- **Cropland Harvested** – This land represents the highest use of land in the agricultural enterprise. All land from which a crop was harvested, or hay was cut, in the current year falls into this category. This includes the land in vegetables, sod, nurseries, orchards, vineyards, other perennial plantings, and greenhouses.
- **Dairy, Beef and Hay; Cropland Pastured, Other Cropland & Permanent Pasture** – Cropland used for pasture or grazing, or land considered as tillable but is elected to be fallow or in cover crops. It can and often is used to produce crops, but its maximum income may not be realized in a particular year. This category also includes land planted in crops, which were to be harvested after the census year, and land is typically not tillable, best suited for grazing or possibly part of an erosion control program, plus necessary and related lands.
- **Nonproductive Land** – The land on the farm which is nonproductive primarily due to slope, drainage capacity, soil type or topography.
