Re: Billing of Intrastate Access Charges on Access Toll Connecting Trunk Switched Access Dedicated Tandem Trunk Ports

May 25, 2007

Subject: Billing of Intrastate Access Charges on Access Toll Connecting Trunk Switched Access Dedicated Tandem Trunk Ports

This notice is to inform you that the Verizon Operating Telephone Companies have identified instances of under-billing of intrastate Access charges on Switched Access dedicated tandem trunk ports associated with Access Toll Connecting Trunks. The applicable dedicated tandem trunk port intrastate Access charges were not billed properly because the PLUR factor was applied in Verizon's Carrier Access Billing System (CABS) to dedicated tandem trunk ports associated with Access Toll Connecting Trunks, trunks which would not be carrying traffic subject to the PLUR factor. This under-billing affected service provided by Verizon Operating Telephone Companies * in the states of MA, ME, NJ, NY, PA, VA, VT and WV.

As a result, for your Access Toll Connecting Trunks, the dedicated tandem trunk ports will be excluded from the PLUR factoring process and, based on the applicable PIUR factor, will be billed the applicable dedicated tandem trunk port intrastate Access charges using the P4TNX USOC, which will be added to your billing account(s) on July 20, 2007. On your first bill following this date, Verizon will correct the billing on a going forward basis by adding the P4TNX USOC to your Access Toll Connecting Trunks. Verizon reserves the right to back-bill the applicable dedicated tandem trunk port intrastate Access charges for the affected ports.

As a result of this change and in order to help assure the correctness of billing for dedicated tandem trunk ports, you should review your PIUR factors and, if necessary, provide updated factors to Verizon. When performing this review, you should also review your PLUR factors and, if necessary, provide updated factors to Verizon.

If you have any further questions, please contact your Verizon Account Manager.

Re: Back Billing of Intrastate Access Charges on Access Toll
Connecting Trunk Switched Access Dedicated Tandem Trunk Ports

August 20, 2007

Subject: Back Billing of Intrastate Access Charges on Access Toll
Connecting Trunk Switched Access Dedicated Tandem Trunk Ports
This notice is to inform you that the Verizon Operating Telephone
Companies have identified instances of under-billing of intrastate access
charges on switched access dedicated tandem trunk ports associated with
Access Toll Connecting Trunks. The applicable dedicated tandem trunk port
intrastate access charges were not billed properly because the PLUR factor
was applied in Verizon's Carrier Access Billing System (CABS) to dedicated
tandem trunk ports associated with Access Toll Connecting Trunks, trunks
which would not be carrying traffic subject to the PLUR factor. This
under-billing affected service provided by Verizon Operating Telephone
Companies¹ in the states of MA, ME, NJ, NY, PA, VA, VT and WV.

As a result, on your September, 2007 bill, Verizon will back bill the
applicable intrastate access charges for the affected dedicated tandem
trunk ports. Back billing of charges will extend back to the more recent
of the Service Establishment Date for the affected port or two years (24
months). The adjustments will be identified in the "Other Charges and
Credits" portion of the invoice using a PON of "CLECATCS754."
If you have any further questions, please contact your Verizon Account
Manager.
