Background

The Massachusetts Department of Public Health (DPH) requires licensed health care facilities, including ambulatory surgical centers, dialysis centers, clinics, rest homes, nursing homes, adult day health centers, and non-acute hospitals to report influenza vaccine coverage among employees.^{1 2} Health care personnel (HCP) are at high risk for influenza exposure and may be a source of influenza virus transmission in health care settings. Annual immunization is the most effective method of preventing influenza and potentially serious complications.³

In 2008, DPH mandated that all licensed health care facilities offer personnel free, annual influenza vaccine. Facilities must document and report receipt of vaccine by personnel, whether administered within or outside the facility, and all declination of immunization. This report presents data on influenza vaccine coverage of non-acute health care facility personnel for 2016-17. Health care facilities included in this report are ambulatory surgical centers, dialysis facilities, and non-acute hospitals. These facility types are required to report health care personnel influenza data through the National Healthcare Safety Network (NHSN) of the Centers for Disease Control and Prevention (CDC).

This report also presents data on influenza vaccine coverage of health care facility personnel working in clinics, nursing homes, rest homes, and adult day health centers. These facilities do not report through NHSN, but rather directly to DPH.

Data describing influenza vaccination of health care personnel in acute care hospitals during the 2016-2017 influenza season has been incorporated in the hospital specific health care associated infection data summaries available at the following link:

<http://www.mass.gov/eohhs/gov/departments/dph/programs/hcq/healthcare-quality/health-care-facilities/flu-vac-hc-personnel/flu-vaccination-reports.html>

While the CDC's Advisory Committee on Immunization Practices recommends annual influenza vaccination for all health care personnel, Massachusetts is one of only a handful of states that mandates reporting of health care personnel influenza vaccination data in order to understand coverage rates and use this information to promote vaccination. The CDC conducted a national online survey of health care personnel in the spring of 2016 to promote coverage. In a sample of 2,258 respondents, 79.0% of all health care personnel reported receiving the influenza vaccination during the 2015-2016 season.⁴ Figure 1 illustrates reported vaccination coverage by care setting.

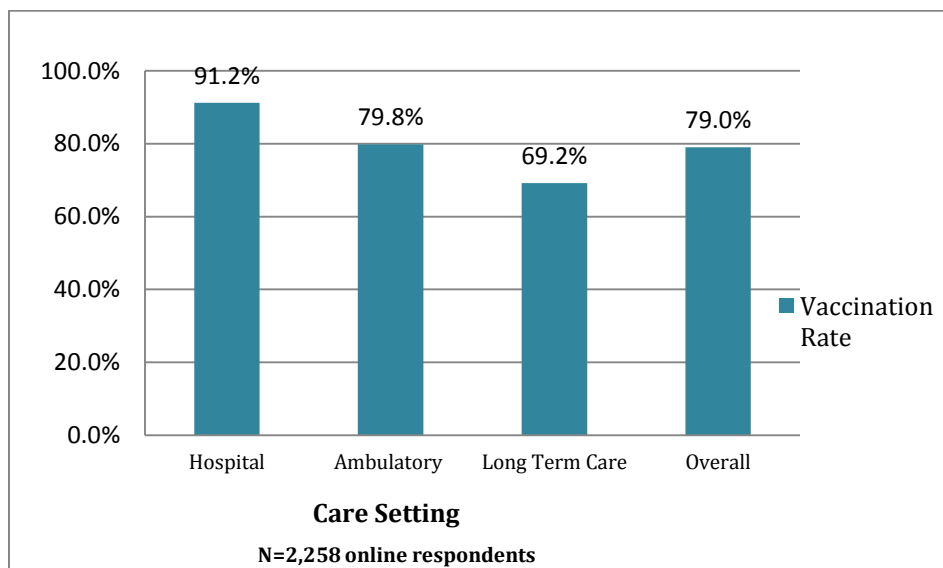

¹ See 105 CMR 140.150 for the influenza vaccination reporting requirements for clinics and dialysis centers; 105 CMR 130.325 for the reporting requirements for non-acute hospitals and 105 CMR 158.030(L)(*) for reporting requirements for Adult Day Health Centers. Note that the requirements under 105 CMR 140.150 apply to dialysis centers licensed under 105 CMR 145.000 pursuant to 105 CMR 145.900.

FIGURE 1. CDC's SURVEY OF NATIONAL HEALTH CARE PERSONNEL INFLUENZA VACCINATION RATES FOR 2015-16 SEASON

Methodology: Ambulatory Surgical Centers, Dialysis Centers, and Non-Acute Hospitals

NHSN is a secure, web-based system managed by the CDC that enables DPH and health care facilities to track and analyze data on health care associated infection and prevention practices to determine their incidence, identify trends and guide improvement. Participating health care facilities are required to report data according to the NHSN definitions and protocols to ensure uniform reporting, consistent over time within a healthcare facility and comparable across facilities.

Consistent with NHSN protocols, DPH required Ambulatory Surgical Centers, Dialysis Centers and Non-Acute Hospitals to offer employees influenza vaccines, and collect data for HCP working in the facility for at least one day between October 1 through March 31 of the influenza season, regardless of clinical responsibility or patient contact. Data is reported separately for three categories of health care personnel (HCP): employees on payroll, licensed independent practitioners (i.e. physicians, advanced practice nurses, physician assistants and other therapists affiliated with the facility but not on payroll), and adult students/trainees and volunteers aged 18 or older. For each HCP group in each facility, the total numbers of HCP vaccinated in and outside the facility, HCP who declined vaccine, HCP with a documented medical contraindication to the vaccine, and HCP with unknown vaccine status was to be compiled and submitted to NHSN.

Methodology: Clinics, Nursing Homes, Rest Homes, and Adult Day Health Centers

The DPH Healthcare Associated Infection (HAI) Prevention Program provided a Microsoft Excel spreadsheet to licensed non-acute health care facilities, for the purpose of capturing HCP influenza vaccination data. The required data elements included the total number of employees as of December 31, 2016; the total number of employees receiving seasonal influenza vaccination provided by the health care facility or administered outside the health care facility between August 1, 2016, and March 31, 2017; and the total number of HCPs who declined vaccination. Facilities were required to complete and submit this spreadsheet via electronic mail by April 15, 2017. DPH distributed guidance to all facilities at the beginning of the influenza season. Facilities that did not report data by the deadline were contacted via electronic mail to request data submission.

The facility vaccination rate was calculated by dividing the number of facility personnel vaccinated by the total number of facility HCPs. The overall mean percentage of HCPs vaccinated by facility type was calculated as the mean of all facility vaccination rates.

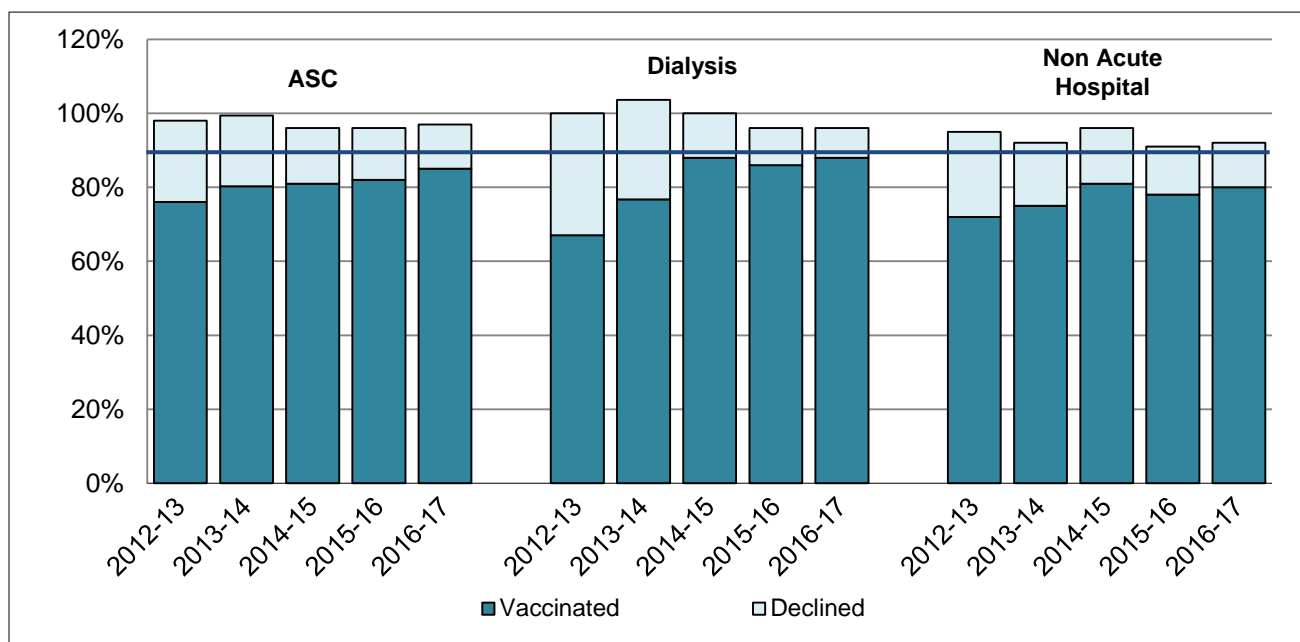

Health care personnel are defined as “individuals, both full-time and part-time employees, who are on the health care facility payroll as of December 31, 2016.” This includes, but is not limited to: physicians; nurses; interns/residents; fellows; physician assistants; physical, occupational, respiratory, and speech therapists; laboratory and operating room technicians; central supply staff; pharmacists; maintenance/environmental services staff; dietary staff; attendants/orderlies; secretarial and administrative staff; and contract staff. Due to the fluctuation in number of staff on payroll over the course of the fall and winter, it is possible for the number of immunizations and declinations documented to exceed 100% of the employees identified as of December 31, 2016.

DPH has utilized this definition of health care personnel since the 2010-11 influenza season, making comparison of data from the 2010-2011 through the 2016-2017 influenza seasons appropriate.

Results: Ambulatory Surgical Centers, Dialysis Centers, and Non-Acute Hospitals

Figure 2 depicts trends in influenza vaccination rates in ambulatory surgical centers, dialysis centers, and non-acute hospitals in Massachusetts over the most recent five flu seasons: from the 2012-13 flu season through the 2016-17 season. Overall, facilities reported similar or slightly improved mean vaccine coverage rates in 2016-17 when compared to 2015-16. No facility type reached the United States Department of Health and Human Services Healthy People 2020 90% coverage goal; however, dialysis centers reported 88% coverage and were very close with 88% coverage. Facilities that achieved this goal or had greater than 90% coverage are indicated in the appendix with an asterisk.

FIGURE 2. MEAN PERCENT OF HCP RECEIVING AND DECLINING INFLUENZA VACCINATION: 2012-2017

Ambulatory Surgical Centers

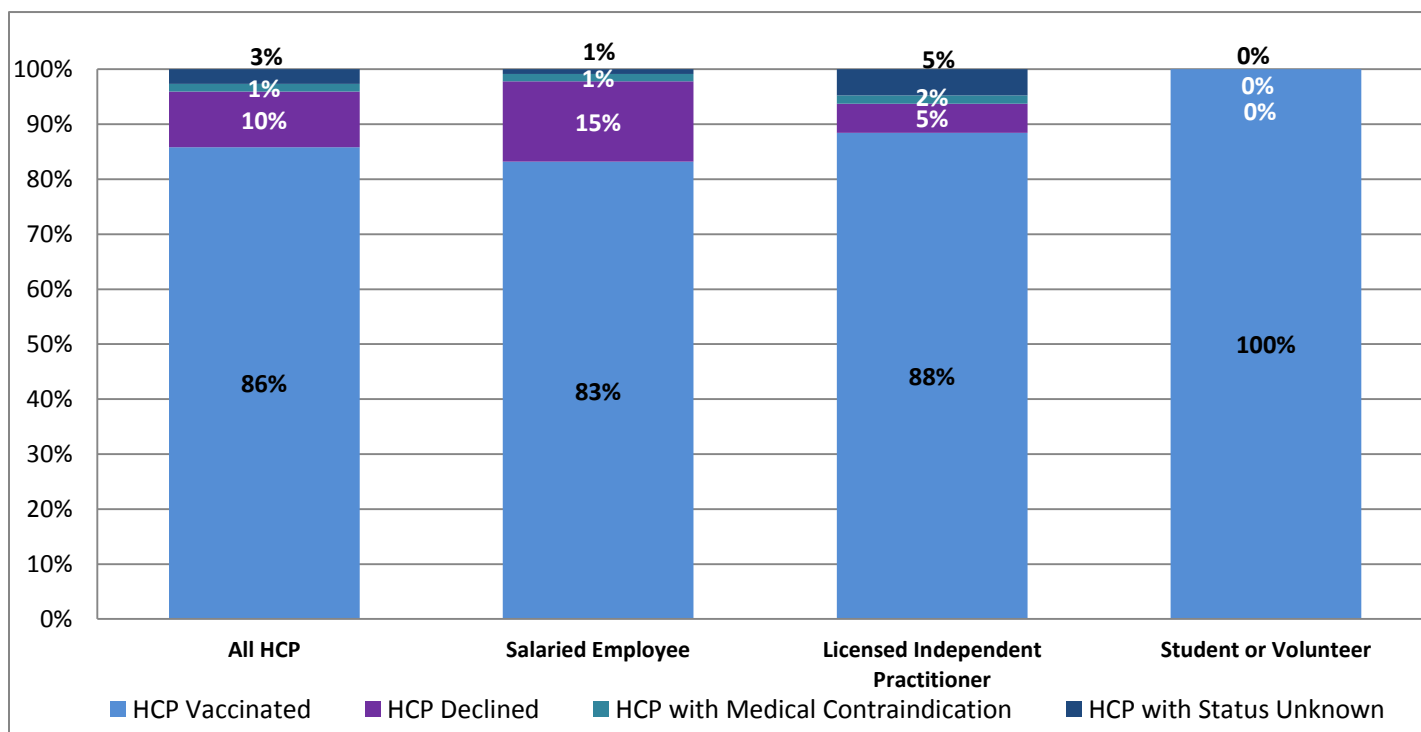

Forty-eight ambulatory surgical centers provided information on influenza vaccine coverage for 2016-17. On average, 85% of HCP at 48 ambulatory surgical centers were vaccinated against influenza and 11% declined vaccination (Table 1). This was an improvement from the 82% influenza vaccine coverage and 14% declination reported in 2015-16 (Figure 2). Twenty-three Massachusetts ambulatory surgical centers, representing 48% of reporting facilities, achieved a vaccination rate of 90% or greater in 2016-17. Forty-four percent of employees received their vaccinations at their place of employment, and 41% were vaccinated elsewhere.

TABLE 1. MEAN PERCENT OF HCP AT AMBULATORY SURGICAL CENTERS VACCINATED AGAINST INFLUENZA DURING 2016-2017 (N=48)

	MEAN % VACCINATED	RANGE
Total Vaccinated	85%	(43-100%)
Vaccination Declination Rate	11%	(0-57%)
HCP With Unknown Status	2%	(0- 30%)
HCP With Medical Contraindication	2%	(0-12%)
Location Vaccinated		
At Place of Employment	44%	(0-90%)
Outside Place of Employment	41%	(3-100%)

In addition to influenza vaccination and declination, data on medical contraindications and unknown vaccine status were also collected, with specifics for salaried employees, licensed independent practitioners, and students and volunteers. Overall, 86% of all HCPs at Ambulatory Surgical Centers (ASC) received the vaccine and 10% declined (Figure 3). Vaccine coverage ranged from 83% to 100%, and salaried employees had the highest declination rate at 15%. Medical contraindications were rare, and unknown vaccine status ranged from 0% to 5%, with licensed independent practitioners reported with unknown status most frequently.

FIGURE 3. OVERALL AMBULATORY SURGICAL CENTER VACCINATION OF HCP BY TYPE 2016-2017

Dialysis Centers

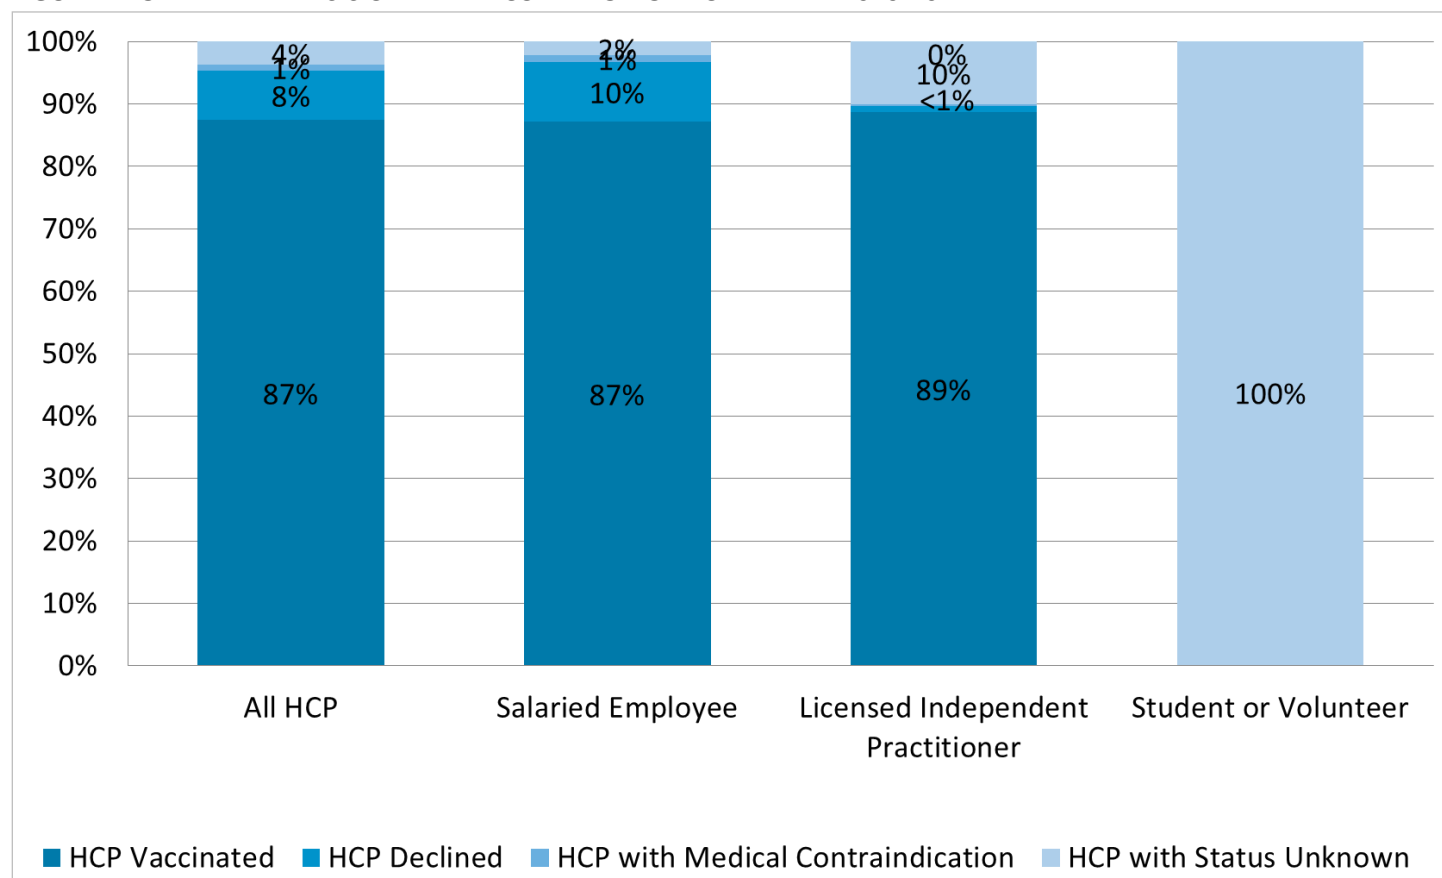

Among 73 reporting dialysis centers, the mean influenza vaccine coverage was 88% and declination rate was 8% in 2016-17 (Table 2). In 2016-17, 43 Massachusetts dialysis centers, 59% of reporting facilities, achieved an overall vaccination rate of 90% or greater. On average, 57% of employees were vaccinated at their place of employment and 30% were vaccinated elsewhere. Dialysis centers that are located within acute care hospitals are included in the acute care hospital report.

TABLE 2. MEAN PERCENT OF DIALYSIS CENTER HCP VACCINATED AGAINST INFLUENZA DURING 2016-2017 (N=73)

	MEAN % VACCINATED	RANGE
Total Vaccinated	88%	(50-100%)
Vaccination Declination Rate	8%	(0-50%)
HCP With Unknown Status	3%	(0-24%)
HCP With Medical Contraindication	1%	(0-11%)
Location Vaccinated		
At Place of Employment	57%	(20-97%)
Outside Place of Employment	30%	(3-59%)

In addition to influenza vaccination and declination, data on medical contraindications and unknown vaccine status were also collected, with specific data for salaried employees, licensed independent practitioners, and students and volunteers. Eighty-seven percent of all HCPs at dialysis centers received the vaccine and 8% declined (Figure 4). Medical contraindications were rare.

FIGURE 4. OVERALL DIALYSIS CENTER VACCINATION OF HCP BY TYPE 2016-2017

Non-Acute Care Hospitals

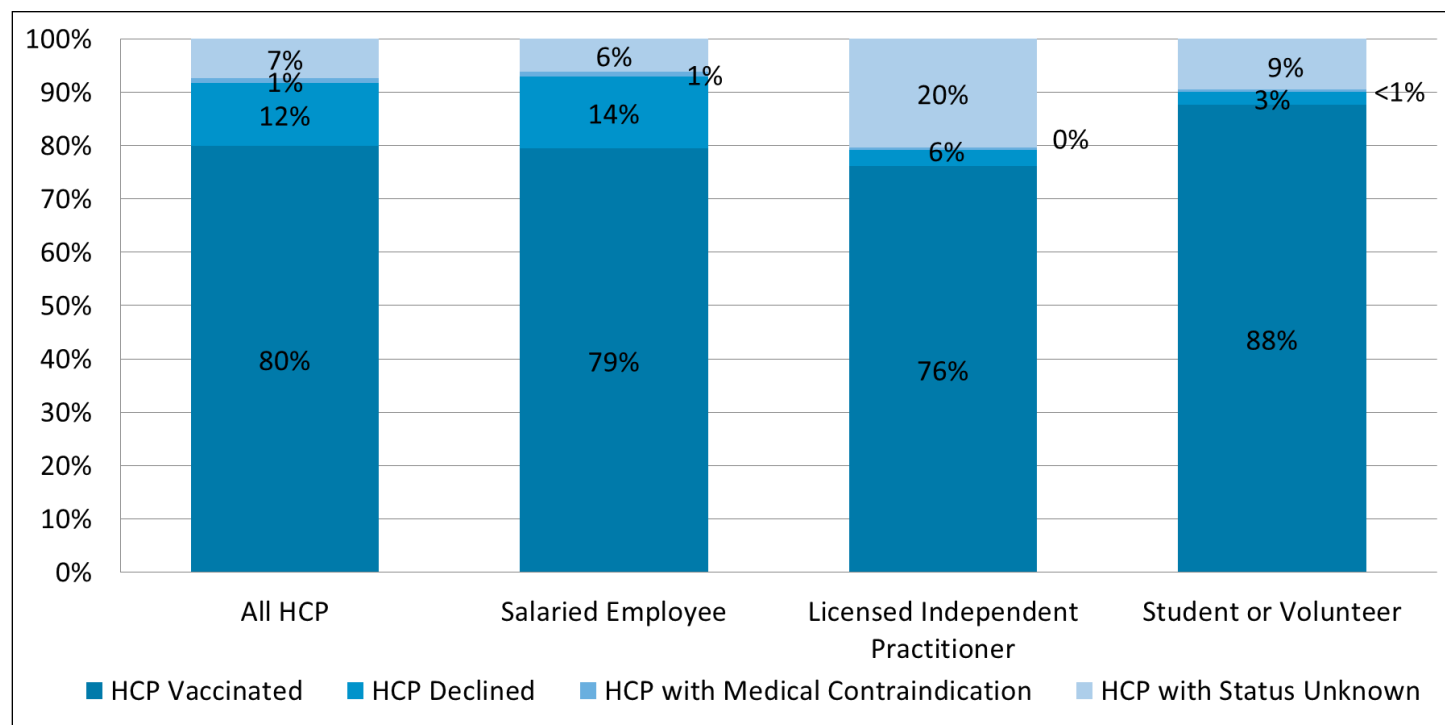

Thirty-nine non-acute care hospitals provided information on influenza vaccine coverage. Seventy-nine percent of HCP at non-acute care hospitals, on average, were vaccinated against influenza, and 12% declined vaccination in 2016-17 (Table 3). There was a small increase in mean vaccine coverage in 2016-2017, compared to mean coverage of 78% in 2015-2016. Only 12% of HCP declined vaccination, compared to 13% in 2015-16 (Figure 2). Thirteen non-acute care hospitals in Massachusetts reported vaccine coverage greater than 90% during the 2016-17 influenza season. Most personnel received vaccination from the facility that employed them: on average 56% . Twenty-four percent of HCP at non-acute care hospitals were vaccinated elsewhere.

TABLE 3. MEAN PERCENT OF NON-ACUTE CARE HOSPITAL HCP VACCINATED AGAINST INFLUENZA DURING 2016-2017 (N=39)

	Mean % Vaccinated	Range
Total Vaccinated	79%	(35-98%)
Vaccination Declination Rate	12%	(0-52%)
HCP With Unknown Status	8%	(0-43%)
HCP With Medical Contraindication	1%	(0-4%)
Location Vaccinated		
At Place of Employment	56%	(23-77%)
Outside Place of Employment	24%	(3-45%)

In addition to influenza vaccination and declination, data on medical contraindications and unknown vaccine status were also collected, with specifics for salaried employees, licensed independent practitioners, and students and volunteers. Eighty percent of all HCPs at non-acute care hospitals received the vaccine and 12% declined (Figure 5). Vaccine coverage among these groups ranged from 76% to 88%. Salaried employees had the highest declination rate at 14%. Medical contraindications were rare, and unknown vaccine status ranged from 6% to 20%, with licensed independent practitioners reported with unknown status most frequently.

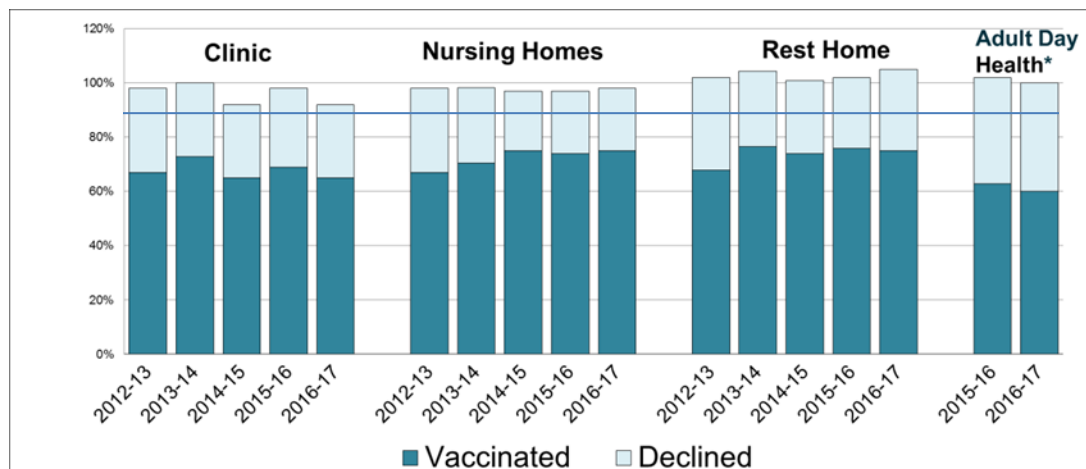

FIGURE 5. OVERALL NON-ACUTE CARE HOSPITAL VACCINATION OF HCP BY TYPE 2016-2017

Results: Clinics, Nursing Homes, Rest Homes, and Adult Day Health Centers

Figure 6 depicts trends in influenza vaccination rates in facilities in Massachusetts from the 2012-13 flu season through the 2016-17 season. Public reporting of influenza vaccine status for adult day health centers began in the 2015-16 season. Nursing homes and rest homes reported a slightly improved mean vaccine coverage rate in 2016-17 when compared to 2015-16. Clinic and adult day health centers had a slight decrease in vaccine coverage when compared to the previous season. Overall, no facility type reached the United States Department of Health and Human Services Healthy People 2020 90% coverage goal, though many individual sites did achieve this goal. Sites with greater than 90% coverage are indicated in the appendix with an asterisk.

FIGURE 6. MEAN PERCENT OF HCP RECEIVING AND DECLINING INFLUENZA VACCINATION: 2012-2017

Clinics

During the 2016-17 influenza season, 164 licensed clinics submitted HCP influenza vaccination data. The average influenza vaccine coverage at clinics was 65%, with a mean of 27% declining the vaccine (Table 4, Figure 6). Forty-six clinics, representing 27% of reporting facilities in 2016-17, had an overall vaccination rate of 90% or greater. Personnel most frequently received vaccination outside their place of employment: a mean of 36% were vaccinated outside their workplace, and 29% were vaccinated at their place of employment.

TABLE 4. MEAN PERCENT OF CLINIC HCP VACCINATED AGAINST INFLUENZA DURING 2016-2017 (N=164)

	Mean % Vaccinated	Range
Total Vaccinated	65%	(0-100%)
Vaccine Declination Rate	27%	(0-100%)
Location Vaccinated		
At Place of Employment	29%	(0-100%)
Outside Place of Employment	36%	(0-100%)

Nursing Homes

In nursing homes, 358 licensed facilities reported data for the 2016-2017 flu season. On average in 2016-17, 75% of HCP at nursing homes were vaccinated against influenza and 23% declined to be vaccinated (Table 5). The vaccine coverage rate increased from 73% in the 2015-16 season to 75% this season, though the declination rate has stayed the same for three seasons at 23%. (Figure 6). In 2016-17, 94 nursing homes in Massachusetts, representing 26% of reporting facilities, reported an overall vaccination rate of 90% or greater. Fifty-five percent of employees received vaccination at their place of employment and 21% were vaccinated elsewhere.

TABLE 5. MEAN PERCENT OF NURSING HOME HCP VACCINATED AGAINST INFLUENZA DURING 2016-2015 (N=358)

	Mean % Vaccinated	Range
Total Vaccinated	75%	(15-100%)
Vaccine Declination Rate	23%	(0-78%)
Location Vaccinated		
At Place of Employment	54%	(0-100%)
Outside Place of Employment	21%	(0-83%)

Rest Homes

Twenty licensed rest homes reported data for the 2016-2017 flu season. On average, 75% of HCP were vaccinated against influenza during 2016-17, and 30% declined (Table 6). Vaccine coverage remained stable at 76% between 2015-16 and 2016-17, while six rest homes (30%) reported an overall vaccination rate of 90% or greater. More rest home employees received vaccine outside their place of employment (40%) rather than at their place of employment (35%).

TABLE 6. MEAN PERCENT OF REST HOME HCP VACCINATED AGAINST INFLUENZA DURING 2016-2017 (N=20)

	Mean % Vaccinated	Range
Total Vaccinated	75%	(47-100%)
Vaccination Declination Rate	30%	(0-70%)
Location Vaccinated		
At Place of Employment	35%	(0-76%)
Outside Place of Employment	40%	(6-87%)

Adult Day Health Centers

One hundred and thirty-two adult day health centers reported flu data for the 2016-17 flu season. On average, 60% of HCP were vaccinated against influenza during 2016-17, and 40% declined (Table 7). Twenty-seven adult day health centers (20%) reported an overall vaccination rate of 90% or greater. More adult day health center employees received vaccine at their place of employment rather than elsewhere, 32% and 28%, respectively.

TABLE 7. MEAN PERCENT OF ADULT DAY HEALTH HCP VACCINATED AGAINST INFLUENZA DURING 2016-2017 (N=132)

	Mean % Vaccinated	Range
Total Vaccinated	60%	(0-100%)
Vaccination Declination Rate	40%	(0-100%)
Location Vaccinated		
At Place of Employment	32%	(0-100%)
Outside Place of Employment	28%	(0-100%)

Public Health Actions

- DPH is planning a two-part webinar series targeting Adult Day Health Centers, Clinics, Nursing Homes, and Rest Homes. Program content will include: influenza disease burden; key facts about the current season; surveillance and reporting; and strategies for increasing HCP coverage.
- DPH will continue to reinforce the reporting requirement and statewide performance goal during dialysis trainings, and on-site Infection Control Assessment and Response (ICAR) visits in nursing homes.
- DPH will continue to monitor trends and report annual compliance with the HCP influenza vaccination requirements.
- DPH will promote continuous quality improvement, and recommend licensed facilities share vaccination rates with all staff, including administrators, boards of directors, practice managers, ombudsperson, and patient/family councils.
- DPH encourages facilities to review reported data and current HCP influenza policies, and as necessary implement processes to maximize vaccination coverage.
- DPH will continue to promote a continuous, comprehensive influenza prevention program in all licensed health care settings.
- DPH will promote the DPH and Healthy People 2020 target to vaccinate 90% or greater of eligible HCP in all licensed health care settings.
- DPH will collaborate with public health partners to intensify efforts to improve immunization rates among HCP especially among low outliers.

Appendix. Vaccination Rates by Facility Type and Name

Asterisk* indicates site achieved greater than 90% flu vaccine coverage in 2016-17. “n/a” indicates data not reported by facility to DPH or available through NHSN. DPH distributed guidance to all facilities at the beginning of the influenza season.

The data was extracted from NHSN on 7/13/17.
