<b>CP Address:</b>	1 Washington Street, Taunton MA 02780

#### Part 1. PY2 Annual Report Executive Summary

CCBC is the sole provider of Behavioral Health Community Partner (BH CP) services. The program accepts members living in the communities of Southeastern Massachusetts (Brockton, Taunton, Attleboro). CCBC has been delivering community-based mental health and substance use disorder services in these three Service Areas for almost 50 years to date and has developed close working relationships with many of the local providers and social service agencies throughout these areas.

Our CCBC and BH CP programs continue to maintain and evolve close working relationships with the associated medical and behavioral health providers in these areas in relation to inpatient, in-home, outpatient, hospital and community-based care. CCBC remains in collaboration with the Dept of Mental Health (DMH) offices in our contracted areas. BH CP staff remain knowledgeable and familiar with accessing all levels of primary and behavioral health care services from establishing with a new PCP or therapist, to submitting a request for DMH services.

CCBC and BH CP has developed close partnerships with the main ACOs and affiliated hospitals in Brockton, Taunton and Attleboro. In collaboration, with our ESP, CCS and CSP services, BH CP, has been able to help divert and meet the direct needs of our members who present and utilize hospital emergency room services at Sturdy Hospital in Attleboro, Brockton Hospital in Brockton, Good Samaritan Hospital in Brockton and Morton Hospital in Taunton. We work closely with our CCBC crisis stabilization (CCS) and emergency service program (ESP) to ensure adequate coordinate of care and discharge planning. In addition, our CSP, ACCS and BHCP programs work regular with the local inpatient facilities.

The CCBC CP target population we service continues to include a significant number of homeless individuals, veterans, persons with HIV, members with severe and persistent mental illness, complex and comorbid medical needs, and high percentages of members struggling with co-occurring substance use disorders. In addition, our members present with multiple social determinants of health (SDOH) and socioeconomic barriers related to housing, income, clothing and food acquisition to name a few. BH CP

continues to work with entities to help meet member needs, from local food pantries, local housing authorities, to Dept of Transitional Assistance and Social Security Administration. CCBC is familiar with the cultural and linguistic diversity needs of our members we serve and remain positioned to meet those needs.
