Definition of a serious health condition

A serious health condition could include an illness, injury, impairment or physical or mental condition that involves at least one of the following two conditions:

1. At least one night of inpatient care in a hospital, hospice or residential medical facility
2. Continuing treatment by a health care provider

Inpatient care
An overnight stay in a hospital, hospice, or residential medical care facility, including any period of incapacity, or any subsequent treatment in connection with such inpatient care.

Continuing treatment by a health care provider (plus examples of conditions). Treatment for a condition that fits any of the following descriptions:

A. Any incapacity to work for more than three consecutive full calendar days that also requires medical visits. The patient’s first visit must be within seven days of the start of incapacity. Telehealth appointments are also included. These medical visits must meet one of the following two patterns:
   • Two or more visits within 30 days of a patient's incapacity to work (unless it is impossible to book two appointments in this timeframe).
   • One such visit—excluding a routine physical, eye or dental exam—plus a regimen of care or medication under the provider's supervision or prescription. E.g., outpatient surgery or strep throat.

B. Any incapacity due to pregnancy or prenatal care.
C. Any incapacity due to a chronic condition, which is a condition that:
   • Requires periodic medical visits,
   • Continues over an extended period of time, and
   • May cause episodic periods of incapacity that require leave. E.g., asthma or migraine headaches.

D. Any incapacity due to a permanent or long-term condition that may not respond to treatment. E.g., Alzheimer's disease or terminal stages of cancer.

E. Any absence to receive multiple treatments, plus any recovery time, for either of the following:
   • Restorative surgery after an accident or injury. E.g., joint replacements or reconstruction.
   • A condition that would lead to more than three consecutive days of incapacity if the patient did not receive treatment. E.g., chemotherapy treatments.

Incapacity
An inability to perform the functions of one’s job owing to the serious health condition. For unemployed applicants, it means an inability to perform the functions of their most recent position or other suitable employment.

Details on Section 4, ability to work

Section 4 establishes the start and end of the time period when the employee is incapacitated and will need time off work because of the serious health condition. This date range is the leave period. A leave period cannot be approved for longer than six months. If the condition requires additional leave after six months or a re-evaluation, the employee can submit a new application at that time with a new certification.

Definition of a health care provider

Health Care Provider:
An individual licensed by the state, commonwealth, or territory in which the individual practices medicine, surgery, dentistry, chiropractic, podiatry, midwifery or osteopathy, and including the following:

A. Podiatrists, dentists, clinical psychologists, optometrists, and chiropractors (limited to treatment consisting of manual manipulation of the spine to correct a subluxation as demonstrated by X-ray to exist) authorized to practice in a state and within the scope of their practice as defined under the law of that state, commonwealth, or territory;

B. Nurse practitioners, nurse-midwives, clinical social workers and physician assistants who are authorized to practice under State law and who are within the scope of their practice as defined under the law of that state, commonwealth or territory;

C. Christian Science Practitioners listed with the First Church of Christ, Scientist in Boston, Massachusetts;
