Pursuant to 310 CMR 7.32(5)(c)1.a.iv., the Department will calculate the allocations for each control period and on or before July 7th of each year forward a draft spreadsheet containing all new CAIR NOx Ozone Season units' allocation, including output data and calculations, to new CAIR ozone season units. This action will commence a comment period ending on July 17th during which the Department will accept comments on any errors in the output data and the calculation of the allocations contained in the spreadsheet. If the Department receives any comments, or does not receive the information required under 310 CMR 7.32(5)(c)1.b.ii.(ii), and makes revisions to the spreadsheet, then it will provide a five day comment period on the revised spreadsheet.											
* These provisions, 310 CMR 7.32(5)(c)1.b., establish the deadline for timely submission of the Mass CAIR NOx Season Trading Program new unit set-aside allowance allocation requests and establish the maximum number of allowances that may be requested for an eligible unit. If the new unit set-aside allocation is oversubscribed for a control period, this provision also provides a formula for adjusting allowance allocation requests.											
** These provisions, 310 CMR 7.32(5)(c)1.b.ii.(iii), establish the number of allowances for each source (Column I) and provide for rounding that number of allowances to the nearest whole number (Column J).
