

Appendix F

U.S. Postal Service Standard Abbreviations (Street Types and Units)

and

Massachusetts ZIP Code Reference

plus ZIP Code ranges for other states

Reminder: The MCR requires that you try to report the patient's usual residence address at the time of diagnosis (and current address is optional), but you only have to report addresses as they appear in your medical records or on your data system. You do *not* routinely have to research anyone's address for the MCR outside your records. You can use the "unknown" codes/entries for address fields if you can't find the necessary information at your facility, but we check for over-use of unknowns to spot software problems. You do not have to use Postal Service abbreviations for street types, nor look up ZIP Codes or city/town/post office names if those are missing, and you do not have to try and correct any address information that's wrong. We don't expect you to become geography or mailing experts. We just ask that you check your medical records and send the address information you have.

Appendix F is a postal reference for those who *want* to complete, verify, update or correct their Massachusetts ZIP Code or postal name information for mailing purposes. Again, you do not have to do this for the MCR, but the information is here in case you want to use it. All this plus more detailed information -- such as exactly which ZIP Code is correct for "5 Elm Rd" in a place with multiple ZIP Codes -- is available straight from the Postal Service at 1-800-275-8777 or <http://zip4.usps.com/zip4/welcome.jsp>.

If you have questions about entering patient addresses or using postal information you can contact Mary Mroszczyk at the MCR (617-624-5659, mary.mroszczyk@state.ma.us), but please don't include confidential patient information (such as a specific address) in voice mail or email.

Note that the Postal Service prefers the use of uppercase letters in addresses but mixed case is used in this Appendix to make it more readable. The names in this appendix are mainly postal names -- not city/town names -- even when they look just like city/town names. ZIP Code™ is a registered trademark of the United States Postal Service.

Massachusetts ZIP Code / Postal Name Reference

Information in this section is based on a US Postal Service (USPS) product called the AIS (Address Information Systems) Viewer. The Viewer is intended to help those sending mail standardize their target addresses, especially for mass mailings. The information is also available from <http://zip4.usps.com/zip4/welcome.jsp>.

Omitted from this appendix are some postal names and ZIP Codes uniquely for certain business or government addresses (non-residential, high-volume mail addresses). Examples are utility companies, catalogs, large insurance companies and banks. We don't expect patients to have such addresses.

Examples of what this information means: See "Accord" and "Acton" below and think about mailing label address layouts.

"ACCORD MA 02018" can be the last line on a mailing label address for Accord PO Boxes. "ACCORD MA 02043" should *not* be used as the last line of an address -- if 02043 is correct, it should be "HINGHAM MA 02043".

"ACTON" can be used with 01718-01720, but the Postal Service prefers "BOXBOROUGH" to be used with 01718 and "VILLAGE OF NAGOG WOODS" to be used with 01719. I recommend using "VLG NAGOG WDS" because it's accepted by the Postal Service *and* fits into NAACCR fields.
