### GENERAL COMMENTS / INSTRUCTIONS

On arrival I was escorted by maintenance personnel (mike) who stated that there was sightings of mice in office and cubicles and roaches in the hallway. On my inspection of the offices I found no signs of activity but maintenance said that he already cleaned up mice droppings from the area I was investigating. I found a hole under the heater and filled it with excluder to prevent entry to the office and placed snap traps. I inspected the cubicles and found no signs of activity but placed bait bait stations on either end of the wall under the heater.

I then inspected the hallways and found no signs of activity but placed gel bait around water fountain and placed zone monitors behind file cabinets. I then inspected court room and found no signs of activity but placed zone monitors. Thank you for choosing Burgess.
