Subject: Submittal of SFY 2015 –2017 Capacity Development Triennial Report (SDWA Section 1420(c)(3))

Dear Ms. Weiss:

The Massachusetts Department of Environmental Protection is the agency responsible for administering the provisions of the Safe Drinking Water Act, Section 42 U.S.C. § 300g-9 (c)(3). The Act requires the State agency (MassDEP) with primacy to prepare a triennial report, stating the progress the agency has made in adopting its Capacity Development Strategy, which is designed to improve the technical, financial and managerial capacity of public water systems in the State.

The attached report fulfills the requirements of the Act by demonstrating that MassDEP has successfully implemented its Capacity Development Strategy and that this initiative has had a direct and positive impact on the quality of drinking water in Massachusetts. A few short examples of the work that MassDEP has completed include;

- Registering and evaluating thirty six (36) new public water systems.
- Evaluating one thousand one hundred and twenty five (1,125) public water systems via the sanitary surveys process.
- Evaluating, categorizing and providing technical assistance and outreach to address (public water system's) three thousand, eight hundred and twenty two (3,822) technical, financial and managerial issues (Scheduled Actions) identified during the sanitary surveys process.
- Completed Phase One of the "Lead in School Drinking Water" program that provided technical assistance and laboratory analysis to 818 schools from 153 different communities. A total of 55,919 samples were collected from 31,832 fixtures.

If you have any questions concerning this submittal, please contact me at 617-292-5857.

Sincerely,

Yvette DePeiza  
Program Director  
BWR/ Drinking Water Program  
Massachusetts Department of Environmental Protection

## EXECUTIVE SUMMARY

---

The Massachusetts Department of Environmental Protection (MassDEP) is the responsible agency for administering the provisions of the Public Health Service Act (Title XIV), also called the Safe Drinking Water Act (SDWA or the Act), Section 42 U.S.C.A. § 300g-9 (c)(3). The Act requires (Section 1420(c)(3)), the head of the State agency (MassDEP) with primacy, to submit to the Governor a triennial report, stating the progress the agency has made in adopting its capacity development strategy. The capacity strategy is designed to improve the technical, managerial and financial capacity of public water systems in the State. The report, which requires no action by the Governor, is attached, and will be made available to the public via MassDEP's Web site and/or upon request.

The MassDEP through its Drinking Water Program (DWP) administers and enforces the requirements of the federal SDWA. From its headquarters in Boston and regional offices in Lakeville, Springfield, Wilmington, and Worcester, MassDEP is involved in every facet of ensuring that public water systems in Massachusetts provide and deliver drinking water that is safe and fit to everyone who lives in, works in, and visits our State. To further enhance its efforts to promote the public health and general welfare of the users of water, as well as to comply with the new federal Capacity Development requirements established by section 1420(c)(2) of the Act, the MassDEP developed and submitted to EPA in August 2000, a capacity development strategy. The capacity development strategy was designed to improve the technical, managerial, and financial (TMF) capabilities of public water systems so that they can achieve compliance with the requirements of the Act.

This report fulfills the requirements of section 1420(c)(3) of the Act by demonstrating that MassDEP has successfully implemented its Capacity Development Strategy and that this initiative has had a direct and positive impact on the quality of drinking water in Massachusetts.

---

## BACKGROUND INFORMATION

---

A public water system's capacity is determined by its ability to plan for, achieve, and maintain compliance with applicable federal and state drinking water standards now and in the foreseeable future. Based upon the research and technical assistance efforts of waterworks professionals and EPA guidance, capacity is known to have three components: technical, managerial, and financial. Adequate capability in all three areas is necessary for the successful operation of a public water system.

Capacity development is the process through which public water systems acquire and maintain adequate technical, managerial, and financial capabilities to assist them in complying with the Massachusetts regulations that implement the Act, published at 310 CMR 22.00. The 1996 Amendments to the SDWA added capacity development provisions that provide a framework for States and public water systems to work together to help ensure that systems acquire and maintain these capabilities in order to meet current and future federal and state public health protection objectives. MassDEP's Capacity Development Strategy is the framework that MassDEP uses to improve the technical, managerial, and financial capacity of public water systems in Massachusetts.

### Massachusetts Drinking Water Systems

The Department of Environmental Protection regulates all public water systems in Massachusetts and enforces the SDWA through a primacy agreement with the USEPA. Public water systems are drinking water systems that serve at least 15 service connections or serve an average of at least 25 people daily at least 60 days per year.

There are 1,668 public water systems in the Commonwealth of Massachusetts, comprising the categories identified in Table A. Approximately 31% of all public water systems are classified as community water systems (residential population), 16 % are Non transient Non community systems (e.g. schools), and 53% are considered Transient Non-Community (e.g. campgrounds).

Table A: Massachusetts Water System Classifications

Year	Community	NTNC	TNC	Total # of PWS
2017	521	258	889	1,668

NTNC = Non transient Non community  
(e.g. – schools)

TNC = Transient non community  
(e.g. – campgrounds)

---

## EFFICACY OF THE CAPACITY DEVELOPMENT STRATEGY

---

The objective of the 1996 Safe Drinking Water Act Amendments is to ensure that public water systems provide safe drinking water to the public. The Amendments seek to prevent compliance problems and associated health risks by ensuring that public water systems have the capability to produce safe drinking water now and in the future.

MassDEP's Capacity Development Strategy focuses on improving the technical, financial, and managerial operations of public water systems in the Commonwealth. Section 1420 of the SDWA requires MassDEP to continuously implement its strategy. The effective implementation of the Capacity Development Strategy (as outlined below in Section I – Components of the Capacity Development Strategy), has resulted in an increase in the percentage of systems meeting all health based standards as well as an increase in the percentage of the population getting water from systems meeting all health based standards as described in Section II – Efficacy of the Capacity Development Strategy.

The following list of accomplishments (for the period July 1, 2014 – June 30, 2017) is indicative of the effectiveness of this program.

# I. Components of the Capacity Development Strategy

## A. New System Review for Community and Non-Transient Non-Community Systems (as required by SDWA Sec 1420 (c))

The MassDEP drinking water staff is responsible for evaluating (via a New System Business Plan and/or Sanitary Survey) the technical, financial and managerial capability of any new Community and Non-Transient Non community public water system. MassDEP staff also completes an evaluation on any new Transient Non-community system. During the last three years the drinking water staff has completed the following number of evaluations (Figure 1);

Figure 1 MassDEP New Public Water System Reviews SFY 2015– SFY 2017				
Type of Public Water System	SFY 2015	SFY 2016	SFY 2017	Total # of Evaluations Completed
Community Systems	1	2	1	4
Non-Transient Non Community Systems	0	1	3	4
Transient Non Community System	16	6	6	28
Totals	17	9	10	36

*See Appendix A for a listing of the new PWS that registered between SFY 2015-2017.*

## B. Existing System Review (as required by SDWA Sec 1420 (c))

The MassDEP drinking water staff is responsible for evaluating (via a Sanitary Survey) the technical, financial and managerial capability of any Community, Non-Transient Non community and Transient non-community public water system. During the last three years the drinking water staff has completed one thousand one hundred and twenty five (1,125) sanitary survey evaluations. Figure 2 provides a breakdown in the number and types of systems that had sanitary survey evaluations completed during FY 2015-2017.

Figure 2 MassDEP Existing Public Water Systems Reviews SFY 2015 – SFY 2017				
Type of Public Water System	SFY 2015	SFY 2016	SFY 2017	Total # of Surveys Completed
Community Systems	185	160	170	515
Non-Transient Non Community Systems	37	26	51	114
Transient Non Community System	164	153	179	496
Totals	386	339	400	1,125

A listing of the (1,125) Public Water Systems that had sanitary surveys completed on them between SFY 2015-2017 is available in Appendix B. They are organized by SFY.

C. Scheduled Actions (Technical, Financial and Managerial (TFM) deficiencies) identified during Sanitary Surveys.

During the course of conducting the 1,125 sanitary surveys to Community and Non-Community public water systems between SFY 2015 – 2017, MassDEP staff identified a total of 3,822 Scheduled Actions (TFM deficiencies). See Figure 3 below for a comparison of the number of scheduled actions identified during SFY 2015 – SFY 2017.

Figure 3 MassDEP Scheduled Actions (Technical, Financial & Managerial Deficiencies) SFY 2015 – SFY 2017				
Type of Public Water System	SFY 2015	SFY 2016	SFY 2017	Total # of Scheduled Actions
Community & Non-Community Systems	1,336	1,120	1,366	3,822

Further analysis of the 3,822 Scheduled Actions identified above in Figure 3 (SFY 2015- 2017) is captured below in Figure 4. The DWP staff analyzes the Scheduled Actions annually (Figure 4) in an effort to identify what type of training and technical assistance is needed to address PWS deficiencies. The analysis is distributed to drinking water related training organizations and technical assistance providers including, but not limited to, Massachusetts Water Works Association, New England Water Works Association, Massachusetts Rural Water Association and RCAP Solutions. It is important to note that the “Issues” identified in Figure 4 reflect the age of a regulations, extreme weather changes, and survey cycle.

<p>Figure 4</p> <p>MassDEP</p> <p>Summary of Capacity Issues</p> <p>Identified as Scheduled Actions</p> <p>During Sanitary Surveys</p> <p>SFY 2015 - 2017</p>			
Issues	Frequency SFY 2015	Frequency SFY 2016	Frequency SFY 2017
Submit Documentation	406	292	439
Public Notification	6	0	8
Planning	265	164	180
Collect Samples	13	5	43
Installation	103	100	126
Well / Source Issue	125	92	118
Emergency/ ERP	44	40	57
Treatment / Distribution	36	45	38
Meter	54	34	23
Staffing Plan	44	27	42
Maintenance Plan/ Program	71	15	23
Distribution Maps	43	30	35
Storage/Tanks	-	107	46
Totals Scheduled Actions	1,336	1,120	1366

The PWS are required to address all identified deficiencies during an agreed upon time frame or face the possibility of penalties and progressive enforcement. The detailed capacity issues and compliance actions identified below demonstrates that MassDEP is taking an active role in improving the technical, financial and managerial health of public water systems.

Detailed Capacity Issues  
Identified as Scheduled Actions  
During Sanitary Surveys  
SFY 2015 - 2017MassDEP

- FENCE WELL
- COLLECT SAMPLES FROM WELL 1 & 2
- SUBMIT ACTION PLAN TO PREVENT OVER PUMPING
- LOCKS FOR WELL
- PAINT WELL CASING
- REGISTER DRY WELLS
- CLEAR VEGETATION / GRADE WELLHEAD
- IDENTIFY WELLHEAD
- RELOCATE SOURCE WATER TAP FOR WELL.
- RELOCATE HAZ MATERIALS NEAR WELL
- INSTALL CHEMICAL INJECTION PORTS AT WELLS
- RAISE WELLHEAD 6"
- SCHEDULE WELL CASING REPAIR (CORROSION)
- INSTALL PROPER WELL VENT/ SCREEN
- REMOVE ABANDONED WELLHOUSE
- FILL IN THE AREA AROUND WELLHEAD
- SUBMIT WS36 ABANDONMENT PERMIT FOR WELL 1.
- SUBMIT DISTRIBUTION MAP FOR EACH WELL
- INSTALL LIGHTS IN WELL PITS
- INSTALL ATMOSPHERIC VACUUM BREAKERS
- INSTALL PR VALVE
- INSTALL DISINFECTION
- INSTALL SURGE PROTECTION
- INSTALL ARSENIC TREATMENT
- INSTALL SMOOTH NOSE SAMPLING TAPS
- INSTALL HOSE BIB ON VACUUM BREAKERS
- INSTALL EMERGENCY GENERATORS
- INSTALL EMERGENCY CONNECTIONS FOR GENERATORS
- INSTALL NEW SANITARY CAP
- INSTALL CHEMICAL INJECTION PORT
- INSTALL NEW WELL SCREEN
- INSTALL A NEW WELL COVER/VENT
- INSTALL AIR GAP BLOWMOFF LINE ON WELL
- INSTALL AIRGAP ON AIR RELIEF
- INSTALL ANTI-SIPHON
- INSTALL EYE WASH
- INSTALL TWIST LOCKS ON METERING PUMPS
- INSTALL LOCKS ON ALL KOH FILL PIPES

#### D. Stakeholder Involvement

In an effort to build capacity and encourage partnerships between non-profit organizations, Universities, environmental agencies and the public water systems themselves, MassDEP worked on two (2) Stakeholder Involvement initiatives. The first (1) initiative was a contract (2016-2017) with the University of Massachusetts – Amherst. This contract was comprised of the University of Massachusetts, Massachusetts Rural Water Association (MRWA) and the New England Water Works Association (NEWWA). The coalition focused on providing an internship program, training sessions and one on one site visits to public water systems.

The second (2<sup>nd</sup>) initiative was during the reporting period SFY 2015 – 2017. Under the EPA Small System Training Contract, MassDEP worked with the following training and technical assistance providers; Massachusetts Rural Water Association, United States Department of Agriculture, (Rural Development), US EPA Environmental Finance Center (New Mexico), American Water Works Association to provide trainings to PWS. Topics included Lead and Copper Rule (LCR), Revised Total Coliform Rule (RTCR), asset management, leak detection, sampling, operator exam preparation and math review.

After analyzing the deficiencies in Figures 3, 4 and 5 and completing an analysis of MassDEP and PWS compliance needs the training classes listed in Figure 6 (below) were given by both MassDEP and various stakeholders.

Figure 6 MassDEP Trainings Technical, Financial & Managerial SFY 2015 – SFY 2017	
Training Class Name	# of Trainings Completed
Certified Operator Exam Preparation	12
Revised Total Coliform Rule - RTCR	8
RTCR – Opening Closing your Seasonal System	4
Lead & Copper Rule -Update	4
Asset Management Planning	2
Totals	30

#### E. Drinking Water Program –Capacity Development via Web based Tools

The MassDEP through its Drinking Water Program (DWP), administers and enforces the requirements of the federal SDWA. To further enhance MassDEP's efforts to promote public health and improve the technical, financial and managerial operations of public water systems MassDEP has compiled a list of technical assistance tools and placed them on our website at <https://mass.gov/lists/water-systems-operations-i> and <https://mass.gov/lists/water-systems-operations-ii>. See summary List below. These technical assistance tools (and other pertinent information) are used by DWP and PWS staff and consultants to promote PWS Capacity;

## **Capacity Development – Technical Assistance Tools**

### **Business Plan for Water Supplies**

Water systems developing new public water supplies and infrastructure should complete and return this package to the appropriate MassDEP Regional office.

### **Capacity Building PowerPoint Presentations**

Assessing Water Systems' Financial Capacity - Part 1

Assessing Water Systems' Financial Capacity - Part 2

### **Enterprise Funds Manual - Massachusetts Department of Revenue**

Link to Massachusetts Department of Revenue publication Enterprise Funds G.L. c. 44, s. 53F1/2

### **MassDEP Drinking Water System Management Handbook**

A tool for public water system owners, officers, and employees to administer their drinking water system through financial, technical, and managerial planning.

### **The Multiple Barrier Approach to Public Health Protection: a Best Practices Guide**

A multiple barrier approach places four types of barriers between possible threats of contamination and consumers. These barriers are risk prevention, risk management, monitoring & compliance, and individual actions on the part of the consumer.

### **Sustainable Infrastructure for Water & Wastewater**

Information from US EPA on better management practices for your water utility.

## US EPA: "Improving Security through Capacity Development"

Information for small system owners and operators, state and tribal agencies, technical assistance providers, and consumers to learn more about helping small water systems provide safe drinking water and protect public health.

## Water Rates Surveys

Water and sewer rate data in Massachusetts, compiled by Tighe & Bond and posted on the New England Water Works Association website. Tools for analyzing the data are available from Tighe & Bond's website.

## Asset Management

### 2010 Capital Improvement Plan for Public Water Systems

This document can be utilized to identify and document capital projects for a public water system. It is designed to provoke a thought process for capital needs for the water works system that may not be apparent from existing engineering or evaluative documents. August 2010.

### Asset Management: A Best Practices Guide

This US EPA guide will help you understand what asset management means, the benefits of asset management, best practices in asset management and how to implement an asset management plan.

### Asset Management: Building Your Water System's Capacity

A description of asset management, with tools, benefits, and advice for public water systems. April 2011.

### Asset Management Worksheet

This worksheet is a simplified asset management tool for small systems. It will provide assistance for PWS under 500 individuals. February 2011.

## Check Up Program for Small Systems (CUPPS)

From the US EPA, CUPSS is a free, easy-to-use, asset management tool for small drinking water and wastewater utilities. It provides a simple, comprehensive approach to implementing an asset management program and developing effective asset management plans.

## EPA: Simple Asset Inventory for Very Small Systems (VSS)

The Simple Asset Inventory for Very Small Systems is an Asset Management tool available through EPA. This tool is intended for very small systems that may have less than 500 individuals. EPA publication # 816-K-03-002.

## EPA: Asset Management: A Handbook for Small Water Systems

The Asset Management Handbook is an effective tool for small water systems available through EPA. This tool is intended for systems of 500-3,300 individuals. EPA publication # 816-R-03-016.

## Infrastructure Needs Survey & Assessment

Every four years, EPA conducts a survey of the anticipated costs of water utilities' investments in drinking water infrastructure and reports the results to Congress. The most recent report was published in June 2005.

2007 Template for survey

## "Liquid Assets: The Story of Our Water Infrastructure"

This web presentation, created by Pennsylvania State University, combines a ninety-minute documentary with a community toolkit for facilitating local involvement. "Liquid Assets" explores the history, engineering, and political and economic challenges of our water infrastructure, and engages communities in local discussion about public water and wastewater issues.

## Training

### Environmental Placement Partnership Internship Program Application Form

Internship program funded by the EPA - Operator Certification Expense Reimbursement Grant and participating public water systems. Individuals that are invited to participate in the program will be introduced to the water supply field and the responsibilities of certified drinking water operators. The program is designed to increase participant's scientific knowledge, skills and understanding of drinking water and drinking water operations through interaction with industry professionals and hands on experience. The program will assist in the development of the individual as a water supply professional.

### Green Jobs - Drinking Water Operator Training Initiative

A drinking water operator training initiative in collaboration with educational institutions and professional associations. November 2009.

Video from US EPA aimed at high-school and vocational-school students, "Water You Waiting For?"

### Small Systems Information and Guidance

Tools to help manage small systems, from the US EPA.

For more information relating to Small Systems, see [below](#).

### Drinking Water Operator Training Summary - Very Small System Drinking Water Operator

Summary of training course for Very Small System (VSS) Operator exam, part of the Green Jobs - Drinking Water Operator Training Initiative (see above).

## II. Capacity Development Strategy Protects Public Health

The Capacity Development Strategy is having a positive impact on protecting public health as demonstrated by Figure 7 below.

---

**Figure 7**  
***GPRA RESULTS – 2nd QUARTER FY 2017***  
***MASSACHUSETTS DRINKING WATER SYSTEMS & POPULATION IN***  
***COMPLIANCE WITH HEALTH-BASED STANDARDS***

	<b>GPRA- COMMUNITY SYSTEMS</b>	<b>GPRA-POPULATION</b>
<b>'17 National Target</b>	<b>90%</b>	<b>92%</b>
<b>'17 Actual Region I</b>	<b>95.7%</b>	<b>98%</b>
<b>'17 MA</b>	<b>96.6%</b>	<b>97.9%</b>

---

## CONCLUSION

---

MassDEP is continuing to implement its Capacity Development Strategy. This strategy will require continuing modification in order to meet the ever-changing needs of the public water system. The MassDEP will also continue to monitor and evaluate the public water systems that have received technical assistance through sanitary survey process, education, training and outreach. By continually monitoring and tracking, MassDEP will be able to modify the Capacity Strategy to include new requirements as it continues to promote the protection of public health and support the general welfare of the consumers of drinking water in the Commonwealth.

This report fulfills the requirements of section 1420(c)(3) of the Act by demonstrating that MassDEP has successfully implemented its Capacity Development Strategy and that this initiative has had a direct and positive impact on the quality and quantity of drinking water in Massachusetts. It is MassDEP's position that as a direct result of the technical assistance, education and outreach programs associated with the Capacity Development Strategy and provided by the DWP, the public water systems in Massachusetts have improved their technical, managerial and financial operations and their consumers/customers are drinking water that consistently meets all required federal and state standards.

## APPENDIX C GLOSSARY OF TERMS AND ACRONYMS USED IN THIS REPORT

---

<b>Capacity:</b>	Refers to the capabilities required of a public water system in order to achieve and maintain compliance with the drinking water rules. It has three elements:
<b>Technical:</b>	Technical capacity or capability means that the water system meets standards of engineering and structural integrity necessary to serve customer needs. Technically capable water systems are constructed, operated, and maintained according to accepted quality standards.
<b>Financial:</b>	Financial capacity or capability means that the water system can raise and properly manage the money it needs to operate efficiently over the long term.
<b>Managerial:</b>	Managerial capacity or capability means that the water system's management structure is capable of providing proper stewardship of the system. Governing boards or authorities are actively involved in oversight of system operations.
<b>MassDEP:</b>	The Department of Environmental Protection. This agency is responsible for administering the drinking water rules in our state.
<b>DWSRF:</b>	The Drinking Water State Revolving Loan Fund. Congress authorized this fund in 1996. In Massachusetts, MassDEP administers the DWSRF.
<b>EPA:</b>	Environmental Protection Agency. This federal agency oversees state programs, sets MCLs and provides technical assistance. EPA determines when a state's capacity development program is in compliance with the Safe Drinking Water Act.
<b>MCL:</b>	Maximum Containment Level. This is the maximum allowable level for a given drinking water contaminant.
<b>PWS:</b>	Public Water System as defined in the Safe Drinking Water Act.
<b>SDWA:</b>	The Safe Drinking Water Act passed by the US Congress in 1974 and amended in 1986 and 1996.
<b>TFM:</b>	Technical, financial, and managerial. The abbreviation is used to save space in the report and avoid frequent repetition of these terms.
