RE: Broadview Networks, Inc.
2018 ICC Rate Reform – Revision to M.D.T.E Tariff No. 2 (Switched Access Services)

Dear Ms. Clark:

Pursuant to the DTC Notice, dated June 4, 2018, enclosed for filing please find the original and one (1) copy of the above referenced tariff filing submitted on behalf of Broadview Networks, Inc. ("Company"). This filing revises the tandem terminating access rate to implement the seventh phase of intercarrier compensation transition in compliance with the requirements of the Federal Communications Commission Report and Order in WC Docket No. 10-90, *et. al.*, FCC No. 11-161. This filing also introduces additional language to the description of billing of terminating switched transport. The Company respectfully requests an effective date for this filing of August 2, 2018.

Also enclosed is a check in the amount of \$100.00 to cover the filing fee. This filing has been submitted via email to dte.efiling@state.ma.us.

The following tariff pages are included with this filing:

13 th Revised Page 1	Updates Check Sheet
2 nd Revised Page 33	Description of Local Transport rate application
9 th Revised Page 40	Reduces Rates

Please acknowledge receipt of this filing by date-stamping the extra copy of this cover letter and returning it to me in the self-addressed, stamped envelope provided for that purpose.

Any questions you may have regarding this filing should be directed to my attention at 407-740-3031 or via email to Sthomas@inteserra.com. Thank you for your assistance in this matter.

Sincerely,

Sharon Thomas
Consultant

3. Switched Access Service

3.2 Rate Categories (Cont'd)

3.2.2 Local Transport

3.2.2.1 The Local Transport rate category provides the transmission facilities between the Customer premises and the end office switch(es) where the Customer traffic is switched to originate or terminate its communications.

3.2.2.2 Local Transport is a two-way voice frequency transmission path composed of facilities determined by the Company. The two-way voice frequency path permits the transport of calls in the originating direction (from the End User end office switch to the Customer's premises) and in the terminating direction (from the Customer premises to the end office switch), but not simultaneously. The voice frequency transmission path may be comprised of any form or configuration of plant capable of and typically used in the telecommunications industry for the transmission of voice and associated telephone signals within the frequency bandwidth of approximately 300 to 3000 Hz.

3.2.2.3 The Company will work cooperatively with the Customer in determining whether the service is to be directly routed to an end office switch or through an access tandem switch, and the directionality of the service.

(a) Transmission Paths - The number of Transport transmission paths provided is based on the Customer's order and is determined by the Company.

(b) Interconnection - Interconnection of non-Company switched access transport facilities is available between an end office and a Customer point of presence where such facilities are provided.

3.2.2.4 Tandem Switched Transport provides the transmission facilities from the end office to the tandem utilizing tandem switching functions. Tandem Switched Transport consists of circuits used in common by multiple customers from the access tandem to an end office.

3.2.2.5 The Dedicated Tandem Trunk Port is a monthly per port rate that provides a port for each dedicated trunk terminating on the serving wire center side of the access tandem.

3.2.2.6 "3rd Party" Switched Transport rates apply to terminating traffic that traverses a tandem switch that is not owned by the Company (the terminating carrier) or its affiliates. "End Office" Switched Transport rates apply to terminating traffic that traverses a tandem switch owned by the Company (the terminating carrier) or its affiliate.
