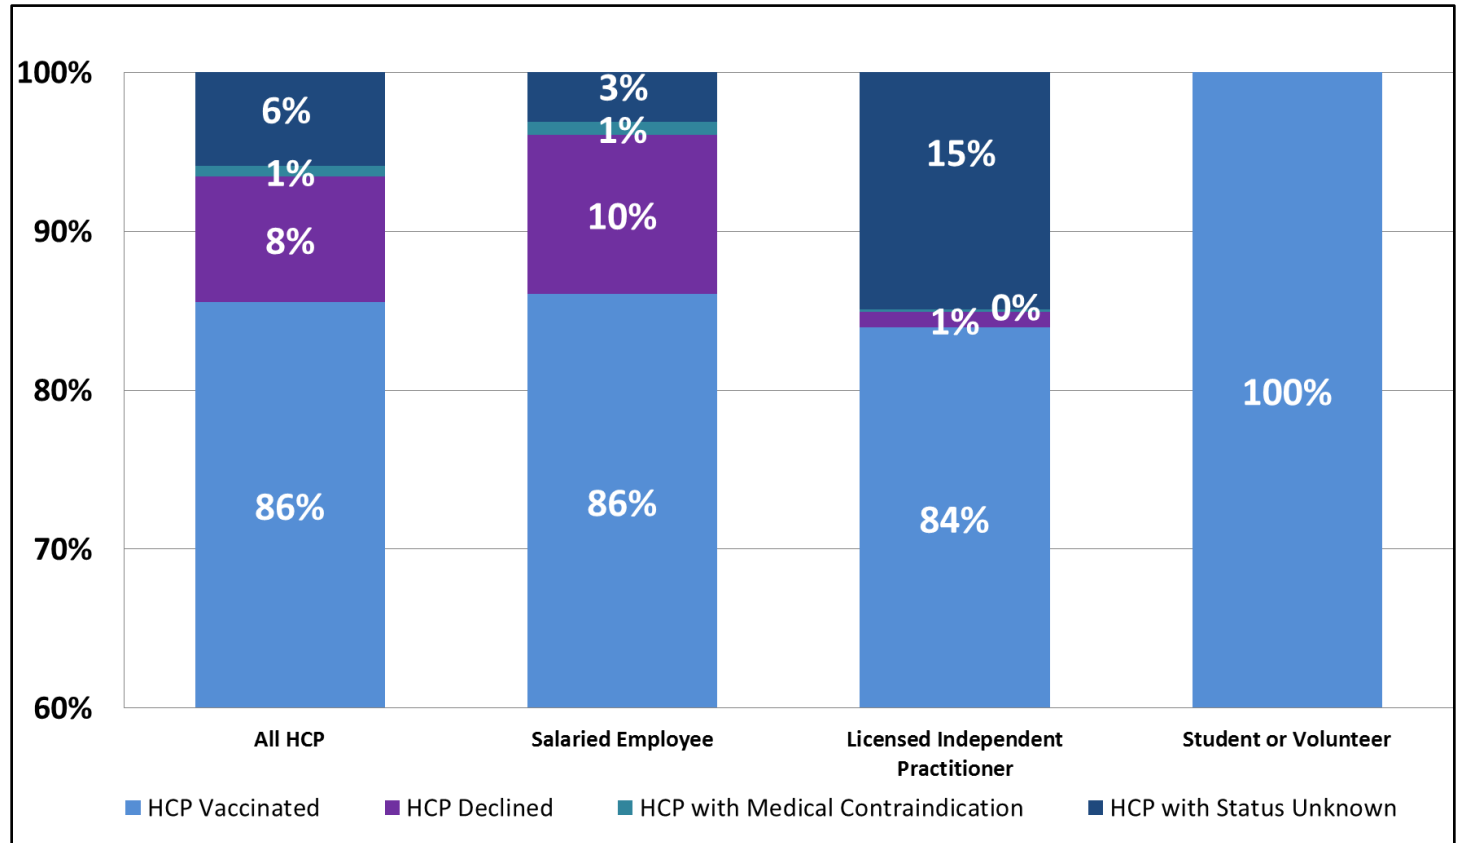

Among 71 reporting dialysis centers, the mean influenza vaccine coverage reported by facilities was 86% and declination rate was 8% in 2017-18 (Table 2). In 2017-18, 33 Massachusetts dialysis centers, 46% of reporting facilities, achieved an overall vaccination rate of 90% or greater. Facilities reported an average of 60% of employees vaccinated at their place of employment and 26% vaccinated elsewhere. Dialysis centers that are located within acute care hospitals are included in the acute care hospital report.

Table 2. Mean Percent of Dialysis Center HCP Vaccinated against Influenza during 2017-2018 (N=71)

	MEAN % VACCINATED	RANGE
Total Vaccinated	86%	(50-100%)
Vaccination Declination Rate	8%	(0-42%)
HCP With Unknown Status	5%	(0-34%)
HCP With Medical Contraindication	1%	(0-9%)
Location Vaccinated		
At Place of Employment	60%	(11-100%)
Outside Place of Employment	26%	(0-60%)

In addition to influenza vaccination and declination, data on medical contraindications and unknown vaccine status were also collected, with specific data for salaried employees, licensed independent practitioners, and students and volunteers. Overall, 86% of all HCPs at dialysis centers received the vaccine and 8% declined (Figure 4). Medical contraindications were rare, and unknown vaccine status ranged from 0% to 15% across the three HCP categories, with licensed independent practitioners reporting unknown status most frequently.

Figure 4. Overall Dialysis Center Vaccination of HCP by Type 2017-2018

Non-Acute Care Hospitals

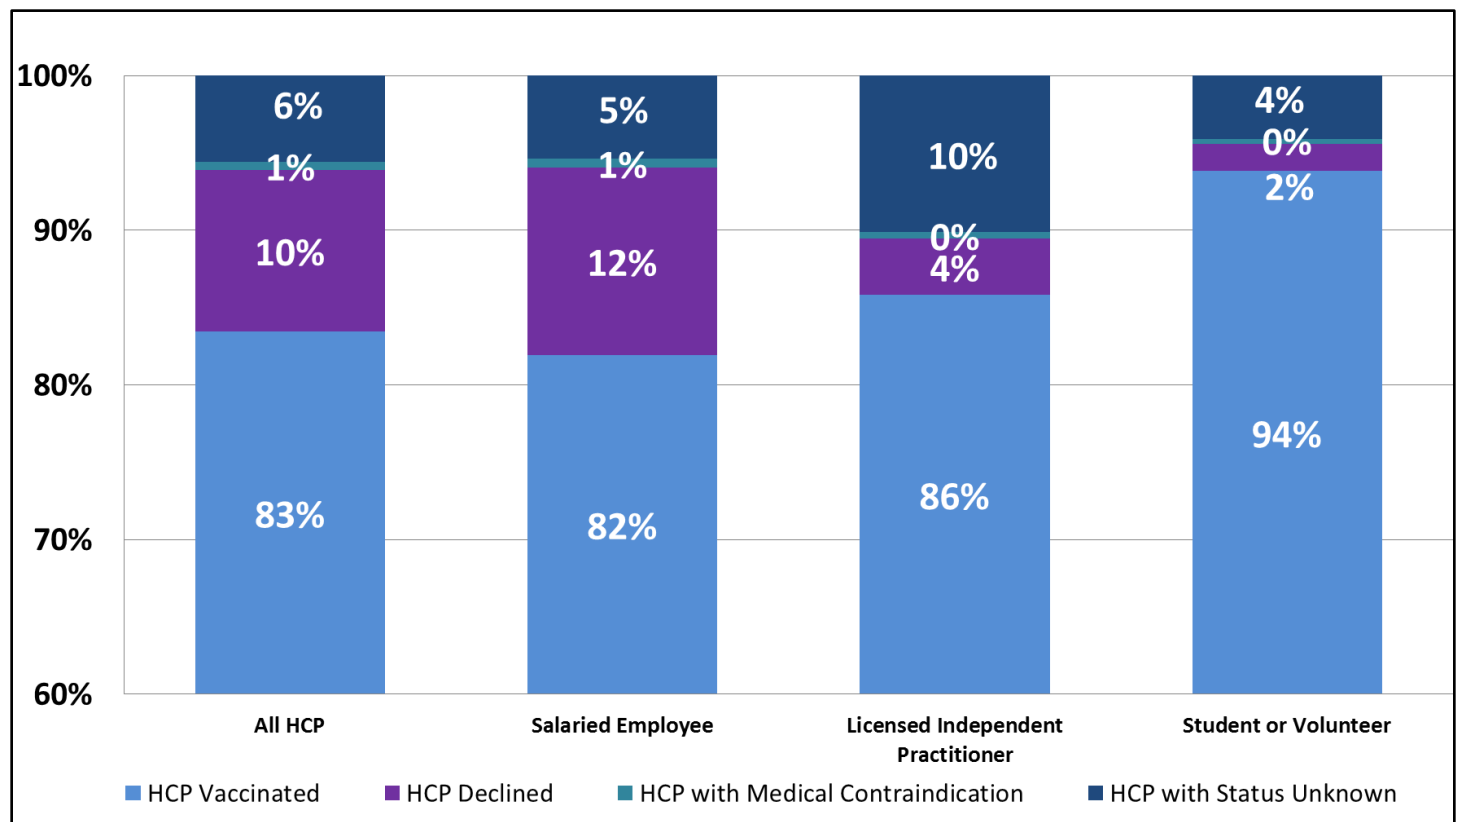

Thirty-six non-acute care hospitals provided information on influenza vaccine coverage. The mean influenza vaccine coverage reported by non-acute care hospital facilities was 80%, and with an average reported declination rate of 13% in 2017-18 (Table 3). There was a small increase in mean vaccine coverage in 2017-2018, compared to mean coverage of 79% in 2016-2017. Sixteen non-acute care hospitals in Massachusetts (44%) reported vaccine coverage greater than 90% during the 2017-18 influenza season. Facilities reported most personnel received vaccination from the facility that employed them: on average 55%, and an average of 25% were reported vaccinated elsewhere.

Table 3. Mean Percent of Non-Acute Care Hospital HCP Vaccinated against Influenza During 2017-2018 (N=36)

	Mean % Vaccinated	Range
Total Vaccinated	80%	(30-97%)
Vaccination Declination Rate	13%	(2-45%)
HCP With Unknown Status	7%	(0-39%)
HCP With Medical Contraindication	1%	(0-4%)
Location Vaccinated		
At Place of Employment	55%	(14-75%)
Outside Place of Employment	25%	(5-41%)

In addition to influenza vaccination and declination, data on medical contraindications and unknown vaccine status were also collected, with specifics for salaried employees, licensed independent practitioners, and students and volunteers. Eighty-three percent of all HCPs at non-acute care hospitals received the vaccine and 10% declined (Figure 5). Vaccine coverage among these groups ranged from 82% to 94%. Salaried employees had the highest declination rate at 12%. Medical contraindications were rare, and unknown vaccine status ranged from 4% to 10% across the three HCP categories, with licensed independent practitioners reporting unknown status most frequently.

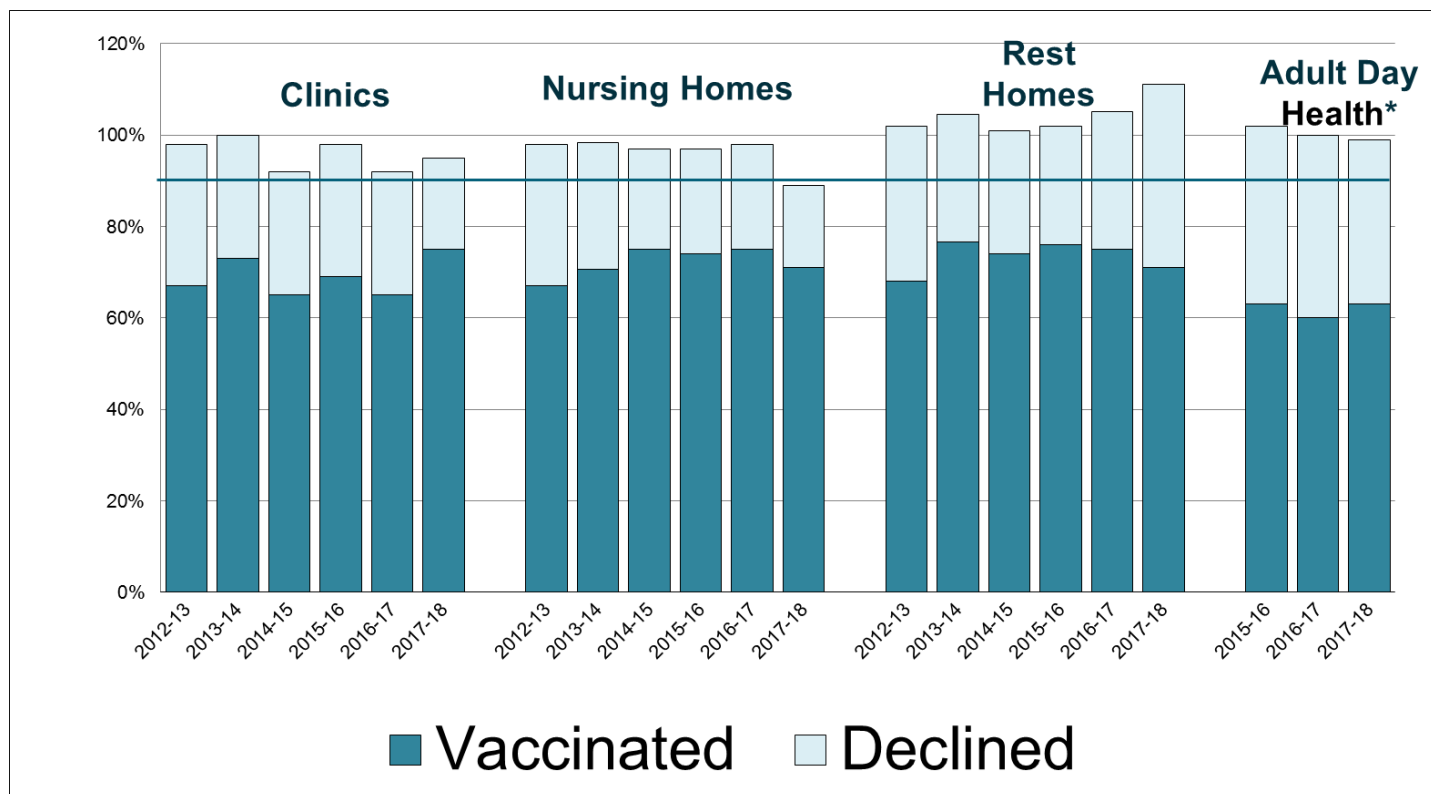

Figure 5. Overall Non-acute Care Hospital Vaccination of HCP by Type 2017-2018

Results: Clinics, Nursing Homes, Rest Homes, and Adult Day Health Centers

Figure 6 depicts trends in influenza vaccination rates in facilities in Massachusetts from the 2012-13 flu season through the 2017-18 season. Public reporting of influenza vaccine status for adult day health centers began in the 2015-16 season. Clinics and adult day health centers reported a slightly improved mean vaccine coverage rate in 2017-18 when compared to 2016-17. Nursing homes and rest homes had a slight decrease in vaccine coverage when compared to the previous season. Overall, no facility type reached the United States Department of Health and Human Services Healthy People 2020 90% coverage goal, though many individual sites did achieve this goal. Sites with greater than 90% coverage are indicated in the appendix with an asterisk.

Figure 6. Mean Percent of HCP Receiving and Declining Influenza Vaccination: 2012-2018

* 2015-2016 Season was the first year Adult Day Health Programs were required to report.

Clinics

During the 2017-18 influenza season, 181 licensed clinics submitted HCP influenza vaccination data. The average influenza vaccine coverage reported by clinics was 75%, with a mean reported declination of 20% (Table 4, Figure 6). Seventy-two clinics, representing 40% of reporting facilities in 2017-18, had an overall vaccination rate of 90% or greater. Personnel most frequently received vaccination outside their place of employment: a mean of 44% were vaccinated outside their workplace, and 31% were vaccinated at their place of employment.

Table 4. Mean Percent of Clinic HCP Vaccinated Against Influenza During 2017-2018 (N=181)

	Mean % Vaccinated	Range
Total Vaccinated	75%	(10-100%)
Total Exceptions		
Medical	1%	(0-14%)
Declined	20%	(0-100%)
Unknown	7%	(0-90%)
Location Vaccinated		
At Place of Employment	31%	(0-100%)
Outside Place of Employment	44%	(0-100%)

Nursing Homes

Among nursing homes, 351 licensed facilities reported data for the 2017-2018 flu season. On average in 2017-18, nursing home facilities reported 71% of their HCP were vaccinated against influenza and reported an average of 18% declined to be vaccinated (Table 5). The mean vaccine coverage rate decreased from 75% in the 2016-17 season to 71% this season, though the mean reported declination rate also decreased from 23% to 18%. (Figure 6). In 2017-18, 85 nursing homes in Massachusetts, representing 24% of reporting facilities, reported an overall vaccination rate of 90% or greater. Facilities reported an average of fifty-two percent of employees receiving vaccination at their place of employment and 19% receiving vaccination elsewhere.

Table 5. Mean Percent of Nursing Home HCP Vaccinated Against Influenza During 2017-2018 (N=351)

	Mean % Vaccinated	Range
Total Vaccinated	71%	(0-100%)
Total Exceptions		
Medical	1%	(0-16%)
Declined	18%	(0-71%)
Unknown	12%	(0-100%)
Location Vaccinated		
At Place of Employment	52%	(0-100%)
Outside Place of Employment	19%	(0-98%)

Rest Homes

Thirty-two licensed rest homes reported data for the 2017-2018 flu season. In 2017-2018, rest home facilities reported an average of 71% of their HCP were vaccinated against influenza and reported an average of 40% declined (Table 6). Ten rest homes (31%) reported an overall vaccination rate of 90% or greater. Facilities reported more rest home employees received vaccine outside their place of employment (41%) rather than at their place of employment (30%).

Table 6. Mean Percent of Rest Home HCP Vaccinated Against Influenza During 2017-2018 (N=32)

	Mean % Vaccinated	Range
Total Vaccinated	71%	(16-100%)
Total Exceptions		
Medical	1%	(0-8%)
Declined	40%	(0-100%)
Unknown	6%	(0-63%)
Location Vaccinated		
At Place of Employment	30%	(0-76%)
Outside Place of Employment	41%	(4-100%)

Adult Day Health Centers

One hundred and forty-four adult day health centers reported flu data for the 2017-18 flu season. In 2017-2018, adult day health center facilities reported an average 63% of HCP were vaccinated against influenza during 2017-18, and 36% declined (Table 7). Thirty-three adult day health centers (23%) reported an overall vaccination rate of 90% or greater. Facilities reported, on average, more adult day health center employees received vaccine at their place of employment rather than elsewhere, 34% and 29%, respectively.

Table 7. Mean Percent of Adult Day Health HCP Vaccinated Against influenza during 2017-2018 (N=144)

	Mean % Vaccinated	Range
Total Vaccinated	63%	(0-100%)
Total Exceptions		
Medical	3%	(0-25%)
Declined	36%	(0-100%)
Unknown	4%	(0-50%)
Location Vaccinated		
At Place of Employment	34%	(0-100%)
Outside Place of Employment	29%	(0-100%)

Public Health Actions

NEW

- DPH is hosting an October 2018 webinar to improve healthcare personnel influenza coverage. Program content will include: Influenza disease burden, key facts about the current season; surveillance and reporting; and strategies for increasing HCP coverage.

NEW

- DPH Quality improvement initiative targeting facilities from the lowest quartile of HCP influenza vaccination coverage during the 2017-18 season.
 - Direct outreach to assess previous vaccination strategies and perceived barriers to implementation.
 - Provide facility specific evidence-based recommendations to improve vaccination coverage.
 - January 2019: Conduct outreach to monitor progress and provide additional support to promote success.
 - Post-season interview to review performance and to assess strategies utilized during the 2018-2019 influenza season.
 - Share aggregate findings with facilities and public health partners.

ONGOING

- Reinforcement of the reporting requirement and statewide performance goal during trainings, and on-site visits in adult day health programs, rest homes and nursing homes.
- Monitoring trends and reporting annual compliance with the HCP influenza vaccination requirements.
- Promotion of continuous quality improvement, by recommending licensed facilities share vaccination rates with all staff, including administrators, boards of directors, practice managers, ombudsperson and patient/family councils.
- Encouraging facilities to evaluate their current influenza vaccination program and policies and develop an action plan to maximize influenza vaccination coverage of HCP to achieve the Healthy People 2020 and DPH target of 90% vaccination.
- Collaboration with public health partners to intensify efforts to improve immunization rates among HCP, especially among low outliers.

Appendix. Vaccination Rates by Facility Type and Name

Asterisk* indicates site achieved greater than 90% flu vaccine coverage in 2017-18. "n/a" indicates data not reported by facility to DPH or available through NHSN. DPH distributed guidance to all facilities at the beginning of the influenza season.

The data was extracted from NHSN on 7/5/18.
