

COVID-19 Boosters:

Fast Facts

Here's what you need to know:

- Like other viruses, COVID-19 changes over time, leading to new variants.
- Boosters provide protection against these variants, giving your body an added layer of defense.
- You can still get COVID-19 after getting a booster, but your risk of severe illness, hospitalization, and death are greatly reduced.
- Your booster does not need to be the same vaccine brand as your original COVID-19 vaccination.

Recommended booster doses vary by age and health status.

Free COVID-19 boosters are available in:
