Vision Zero Strategic Communications Goals

Working with Vision Zero and City of Cambridge staff, we have identified a number of strategic communications goals for the Vision Zero initiative as it relates to the public education component of the action plan. A comprehensive and successful public relations strategy will only be achieved by knowing the objectives that the organization wishes to attain. As such, below we have outlined the recommendations for Vision Zero’s strategic communications goals based on our discussion:

1. Develop an easy-to-understand but relevant message for those living in Cambridge and those who drive through it regarding the need for slower, safer driving.
2. Communicate that Cambridge wants to see ZERO car crashes that result in fatalities or serious bodily harm for those walking and biking in Cambridge. The audience is all who use Cambridge streets, including but not limited to drivers, with the recognition that those who will benefit will most likely be pedestrians and bicyclists.
3. Deliver a toolbox of baseline ideas, as well as creative ones, to deliver this message.
4. Develop a set of recommended media partners to approach or to deliver an ad campaign
5. Develop a set of community organizations to inform about and partner with on the Vision Zero campaign.
Key Messages

If you travel in and through Cambridge, you will likely get where you’re going safely. Our streets are safe - but we can make them even more safe for everyone.

The good news for anyone driving in and through the City of Cambridge is that you are likely to get where you’re going safely and not suffer any injury. Over the past decade, no one has been killed while riding in a car on a Cambridge-owned street. Very few people have been killed in crashes while walking or biking.

Even a few fatalities are a few too many. Cambridge is committed to implementing strategies that will lead to zero fatalities and serious injuries for everyone who uses our streets.

Speed – especially the speed of a vehicle that weighs so much more than any person - is the core issue. The slower that drivers in Cambridge go, the fewer crashes we will see that will injure or kill pedestrians, bicyclists, and other drivers and their passengers – until we get to zero.

Speed kills – or harms people severely. The slower that drivers go, the less likely they are to crash into another car, a person walking down the street or someone on a bicycle. To achieve the vision of zero fatalities or crashes that result in severe injury, we need those who drive through Cambridge to slow down.

Cambridge is doing its part to encourage slower driving – by reducing speed limits and designing streets that help people self-enforce their speeds. But everyone has a role to play. Drivers must be responsible for their vehicles. And we must empower pedestrians, bicyclists and others to be safe.

The City of Cambridge recognizes that there are strategies that we can employ to encourage slower driving. And we’re taking steps. We are reducing speed limits, which has been shown to be effective in other Vision Zero cities, in our city squares and on primarily local-access streets. And we are redesigning our streets to encourage slower and safer driving.

But drivers themselves are responsible for driving more slowly and acting in other ways that will keep members of the community safe. This public education campaign is designed to remind drivers that a few extra minutes of their time is worth keeping people safe. And we are committed to empowering bicyclists, pedestrians and others to be safe when they are on Cambridge roads.
In addition, we recognize that Cambridge is home to a diverse community, but our streets, bike lanes, and sidewalks also provide reliable transportation to the residents in many surrounding communities. We want to ensure that regardless of what mode or modes of transportation you take to or through Cambridge that your safety is prioritized. We want to make sure that we all get where we are going, without sacrificing the life or living condition of any resident or commuter, including your own.

Risky driving IS a national crisis. The good news is that Cambridge’s roads and streets are safe. But we believe we need to do as much as possible to achieve the goal of zero fatalities and crashes that result in serious harm.

According to the National Safety Council, in 2017, more than 40,000 people died in motor vehicle crashes in the United States. In contrast, according to data from the Aviation Safety Network, in 2017, less than 100 people were killed in commercial airline crashes around the world. We know that there are differences – far fewer people are licensed to fly than are licensed to drive. But this is still clearly a crisis that we need to address community by community.

The statistics show that by and large, Cambridge’s roads are safe. But the data also show that when people walk or bike in Cambridge they are more vulnerable than when they drive, both in terms of risk of death and bodily harm.

Years ago, the airline industry in the U.S. committed to implementing policies that would lead to zero crashes. It’s time to see a similar commitment from communities, drivers, and others when it comes to car crashes that result in serious or fatal injuries. Cambridge is making that commitment.

Cambridge is committed to working with vulnerable populations to ensure that they are empowered. It’s the only way to ensure safer streets for everyone who lives, studies, works, and plays in Cambridge.

The City of Cambridge is a vibrant, diverse city that welcomes people from all over the world to live, work, study and enjoy time here. With this public education campaign, we are committed to working with the population of individuals who are most vulnerable when using our roads and streets to help empower them. And we are also committed to educating the many people who drive through our City on ways that they can help to keep their neighbors, coworkers, friends, and other members of the community safe.

**Recommended Taglines:**

- “Go Slow in Cambridge. Life Isn’t A Race.”
• “You’ll Still Get There: Saving a Few Minutes Isn’t Worth Hurting Someone”
• “Life Isn’t A Race – Slow Down, You’ll Still Get There”
• “Life Isn’t A Race: It’s Worth Saving a Few Minutes to Prevent Crashes”
• “Take A Few Extra Minutes. You’ll Still Get There”
Vision Zero Tactical Toolbox

Introduction
As you implement the Vision Zero initiative, we want to make sure that you have a solid toolbox of options – both time-tested and creative – to spread the word about Vision Zero, elevate the Vision Zero brand so that it is immediately recognizable to those living, visiting, and working in Cambridge and give supporters ways to engage. Signage, leave-behinds, guerrilla marketing tactics, and partnerships in the community will be critical to promote the Vision Zero initiative and educate the public about it. As such, below are our recommendations for basic tactics that you must employ along with guerilla actions and promotional material that you should consider.

Goal: Provide suggestions that will advance the message of systems change and are meaningful to the various Vision Zero audiences, and propose some high-visibility actions that will generate excitement and engagement.

The below is broken down into 5 sections:

- Key tagline and information that must be on all Vision Zero material
- Phase I: Basic recommended tools for organizing and public information that Vision Zero should implement
- Phase II: Additional effective ideas to implement once Phase I is completed
- Phase III: Higher-engagement ideas for attention-grabbing tactics
- Phase IV: A “big idea” proposal that we think will make a big splash while also being educational and informative.

Additionally, we have provided an estimate of hours that will be needed to complete each project and the recommended steps for completion. The suggested hours here are based on the estimated times it takes O’Neill and Associates to complete these projects. As a municipality, there may be additional review time needed – with limited resources and review time, you may want to triple each suggested time estimate.

Key Tagline and Information for All Vision Zero Materials

In the messaging section, we have a set of key messages and tagline recommendations that we recommend you use. We recommend that the following be on ALL Vision Zero-related materials, including swag material:

- Go Slow in Cambridge. Life Isn’t A Race.

Additionally, all Vision Zero materials should include the following:
• Cambridge’s Vision Zero logo
• A link to the City’s website focused on Vision Zero – cambridgema.gov/visionzero
• Although Cambridge does not currently have social media platforms dedicated to its Vision Zero initiative, if and when it does, the material should include information on those social media accounts.

Phase I Recommendations: Basic Tools for Organizing

Cambridge’s Vision Zero initiative must implement some basic but effective tools of public awareness-raising as part of its public education process. We have reviewed other efforts by American cities and many of them include these basic tools. Below are our recommendations of the tools that Cambridge must employ to help educate members of the public.

• A Vision Zero pledge –

Pledges are effective ways to both collect information and have members of the public commit to the goals of the initiative. It is a concrete ask of members of the public; psychologically, when someone puts their name to something, they are more likely to recall the initiative and its goals; and it gives supporters a way to talk to their friends, neighbors, and co-workers about the initiative. Additionally, it will allow the City to collect contact information about supporters to which the City can push out, with the permission of supporters, updates on ongoing projects.

Proposed language:
“Take the Vision Zero Cambridge pledge:

Through the Vision Zero Action Plan, Cambridge is committed to implementing strategies that will lead to zero fatalities and serious injuries for everyone who uses our streets. As a person utilizing Cambridge’s streets, I recognize that those who walk and ride bicycles in Cambridge – including me – are vulnerable to death and injury from car crashes. I pledge to recognize that those who walk and use bicycles on our streets deserve a safe environment, to advocate for systems that will keep us all safer, and – when I drive - to take a few extra minutes to drive slowly. Because life isn’t a race and you’ll still get there.

Name: ______________________
Email: ______________________
Ph: ______________________
Zip: ______________

Steps for completion:
- Finalize pledge language
  - Pledge language should be translated into Spanish, Mandarin, Portuguese, Haitian Creole, and languages spoken by the people of India (Hindi, Gujarati, etc.)
- Create sign-up sheets using pledge language
- Create laid out version for events
- Develop online version for individuals visiting Vision Zero website (including receiving permission from those who sign to update them on the initiative)
- Designate platform for maintaining contact sheet – the easiest may be to input collected signatures into an Excel spreadsheet but if Cambridge uses a database software, that could be utilized too.

Hours:
- 2 to 4 hours to complete pledge language and lay out in In Design
- 30 minutes per event to print out pledge
- 1 to 2 hours post-event to input into Vision Zero database (so if you complete 10 events, it will take between 10 to 20 hours of data entry time)

- **Lawn/Apartment/Business Signs**

  Lawn signs – and corresponding signs that are appropriate for those living in multifamily housing and businesses – are an effective way to show community support for an initiative. They will not only raise awareness of the Vision Zero initiative as a whole, they will signal to everyone that members of the community are on board with the initiative’s goals, especially to promote system change and safety for all those moving through Cambridge.

  We recommend creating a lawn sign and an apartment that says the following:

  Life Isn’t a Race
  Go Slow in Cambridge

  The sign should also include the Vision Zero logo and the website URL

  To disseminate signs, the City of Cambridge has a number of options to pursue:
1. The City can create a sign-up form on its website for signs, which will allow any visitor to the site to receive a sign, so long as they are a Cambridge resident and/or business owner.

2. The City can create a sign-up sheet at events for signs. We do not recommend distributing signs at the events themselves, since they can become expensive. But the City can use those festivals and the signs as another way of garnering support.

3. The City could organize a series of canvases, whereby city staff would take an afternoon, knock on doors in a designated neighborhood, and ask residents if they are interested in displaying a Vision Zero sign. This is a time- and labor-intensive process – the City would likely need volunteers who are willing to knock on doors - and as such, it would not be our first recommendation for outreach. But as the initiative awareness grows, it may be worth exploring as an option.

Steps for completion:

- Finalize sign language and design
  - Create some options for Spanish, Mandarin, Portuguese, Haitian Creole, and languages spoken by the people of India (Hindi, Gujarati, etc.)
- Contact sign printer to estimate cost and place order
  - We recommend an initial order of 500 signs so that the City has sufficient supply as residents request signs.
- Create sign up sheet for signs, both online and at events
  - Create a reasonable expectation for delivering signs OR ask those who sign up to come to the Cambridge traffic department to obtain a sign.
- Deliver signs – either through mail or by dropping off at a place of business or residence

Hours:

- 5 hours to finalize message and simple sign design
- Additional 2 to 3 hours to research printers, obtain print estimates, and choose printer
- 2 to 3 hours in total to manage print process
- One hour per event for input of information into database
- Ongoing investment of time for those who order signs
• **Palm Cards and Posters**

A palm card and posters are necessary materials for a campaign of this nature. The palm card will provide residents and others with information about the Vision Zero campaign while also being a tangible, shareable material that can be given out to individuals, families, and community organizations. For the poster, we recommend developing one that is useful for Vision Zero staff to have at events, but the same poster can be given to other municipal departments and community organizations for display. We have developed the written content for a palm card and a poster.

For distribution of the palm cards, in addition to handing them out at festivals and events, Vision Zero staff may want to reach out to key community organizations to see if they are interested in receiving the palm cards or displaying the poster. We recommend an initial outreach by email to the groups listed in the “Green Community Organizations” list in the community organization section of the Excel spreadsheet that accompanies this report.

Steps for completion:

- Finalize content for palm card/poster
- Finalize design version of palm card/poster
- If using outside print house for production, contact printers to gather estimates for cost of production
- Determine print size order – we recommend ordering no fewer than 1000 palm cards for an initial poster. For posters, we recommend an initial order of 50 posters.
- Implement outreach to community organizations – first by email, then by phone – to see if there is interest in distribution of palm cards or display of poster.

Hours:

- 2 to 3 hours to complete content
- 2 to 4 hours to gather estimates, make decision on print house
- 2 to 3 hours in total managing print process
- 5 to 6 hours to reach out to community partners
- Ongoing hours to deliver palm cards and/or posters to any community partner
• **Stickers and Pins**

Vision Zero staff should have stickers and pins to distribute to members of the public so that they can act as ambassadors for the initiative. The City should have two sticker sizes available – wearable, lapel-sized stickers and bumper stickers that can also be repurposed as lap top stickers, used on bicycles, etc. All stickers should include the Vision Zero logo, the tagline “Go Slow in Cambridge. Life Isn’t a Race,” and the website URL.

Additionally, Vision Zero should order lapel pins with the above information to distribute at events and festivals.

With regards to distribution, while pins and stickers should primarily be given away at events, Vision Zero may want to consider this as part of the package of materials to give to community partners for distribution. At the very least, when the City is reaching out to community partners for palm card and poster distribution, staff should also offer those organizations a set of Vision Zero stickers.

**Steps to completion:**
- Finalize design for Vision Zero sticker and pin
- Outreach to vendor to receive estimates on production costs
- Determine order size – we recommend an initial order of 1500 stickers and 500 lapel pins
- Outreach to community partners to offer stickers
- For pins, we recommend creating an online order form so that Vision Zero staff can keep track of who is ordering the pins.

**Hours:**
- 1 to 2 hours to finalize design of stickers and pins
- 2 to 3 hours to receive vendor estimates
- 2 to 3 hours in total managing print process
- 5 to 6 hours in outreach to community partners, but can be done in conjunction with outreach on palm cards and posters.

• **Media relations as public education tool**

Media relations act as a public education tool because they give the City a way to inform the public of the substantive work of improving traffic systems that are part of the Vision Zero Action Plan. With each new project implemented as part
of Vision Zero, the City of Cambridge should issue a brief press release that
explains the project, highlights how it will reduce car crashes that lead to
fatalities and serious injury, and reinforces that the project is part of Cambridge’s

The release should be distributed to local Cambridge media, including *The
Cambridge Chronicle, Cambridge Day* and the *Harvard Crimson*. Additionally,
the releases should be posted to Cambridge’s Vision Zero website and pushed out
through the City’s social media platforms.

Vision Zero staff should create a press release template that follows the format
below:

**DATE**

**MEDIA CONTACT INFORMATION**

**HEADLINE:** New Cambridge Traffic Improvement Project [NAME OF
PROJECT] Part of Vision Zero Action Plan

*Cite Place, Aims to Eliminate Car Crashes that Result in Fatalities or
Serious Injury for Pedestrians, Bicyclists* 

**[DATE, Cambridge, MA] –** The City of Cambridge announced today that it
will begin working on [NEW PROJECT], which is part of the city’s Vision Zero
Action Plan. Cambridge adopted the Vision Zero initiative, which aims to
eliminate car crashes that result in fatalities or serious injury, in 2017.

**[DETAILS OF PROJECT]**

**[QUOTE FROM APPROPRIATE MUNICIPAL OFFICIAL: “Cambridge is
committed to ensuring that everyone who lives, works, or visits here is safe on
our roads. That’s why we adopted the Vision Zero plan,” said X official. “X
project is an important way for us to achieve the goal of zero car crashes that lead
to fatalities or serious injuries for everyone here.”]**

X number of projects have been completed as part of the Vision Zero effort since
the City adopted the program in 2017. While there have been zero fatalities
among drivers involved in car crashes inside Cambridge over the past several
years, last year, X number of people walking and/or riding bicycles have suffered
a serious injury or were killed. Cambridge’s goal is to eliminate such crashes and
is doing so by designing safer transportation corridors, lowering the speed limit
in city squares, and educating the public.
Additionally, Vision Zero staff should develop at least one op-ed explaining the Vision Zero concept and why it is so important for both The Cambridge Chronicle and the Cambridge Day.

Steps to Completion:

- Finalize press release template
- Finalize media outreach list – at minimum, the Cambridge Chronicle, the Cambridge Day, the Harvard Crimson, and Cambridge community access should be on the list. We also recommend including the Boston Globe, WBZ AM, WGBH FM, WBUR FM, all of Boston’s television stations, and the media outlets that are included in the sponsorship section of this report to be included on the list.
- Distribute press release when project is ready to be announced.
- Draft and finalize op-ed piece. Author will need to be determined by Vision Zero staff
- Submit op-ed to Cambridge Chronicle. In three months, the City should submit a similar op ed to Cambridge Day (please be aware that all op eds can be of a similar theme but they should not be the exact same piece).

Hours:

- 1 hour to complete press release
- 1 hour to finalize media outreach list
- 1 hour to distribute press release when announcement is ready to be made
- 4 to 5 hours to draft, finalize, and submit an oped

Phase II Recommendations

Above we outlined Phase I recommendations. Those are the basic tools of organizing and public education efforts that we feel the City of Cambridge must implement. While there is a time commitment to creating and distributing those tools, once you have finalized the pledge, produced the palm cards, posters, signs, and stickers, and created a database for capturing supporters’ information, the time commitment will lessen. By implementing the recommendations above, Cambridge will be at par with Portland, Oregon in terms of public education efforts and will exceed most other communities.
Below are some recommendations for Phase II of the public education campaign, to be implemented once the tactics in Phase I are already employed. These are also very effective ways to communicate the message to residents and others, and to touch them directly, thereby reinforcing the message about Vision Zero and promoting public awareness.

- **Direct Mail Piece**

  Direct mail remains an important way for political campaigns and ballot initiative organizers, for instance, to reach out to potential supporters. The City of Cambridge can also use direct mail to inform residents of the initiative, the Vision Zero pledge, and the infrastructure projects underway that will make the streets of Cambridge safer for people who walk and bike.

  We recommend that eventually, the City of Cambridge send one piece of direct mail to Cambridge residents at least twice a year. The direct mail piece should ALWAYS include the Vision Zero logo, the tagline “Go Slow in Cambridge. Life is Not A Race” and the website URL. The content of the piece can include a few key facts, an update on projects, and/or the pledge language.

  Cambridge will need to acquire a list of Cambridge residents from a list broker. Additionally, some of the direct mail pieces should be produced in Spanish, Spanish, Mandarin, Portuguese, Haitian Creole, and languages spoken by the people of India (Hindi, Gujarati, etc.) to ensure that those populations remain informed.

  Steps to completion:

  - Determine schedule of direct mail outreach pieces
  - Develop concept for each piece – i.e. tips for staying safe while walking and biking in Cambridge; updates on Vision Zero projects; sign our Vision Zero pledge
  - Develop and finalize content for pieces
  - Finalize designed version of pieces
  - Contact list broker for estimate to purchase list
  - Purchase list
  - Contact U.S. Post Office to arrange for postage and determine postage costs – can be run through meter or postage can be applied
  - Work with print house to produce final version of direct mail piece – print houses can also work with the U.S. Post Office for postage
Hours:

- 2 to 3 hours to determine schedule
- 5 to 6 hours to develop concept and content for each piece
- 4 to 5 hours to finalize designed version
- 1 to 3 hours to contact list broker and purchase list
- 5 to 6 hours to manage production and list

- **Vision Zero Cambridge Newsletter**

Newsletters remain an effective way to keep a highly engaged audience informed of the initiative’s progress and will allow for the City to remain in dialogue with supporters of Vision Zero. From a time and resources perspective, it would make the most sense for the City to develop an online newsletter, as opposed to a printed newsletter.

Newsletters are often developed on a daily, weekly, monthly, or quarterly schedule. Our recommendation is for the City to develop a quarterly newsletter to be distributed to those who sign up for the pledge and/or to display lawn or apartment signs. Potential topics for a newsletter include:

- Updates on Vision Zero projects in Cambridge
- Tips for safely navigating through the city
- Profile of supportive businesses
- Up to date data on car crashes and ways to reduce injury and fatalities

There are a number of outside vendors that provide email marketing services – the most well-known are Constant Contact and MailChimp, both of whom are user friendly and cost effective. They provide marketing templates, list management, and analytics around who is and is not opening the newsletter.

Steps to completion:

- Determine schedule of newsletter
- Compare costs and determine which email marketing platform you wish to use
- Create email database – to likely be derived from those who sign the pledge or those who request signs for display. If the City desires this, they can create an opt-in option so that individuals agree to receive updates about Vision Zero.
• Develop content for inaugural newsletter – for the first newsletter, there should be a brief letter welcoming readers, explaining the purpose of the newsletter, and inviting feedback from readers.
• Finalize content and input it into the newsletter template
• Test links and review for typos.
• Schedule email for distribution

Hours:
• 2 to 3 hours to determine schedule of newsletter and research platform costs
• Email database should be derived from pre-existing email collection but it may take an additional 1 to 2 hours to format for upload, create lists inside the platform, etc.
• 6 to 8 hours in total to draft, review and edit the content
• 2 to 3 hours to input content into template, review for typos, and test links
• Scheduling the email takes only a few minutes

• **Events – neighborhood and otherwise**

The City may want to consider organizing a series of neighborhood events to update residents, community organizations and others on the purpose and progress of the Vision Zero Action Plan. O’Neill and Associates recommends that these events be held quarterly and that the City look to partner with various community organizations to co-sponsor. The events can be simple but should be held outside of City Hall and across the City’s many neighborhoods.

The purpose of the events will be to update interested stakeholders on the action plan and related projects, to create networking opportunities among individuals and organizations interested in systems change and sustainable transportation, and solicit feedback from residents and others. The events themselves can take a variety of forms – they could be morning breakfasts or after work get-togethers. In general, though, we recommend the following:

• Events to be no longer than 60 minutes
• Light refreshments are served
• A speaking program of 2 to 3 speakers, one of whom will update attendees on Vision Zero plans and projects
  • Allow for a Q&A opportunity at the end of the speaking program
• Materials, including the palm cards and SWAG offerings, will be available
• Sign up sheets – for the pledge, to display signs, and or just to receive more information – will be available
• Name tags will be produced and worn by attendees

Steps to completion:
• Develop schedule for quarterly events
• Develop inaugural event
  o Identify community partners and reach out to them
  o Select location, date, and time
  o Develop invitee list – focus on individuals, organizations, and businesses in the neighborhood where event is held
  o Determine appropriate way for respondees to RSVP to event – we often use the EventBrite service to collect RSVPs but Google forms can be used as well
  o Create EventBrite page or Google form for RSVPs
  o Develop invitation – both hard copy flier and email invitation – make sure to include URL for RSVPs
  o Distribute invitation to invitee list 4 weeks prior to event
  o Follow up emails and/or phone calls to invitees
  o Determine what signage, material, and SWAG you want at the event and produce appropriate amounts
  o Determine AV and or tables/chairs needs for event. Order AV equipment, tables/chairs, and refreshments 4 weeks prior to the event
  o Develop speaking program, asking speakers to speak no more than 5 minutes
  o At least one week before the event, visit the location site to determine where your registration table will be, where your signage will be, where the speaking program will be held, etc.
  o One day before event, produce name tags for event
  o At event, have a sign-in sheet and collateral material at the registration table

Hours:
Note: Events are time-consuming, but once you have a template down, they become easier to organize. But because of their time consumption, we recommend initially trying to organize two events per year and then moving to a quarterly schedule.

• 2 to 3 hours to determine schedule and concept of inaugural event
• 3 to 4 hours total to outreach to potential community partners
• 6 to 8 hours to develop invitee list (if building from scratch)
• 3 to 4 hours to determine and secure event location
• 2 to 3 hours total to develop invitation language and set up EventBrite page or Google form
• 2 to 3 hours to produce email invitation and/or flier
• 4 to 6 hours on event logistics – ordering AV equipment if necessary, ordering tables and chairs if necessary, ordering light refreshments
• 4 to 6 hours developing speaking program, including discussing with speakers their roles and talking points
• 2 to 3 hours to produce signage, sign-in sheets, collateral material, and name tags
• For a 60 minute event, you should allocate 4 to 5 hours on the day of – for set up and break down time, as well as the time of the event
• Post event, you should allocate 2 to 3 hours to send thank you emails to those who participated and to determine any next steps to come out of the event

Other events

There are a number of other large-scale events that take place in and around Cambridge and Boston that the City may want to participate in. Below, we have included a list of events where vendors are able to secure tables or become sponsors. These kinds of events are less labor intensive for the vendors than organizing their own.

Steps to completion:

• Determine which event you want to participate in
• Outreach to event organizers for cost information on booths, tables, and sponsorship opportunities
• Secure booth space by organizers’ deadlines
• Determine and develop materials needed for booths
  o Signs
  o Booth backdrops
  o SWAG material
  o Collateral material
  o Pledge sign-up sheets
• Determine personnel hours needed to staff a booth – will you need volunteers?
Hours:

- 1 to 2 hours to determine which events you want to participate in
- 3 to 4 hours total reaching out to event organizers and securing space
- 5 to 6 hours total finalizing materials, if they do not already exist
- On day of events, you should allocate 10 to 12 hours for set up, break down, and time spent at the event
- 1 to 2 hours post-event inputting names into your database

Potential Major Events:

**Cambridge Half Marathon**
Phone: (617) 398-0611
Occurs in November of every year. The Cambridge Half Marathon is a 13.1 mile USATF certified course* that starts & finishes at CambridgeSide. It is a fast & flat course through Cambridge featuring: MIT, Riverbend Park, John W. Weeks Footbridge, Harvard Stadium, Charles River and Harvard Square. Post-race there are festivities such as music, food and beverages, and vendor booths.

**Harvard Square Oktoberfest**
Email: hsba@harvardsquare.com
Phone: 617-491-343
Occurs in October of every year. Harvard Square’s Oktoberfest features food from all over the world, arts, crafts, vintage goods, free samples, sidewalk sales and one-of-a-kind items. In addition, Oktoberfest boasts six beer gardens located throughout the festival grounds.

**Cambridge Jazz Festival**
Contact: https://www.cambridgejazzfestival.org/merchandise-vendors
Occurs in July. The Cambridge Jazz Festival was born through the combined talents and efforts of former City Councilor Larry Ward, and Chair of the Ensemble Department at the Berklee School of Music, Ron Savage. It is their vision that the interest, energy and excitement generated by The Cambridge Jazz Festival will be the catalyst for a lasting, sustainable Culture of Jazz in Cambridge, Massachusetts.

**Cambridge Carnival**
Contact: Phone: (617) 863-0476
Email: cambridgecarnival@gmail.com
Occurs in September. Cambridge Carnival is the most unique event in the City of Cambridge. It is planned entirely by the community for the community. The organizing committee works hard year-round to plan an event that is inclusive,
engaging, and reflective of the city’s diversity. The event is organized by a non-profit volunteer community organization made up of a diverse group of individuals.

**Boston Pride**
LGBTQ pride celebration that occurs every year in June. Boston Pride is a week-long celebration with the main attraction, the parade, which attracts millions from all over New England. The parade is a perfect place for vendors to set up booths and attract people from all ages and walks of life.
Contact: In-house

**Head of the Charles Regatta**
Head of the Charles Regatta – the annual rowing head race held in October of every year in Boston on the Charles River which separates Boston and Cambridge. Due to the location of the race, the proximity to Cambridge, as well as the various walks of life the race attracts, setting up a Vision Zero booth would be ideal.
Contact: In-house

**Boston Calling**
Boston Calling is a Boston-based music festival that takes place in May of every year in City Hall Plaza. The festival attracts approximately 50,000 people every year and continues to grow.
Contact: andrew@44-communications.com

**Boston GreenFest**
Boston GreenFest & TechExpo is an event held annually to educate and empower people to create a more sustainable, healthier world. The event combines business, tech, and artistic expression to unite the community locally, nationally, and globally.
Contact: 617-477-4840, info@bostongreenfest.org

**BostonPops – July 4th**
The BostonPops Orchestra performs on the Esplanade every 4th of July. This event encompasses musical entertainment from notable artists as well as a firework show. This event attracts thousands of people every year and is a great place to set up booths.
Contact: 888-266-1200, customerservice@bso.com

**BioTech Week**
BioTech Week Boston is dedicated to accelerating the business of biotechnology through new ideas, science, technology and partnerships to make a positive
impact on patient health. Biotech Week occurs on September 9-12 of every year at the Boston Convention Center. Contact: 1857-504-6687, tasmin.aspinall@knect365.com

*The International Conference on Environmental Systems*
Focuses on the dissemination of technical and scientific information on topics related to humans living in space and working in extreme environments. The conference includes technical sessions, panel discussions, and published proceedings. This conference occurs in July of every year. Contact: info@ices.space

*Annual Boston Local Food Festival*
Contact: Nicola A. Williams, Producer/Marketing Director, The Williams Agency Email: nicola@thewilliamsagency.net Telephone: 617-395-7680 Occurs in September. For one spectacular day each year, SBN transforms the Rose Kennedy Greenway and the City of Boston into the nation's largest local & sustainable food hub! Boston Local Food Festival is a free outdoor festival that showcases farmers, local restaurants, food trucks, specialty food producers, fisher folks, and organizations focusing on healthy food and fitness from New England. The festival also features lively chef & DIY demos, a Seafood Throwdown competition, diverse music and performances, family fun zone and more.

- **Posters for MBTA and Blue Bikes**

Because, as a municipality, you have access to MBTA advertising space and because so many people come to Cambridge by using the subway, we are recommending that you develop MBTA signs and signs that can be posted at Cambridge’s Blue Bikes locations. We recommend developing signs that can be used in Red Line and Green Line cars, since both of those lines serve Cambridge riders. We have attached the specs for each of those lines. You can reach Eoin McCann of Outfront Media, the vendor who manages MBTA advertising space, at (718) 792-2123 or at their website for more information.

Steps to completion:

- Produce a sign to MBTA specs – the sign should include the same messages and information as the Vision Zero lawn/apartment sign
- Reach out to Outfront Media to secure signage space
- Place order to reserve space
- Deliver signs to MBTA to run
Hours:

- 1 to 2 hours to design sign to MBTA specs
- 4 to 5 hours total to manage printing process
- 2 to 3 hours total to reach out to X to secure MBTA space

**Phase III: Higher-cost, higher-engagement ideas**
These are ideas to implement after the basic educational tools have been employed. Some of them will require time, and investment from Vision Zero, but represent ideas that are bound to grab the attention of the Cambridge community, drivers who are passing through, and community members who are interested in promoting the goals of Vision Zero. At least one of these ideas would be necessary for this campaign, and all three over a spread-out timetable would elevate Cambridge’s Vision Zero initiative as an innovator within the Vision Zero movement.

- Develop a deck of cards with Vision Zero Facts
  - **Concept:** A fun but educational item to give away at an outdoor event, this would be a deck of cards that features some of the top facts regarding Cambridge’s Vision Zero project, road safety, ways to reduce dangerous car crashes, multimodalism, the benefits of using alternatives to driving, and why we are encouraging slower speeds for drivers. In particular, we would want to use these playing cards to reinforce the message to “slow down” every several cards.

  **Steps to completion:**
  - Determine if Cambridge wishes to develop this concept
  - Develop a set of facts for 52 cards. However, some of the facts can repeat and in fact, we would recommend that the message “Go Slow in Cambridge. Life is Not A Race.” be on at least 8 of the cards.
  - Develop content and design for cards
  - Reach out to print house for estimates on costs of production
  - Manage print production
  - Bring cards to major events for distribution – may be combined as part of our next idea

  **Hours:**
  - 2 to 3 hours to determine desire and feasibility of this concept
  - 4 to 6 hours in total to develop set of facts and content
- 4 to 7 hours to develop design template
- 4 to 5 hours in total to manage production

- Trivia game at Tabling Events
  - This is a way to encourage discussion at events where you are staffing booths and/or tables. At tabling events, and possibly using your current SWAG or the deck of cards as an enticement, you should challenge two attendees to compete in a trivia game to test their traffic knowledge. Any right answer educates the audience, any wrong answer educates the participants. The only materials necessary would be your knowledge of traffic history, laws, and best practices. This is a fun, non-confrontational way to nudge people to drive more slowly and safer, and to take traffic laws and traffic safety more seriously.

  Steps to Completion:
  - Develop facts for game
  - Develop questions for trivia game
  - Determine prize for “winning” the game – should be a piece of Vision Zero SWAG
  - Determine other collateral material you want to give to the winner – should include a copy of the pledge and the palm card

  Hours:
  - 1 hour to determine feasibility and determine prizes
  - 3 to 4 hours to develop facts and questions for the trivia game

- Cambridge Traffic Trail
  - This is another simple idea that requires mostly the knowledge of the Cambridge transportation community. It would be fun and informative to offer a scavenger hunt of sorts, a competition where there are several important “traffic and transit landmarks” all throughout the City of Cambridge, and a participant in the hunt will have to take the pledge, and then will be issued a checklist for each landmark. The checklist will act as an educational tool, as it will also include information on Vision Zero and safety tips.

  Participants will go to each landmark and share a photo of themselves on social media with the traffic fact. The City could also designate the landmark as a part of the Vision Zero Traffic Trail, and thus include
signage that says “Cambridge is a Vision Zero community.” Once participants confirm that they have gone to every location with photo evidence, they will earn a prize. The messaging in the scavenger hunt would be the reverse of the usual scavenger hunt – instead of focusing on finishing first, we will ask participants to savor their time and go a little more slowly to keep themselves and their friends and family safe.

This could be done within a set period of time – perhaps during a “Vision Zero Cambridge” week.

Steps to completion:
- Determine feasibility of concept
- Determine sites for the traffic trail
- Create signs that indicate landmarks that are part of the traffic trail
- Determine if the City wants to do this as a Vision Zero Cambridge week and pick date
- Determine prize for those who participate and make sure the City has enough SWAG available
- Develop “traffic trail” site map to give to participants, to include clues, key facts about traffic safety in Cambridge, and a reminder to go slow in Cambridge
  - Include instructions on receiving prizes – easiest way would be for participants to pick up at Cambridge’s traffic office
- Create traffic trail hashtag for participants to include on social posts
- Retweet social posts that include the hashtag or images of participants in front of the Vision Zero landmarks

Hours:
- 2 to 3 hours to determine feasibility of concept and prizes
- 5 to 6 hours to determine traffic trail landmarks and develop signage
- 5 to 6 hours to develop content for and design traffic trail site map with safety facts
- 5 to 6 hours total to promote the Vision Zero Cambridge week and the traffic trail initiative
- Ongoing hours to promote social posts
- Ongoing hours to distribute prizes to participants
Phase IV: Partnership with a Software Developer for App, Game Simulator, etc.
If possible, it would be good to sit down with a local software or game developer in the Kendall Square area and have an involved conversation about what a partnership would look like. Alternatively, we think that the City should explore a potential partnership with MIT to help develop this idea. It would be press-worthy for Cambridge Vision Zero to have a phone app or game that supports transportation systems change and safe driving. One example of something similar is Boston’s Safest Driver Competition, supported by a phone app. (To be clear, we aren’t recommending you recreate that competition or utilize that app but it is a model of how technology, phone apps, etc., are being used for these kinds of initiatives).

We have included in this section a list of local game developers that the City may be interested in approaching. This kind of partnership and the resultant program could take a few forms:

- Game simulator
  - We think that in conjunction with the Cambridge Traffic Trail above, it would be nice to feature factoids and safe route suggestions in an alternate reality app that folks walking through Cambridge can use, much like Pokemon Go. That way it encourages folks to stop and take in more of Cambridge, rather than simply rushing through to get to their destination. If the user is in a car, the app (again like Pokemon Go) will offer limited to no functionality, as the internal sensor can be capable of realizing that they are moving too fast to look at their phone.

- Virtual reality goggles at an event
  - For events, it would be interesting if you could have a partnership with a virtual reality (VR) headset company and introduce a game where people can explore the risks of high-speed driving, and test their reaction capabilities at increasingly high speeds. Lots of drivers think that they are in complete control until it’s too late. This VR simulation would have the user driving through Cambridge at higher and higher speeds and would ask them to come to a complete stop as different obstacles are introduced. This would be an important way to interrupt the thought cycle that “bad drivers” get into crashes, and would teach the user that the speed is the issue, and not the relative “skill” of the operator.

The best way to pursue this kind of project would be to reach out to local software designers and propose a partnership. In addition, another option would be to develop a Request for Proposals from the City of Cambridge in order to solicit vendors to develop
the app. Below, we have laid out to the steps to completion and hours necessary to accomplish those steps.

Steps to Completion – Volunteer option
- Determine whether or not you will pursue an RFP route or reach out to the developers listed below.
- See list below of local software developers
- Determine the scope of the app
- Make initial outreach to each company proposing a meeting to develop the partnership
- Outline the scope of the relationship with budget
- Acquire the development timeline from the partner company
- Prepare a press release and media relations strategy for the announcement and rollout of the app
- At the time of launch, distribute the press release and promote on social media

Hours
- 1-hour planning phase to determine whether or not you want to do outreach or draft a Request for Proposals.
- 2-3 hours to determine and outline the scope
- 1 hour to make initial outreach to potential partners
- 1-2 hours to meet with potential partner and perform the necessary follow up
- 1 hour to acquire the necessary timeline
- 1 hour to outline the proper budget (if a budget is necessary)
- The development hours will be set by the developer, but there will be necessary correspondence between both parties that will be shaped by the scope of the app
- 2-3 hours to prepare media distribution list and develop the press release
- 1 hour to prepare necessary social media posts
- 3-4 hours at least on launch day to distribute the announcement and rollout of the app

As noted above, we have pulled together a list of game creators with which Vision Zero could potentially partner. See below for that list, which includes contact info and a brief summary of the company.

1. Crate entertainment
   1. Cambridge, MA
   2. business@crateentertainment.com
3. The company focuses on Action role-playing games. Crate entertainment eventually purchased the rights to Iron Lore entertainment. From here they developed their first game in 2013, Grim Dawn.

2. Dejobaan Games
   1. Boston, MA
   2. (617) 395-2601
   3. An independent game studio that has shifted its focus from handheld devices to PC and gaming consoles. The company has worked in various genres of gaming including art, music, and first-person shooters. One of their more notable projects is Elegy for a Dead World listed as a side-scrolling exploration game.

3. Demiurge Studios
   1. Cambridge, MA
   2. info@demiurgestudios.com, (617) 354-7772
   3. Creates mobile, console, and PC games with the focus of incorporating characters that are memorable and deep interactions. They have created games in the Rock band series and the game Borderlands which is an open-world first-person shooter. It joined SEGA games in 2015.

4. FableVision
   1. Boston, MA
   2. (617) 956-5700
   3. FableVision is concerned with making games for children. They make educational titles on the web and mobile devices with 2D and 3D animation.

5. Fire Hose Games
   1. Cambridge, MA
   2. info@firehosegames.com
   3. Fire Hose develops fun and creative games for computers, mobile devices, and consoles. They released their first project Slam Bolt Scrappers in 2011 which is a unique game that features the mashup of puzzle solving and brawling.

6. Funkitron
   1. Cambridge, MA
   2. www.funkitron.com
   3. A casual gaming company that creates mostly games for mobile devices. They are best known for their addictive top-grossing game on the app store Cascade. They also developed the number one paid casino game Slingo Supreme.

7. Gamesville
   1. Boston, MA
   2. (781) 370-2700
   3. A casual gaming portal that was acquired by Lycos in 1999. The portal has games that are casino style where users compete for cash prizes.

8. Harmonix Music Systems
   1. Cambridge, MA
3. Harmonix is known for its music-based titles like Rock band and Dance central. They focus on creating “the future of music gaming”.

9. Lantana Games
   1. Boston, MA
   2. www.lantanagames.com
   3. An independent gaming company that focuses on educational games mostly on PC and console. One of their more well-known games Children of liberty fills in the plot holes of Paul Revere's ride but is also historically accurate.

10. Linden Lab
    1. Boston, MA
    2. (415) 243-9000
    3. Linden lab is an American internet company. They are best known for creating the game Second Life, where users interact on an online virtual world.

11. Otherside Entertainment
    1. Boston, MA
    2. https://otherside-e.com/wp/
    3. Otherside Entertainment is a Video game developer that works on First person action role playing games. They have released two versions of their underworld series, Underworld Overlord on Android, and Underworld Ascendant on PC/Mac.

12. Proletariat
    1. Boston, MA
    2. biz@proletariat.com
    3. Proletariat is a software company whose mission is to create some of the best multiplayer games around. They developed a game World Zombination which was on Apples “Best of 2015” list on the app store. They also have a plethora of projects that are focused on advancing the game streaming industry.

13. The Molasses Flood
    1. Boston, MA
    2. contact@themolassesflood.com
    3. A game studio that is made up of AAA developers who are looking for their own path in the gaming industry. Their debut game The Flame of the Flood is a survival adventure game about traveling down a river. The game is available on PC, Mac, Xbox one, Playstation 4, and Nintendo Switch.

Cultural Competency
As we have noted in a few places, we feel it is important to note that in the production of these various items, Vision Zero will need to take into account the various ethnic groups and languages spoken among the Cambridge community. In the production of these materials, make sure to reserve a proportional amount for every community, featuring the languages spoken in those communities. Not only is this critical for properly
engaging, but as a representative of the City of Cambridge, you will also help send a powerful message that every Cambridge resident is visible.
Evaluation of Public Education Initiative

There are a few measures by which the City of Cambridge can evaluate the effectiveness of the public education component of the Vision Zero Action Plan - one, did the campaign impact the long-term behavior of people in Cambridge and two, are people aware of what Vision Zero means and what it is trying to do?

Evaluating whether or not the campaign has changed behavior when it comes to driving more slowly and safely would likely require a multi-year, longitudinal study and would probably require a tremendous amount of time and resources from the City – resources that the City could use more effectively to inform the public. It is easier to measure whether or not the campaign has raised its profile sufficiently high enough that it is recognized by residents, people who work in Cambridge and frequent visitors, and that the campaign is tied to a basic message – go slow in Cambridge.

Cambridge does have one ready-made option for answering some of those questions - its annual resident survey - and we recommend using that survey, if possible. In both cases, we think that the City can utilize that survey to garner baseline data. The 2018 survey included questions on pedestrian and bicycle safety – as such, we recommend including two questions in the 2019 annual survey:

1. Are you aware of the City’s Vision Zero Action Plan?
   a. If yes, what does it pertain to?
      i. Traffic safety on Cambridge roads
      ii. Zero waste efforts in Cambridge*
      iii. The promotion of better eye health*
      iv. Don’t Know

2. At what speed do you drive through Cambridge’s city squares?

*These do not have to be the alternative answers, though it would be valuable specifically to know if people are confusing Vision Zero with zero waste efforts.

These questions will give you baseline information before the public information campaign goes into full gear. It will also allow you to see if the public education initiative is achieving its goals, since you will be able to ask these questions in subsequent years to see if residents are receiving the appropriate messages, learning about Vision Zero and driving more slowly on Cambridge’s streets.

We do not recommend commissioning a separate survey for this purpose, as the resources the City would need to spend to acquire this data would be better used in educating the public.
Finally, determining which tactics are working the best – and which can be improved upon – is an important part of any evaluation process. Often, the best way to determine which tactics are the most effective is just to ask. The pledge can be used for this purpose. Before or after an individual signs the pledge online, the City should ask how the signer learned about Vision Zero (through a menu of options). Alternatively, after you have received a critical mass of signers, the City could send an email to those who have signed, asking them how they learned about Vision Zero, what they know of the campaign, and ways to spread the word.

With both the resident survey process and outreach on effective tactics, the City may want to consider convening a focus group of Cambridge residents only after Phase I has been completed. By convening a focus group after launching the public education component of the action plan, the City will be in a better position to know what has and has not worked to educate residents and where to allocate its resources as it moves into Phase II and Phase III. Since this would be another commitment of resources that may be best used in implementing education tactics, we would only recommend this if it is clear from the resident survey that there has been little movement on awareness of the Vision Zero campaign.

Steps to completion:
- Determine if questions re Vision Zero can be added to annual resident survey
- Develop questions for inclusion in survey
- Analyze data on an ongoing basis
- Include in pledge a question re how the signer learned of Vision Zero
- Adjust tactics according to data received
- If no movement on awareness of Vision Zero, determine if focus groups are needed
- For focus groups
  - Decide if the City wants to conduct focus groups on its own or contract with a research organization to conduct
  - Develop messages to test
  - Recruit participants for focus groups
  - Conduct focus groups
  - Analyze data from focus groups and adjust tactics

Hours:
- 2 to 4 hours to determine if Vision Zero can be added to resident survey
- 2 to 4 hours to develop questions for survey inclusion
- 4 to 5 hours to analyze data
- 4 to 5 hours to adjust tactics
• 3 to 4 hours to determine if focus groups are needed and to decide if they should be done in-house or contracted out
• 5 to 6 hours to develop messages to test
• 6 to 10 hours to recruit participants
• 2 to 3 hours to conduct focus groups
• 5 to 6 hours to analyze data and adjust tactics
Media Partnerships

We have researched various publications we believe would make satisfactory media partnerships with the City of Cambridge Vision Zero campaign. We believe it makes the most sense for the City to approach local publications that serve audiences and populations that live in Cambridge.

We have included publications that serve the immigrant community as well as student publications in the Cambridge area in order to broaden the range of our audience and ensure it is not limited to only English-speaking communities. Since the City of Cambridge encompasses many college students, we believe it would be beneficial for the City to advertise in student publications as well.

We determined that the best use of resources for media sponsorships for Vision Zero staff is with local Cambridge media and media that reaches non-English speaking populations. We elected not to recommend pursuing media partnerships with major outlets like the Boston Globe or the region’s television stations because the resources needed would be too large and therefore less likely to help the City reach targeted audiences with a smaller advertising purchase.

In this section, you will find recommendations, ad rates, and ad specs for the following publications:
- Cambridge Chronicle
- Cambridge Day
- Harvard Crimson
- El Mundo
- The Haitian Reporter
- Metro Boston
- Portuguese Times
- Sampan

Overall recommendation:

O’Neill and Associates recommends that the City of Cambridge plan a Vision Zero advertising campaign with The Cambridge Chronicle, Cambridge Day, and The Harvard Crimson. These are “must have” publications to reach our targeted audiences. Depending upon your budget, we think it makes sense to then develop a strategy for the rest of the publications listed here. But first, make sure to blanket Cambridge-based media with Vision Zero messages.
**The Cambridge Chronicle**

*The Cambridge Chronicle* and TAB is the City’s legacy newspaper and is most likely to cover stories about the Vision Zero initiative. It makes sense for the City to focus resources on both a print and online ad purchase for the publication as a way of reaching Cambridge residents.

**Recommendation:**

*The Chronicle’s* print options are expensive (though discounts may be available) but the outlet also offers less costly online advertising options. If the City decides to run a print campaign, O’Neill and Associates recommends that the City do a ¼ color page or ½ page color ad buy for at least four weeks to reinforce the message. The total cost for that purchase, before any discounts, would be $6,300 for a quarter page or $11,312 for a half page.

Additionally, *the Chronicle* offers an online banner ad at $.10 cpm (cost per million) for $500 in total. According to their media kit (see below), that would bring 50,000 impressions to the Vision Zero website. A four-week run of that banner would cost $2,000 and would be a wise investment of funds for the City. When the pledge becomes available, it would make sense to use the *Chronicle’s* website to drive traffic to sign the pledge.

See the next page for more information on their ad buy options. Additionally, you can contact GateHouse Media, the group that owns *The Cambridge Chronicle*, for more information here.

Cambridge Day

The Cambridge Day is a Web-only publication in Cambridge, so we think that the City should focus on making a significant purchase to help elevate the Vision Zero initiative.

Recommendation:

O’Neill and Associates recommends purchasing the option for homepage placement and the top bar for $275 for 8 weeks. The total cost would be $2,200.

Media Kit Information

The current rates on Cambridge Day, subject to change or negotiation:

A box that appears on all stories is $150 a week, and claiming the bar above the flag is the same; getting both for the week is $225.

Homepage placement alone is $75, and homepage placement plus the top bar is $200. All three (homepage, bar and all “inside” pages) is $300.

The bar above the flag is an exclusive spot; the other placements may have ads from other businesses appearing as well, above or below.

Those wishing to advertise on the site should send email to advertising@cambridgeday.com.
**Harvard Crimson**

Though a student publication, *The Harvard Crimson* is an important part of Cambridge’s media landscape. Taking out ads in *The Crimson* will help the City reach not only Harvard’s student population but its many employees and people affiliated with the university.

**Recommendation:**
O’Neill and Associates recommends that the City take out a ¼ page advertisement for 4 to 6 issues. The total cost for a 6-week campaign would be between $1,472 and $2,208.

*The Crimson* charges for online ads by 1,000 page views. Our online recommendation would be for a primary ad ($14 per 1,000 page view) for between 15,000 and 20,000 page views. That would cost between $1,072 and $1,429 in total.

Contact information:

You can contact The Crimson’s business office at:

14 Plympton Street  
Cambridge, MA 02138

Policies and Procedures

Redesign Fees
The Harvard Crimson will apply a one-time $75 redesign fee to your bill with proper notice if:
(i) You would like us to redesign your ad.
(ii) Your advertisement does not fall within submission specifications.

Submission
Please submit your advertisement according to the formatting specifications on the previous page. When submitting, please email your advertisement to your contact at The Harvard Crimson.

When to Submit
- Print and Online: at least 2 days before your selected advertising run dates
- Inset惩戒 mailed to The Harvard Crimson, 14 Plympton Street, Cambridge MA 02138 at least 1 week before your selected advertising run dates
- Email Newsletter: at least 2 days before your selected advertising run dates

Payment
We will accept payment by credit card, ACH, or check. First-time advertisers are required to complete payment before the advertisement run date. Please have payment information ready when contacting your representative at The Harvard Crimson.

Disclaimer
Upon agreeing to terms with The Harvard Crimson, the advertiser agrees to produce and submit artwork for the space ordered. If the artwork is not provided by the specified deadline above, the space will be forfeit and the advertiser will pay for 100% of the space ordered. Additional terms regarding cancellation fees will apply to all advertising packages over $3,000. We reserve the right to review and reject all advertisements prior to publication should we see fit.

Advertiser Agreement
By submitting your advertisement to The Harvard Crimson, you are agreeing to have your advertisement run in our products. If you decide to cancel your advertisement, you must give us 2 days notice.
El Mundo

*El Mundo Boston* is one of the City’s largest media outlets serving the Spanish-speaking population and therefore, it makes sense to explore both their print and web advertising options to ensure that Cambridge’s Spanish speakers are informed of the Vision Zero initiative.

**Recommendation:**
O’Neill and Associates recommends a purchase a quarter page (display ad, as opposed to classified) a $500 for four weeks, for a total of $2,000. Color is available, but would be an additional $750 for full color.

We also recommend purchasing a sidebar banner for their website, for at least one month at $700 for the month.

You can contact El Mundo’s advertising department at: sales@elmundoboston.com

- Below-fold banner 645x80
- In-Article banner 043x80
- In-Article square 150x150
The Boston Haitian Reporter

The Haitian Reporter is part of the Dorchester Report family of newspapers and as such, has a respected reputation for providing news to the communities it serves. They are no longer accepting print ads but they do run web ads – see below for their rates.

Recommendation:

O’Neill and Associates recommends running a banner ad for a 3-month run, for a total cost of $450.

Ad info:
No longer do print ads, block and banner online ads are priced per 30 days at $150 per.

You can contact the Dorchester Reporter advertising for more information. The appropriate contact for both print and online is Jack Conboy, 617-436-1222 or AdDesk@dotnews.com
Metro Boston

Metro Boston is a good way to reach younger commuters who are traveling in and out of Cambridge for work, but it would be a significant investment of resources for either print or online advertising. If the City wants to make a heavy investment in online advertising, the Metro would be the publication where it might make the most sense. As of June 2019, both UNICEF and Franklin Park Zoo are advertising online there, which gives you a sense of the level of advertiser they receive.

You can contact Metro US advertising through their website.

Recommendation:

O’Neill and Associates doing either a print ad buy or an online ad buy but not both. For print, we recommend purchasing a ¼ page ad for a 5 time run, which would cost $7,700 in total.
Portuguese Times

The Portuguese Times would allow the City of Cambridge to reach some of Cambridge’s Brazilian population. Since the publication itself is not located in Cambridge or Greater Boston, we are recommending a shorter ad buy.

Recommendation:
O’Neill and Associates recommends that the City of Cambridge purchase a ¼ page advertisement for four weeks. In total, that would cost $900 for a Black and White advertisement.
Color: $140.00 + Black & White Rate

Back Page: 15% extra

Guaranteed Position: 10% extra

Minimum Contract: 5 inches

Tear sheets: upon request
Political advertising: Open rate (payment in advanced)

LINE CLASSIFIED ADVERTISING
$2.00 per line
Minimum billing of 5 lines, 10 pt heading is counted
As 2 lines, 18 pt head is counted as 4 lines

Portuguese Times
Box Number Blind Ads
5.00 service charge in addition to
lines charge of the ad. The phrase
"Write to Portuguese Times, Ltd.
Box #______, P.O.Box 6128S, New
Bedford, MA 02746-6288" must
appear in the ad.

**Sampan**

*Sampan* serves the area’s Asian American community and is an effective way to reach Cambridge’s Asian and/or Asian American population.

Most print publications base their rates on size of ad and frequency of ad run. Usually, the higher frequency, the more they will give the advertiser a discount.

**Recommendation:**
With *Sampan*, O’Neill and Associates recommends that Vision Zero take out a half-page print ad for a 4 to 6 issue run. See their media kit below the dimensions of a half page ad. In total, a half page ad for 4 to 6 issues would cost $1,620 at most.

*Sampan* also offers a 30% discount for online ads if the advertiser runs a print ad 1/3 page or larger. Once the Vision Zero pledge is created and posted online, it will make sense for the City to use ad buys to drive traffic to it. In that case, O’Neill and Associates would recommend Vision Zero purchase the medium sidebar ad at $150 or tall sidebar ad at $200. In the case of online ads, the metric usually used is page views – Vision Zero should ask for the ad to run until you reach a goal of 25,000 page views.

You can contact Sampan’s advertising agent at ads@sampan.org or call (617) 426-9492 x 206.

Go Slow in Cambridge. Life Isn’t A Race.
To the Cambridge Community:

I am pleased to share Cambridge’s Vision Zero Action Plan, and to lay out this strong framework for how we will achieve Vision Zero in our city. Vision Zero is an initiative to reduce and ultimately eliminate transportation fatalities and serious injuries, while at the same time creating safe, healthy, and equitable mobility for all those who travel in Cambridge.

As with all of the work we do in Cambridge, Vision Zero requires ongoing commitments to equity and collaboration, not only in how we plan and make decisions, but also in how we implement our Vision Zero-related programs. The foundation for our Action Plan is data driven decision-making. We seek to identify the fundamental causes for traffic crashes, injuries, and fatalities, to come up with creative and implementable solutions to prevent those incidents, and to evaluate our successes—and remaining challenges—so that we can do even better in the future.

To implement the plan, we have identified 42 actions that the City will undertake, divided into seven high-level commitments:

- Design and operate safe streets;
- Improve large vehicle, taxi/for-hire vehicle, and TNC safety;
- Ensure equity in all efforts;
- Lead by example;
- Engage the public;
- Create partnerships; and
- Use data to direct our efforts and measure our progress

Our shared Vision Zero commitment reinforces our focus on safety and the actions that we can collectively take to create the safest possible transportation system—and the safest possible city. As City Manager, I believe effective communication, collaboration, and public process are critical to successful initiatives, and these will be central themes that will guide our approach for Vision Zero. By coming together as a community, we will continue making it safe and easy for people of all ages and abilities to travel between work, school, shops, and other destinations, whether they choose to walk, bicycle, drive, or take transit. I look forward to working with the City Council and the entire community to enhance the safety of our city.

Sincerely,

Louis A. DePasquale
City Manager
TRANSPORTATION IS A KEY ELEMENT OF WHAT MAKES CAMBRIDGE THE VIBRANT, LIVELY CITY IT IS. RESIDENTS, BUSINESSES, AND VISITORS ALIKE ENJOY THE WALKABILITY, CONVENIENCE, AND HEALTHY LIFESTYLE AVAILABLE HERE. WHETHER WALKING, CYCLING, USING TRANSIT, DRIVING, OR MOVING AROUND CAMBRIDGE ANOTHER WAY, OUR RESIDENTS AND VISITORS NEED SAFE STREETS. WHILE CAMBRIDGE HAS LONG BEEN A LEADER IN IMPROVING BICYCLE AND PEDESTRIAN FACILITIES AND SAFETY, SIGNIFICANT CHALLENGES REMAIN. TRAFFIC VIOLENCE IMPACTS OUR PUBLIC HEALTH, OUR PUBLIC SAFETY, OUR QUALITY OF LIFE AND CAN DISPROPORTIONATELY IMPACT OUR MOST VULNERABLE RESIDENTS. WHILE CAMBRIDGE BENEFITS FROM A LONG HISTORY OF SUPPORT FOR WALKING, BICYCLING, AND TRANSIT, OUR DENSE, URBAN ENVIRONMENT DOES POSE CHALLENGES. ALTHOUGH CAMBRIDGE’S CROWDED, NARROW STREETS RESULT IN LOWER AND SAFER SPEEDS, WE ALSO HAVE LESS STREET REAL ESTATE AVAILABLE FOR THE COMPETING USES OF PEOPLE WHO DRIVE, BICYCLE, OR WALK. ADDITIONALLY, A SIGNIFICANT AMOUNT OF VEHICULAR TRAFFIC IN CAMBRIDGE PASSES THROUGH WITH NO ORIGIN OR DESTINATION WITHIN THE CITY, ON ROADS THAT ARE NOT UNDER LOCAL CONTROL.

AS A CITY, WE HAVE COMMITTED TO TAKING THE STEPS NECESSARY TO ADDRESS THESE CHALLENGES AND ELIMINATE ALL TRAFFIC FATALITIES AND SERIOUS INJURIES—VISION ZERO REPRESENTS THIS COMMITMENT. VISION ZERO IS A STRATEGY TO ELIMINATE ALL TRAFFIC FATALITIES AND SEVERE INJURIES, WHILE INCREASING SAFE, HEALTHY, EQUITABLE MOBILITY FOR ALL. THE VISION ZERO APPROACH CONSISTS FIRST AND FOREMOST OF AN ACKNOWLEDGMENT THAT CRASHES ARE PREVENTABLE. BY EXAMINING THE FACTORS THAT CAUSE CRASHES, FROM INFRASTRUCTURE TO BEHAVIOR AND SOCIETAL FACTORS, WE CAN MAKE THE CHANGES NECESSARY TO ELIMINATE TRAFFIC FATALITIES AND SERIOUS INJURIES. VISION ZERO ALSO ACKNOWLEDGES THAT HUMAN BEINGS WILL ALWAYS MAKE MISTAKES, SO WE MUST HAVE SYSTEMS IN PLACE TO ENSURE THAT THEY ARE NOT FATAL OR LIFE CHANGING.

THIS ACTION PLAN IS THE BLUEPRINT FOR HOW WE WILL REACH LONG-TERM GOALS, AND FALLS INTO ONE OF SEVEN CATEGORIES:

A. DESIGN AND OPERATE SAFE STREETS: THE CITY WILL DESIGN AND OPERATE OUR STREETS TO ENSURE THAT PEOPLE OF ALL AGES AND ABILITIES CAN WALK, BIKE, USE TRANSIT AND DRIVE SAFELY. ACTION STEPS INCLUDE:

- Lower default speed limit to 25 MPH
- Improve safety for all modes in city squares
- Grow network of separated bike lanes
- Traffic Calming
- Safer Pedestrian Crossings
- Change infrastructure, roadway layout, and curb usage to prevent stopping and parking in bike lanes, crosswalks, and pedestrian ramps
- Special Slow Speed Zones
- Establish Rapid Response Protocol for fatalities and serious injuries
- Enhance intersection safety
- Safe Routes to Transit
- Enforcement

B. IMPROVE LARGE VEHICLE, TAXI/FOR-HIRE VEHICLES, AND TNC SAFETY: THE CITY WILL MINIMIZE THE NEGATIVE IMPACTS OF LARGE VEHICLES, TAXI/FOR-HIRE VEHICLES, AND TRANSPORTATION NETWORK COMPANY VEHICLES, WHILE ENSURING THEY CAN PROVIDE NECESSARY SERVICES TO CAMBRIDGE RESIDENTS, STUDENTS, WORKERS AND VISITORS. ACTION STEPS INCLUDE:

- Improve understanding of impacts of large vehicle delivery in Cambridge
- Truck safety education for people who walk or bike
- “Watch for Bikes” stickers for taxis, TNCs, and car share vehicles
- Increase adoption of truck side guards in Cambridge
- Tour Bus Safety
- Coordination and education for TNCs and car share companies

C. ENSURE EQUITY IN VISION ZERO: THE CITY WILL ENSURE ALL VISION ZERO EFFORTS PROMOTE EQUITY AND INCLUSIVENESS AND PROTECT PEOPLE OF ALL AGES AND ABILITIES, PAYING Particular ATTENTION TO VULNERABLE AND UNDERSEEN POPULATIONS. ACTION STEPS INCLUDE:

- Complete roll-out of Accessible Pedestrian Signals (APS)
- Ensure all Vision Zero outreach and communication efforts reach underserved and vulnerable residents
- Safe Routes for Seniors and Persons with Disabilities
- Continue use of Five Year Plan for Streets and Sidewalks to improve safety, accessibility, and mobility for all residents
- Create specialized traffic safety training programs and educational materials for vulnerable populations
- Safe Routes to Schools

D. LEAD BY EXAMPLE: THE CITY WILL LEAD BY EXAMPLE IN ALL THINGS RELATED TO TRAFFIC SAFETY. CITY POLICIES AND ACTIONS WILL REFLECT OUR COMMITMENT TO VISION ZERO. ACTION STEPS INCLUDE:

- Renewed focus on safety in City operations
- Review crashes involving City employees conducting City business
- Vision Zero training for all Cambridge Police Officers
- Ensure that City employees are operating vehicles in the safest manner possible
- Develop and pilot general employee training on Vision Zero and rules of the road

E. ENGAGE THE PUBLIC ON VISION ZERO: THE CITY WILL ENGAGE THE PUBLIC TO GATHER FEEDBACK ON TRAFFIC SAFETY RELATED CONCERNS AND PRIORITIES, EDUCATE AND CHANGE BEHAVIORS TO IMPROVE PUBLIC SAFETY AND PUBLIC HEALTH. ACTION STEPS INCLUDE:

- Establish a standing advisory committee on Vision Zero

F. CREATE PARTNERSHIPS: THE CITY WILL PARTNER WITH UNIVERSITIES, PRIVATE BUSINESSES, AND OTHER LOCAL AND STATE ENTITIES TO IMPROVE TRAFFIC SAFETY. ACTION STEPS INCLUDE:

- Create partnerships with Universities, Businesses, and Nonprofits
- Partner with researchers to support safety related research and test safety related technology
- Partner with local municipalities, state and federal-level organizations

G. USE DATA TO DIRECT EFFORTS AND MEASURE PROGRESS: THE CITY WILL DEVELOP METRICS TO GUIDE DECISION-MAKING, MEASURE PROGRESS ON VISION ZERO ACTIVITIES AND SHARE SUCCESSES AND CHALLENGES IN A TRANSSPARENT WAY. ACTION STEPS INCLUDE:

- Ensure Vision Zero is a data-driven effort
- Create a Vision Zero Safety Portal
- Make all Vision Zero related data available to the public
- Develop key metrics to measure Vision Zero progress
**WHAT IS VISION ZERO**

First implemented in Sweden in the 1990s, Vision Zero has proved successful across Europe—and is now gaining momentum in major American cities. The fundamental concept behind Vision Zero, that no traffic related death or serious injury is acceptable, is a change from the traditional cost-benefit or economic based models used to measure acceptable risks from traffic crashes. In Sweden, traffic deaths have fallen by half since 2000, thanks to Vision Zero.

The Vision Zero approach consists first and foremost of an acknowledgment that crashes are preventable. By examining the factors that cause crashes, from infrastructure to behavior to societal factors, we can make the changes necessary to eliminate traffic fatalities and serious injuries. Vision Zero also acknowledges that human beings will always make mistakes, so we must have systems in place to ensure mistakes do not cause fatalities or serious injuries.

Vision Zero has now spread across the world, including US cities like New York City, Los Angeles, Seattle, and Washington D.C., among others. While each community crafts a Vision Zero program that is unique to its needs and conditions, there are certain elements common to successful Vision Zero programs including political commitment, multi-disciplinary leadership and cooperation, a transparent, data-driven systems-based approach, and community engagement.

Vision Zero focuses on identifying the steps necessary to meet its goal through the creation of a collaborative framework, based on the elements outlined above.

**HISTORY**

Transportation policy and planning in Cambridge, with its longstanding emphasis on the sustainable modes of walking, biking and using transit, laid the groundwork for Vision Zero. As far back as the early 1990s, the City has encouraged active transportation and transit over driving. The Vehicle Trip Reduction Ordinance (VTRO) of 1992 mandates a variety of measures to encourage residents and people commuting to Cambridge to reduce automobile usage.

In 1998, the City passed the Parking and Transportation Demand Management (PTDM) Ordinance. The PTDM Ordinance is a national model for improving mobility and access, reducing congestion and air pollution, and increasing safety by promoting walking, bicycling, public transit, and other sustainable modes. The PTDM ordinance, made permanent in 2006, requires owners of non-residential properties who install additional parking to implement certain measures that discourage single occupancy vehicle commuting trips.

In addition to these two ordinances, the City has developed mode-specific plans, such as the Pedestrian Plan, the Cambridge Bicycle Plan, and the Transit Strategic Plan, all of which lay out policies and guidelines that shape transportation in our community.

The efforts to lower vehicle miles traveled and transportation emissions of the past 25 years have been paying off. Cambridge leads the nation in walkability and the percentage of residents who get to work without using a car. Bicycling is now seen as a fully viable mode of transportation and has experienced extreme growth; bicycling has tripled. Importantly, the population has grown significantly—both those who live and those who work in the city—without a corresponding growth in traffic.

The City of Cambridge is a leader in incorporating health and safety into all transportation planning and implementation of capital projects. The City created a Traffic Calming program in the mid-1990s with the goal of improving the quality of life in neighborhoods while enabling people to use their motor vehicles on city streets more safely. Elements like curb extensions, raised crosswalks and intersections, and other features are incorporated into capital reconstruction projects. The Department of Public Works, in collaboration with the Community Development Department and the Trafﬁc, Parking, and Transportation Department, has also focused on improving accessibility around Cambridge as part of their Five Year Plan for Streets and Sidewalks.

The Cambridge Public Schools Wellness Policy commits to promoting walking and bicycling to school as part of their efforts to encourage active transportation. More recently, the Community Development Department formalized its Safe Routes to School Program to expand the City’s support of the School Wellness Policy. The City continues to work hard to ensure that users of all ages and abilities have the safe, convenient mobility they deserve.

Healthy Eating and Active Living was identiﬁed as one of the four priority areas of the 2015 Cambridge Community Health Improvement Plan, which includes two objectives related to increasing active and sustainable transportation and reduction of injuries among people who bike and walk.

Standart Transit

Interior Cards 11x28

11"x28"

Substrate
- 18 pt Cardstock

Inks
- VOC-free materials preferred.
- Weatherproof/waterproof with UV protection.
- When applicable, UV or conventional clear coat must be in compliance with product bulletin specifications of substrate and ink manufacturers.

Mechanical Size
11"h x 28"w

Artwork requirements
- Artwork must be prepared in proportion to overall size. Keep critical information within the safety area.
- Output resolution at full size must be between 80-100 ppi. For artwork prepared at the suggested scale of 100%, effective resolution of images in mechanical should be between 80-100 ppi.
- All art bleeds. Live fonts and images must be provided, and images must be saved as CMYK.

Accepted file types:
- Packaged InDesign or Illustrator files, including all linked images and live fonts
- Print quality PDF with fonts outlined, and all raster images provided at the target resolution, including crop marks and bleed
- Photoshop files with bleed included, and trim and safety areas indicated within the file

Finishing
- Produce in one piece. Trim to overall size.

Overage
- An overage of 50% per four-week period is required.

Disposal of material
- All unused material remaining after conclusion of display may be disposed of unless instructions are received 30 days prior to conclusion of display date.

Delivery
- Advertising material must be received at least 10 working days prior to the commencement of the showing, with applicable posting instructions.
