##### **Plymouth CWT-22-02**

Community Septic Management Program

### **Clean Water Agreements**

##### **Chatham CW-19-47**

This Project includes extending sewers to serve portions of the Taylors Pond/Mill Creek, Pleasant Bay and Stage Harbor watersheds. The project is intended to consist of multiple construction Contracts including: Phase 1D-2: Route 137 - Morton Road Sewer Extension Project; the Phase 1-E: Stage Harbor Sewer Extension Project and the Stony Hill Road and George Ryder South Sewer Extension Projects. These sewer extensions will allow the Town of Chatham to continue implementing their approved Comprehensive Wastewater Management Plan (CWMP) and addressing nitrogen loading from septic systems by extending the wastewater collection system to serve properties within the watersheds impacting the Town's coastal estuaries.

##### **Revere CW-20-28**

The Phase 12 Field Investigations, Illicit Discharge Detections and Eliminations (IDDE), and Illicit Connections and Sump Pump Investigation Programs are important planning projects for the City of Revere. The investigation programs will include IDDE, CCTV of drains and sewers throughout the City, dye testing, smoke testing, wastewater and storm water pump station inspections, and inspections of private homes and businesses to identify sources of inflow from sump pumps, roof leaders, roof drains, driveways drains, yard drains and other sources of inflow. The findings of these investigations will be incorporated in the City's future construction projects to address the detected deficiencies.
