APPEAL DECISION

Appeal Decision:	Denied	Issue:	Orthodontic treatment
Decision Date:	8/11/2022	Hearing Date:	08/03/2022
MassHealth's Rep.:	Dr. Carl Perlmutter, DentaQuest	Appellant's Rep.:	Mother
Hearing Location:	Quincy Harbor South		

Authority

This hearing was conducted pursuant to Massachusetts General Laws Chapter 118E, Chapter 30A, and the rules and regulations promulgated thereunder.

Jurisdiction

Through a notice dated June 16, 2022, MassHealth denied the appellant's request for prior authorization for orthodontic treatment because MassHealth determined that the appellant does not have a handicapping malocclusion as is required by MassHealth regulations for orthodontic coverage. (see 130 CMR 420.431 and Exhibit 1). The appellant filed this appeal in a timely manner on June 23, 2022. (see 130 CMR 610.015(B) and Exhibit 2). Denial of prior authorization is valid grounds for appeal. (see 130 CMR 610.032).

Action Taken by MassHealth

MassHealth denied the appellant's request for prior authorization for coverage of orthodontic treatment.

Issue

The appeal issue is whether MassHealth was correct, pursuant to 130 CMR 420.431, in determining that the appellant does not meet the MassHealth requirements for coverage of orthodontic treatment.

Summary of Evidence

The appellant is a child and was represented telephonically at the hearing by her mother. MassHealth was represented telephonically at the hearing by an orthodontist consultant with DentaQuest, the contracted agent of MassHealth that makes the dental prior authorization determinations. The appellant's orthodontist submitted a request for prior authorization for orthodontic treatment for the appellant on June 15, 2022. (Exhibit 4, p. 3). The appellant's orthodontist completed an Orthodontics Prior Authorization Form and a MassHealth Handicapping Labio-Lingual Deviations (HLD) Form and submitted these along with photographs and x-rays of the appellant's mouth. (Exhibit 4) The appellant's orthodontist noted that a medical necessity narrative would not be submitted. (Exhibit 4, p. 9).

The MassHealth representative testified MassHealth only covers orthodontic treatment when the member has a handicapping malocclusion. The HLD form lists 13 autoqualifiers and 9 characteristics, such as bite and crowding, with corresponding numerical values. (Exhibit 4, p. 7). If a member has any of the 13 autoqualifiers or a HLD score of 22 or higher, the member meets the criteria for a handicapping malocclusion. (Testimony, exhibit 4, p. 7). The 13 autoqualifiers are a cleft lip/palate; impinging overbite with evidence of occlusal contact into the opposing soft tissue; impactions where eruption is impeded but extraction is not indicated (excluding 3rd molars); severe traumatic deviations; overjet greater than 9 millimeters; reverse overjet greater than 3.5 millimeters; crowding of 10 mm or more, in either the maxillary or mandibular arch (excluding 3rd molars); spacing of 10 mm or more, in either the maxillary or mandibular arch (excluding 3rd molars); anterior crossbite of 3 or more maxillary teeth per arch; posterior crossbite of 3 or more maxillary teeth per arch; two or more congenitally missing teeth (excluding 3rd molars) of at least one tooth per quadrant; lateral open bite: 2 mm or more of 4 or more teeth per arch; and anterior open bite: 2 mm or more of 4 or more teeth per arch. (Exhibit 4, p. 7). If any of these are present, the request for orthodontic treatment is approved. (Exhibit 4, testimony). If none of these are present, the orthodontist measures overjet, overbite, mandibular protrusion, open bite, ectopic eruption, anterior crowding in the upper and lower mouth, labio-lingual spread or anterior spacing, posterior unilateral crossbite, and posterior impactions or congenitally missing posterior teeth, and gives each measurement a value based on the calculation worksheet on the HLD Form. (Exhibit 4, p. 7, testimony).

The appellant's orthodontist indicated that the appellant had the autoqualifier of impactions where eruption is impeded but extraction is not indicated (excluding 3rd molars). (Exhibit 4, p. 7). The appellant's orthodontist also calculated a HLD score of 22, measuring 1 millimeter for overjet, 1 millimeter for overbite, 3 millimeters of mandibular protrusion for a score of 15, and 5 millimeters for labio-lingual spread. (Exhibit 4, p. 7).

Based on a review of the photographs of the appellant's mouth, MassHealth/DentaQuest calculated a HLD score of 7, measuring 1 millimeter for mandibular protrusion for a score of 5, and 2 millimeters for labio-lingual spread (spacing). (Exhibit 4, p. 13). Based on a review of the x-rays, MassHealth/DentaQuest did not find impactions where eruption is impeded but extraction is not indicated. (Exhibit 4, p. 11, testimony).

The MassHealth representative testified that he reviewed the appellant's photographs and x-rays and

carefully measured the appellant's teeth. The MassHealth representative testified that he measured 1 millimeter for mandibular protrusion, not 3 millimeters as noted by the appellant's orthodontist. The MassHealth representative noted that the photographs do not clearly show the molars in mandibular protrusion but he gave the appellant the benefit of the doubt and gave 1 millimeter for a score of 5. (Exhibit 4, p. 12). The MassHealth representative stated further that the appellant does not have an impaction where eruption is impeded but extraction is not indicated. The MassHealth representative testified that the x-rays do not show any impacted tooth and it was difficult to ascertain to which tooth/teeth the appellant's orthodontist was referring. (Exhibit 4, p. 11). The MassHealth representative noted that the appellant's orthodontist might be referring to the appellant's lower left second bicuspid, but it is not fully impacted and appears to have enough space to erupt. The MassHealth representative stated that it is too soon to say that tooth is impacted. (Exhibit 4, p. 11). The MassHealth representative stated that he got the same HLD score as DentaQuest.

The MassHealth representative stated that while the appellant would benefit from orthodontic treatment, the issue here is not whether the appellant needs braces, but rather whether she meets the criteria under the regulations for MassHealth to cover the orthodontic treatment. The MassHealth representative stated that because there is no evidence of a handicapping malocclusion, MassHealth will not cover the orthodontic treatment. The MassHealth representative advised that the appellant go back to her orthodontist after 6 months from the last visit to see if the lower left second bicuspid is erupting and to take more clear photos of the molars claimed to be in mandibular protrusion.

The appellant's mother stated that the appellant has a bad underbite in her front teeth. The appellant's mother noted that she feels the appellant's teeth are bad enough to be covered now by MassHealth and she does not want to wait any longer because she is concerned it will be more harmful to the appellant to wait. The appellant's mother stated that the appellant has a palatal expander, but it is not working enough. The appellant's mother stated that they were told that the appellant's jaw would need to be broken and tied together to get the teeth to adjust.

The MassHealth representative stated that the appellant's orthodontist did not indicate that the appellant has the autoqualifier of reverse overjet and in fact measured one millimeter of overjet. (Exhibit 4, p. 7). The MassHealth representative noted further that in order to meet the autoqualifier for reverse overjet (underbite), the appellant would need to have greater than 3.5 millimeters of reverse overjet and the photographs do not show that the appellant's upper front teeth are more than 3.5 millimeters behind the lower front teeth. (Exhibit 4, p. 12).

Findings of Fact

Based on a preponderance of the evidence, I find the following:

1. The appellant's orthodontist submitted a request for prior authorization for orthodontic treatment for the appellant.
2. The appellant's orthodontist completed an Orthodontics Prior Authorization Form and a HLD Form and submitted these, along with photographs and x-rays of the appellant's mouth, to DentaQuest.
3. The appellant's orthodontist calculated an HLD score of 22 and noted that the appellant has an impacted tooth or teeth.
4. MassHealth/DentaQuest and the MassHealth representative calculated an HLD score of 7 after reviewing the photographs and x-rays.
5. A HLD score of 22 is the minimum score indicative of a handicapping malocclusion.
6. The appellant has a mandibular protrusion of no more than 1 millimeter.
7. The appellant does not have impactions where eruption is impeded but extraction is not indicated.

Analysis and Conclusions of Law

Service Descriptions and Limitations: Orthodontic Services

(A) General Conditions. The MassHealth agency pays for orthodontic treatment, subject to prior authorization, service descriptions and limitations as described in 130 CMR 420.431. The provider must seek prior authorization for orthodontic treatment and begin initial placement and insertion of orthodontic appliances and partial banding or full banding and brackets prior to the member's 21st birthday.

(B) Definitions.

- (1) Pre-orthodontic Treatment Examination – includes the periodic observation of the member's dentition at intervals established by the orthodontist to determine when orthodontic treatment should begin.
- (2) Interceptive Orthodontic Treatment – includes treatment of the primary and transitional dentition to prevent or minimize the development of a handicapping malocclusion and therefore, minimize or preclude the need for comprehensive orthodontic treatment.
- (3) Comprehensive Orthodontic Treatment – includes a coordinated diagnosis and treatment leading to the improvement of a member's craniofacial dysfunction and/or dentofacial deformity which may include anatomical and/or functional relationship. Treatment may utilize fixed and/or removable orthodontic appliances and may also include functional and/or orthopedic appliances. Comprehensive orthodontics may incorporate treatment phases including adjunctive procedures to facilitate care focusing on specific objectives at various stages of dentofacial development.

(4) Orthodontic Treatment Visits – periodic visits which may include but are not limited to updating wiring, tightening ligatures or otherwise evaluating and updating care while undergoing comprehensive orthodontic treatment.

(C) Service Limitations and Requirements.

(1) Pre-orthodontic Treatment Examination. The MassHealth agency pays for a pre-orthodontic treatment examination for members younger than 21 years old, once per six (6) months per member, and only for the purpose of determining whether orthodontic treatment is medically necessary, and can be initiated before the member's twenty-first birthday. The MassHealth agency pays for a pre-orthodontic treatment examination as a separate procedure (see 130 CMR 420.413). The MassHealth agency does not pay for a pre-orthodontic treatment examination as a separate procedure in conjunction with pre-authorized ongoing or planned orthodontic treatment.

(2) Interceptive Orthodontics.

(a) The MassHealth agency pays for interceptive orthodontic treatment once per member per lifetime. The MassHealth agency determines whether the treatment will prevent or minimize a handicapping malocclusion based on the clinical standards described in Appendix F of the Dental Manual.

(b) The MassHealth agency limits coverage of interceptive orthodontic treatment to primary and transitional dentition with at least one of the following conditions: constricted palate, deep impinging overbite, Class III malocclusion including skeletal Class III cases as defined in Appendix F of the Dental Manual when a protraction facemask/reverse pull headgear is necessary at a young age, craniofacial anomalies, anterior cross bite, or dentition exhibiting results of harmful habits or traumatic interferences between erupting teeth.

(c) When initiated during the early stages of a developing problem, interceptive orthodontics may reduce the severity of the malformation and mitigate its causes. Complicating factors such as skeletal disharmonies, overall space deficiency, or other conditions may require subsequent comprehensive orthodontic treatment. Prior authorization for comprehensive orthodontic treatment may be sought for Class III malocclusions as defined in Appendix F of the Dental Manual requiring facemask treatment at the same time that authorization for interceptive orthodontic treatment is sought. For members with craniofacial anomalies, prior authorization may separately be sought for the cost of appliances, including installation.

(3) Comprehensive Orthodontics. The MassHealth agency pays for comprehensive orthodontic treatment, subject to prior authorization, once per member per lifetime for a member younger than 21 years old and only when the member has a handicapping malocclusion. The MassHealth agency determines whether a malocclusion is handicapping based on clinical standards for medical necessity as described in Appendix D of the Dental Manual. Upon the completion of orthodontic treatment, the provider must take post treatment photographic prints and maintain them in the member's dental record. The MassHealth agency pays for the office visit, radiographs and a record fee of the pre-orthodontic treatment examination (alternative billing to a contract fee) when the MassHealth agency denies a request for prior authorization for comprehensive

orthodontic treatment or when the member terminates the planned treatment. The payment for a pre-orthodontic treatment consultation as a separate procedure does not include models or photographic prints. The MassHealth agency may request additional consultation for any orthodontic procedure. Payment for comprehensive orthodontic treatment is inclusive of initial placement, and insertion of the orthodontic fixed and removable appliances (for example: rapid palatal expansion (RPE) or head gear), and records. Comprehensive orthodontic treatment may occur in phases, with the anticipation that full banding must occur during the treatment period. The payment for comprehensive orthodontic treatment covers a maximum period of three (3) calendar years. The MassHealth agency pays for orthodontic treatment as long as the member remains eligible for MassHealth, if initial placement and insertion of fixed or removable orthodontic appliances begins before the member reaches 21 years of age. Comprehensive orthodontic care should commence when the first premolars and 1st permanent molars have erupted. It should only include the transitional dentition in cases with craniofacial anomalies such as cleft lip or cleft palate. Comprehensive treatment may commence with second deciduous molars present. Subject to prior authorization, the MassHealth agency will pay for more than one comprehensive orthodontic treatment for members with cleft lip, cleft palate, cleft lip and palate, and other craniofacial anomalies to the extent treatment cannot be completed within three years.

(4) Orthodontic Treatment Visits. The MassHealth agency pays for orthodontic treatment visits on a quarterly (90-days) basis for ongoing orthodontic maintenance and treatment beginning after the initial placement, and insertion of the orthodontic fixed and removable appliances. If a member becomes inactive for any period of time, prior authorization is not required to resume orthodontic treatment visits and subsequent billing, unless the prior authorization time limit has expired. The provider must document the number and dates of orthodontic treatment visits in the member's orthodontic record.

(5) Orthodontic Case Completion. The MassHealth agency pays for orthodontic case completion for comprehensive orthodontic treatment which includes the removal of appliances, construction and placement of retainers and follow-up visits. The MassHealth agency pays for a maximum of five (5) visits for members whose orthodontic treatment begins before their 21st birthday, consistent with 130 CMR 420.431(A). The MassHealth agency pays for the replacement of lost or broken retainers with prior authorization.

(6) Orthodontic Transfer Cases. The MassHealth agency pays for members who transfer from one orthodontic provider to another for orthodontic services subject to prior authorization to determine the number of treatment visits remaining. Payment for transfer cases is limited to the number of treatment visits approved. Providers must submit requests using the form specified by MassHealth.

(7) Orthodontic Terminations. The MassHealth agency requires providers to make all efforts to complete the active phase of treatment before requesting payment for removal of brackets and bands of a noncompliant member. If the provider determines that continued orthodontic treatment is not indicated because of lack of member's cooperation and has obtained the member's consent, the provider must submit a written treatment narrative on office letterhead with supporting documentation, including the case prior authorization number.

(8) Radiographs. Payment for Cephalometric and radiographs used in conjunction with

orthodontic diagnosis is included in the payment for comprehensive orthodontic treatment (see 130 CMR 420.423(D)). The MassHealth agency pays for radiographs as a separate procedure for orthodontic diagnostic purposes only for members younger than 21 years old if requested by the MassHealth agency.

(9) Oral/Facial Photographic Images. The MassHealth agency pays for digital or photographic prints, not slides, only to support prior-authorization requests for comprehensive orthodontic treatment. Payment for digital or photographic prints is included in the payment for comprehensive orthodontic treatment or orthognathic treatment. The MassHealth agency does not pay for digital or photographic prints as a separate procedure (see 130 CMR 420.413). Payment for orthodontic treatment includes payment for services provided as part of the pre-orthodontic treatment examination, unless the MassHealth agency denies the prior authorization request for interceptive or comprehensive orthodontic treatment. The MassHealth agency pays for the pre-orthodontic treatment examination if prior authorization is denied for interceptive or comprehensive orthodontic treatment.

130 CMR 420.431.

MassHealth covers comprehensive orthodontic treatment if the MassHealth member evidences a handicapping malocclusion either by having one of the autoqualifiers listed on the HDL form or by meeting a HLD score of 22 or higher. Comprehensive orthodontic treatment is also covered by MassHealth if it is medically necessary for the member as evidenced by a medical necessity narrative and supporting documentation. The appellant's orthodontist noted that no medical necessity narrative would be submitted.

Despite the appellant's orthodontist's indication that the appellant has the autoqualifier of impactions where eruption is impeded but extraction is not indicated, the submitted x-rays do not show any teeth that meet the criteria for impactions set forth in the HLD form.

Further, the appellant does not have 3 millimeters of mandibular protrusion. The photographs show no more than one millimeter of mandibular protrusion, therefore the appellant's orthodontist's HLD score is reduced by 10 points, to a score of 12. Furthermore, the appellant has a reverse overjet, not an overjet or overbite and thus the appellant's orthodontist's score of one millimeter for overjet and one millimeter for overbite is not accurate. Both the MassHealth representative and the appellant's orthodontist's HLD scores are less than the necessary 22 for approval of MassHealth coverage. Because the appellant does not meet the criteria for any of the autoqualifiers, nor does she have a HLD score of 22 or higher, there is no evidence to support that the appellant has a handicapping malocclusion. MassHealth was correct in denying the request for prior approval pursuant to 130 CMR 420.431. MassHealth's action is upheld and the appeal is denied.

Order for MassHealth

None.

Notification of Your Right to Appeal to Court

If you disagree with this decision, you have the right to appeal to Court in accordance with Chapter 30A of the Massachusetts General Laws. To appeal, you must file a complaint with the Superior Court for the county where you reside, or Suffolk County Superior Court, within 30 days of your receipt of this decision.
