	FEATURE(S)
	<ul style="list-style-type: none"> None
	USER INTERFACE REFINEMENTS
	<ul style="list-style-type: none"> Remove “Edit “role feature for candidate role Licensee and Designated Administrator Remove “Edit “employment status feature for candidate role Licensee and Designated Administrator Retrofit the Employment Status for all existing Licensees and Designated Administrators Sync all Candidate role changes to Viewer Split Error code 4 “Email already in use” into two sub codes, 4a and 4b Send “Full Removal” transaction to Navigator and deprovision user in the Navigator Send “Partial Removal” transaction to Navigator and do not deprovision candidate Auto update employment status to Hired when marked Not Hired if marked Not Suitable Do not update Correspondence or Login Email for candidate upon subsequent submission from LEAD for the umbrella Do not update Correspondence Email for candidate upon subsequent submission from LEAD for different umbrella (same Login Email) Script to compare LEAD data File with BRC IDs to the Navigator BRC ID Error Code 5A/5B/5C Duplicate “Candidate deprovisioned due to Role Change” case note when role change comes from LEAD Case Notes are created for role changes triggered rom LEAD or Program Portal Program Portal Login Info section Update
	FIXES
	<ul style="list-style-type: none"> Role can no longer be edited on the Navigator application for candidates who are currently a Licensee or Designated Administrator The hiring status cannot be ended for Licensee and Designated Administrator role on the Navigator. Licensees and Designated Administrator currently on Navigator that are completed and suitable will be moved to the “All Staff “tab When a candidate other than a Licensee or Designated Administrator has a role change on Program Portal, that role will be updated on the Viewer submission as well. See associated error code listing When a Licensee or Designated Administrator’s last program association is inactivated or has a role change, the Navigator will update candidate to employee and deprovision the candidate. If a Licensee or Designated Administrator is being inactivated or has had a role change but remains in the Licensee or Designated Administrator role for another program in the umbrella, the Navigator will simply change that submission role to “Employee” Auto update occurs immediately and moves candidate to correct roster tab If consent from is processed and received by the Navigator, no email change will be

processed if candidate form has a different email.

- When a submission arrives from LEAD for an additional umbrella, the candidate will be provisioned with that email but the correspondence email will remain unchanged.
- Data comparisons completed and BRC IDs provided to LEAD.
- Notification code 5a and 5b are returned to LEAD from the Navigator while code 5c is generated in LEAD. For all definitions see associated code list.
- Duplicate "Candidate deprovisioned due to role change case notes when role change comes from LEAD
- Case notes appear in Viewer for these automatic system updates
- The deprovisioning reason appears in this section. Reasons include "role change", "inactivated", suitability update"
