Application for Certification as a Building Code Enforcement Official

Chapter 143 § 3 establishes minimum qualifications for inspector of buildings, building commissioners and local inspectors. Chapter 168 of the Acts of 1992 expanded these qualifications to include certification. The following passages are excerpted from this section of law (the language is repeated in the current edition of the Massachusetts Building Code).

"Each inspector of buildings or building commissioner shall have had at least five years of experience in the supervision of building construction or design or as an alternative, at least a four year undergraduate degree in a field related to building construction or design or shall have any combination of education and experience so determined by the Board of Building Regulations and Standards which would confer equivalent knowledge and ability. In addition, such person shall have had a general knowledge of the quality and strength of building materials; a general knowledge of the accepted requirements for building construction, fire prevention, light, ventilation, safe exits and the requirements of section thirteen A of chapter twenty-two and the rules and regulations promulgated pursuant thereto pertaining to accessible design standards; and a general knowledge of other equipment and materials essential for safety, comfort, and convenience of the occupants of a building or structure."

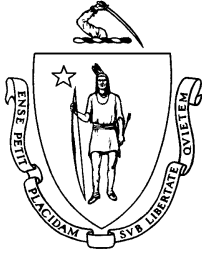

"Each local inspector shall have had at least five years of experience in the supervision of building construction or design or in the alternative a two year associate degree in a field related to building construction or design or shall have any combination of education and experience so determined by the Board of Building Regulations and Standards which would confer equivalent knowledge and ability. In addition, such person shall have a general knowledge of the quality and strength of building materials; a general knowledge of the accepted requirements for building construction, fire prevention, light, ventilation and safe exits; and a general knowledge of other equipment and materials essential for safety, comfort, and convenience of the occupants of a building or structure."

An applicant for certification as a building code enforcement official **must** meet or exceed the minimum qualifications stated above for the level of certification desired. In addition, each applicant must have successfully taken all requisite examinations for the category of certification sought.

A candidate for certification as a **Local Inspector** must attain passing scores in all examinations required for certification under the National Certification Program for Construction Code Inspector (NCPCCI) or International Code Council (ICC). A candidate for certification as an **Inspector of Buildings/Building Commissioner** must attain passing scores in all examinations required for certification as a Local Inspector. In addition he/she must attain passing scores in all examinations required for certification as a Certified Building Official under the Certified Building Officials Program of the International Code Council (ICC). Or receive a **Massachusetts Certified Building Official** Certification (MCBO) by passing all required exams for certification as a Local Inspector, attain passing scores on the Legal Module and Management Module under the International Code Council (ICC), and attend and attain a passing score through On-board Training. Utilizing the MCBO option does **not** qualify for receipt of a Certified Building Official (CBO) issued through the International Code Council (ICC).

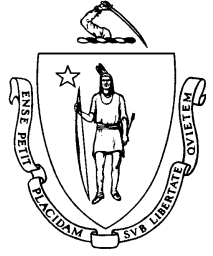

Once a candidate accomplishes these goals, he/she may apply to the Board of Building Regulations and Standards on the attached form to receive the Commonwealth's testimonial of certification. Please remember that certification status **must be maintained** through continuing education. For information regarding this and other topics regarding this process, please refer to the **Rules and Regulations for the Certification of Inspectors of Buildings, Building Commissioner and Local Inspectors, 780-CMR R7.**
