

i reside in franklin, ma. and i am very opposed to the "task force" permanently shutting down 25% of fishing areas in ma. i spend close to \$1000 per year on gas alone driving to my favorite locales on the cape. i treat the commonwealth with respect, as do i the environment i fish in. i do not leave trash behind and i did not keep more than 4 stripers last season. to close down these waters would be a clear violation of the freedom to fish act and once again i am very opposed to this notion.
