Third Party Liability Carrier Codes

This appendix links to a list of MassHealth Carrier Codes and the carrier names and addresses of the insurance companies to which they refer. For members with other health insurance, providers must report the appropriate MassHealth seven-digit carrier code on claim submissions.
If a carrier code is not listed in this Appendix, please complete the Third Party Carrier Code Request form to request a new carrier code be created. The form is located on the MassHealth website at Third Party Carrier Code Request.

The Eligibility Verification System (EVS) provides the most current information about the members' other health insurance that is available in the Medicaid Management Information System (MMIS), including the carrier code. On each date of service and at time of billing, check EVS before submitting your claim to verify the member's other health insurance coverage.

Please note that Appendix C is a reference document and is not used in MMIS claim adjudication. Refer to the applicable billing guide or companion guide for instructions on using EVS. These guides are available on the web at www.mass.gov/masshealth.

A searchable version of this appendix is available on the MassHealth website at **Eligibility Verification for MassHealth Providers**

The Third-Party Liability Indicator form can be used to report a new insurance plan or to update an existing insurance plan. The form can be downloaded from the **MassHealth and Other Health Insurance web page.**
