EXECUTIVE SUMMARY:

Behavior Health Network, Inc. (BHN) is a large, nonprofit human services organization which has been providing an array of human services, including mental health supports and substance abuse recovery services, to individuals and families in Western Massachusetts since 1938. The agency supports individuals funded by the Department of Developmental Services (DDS) through its residential, placement and respite programs. These services were subject to this current licensing and certification review.

The scope of this survey was a full licensing review for 24-hour residential, placement services, and respite supports. Most tasks for this survey were conducted in-person while some were conducted using remote technology. Interviews with key administrative and supervisory staff occurred virtually through Microsoft (MS) Teams. Observations, interviews with individuals and staff, review of environmental safety, and review of relevant documentation occurred on-site.

Findings from the current licensing review demonstrated BHN has effective systems in place for environmental and personal safety, healthcare, and workforce competency. Review of sampled 24-hour residential locations found inspections of heating systems were current, fire-alarm and carbon monoxide systems were operational and located where required, and homes maintained clean and sanitary conditions for residents. In residences and placement homes, safeguards were in place to ensure timely and safe evacuation, required review of evacuation plans by area offices, and training of individuals in how to report complaints of mistreatment or abuse.

Overall findings also established that the agency had ensured individuals' health care needs were addressed, including those in residential homes receiving annual physical and dental examinations, attending specialist appointments, and receiving preventive health care screenings. Those supported in residential and placement services were provided with healthy food choices, had regular opportunities for physical activity and, when indicated, were supported with health care protocols that addressed the monitoring of significant medical conditions and emergency procedures to follow in related to those conditions. Review results also supported effective oversight of medication administration in group residences, including the need for competency training by nurses when procedures ancillary to medications were required.

This review also demonstrated that the agency has successfully recruited and trained a competent workforce, with sampled residential staff and home care providers having completed DDS-mandated trainings, all staff qualified for their roles, and licensed staff maintaining current licensure. In locations, staff had completed training in the signs and symptoms of illness, were aware of and trained in individuals' unique support needs, health care protocols, and trained in and aware of individuals' human rights of individuals human rights.

Positive findings for certification included individuals in residential services being supported to make knowledgeable decisions; to participate in daily household routines; and to utilize the same resources in their communities available to others.

In addition to the positive findings of this review, there were areas where Behavioral Health Network will need to focus its attention. The agency will need to ensure that when the ISP team agrees the person would benefit from a funds management training plan, that the plans it develops include learning strategies to enhance the individual's independence managing their own funds. The agency also will need to strengthen its implementation of individuals' funds management plans, including the need to document expenditures as they occur and to verify that reported balances are accurate. The agency also needs to ensure that health-related support devices or equipment have been authorized and that staff are trained in its care, use, and safety. Finally, the agency needs to strengthen its monitoring systems to assure that ISP assessments and support strategies are submitted to the service coordinator at least fifteen days prior to the ISP meeting and that incident and restraint reports are submitted and reviewed within required timelines.

For residential indicators subject to certification, the agency needs to ensure that individuals it supports have had the opportunity to explore, define and express their needs for intimacy and companionship and are supported by an educational curriculum the agency has selected for this purpose. Additionally, the agency needs to fully support individuals to try and select personal belongings they need or desire in stores of their choosing. Finally, the agency will need to ensure individuals are supported to be introduced to and acquainted with their neighbors through natural opportunities in the neighborhoods and communities in which they live.

As a result of the licensing and certification review, Behavioral Health Network, Inc. will receive a Two-Year License Residential Supports, with a service group score of 93%. This service group is Certified with an overall score of 93%. Follow-up will be conducted by BHN and reported to OQE within 60 days on those licensing indicators that received a rating of not met.

LICENSURE FINDINGS

	Met / Rated	Not Met / Rated	% Met
Organizational	9/10	1/10	
Residential and Individual Home Supports	73/78	5/78	
Residential Services Respite Services Placement Services			
Critical Indicators	8/8	0/8	
Total	82/88	6/88	93%
2 Year License			
# indicators for 60 Day Follow-up		6	

Organizational Areas Needing Improvement on Standards not met/Follow-up to occur:

Indicator #	Indicator	Area Needing Improvement
		Three out of nine restraints did not meet required timelines for reporting. The agency will need ensure restraints are reported and reviewed with mandated timelines.

Residential Areas Needing Improvement on Standards not met/Follow-up to occur:

Indicator #	Indicator	Area Needing Improvement
	agency has shared or delegated money management responsibility.	Two out of seven funds management plans did not include a training plan with learning strategies to further independence. The agency will need to ensure when the ISP team agrees the person would benefit from a funds management training plan, that the plan it develops includes learning strategies to enhance the individual's independence managing their own funds.

L69	Individual expenditures are documented and tracked.	For two out of eight individuals whose expenses were reviewed, expenditures either were not documented on the tracking sheet or balances were not accurately tracked. The agency needs to strengthen its implementation of individuals' plans as written, including the need to document expenditures when they occur and to validate reported balances as accurate.				
L86	Required assessments concerning individual needs and abilities are completed in preparation for the ISP.	For two of eight individuals, required ISP assessments were not submitted to DDS within required timelines. The agency will need to ensure that ISP assessments are submitted to the service coordinator at least fifteen days prior to the ISP meeting.				
L87	Support strategies necessary to assist an individual to meet their goals and objectives are completed and submitted as part of the ISP.	For two of eight individuals, the provider support strategies were not submitted to DDS within required timelines. The agency will need to ensure that provider support strategies are submitted to the service coordinator at least fifteen days prior to the ISP meeting.				
L91	Incidents are reported and reviewed as mandated by regulation.	For six out of nine locations, incident reports were not submitted or reviewed within the required timelines. The agency needs to ensure incidents reports are submitted and reviewed within required timelines.

Residential Services- Areas Needing Improvement on Standards not met:

Indicator #	Indicator	Area Needing Improvement
C12	define, and express their need for intimacy and companionship.	Four individuals reviewed had not been assessed or their support needs reviewed in the areas of intimacy and companionship. The agency will need to ensure that all individuals' interests

		and support needs have been reviewed and educational needs are supported by the agency's preferred curriculum.
C18	Staff (Home Providers) assist individual to purchase personal belongings.	Two out of six individuals were not fully assisted to purchase personal belongings they desired at stores of their own choosing. The agency will need to support individuals to purchase personal belongings of their choice at retailers they prefer.
C48	Individuals are a part of the neighborhood.	Two of six individuals had not been supported to become acquainted with their neighbors through routine opportunities to develop connections with them. The agency will need to ensure individuals are given routine opportunities to be introduced to and become acquainted with their neighbors.
