## *The Path to Regional Labor Market Blueprints: Core Regional Working Groups*

# Blueprint Components

## ANALYSIS\*

- ✓ Regional Industry Trends in Employment
- ✓ Demand Trends for Occupations (Across Industries)
  - Weighted Demand
  - Current Openings (HWOL)
  - Short/Long Term Projects
  - Star Ranked Occupations
- ✓ “Talent” Gap
  - Available workforce for priority occupations (UI claimants, graduates of Voc Tech, certificates, degrees)
  - Which occupations show the biggest gaps?
- ✓ Career Pathway Opportunities

## STRATEGIES

- ✓ Priority Industries/Occupations:
  - Consensus from Team on top 3-5 occupational pathways that need more workforce capacity
  - Asset map of existing credential pathways
- ✓ Concrete Strategies to Grow Talent Pipeline:
  - Increases “seat” capacity or graduates
  - Increase retention of existing graduates in region
  - Better matching of existing workers with jobs
  - Recruit workers from other areas
- ✓ Measures/ Shared Accountability for Regional Priority Pipelines

\*All data sources, analysis and initial occupational ranking tables are available through the data tool. The initial PPT packages for the region were organized into data “chapters” based on the needed analysis (e.g. industry profile, weighted demand, star ranking, career pathways etc.)

# Goals for **today** and for our **process**:

## **PROCESS**

- Build shared understanding of anticipated changes and challenges in the region's ability to meet labor market needs
- Create shared understanding of the outcomes each region wants to achieve in relation to priority sectors and occupations
- Identify existing assets and regional collaborations to be leveraged
- Identify role and understand strengths/capacity of each regional planning group sector to achieve outcomes
- Develop consensus around a clear strategy and work plan to achieve agreed-upon regional outcomes

## **TODAY**

- Introduce new Regional Team
- Build shared understanding of the planning region's employer demand through industry and occupation lens
- Begin to build consensus around criteria that determine priority sectors and occupations
- Begin to build consensus around priority sectors and occupations
- Identify next steps for the Regional Team

# LMI Overview

- Employers in our region have difficulty filling available openings.
- This **team** – representing education, workforce development, and economic development – is asked to identify skill gaps in priority sectors and occupations in your region and prioritize solutions to these skill gap problems.
- We need to understand how occupations and industries stack up against each other given different sets of **criteria**. For example:
  - Which jobs are plentiful, and make up a large share of an industry or employer base?
  - Which jobs pay well, and have a low barrier to entry?
  - Where do employers have a hard time finding skilled workers?
  - Which jobs are critical to an emerging industry in our region?
  - Which jobs are part of a career pathway, allowing workers to graduate from a lower-skill, lower-pay job to a higher-skill, higher-pay job?
- This initial data package and forthcoming data tool demonstrate different sets of criteria to frame your team's conversations around priority sectors and occupations. Remember, this data is a starting point -- we expect that you will start here, and complement and verify this with on the ground information and stakeholder feedback.

# LMI Overview - Continued

- **Industry data** will show us what **employers** in the region look like.
- **Occupation data** shows us what **jobs** people in our region do. People often perform the same jobs at different types of employers and in different industries.
- This data will be organized across several different criteria and begin to guide your consensus and decision-making process.
- The data package will focus on demand data today. The slides will move through a thinking process on how to layer in criteria to see priorities within your region.

# Preview

- Goal: a preliminary understanding of where we are
- Two lenses on labor force:
  - Industry
  - Occupation
- Some criteria that we might choose to prioritize:
  - Employment share
  - Demand Index
  - Median wages + employment growth (STAR Ranking)
  - Career Pathways

# II.A: Occupations by Share of Employment

*For discussion purposes only  
Not for publication*

# Terminology

Employment Share	Number of workers currently in a specific occupation or type of work
Occupation	A job or profession, not specific to an industry, defined by Standard Occupational Classification (SOC) code

# II.A.1: Top 15 Occupations by Share of Employment, 2015

**Cape and Islands**

**Statewide**

# II.B: Occupations by Indexed Employer Demand

*For discussion purposes only  
Not for publication*

# Note on Employer Demand

- There are many different ways to estimate increasing or decreasing employer hiring.
- For example:
  - Occupational Employment Statistics (OES) Short-Term and Long-Term Projections
    - Estimated number of total jobs and openings from growth and replacement
  - Online Postings
    - Jobs employers post online. High volume of postings often signifies jobs that are hard to fill.
  - Wages
    - High/increasing wages are often proxy for hard-to-fill jobs

# Terminology

Employment Projections

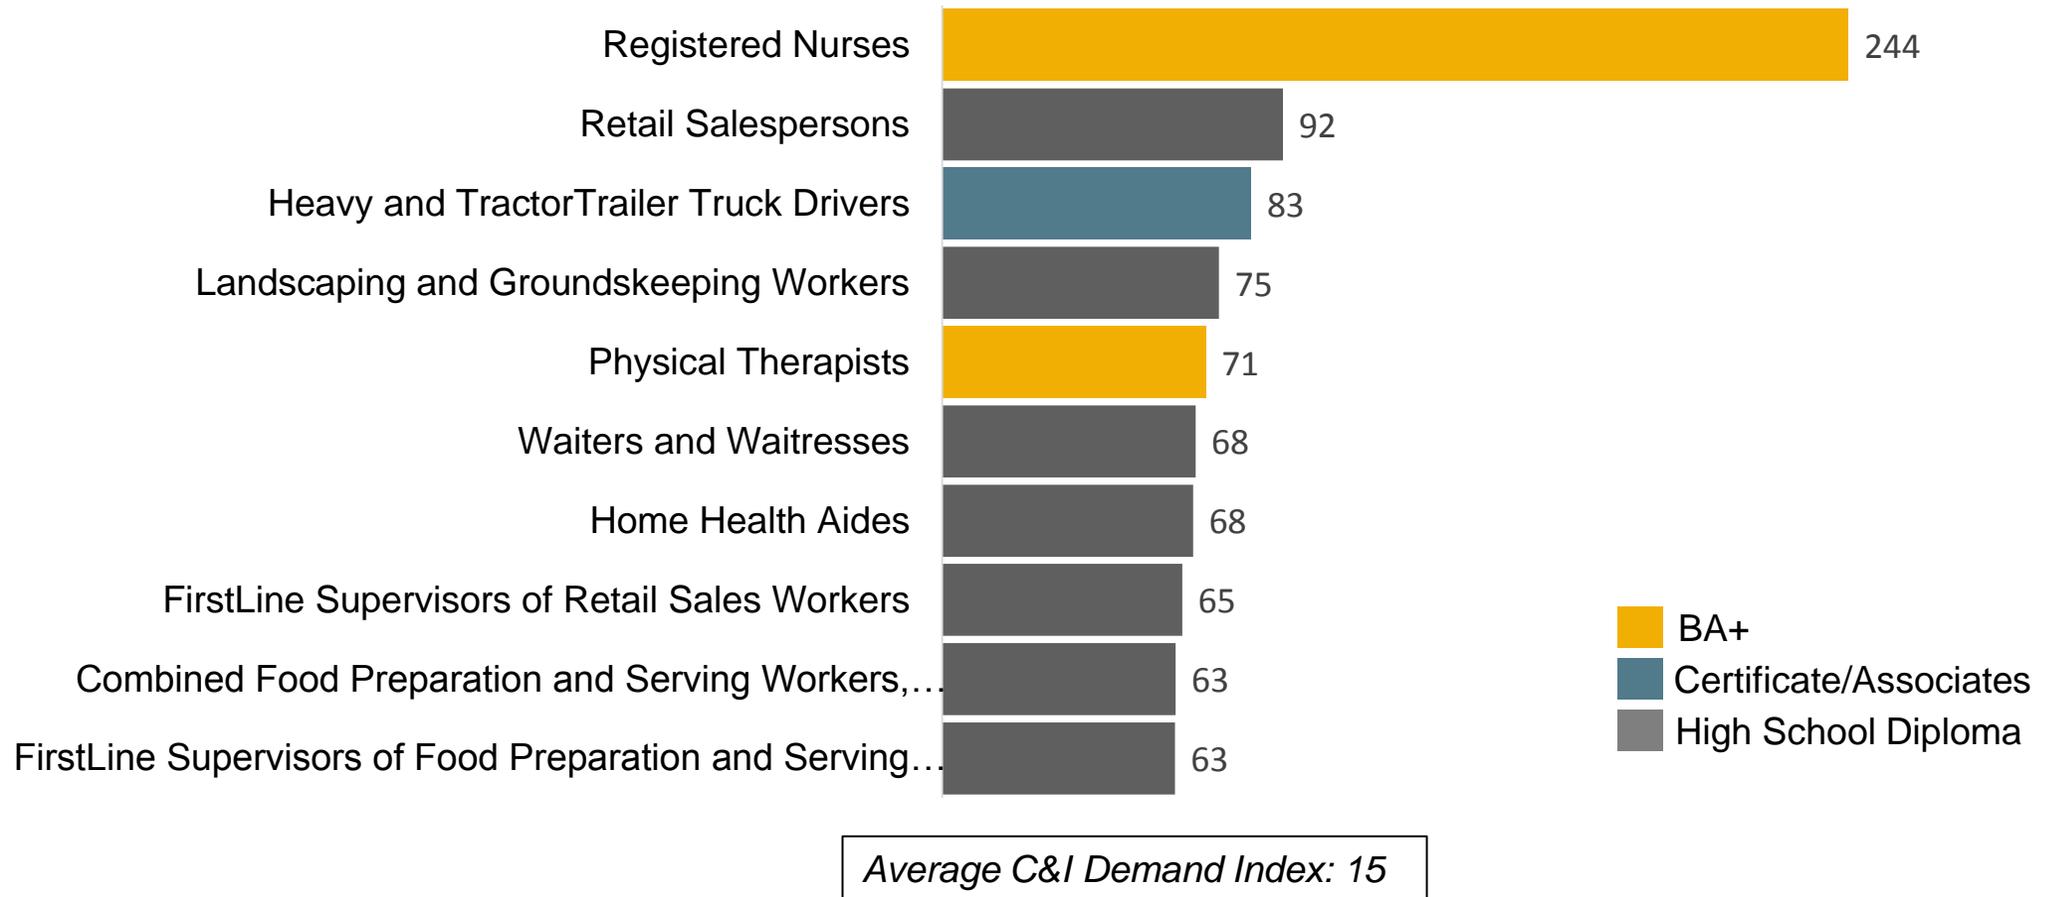

Expected employment in 2017 (short term) and 2024 (long term) for a particular occupation, based on surveyed employers

Indexed Employer Demand

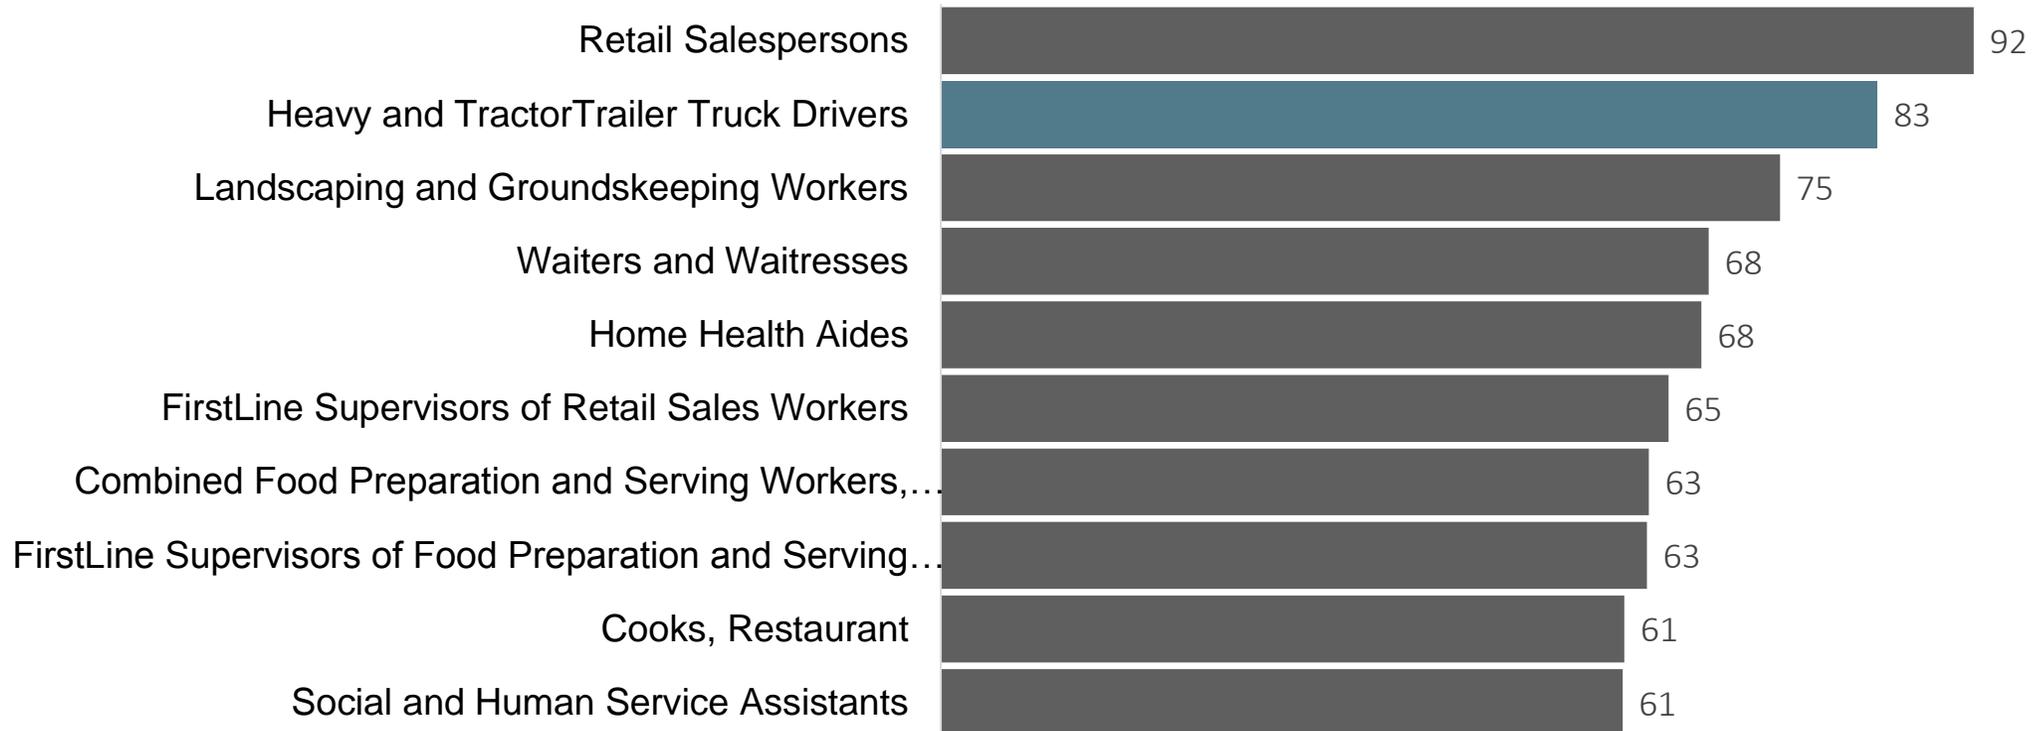

Relative indexing of occupations by short term openings from replacement and growth (2017), long term openings from replacement and growth (2024), and advertised online postings, averaged

*Note #1: there are many different ways to measure “employer demand.” The WSC team acknowledges that none are perfect, and thus an average of three different measures seeks to find middle ground.*

# II.C.1 Top 15 Occupations by Indexed Employer Demand, All Education Levels

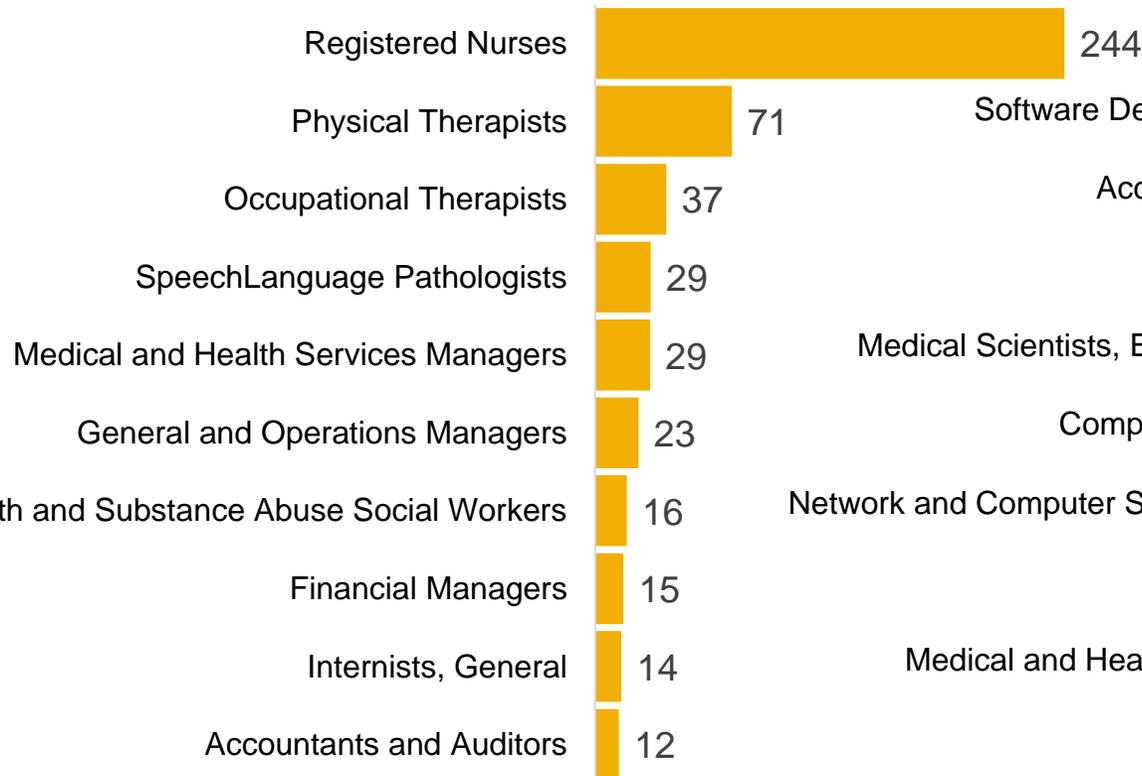

# II.C.2: Top 15 Occupations by Indexed Employer Demand, Sub-BA

*Average C&I Demand Index:*

# Where Do We Want to Go?

## Setting Regional Priorities for Investment

What criteria should we use to set shared priorities for future investment?

How about jobs that:

- Make up a large part of our economy
- With career pathways to higher wage jobs?
- That have low barriers to entry but also good pay?
- Employers find hard to fill?
- What else?

# Where Do We Want to Go?

## Regional Goals

- 1) What criteria should we use to set priorities?
- 2) What does the employer demand data that we have available today tell us about industries and occupations in my region?
- 3) Given the information we have available, what industries or occupations could we preliminarily prioritize as a team?
- 4) What other information do we need in order to finalize these decisions?

Please discuss in small groups as directed and prepare to report your answers.
