

Hello

There are plenty of organizations with lots of money to harass fishermen. Oceana ,Conservation Law Foundation , Ocean Conservancy are just a few.

It seems they are motivated by a basic premis which is

"Any interaction between people and animals/fish where the fish/animals come out on the short end is not acceptable to them".

So they proceed to try to shut down hunting and fishing.

I am not a hunter, but I am a fisherman and hope you will stand against these efforts to shut down fishing areas to satisfy these radical preservationists. - Tom
