# Career Center-Specific Program Report with Start Date-V2

**Development Version:** Crystal Reports XI, Service Pack 2

**First Issuance Date:** 1/2/2007

**Modification 1 (2/11/07):** Changed retention to show date of retention instead of "Y", to show "N" if not retained, or "Other-N" if the retention is for a period other than 30-days, or blank if retention has not been determined.

**Modification 2 (2/18/07):** Adjusted grouping to allow multiple retentions with the same value but for different parent jobs to appear, and to exclude followup retentions = "Y" for periods other than 30-day retention.

**Modification 3 (4/12/07):** Fixed error in GT Pending running total. Slightly adjusted a few other formulas/running totals.

**Parameters:** Program, Program Name Like, Location Level (Site, Career Center, Region), Report Type (Summary or Detail), Start Date, Report End Date.

**Parameter List of Values Updated Date:** 4/15/07.

**Key Features:** The Career Center-Specific Program Report - with Start Date can be used for programs which are designed as career center-specific programs. These include NEGs and State Set-Aside programs, as well as programs funded from other sources. One or more programs may be viewed at a summary or detail (with summary) level. If you have a new program that does not appear on the list of programs to select, if you know the Program ID, you can enter that manually. Or, you can import an updated pick list by running another Crystal Report: **"Programs with Abbrev LO Names-Pick List"** (all programs statewide or for selected local offices and with abbreviated local office names shown with the program name) or **"Programs with No LO Names-Pick LIst"** (for selected offices, but with no local office displayed with the program name), exporting it as tab-separated text, opening the exported file and removing quotes in WordPad, and then importing the text file in the parameter setup screen. Otherwise, please contact Linda Bass (see contact info below).

The report allows you to select specific programs by name or to use a keyword to select all programs statewide. Program names are shown with local office name first, followed by the program name. Long local office names have been abbreviated by using initals of words in the names, or in some cases, additional letters to help distinguish similar abbreviations.

You can also choose the "location level" in order to view the summaries of the programs you select at a site, career center, or regional level.

The report is based on all customers who are program participants during the report period. Because the report does not rely on services delivered during the report period, but instead selects customers who have not yet been terminated or who are terminated during the report period, it will include customers who may not have received services recently, but who were not terminated from the program at a more appropriate time. If you choose a start date that corresponds with the first possible enrollment date for the program and an end date that is the currentdate, the report will include all enrollees regardless of termination status (as long as their records have not been archived).

Enrollments are grouped by active or terminated status within those groups. **Note that in the unusual situation where a customer has multiple enrollments in a program with different statuses in each, the grand total summaries will not tally correctly; in this case the user might want to inspect the enrollment statuses for consistency.** Employment information is shown for any jobs obtained during the program participation period, but summary counts are shown only for jobs obtained during the report period. Those jobs obtained while enrolled in the program, but prior to the report period are shown in Bold Italic, and do not contribute to counts. Training information (course enrollment) is displayed and counted for all participant activities occurring while enrolled (regardless of funding source), including training prior to and during the report period. Training activities completed prior to the report period are shown in Bold Italic. A crosstab at the end of the report shows the current active/terminated status of customers according to the month of enrollment.

For employment information, counts are for people not cases, i.e., a customer who gets two jobs within the report period is counted only once. For job retention, a customer is counted if he/she has at least one 30-day retention recorded, but is only counted once in the summary even if there are multiple 30-day retentions. The retention variable is based on 30-days for all programs. Note that "periodic" retentions or retentions for other time periods are not counted in the summary. **Note that the report is designed to show jobs that have no job retention info collected or have 30-day job retention collected (either "Y" or "N"); if a later followup shows the job was lost, the job will appear a second time with an "Other-N" shown in the retention column. Note that followups that are "Y" for periods other than initial 30-day followup are not shown, so if a job should show retention, but it does not, it may be because the job retention was done using either "Periodic" or some other followup period, instead of 30-day retention; in order to make the retention appear, enter 30-day followup information in MOSES. Note also that second jobs that are entered in the followup screen of an earlier job in order to show continuity of employment are not shown--only the parent job will appear.**

For training information, customers who enroll in more than one course are counted only once. However, completion status is counted for each course enrollment, so that if one or more customers enroll in more than one course, the sum of completion statuses will exceed the number of customers enrolled in training.

**Report Run Times:** Anywhere from 12 seconds to 3 to 5 minutes.

**Report Feedback:** This report has been tested for accuracy; however, we encourage your feedback--if you get unexpected results or have other suggestions, please contact the report developer below.

**Report Developer:** Linda Bass, lbass@detma.org, 617-864-1570.
