| Hearing Location: | Quincy Harbor South | | |

Authority

This hearing was conducted pursuant to Massachusetts General Laws Chapter 118E, Chapter 30A, and the rules and regulations promulgated thereunder.

Jurisdiction

Through a notice dated July 3, 2023, MassHealth denied the appellant's request for prior authorization for orthodontic treatment because MassHealth determined that the appellant does not have a handicapping malocclusion as is required by MassHealth regulations for orthodontic coverage. (see 130 CMR 420.431 and Exhibit 1). The appellant filed this appeal in a timely manner on July 31, 2023. (see 130 CMR 610.015(B) and Exhibit 2). Denial of prior authorization is valid grounds for appeal. (see 130 CMR 610.032).

Action Taken by MassHealth

MassHealth denied the appellant's request for prior authorization for coverage of orthodontic treatment.

Issue

The appeal issue is whether MassHealth was correct, pursuant to 130 CMR 420.431, in determining that the appellant does not meet the MassHealth requirements for coverage of

orthodontic treatment.

Summary of Evidence

The appellant is a child and appeared at the hearing with his mother, who testified through an interpreter. The appellant's mother verified the appellant's identity. MassHealth was represented at the hearing by an orthodontist consultant with DentaQuest, the contracted agent of MassHealth that makes the dental prior authorization determinations. The appellant's orthodontist submitted a request for prior authorization for orthodontic treatment for the appellant on June 29, 2023. (Exhibit 3, p. 3). The appellant's orthodontist completed an Orthodontics Prior Authorization Form and a MassHealth Handicapping Labio-Lingual Deviations (HLD) Form and submitted these along with photographs and x-rays of the appellant's mouth. (Exhibit 3). The appellant's orthodontist noted that a medical necessity narrative would not be submitted. (Exhibit 3, p. 10).

The MassHealth representative testified MassHealth usually does not cover orthodontic treatment; MassHealth only covers orthodontic treatment if the member's malocclusion is severe, disfiguring, or handicapping. The MassHealth representative noted that the issue here is not whether the appellant needs orthodontic treatment, but whether her malocclusion is severe enough to meet MassHealth criteria for coverage. The MassHealth representative testified that MassHealth determines the severity of a malocclusion by using the HLD form. The MassHealth representative stated that the HLD form has all the orthodontic conditions that can exist in the mouth and, the more the condition deviates from the norm, the more points are assigned to the condition. The MassHealth representative stated that 22 points or more are needed on the HLD form to show a severe malocclusion.

The appellant's orthodontist submitted an HLD form with the request for prior authorization. (Exhibit 3, p. 9). The HLD form lists 13 autoqualifiers and 9 characteristics, such as bite and crowding, with corresponding numerical values. (Exhibit 3, p. 9). If a member has any of the 13 autoqualifiers or a HLD score of 22 or higher, the member meets the criteria for a handicapping malocclusion. (Exhibit 3, p. 9). The 13 autoqualifiers are a cleft lip/palate; impinging overbite with evidence of occlusal contact into the opposing soft tissue; impactions where eruption is impeded but extraction is not indicated (excluding 3rd molars); severe traumatic deviations; overjet greater than 9 millimeters; reverse overjet greater than 3.5 millimeters; crowding of 10 mm or more, in either the maxillary or mandibular arch (excluding 3rd molars); spacing of 10 mm or more, in either the maxillary or mandibular arch (excluding 3rd molars); anterior crossbite of 3 or more maxillary teeth per arch; posterior crossbite of 3 or more maxillary teeth per arch; two or more congenitally missing teeth (excluding 3rd molars) of at least one tooth per quadrant; lateral open bite: 2 mm or more of 4 or more teeth per arch; and anterior open bite: 2 mm or more of 4 or more teeth per arch. (Exhibit 3, p. 9). If any of these are present, the request for orthodontic treatment is approved. (Exhibit 3, p. 9). If none of these are present, the orthodontist measures overjet,

overbite, mandibular protrusion, open bite, ectopic eruption, anterior crowding in the upper and lower mouth, labio-lingual spread or anterior spacing, posterior unilateral crossbite, and posterior impactions or congenitally missing posterior teeth, and gives each measurement a value based on the calculation worksheet on the HLD Form. (Exhibit 3, p. 9).

The appellant's orthodontist indicated that the appellant does not have any of the autoqualifiers. (Exhibit 3, p. 9). The appellant's orthodontist calculated a HLD score of 22, measuring 7 millimeters for overjet, 5 millimeters for overbite, 5 points for more than 3.5 millimeters of crowding in the anterior teeth, and 5 millimeters for labio-lingual spread. (Exhibit 3, p. 9).

Based on a review of the photographs of the appellant's mouth, MassHealth/DentaQuest calculated a HLD score of 12 measuring 3 millimeters for overjet, 3 millimeters for overbite, and 6 millimeters for labio-lingual spread. (Exhibit 3, p. 16).

The MassHealth representative examined the appellant at the hearing and measured the appellant's teeth. The MassHealth representative testified that he measured 5 millimeters for overjet, 4 millimeters for overbite, and 5 millimeters for labio-lingual spread for a total of 14 points. The MassHealth representative noted that his measurements differed from the appellant's orthodontist's measurements in that the appellant does not have more than 3.5 millimeters of crowding in the front teeth of either his upper or his lower arch, and thus the appellant's orthodontist's score is lowered by at least 5 points.

The MassHealth representative stated that while he agrees that the appellant would benefit from orthodontic treatment, the issue here is not whether the appellant needs braces, but rather whether he meets the criteria under the regulations for MassHealth to cover the orthodontic treatment. The MassHealth representative stated that because there is no evidence of a handicapping malocclusion, MassHealth will not cover the orthodontic treatment.

The appellant's mother stated that the appellant's orthodontist told her that if she was not successful on appeal, they could establish a monthly payment plan for her. The MassHealth representative advised that she have the appellant go back to the orthodontist in 6 months to be re-evaluated and see if the HLD score increases.

Findings of Fact

Based on a preponderance of the evidence, I find the following:

1. The appellant's orthodontist submitted a request for prior authorization for orthodontic treatment for the appellant.
2. The appellant's orthodontist completed an Orthodontics Prior Authorization Form and a

HLD Form and submitted these, along with photographs and x-rays of the appellant's mouth, to DentaQuest.

3. The appellant's orthodontist calculated an HLD score of 22.
4. The MassHealth representative calculated an HLD score of 14 after examining the appellant at the hearing.
5. The appellant does not have more than 3.5 millimeters of crowding in his upper front teeth or his lower front teeth.
6. A HLD score of 22 is the minimum score indicative of a handicapping malocclusion.

Analysis and Conclusions of Law

Service Descriptions and Limitations: Orthodontic Services

(A) General Conditions. The MassHealth agency pays for orthodontic treatment, subject to prior authorization, service descriptions and limitations as described in 130 CMR 420.431. The provider must seek prior authorization for orthodontic treatment and begin initial placement and insertion of orthodontic appliances and partial banding or full banding and brackets prior to the member's 21st birthday.

(B) Definitions.

- (1) Pre-orthodontic Treatment Examination – includes the periodic observation of the member's dentition at intervals established by the orthodontist to determine when orthodontic treatment should begin.
- (2) Interceptive Orthodontic Treatment – includes treatment of the primary and transitional dentition to prevent or minimize the development of a handicapping malocclusion and therefore, minimize or preclude the need for comprehensive orthodontic treatment.
- (3) Comprehensive Orthodontic Treatment – includes a coordinated diagnosis and treatment leading to the improvement of a member's craniofacial dysfunction and/or dentofacial deformity which may include anatomical and/or functional relationship. Treatment may utilize fixed and/or removable orthodontic appliances and may also include functional and/or orthopedic appliances. Comprehensive orthodontics may incorporate treatment phases including adjunctive procedures to facilitate care focusing on specific objectives at various stages of dentofacial development.
- (4) Orthodontic Treatment Visits – periodic visits which may include but are not limited to updating wiring, tightening ligatures or otherwise evaluating and updating care while undergoing comprehensive orthodontic treatment.

(130 CMR 420.431(A)(B)).

Comprehensive Orthodontics. The MassHealth agency pays for comprehensive orthodontic treatment, subject to prior authorization, once per member per lifetime for a member younger than 21 years old and only when the member has a handicapping malocclusion. The MassHealth agency determines whether a malocclusion is handicapping based on clinical standards for medical necessity as described in Appendix D of the Dental Manual. Upon the completion of orthodontic treatment, the provider must take post treatment photographic prints and maintain them in the member's dental record. The MassHealth agency pays for the office visit, radiographs and a record fee of the pre-orthodontic treatment examination (alternative billing to a contract fee) when the MassHealth agency denies a request for prior authorization for comprehensive orthodontic treatment or when the member terminates the planned treatment. The payment for a pre-orthodontic treatment consultation as a separate procedure does not include models or photographic prints. The MassHealth agency may request additional consultation for any orthodontic procedure. Payment for comprehensive orthodontic treatment is inclusive of initial placement, and insertion of the orthodontic fixed and removable appliances (for example: rapid palatal expansion (RPE) or head gear), and records. Comprehensive orthodontic treatment may occur in phases, with the anticipation that full banding must occur during the treatment period. The payment for comprehensive orthodontic treatment covers a maximum period of three (3) calendar years. The MassHealth agency pays for orthodontic treatment as long as the member remains eligible for MassHealth, if initial placement and insertion of fixed or removable orthodontic appliances begins before the member reaches 21 years of age. Comprehensive orthodontic care should commence when the first premolars and 1st permanent molars have erupted. It should only include the transitional dentition in cases with craniofacial anomalies such as cleft lip or cleft palate. Comprehensive treatment may commence with second deciduous molars present. Subject to prior authorization, the MassHealth agency will pay for more than one comprehensive orthodontic treatment for members with cleft lip, cleft palate, cleft lip and palate, and other craniofacial anomalies to the extent treatment cannot be completed within three years.

(130 CMR 420.431(C)(3)).

MassHealth covers comprehensive orthodontic treatment if the MassHealth member evidences a handicapping malocclusion either by having one of the autoqualifiers listed on the HDL form or by meeting a HLD score of 22 or higher. Comprehensive orthodontic treatment is also covered by MassHealth if it is medically necessary for the member as evidenced by a medical necessity narrative and supporting documentation. The appellant's orthodontist noted that no medical necessity narrative would be submitted.

The appellant's orthodontist noted that the appellant does not have any of the autoqualifiers. Although the appellant's orthodontist calculated an HLD score of 22, the exam at hearing showed that the appellant does not have 3.5 millimeters of crowding in his upper front teeth or his lower front teeth and this reduces the appellant's orthodontist's score by 5 points. Furthermore, the MassHealth orthodontist measured 5 millimeters of overjet, not 7, and measured 4 millimeters of

overbite, not 5, thus the appellant's orthodontist's score is reduced by another 3 points. Accordingly, the appellant's orthodontist's accurate HLD score is 14. Both the MassHealth representative's HLD score of 14 and the appellant's orthodontist's accurate HLD score of 14 are less than the necessary 22 for approval of MassHealth coverage. Because the appellant does not meet the criteria for any of the autoqualifiers, nor does he have an HLD score of 22 or higher, there is no evidence to support that the appellant has a handicapping malocclusion. MassHealth was correct in denying the request for prior approval pursuant to 130 CMR 420.431. MassHealth's action is upheld and the appeal is denied.

Order for MassHealth

None.

Notification of Your Right to Appeal to Court

If you disagree with this decision, you have the right to appeal to Court in accordance with Chapter 30A of the Massachusetts General Laws. To appeal, you must file a complaint with the Superior Court for the county where you reside, or Suffolk County Superior Court, within 30 days of your receipt of this decision.
