[Sent to Hourly Employees via Email]

As you know, we suffered a ransomware attack earlier this month on our systems. As a result of that attack, there is a chance that the attackers may have been able to access a spreadsheet which included your name and Social Security number.

Because of that risk, we would like to offer you with identity theft protection through Identity Guard. To accept, please contact the HR Department prior to April 15th. We will purchase you an individual plan for two years.

We recommend that you keep mindful of signs that your information may have been misused, which could include receiving unusual mailings or other communications. If you believe someone may have improperly used your financial information, you should contact the toll-free numbers of the three major nationwide consumer reporting companies and place an initial fraud alert on your credit report (Equifax - 800-525-6285; Experian - 888-397-3742; TransUnion - 800-680-7289).

Please email me at or call me at 860-221-7473 if you have any questions.
