#### INTRODUCTION

The Town of Chatham's nearly \$66 million all funds five-year Capital Improvement Plan (CIP) for FY2020-FY2024 will make much needed investments in equipment, facilities, information technology, schools, public safety, roads, information technology, recreation, and water projects. The \$66 million capital plan includes nearly \$32 million in projects funded through general fund debt, \$15 million in pay as you go projects, nearly \$10 million in Water Enterprise projects, and \$4 million in State grants, largely through Chapter 90 road funding.

This year's planning process continues Chatham's long standing commitment to making necessary capital improvements. In the 2016 annual report to the town, Town Manager Jill Goldsmith summarized some of Chatham's major accomplishments:

"Much work was done on strategic land-use planning and capital facilities. Such included continuation of the Route 28 Corridor Land Use Visioning Project (Crowell Rd to Harwich) initial protective bylaw amendments approved at the 2016 Annual Town Meeting and the West Chatham Roadway Design Project (Barn Hill Rd to George Ryder Rd). Following concept design discussions since 2007 and Town approval in the fall of 2013, the new Chatham Fire & Rescue Station Headquarters project was completed."

Citing recent accomplishments such as the design and construction of a \$10.3M fire station and the replacement of the Mitchell River Bridge (grant funded), Board of Selectmen Chairman Jeffrey Dykens noted that "The Board of Selectmen continued the Town's historical commitment to invest in infrastructure and needed capital improvements".<sup>2</sup>

By looking forward across multiple years in this capital improvement plan, Town officials will be able to carefully schedule projects, identify the source of the funding and cost of the project, and the impact on the operating budget and tax rate. At the same time, department heads will be able to plan in advance for upgrades of equipment and infrastructure so as to reduce emergency repairs and purchases, which inevitably drive up costs. Departments will also be able to plan for multi-year projects such as the design and construction of a major roadway project or a new building, while being kept on task by being included in the CIP.

#### What is a capital budget? What is a capital project?

A capital budget is distinct from an operating budget in that the items included in a capital budget are typically large or infrequent expenses, such as construction of a new building or acquisition of a new dump truck, whereas an operating budget includes recurring expenses or are modest in magnitude, such as supplies or vehicle maintenance. A capital budget identifies the array of resources to be used to fund a series of capital projects. In many instances, municipalities establish minimum dollar thresholds for projects to be included in a CIP.

The Massachusetts Association of Town Finance Committees defines capital projects as "major, non-recurring expenditures, for one of the following purposes:

acquisition of land for a public purpose;

<sup>&</sup>lt;sup>1</sup> Town of Chatham. 2017 Annual Town Report, p. 9

<sup>&</sup>lt;sup>2</sup> Town of Chatham. 2017 Annual Town Report, p.8

- construction of a new facility or external expansion or major rehabilitation of an existing one. Examples of such town facilities include public buildings, water and sewer lines, roads and playing fields;
- purchase of vehicles or major equipment items;
- planning, feasibility, engineering or design study related to a capital project or to a capital improvement program consisting of individual projects;
- equipment for public improvements when they are first constructed such as furniture, office equipment, or playground equipment;
- major equipment which is expensive and has a relatively long life such as a fire apparatus, garbage trucks, and construction equipment."

#### What is a capital plan? Why prepare one?

According to the Massachusetts Department of Revenue (DOR), a capital plan is a blueprint for planning a community's capital expenditure and "one of most important responsibilities of local government officials." Putting together multiple years of capital spending into a plan, instead of looking at each year in isolation, has multiple benefits including:

- impacts on the operating budget can be minimized through thoughtful debt management;
- high-cost repairs and emergency acquisitions can be reduced by implementing regular vehicle and equipment replacement schedules, and by undertaking major facilities improvements, such as replacing roofs, before a problem becomes chronic and damage occurs;
- large scale, ambitious public improvements can be phased over multiple years;
- critical parcels of land can be purchased before costs increase;
- costly mistakes created by lack of coordination such as paving a street one year and then cutting into it the next year to install a sewer line can be avoided; and,
- methodical progress can be made toward meeting community goals.

#### **ABOUT THE TOWN OF CHATHAM**

Within the Town of Chatham's 24.4 square miles can be found many significant infrastructure systems that must be maintained each year, including school facilities, parks and open space, roadways and sidewalks, and the water, sewer and storm water systems. In addition, the many vehicles and pieces of equipment used by Town staff to perform their duties must also be maintained and replaced over time.

The maintenance of Chatham's infrastructure systems is critically important to the health and safety of the town's approximately 6,125 residents (U.S. Census, 2010), non-resident taxpayers, as well as the influx of tens of thousands of visitors every year. Town officials face a significant challenge as they strive to keep these systems and equipment in good working condition while using the public resources available to them wisely and with the greatest impact.

#### Parks and Open Space

The mission of Chatham Parks & Recreation Department is to provide "quality recreational program and facilities to the residents and visitors of Chatham." The Chatham Parks and Recreation Department receives policy direction from the Parks and Recreation Commission, made up of five members appointed by the Board of Selectmen.

In addition to maintaining parks and facilities and offering diverse activities such as soccer, baseball, basketball, tumbling, arts and music, the Department also administers and manages concessions, permits, and fees associated with their programs and facilities. For example, in 2016 non-resident beach parking fees were raised to \$20, raising over \$272,000 in non-resident parking receipts. Almost \$10,000 was raised through leased concession sales at beaches and at Veterans Field.

The Parks and Recreation Department also makes important planning recommendations related to capital improvements. For example, in 2016, the Department oversaw a new concrete skateboard park for use by skateboarders and bikers. The Department also purchased a new ATV to replace the existing vehicle after years of use on town beaches.

A sample of locally owned/managed parks and open spaces is provided below to illustrate the scope of the Parks & Recreation Department's responsibilities.

#### Roadways

A network of approximately 123 miles of public roadway transects the Town of Chatham. This includes approximately 116 miles of Town- roadways and 7 miles of State roadway managed by MassDOT.<sup>4</sup> There are several miles of privately owned roadways which are open for public use, but not maintained except for public safety purposes (snow operations) if certain requirements are met.

Roads are typically classified into three categories:

- **Local streets** comprise approximately 103 miles of the roads in Chatham. These roads provide access to residential properties and generally have lower speed limits.
- **Collector roads** make up about 4 miles of the Town's network. These roads primarily collect traffic from local streets and funnel it to arterial streets and vice versa.
- Arterial roadways comprise around 16 miles of roads in the Town. These roads are designed for mobility, carrying traffic at greater speeds over longer distance than other roads. These streets are typically

<sup>&</sup>lt;sup>4</sup> "Road Inventory Year End Report 2016," Massachusetts Department of Transportation – Office of Transportation Planning

numbered. These roadways may be maintained by the State and function as part of a regional highway system.

#### **School Facilities**

The Town of Chatham is a member of the Monomoy Regional School District. The district encompasses the towns of Chatham and Harwich. The schools in the district are Chatham Elementary School, Harwich Elementary School, Monomoy Regional Middle School (located in Chatham) and Monomoy Regional High School (located in Harwich).

Capital planning is carried out at the district level and therefore falls outside of the scope of this plan.

"Since regionalization, the school district has maintained a 5-year capital and technology plan, with the goal of ensuring that both the physical plants and technology infrastructure continually support learning and preserve the towns' facilities investments." 5

Recent capital projects completed by the district include:

- Refinishing all middle school and elementary school gym floors
- Installing an ADA compliant bathroom at the middle school for our special education program
- Replacing exterior columns at the middle school and Chatham Elementary
- Installing a well to irrigate the Chatham Elementary playground (to allow grass to grow)
- Upgrading the exterior lighting at Chatham Elementary
- Installing vinyl tile flooring in several Chatham Elementary classrooms

#### **Town Facilities**

The Town manages a series of buildings and building complexes that serve a multitude of purposes from Town Offices and the Community Center to the Police Station and DPW facilities. The average building age is approximately 57 years. Each of these facilities must be maintained on a regular basis to ensure the safety and effectiveness of the working environment, while new initiatives such as land acquisitions or building replacements may also be necessary or advantageous.

#### **Vehicles and Equipment**

The Town's vehicle inventory includes records a total of approximately 138 rolling stock and 13 boats that range in age as old as 59 years to brand new, with an average age of approximately 14 years old. Some of the older pieces of equipment in Chatham's inventory includes a 1960 Boston Whaler boat assigned to the Harbormaster, a 1972 Ford Tractor used by the Parks and Recreation Department, and a 1978 Tractor at the Transfer Station. Newer vehicles include EV/Hybrids such as a 2018 Mitsubishi Outlander used by the Natural Resources Dept., a 2017 Ford Transit Van at the Council on Aging, and several 2017 Ford Interceptor/Explorers used by the Police Department.

#### POSSIBLE FUNDING SOURCES

There are a number of ways to finance municipal capital improvement projects. Some of the most common methods are:

#### **Local Resources**

- Municipal Indebtedness: The most commonly used method of financing large capital projects is general
  obligation bonds (aka, "GO Bonds"). They are issued for a period of time ranging from 5 to 30 years, during
  which time principal and interest payments are made. Making payments over time has the advantage of
  allowing the capital expenditures to be amortized over the life of the project. Funding sources used to pay
  back the debt can include:
  - Bonds funded within the tax limits of Proposition 2 ½: Debt service for these bonds must be paid within
    the tax levy limitations of proposition 2 ½. Funds used for this debt must be carefully planned in order
    to not impact the annual operating budget.
  - o **Bonds funded outside the tax limits of Proposition 2** ½: Debt service for these bonds is paid by increasing local property taxes in an amount needed to pay the annual debt service. Known as a Debt Exclusion or Exempt Debt, this type of funding requires approval by 2/3 vote of the local appropriating authority (e.g., town council or town meeting) and approval of majority of voters participating in a ballot vote. Prior to the vote, the impact on the tax rate must be determined so voters can understand the financial implications.<sup>6</sup>
  - O Bonds funded with Enterprise Funds: Debt service for these bonds is typically paid by user fees, such as water and sewer revenue. Depending upon the type of project, interest costs may be subsidized by the Commonwealth and at times partial grant funds may be available (see below). Enterprise funds do not affect the general operating budget unless general funds are needed to subsidize revenues from the enterprise. Prior to the issuance of debt, the projects must be analyzed for their impact on rates.
- Capital Outlay / Pay as You Go: Pay as You Go capital projects are funded with current revenues (typically tax levy or free cash) and unexpended balances in previously approved projects. The entire cost is paid off within one year so no borrowing takes place. Projects funded with current revenues are customarily lower in cost than those funded by general obligation bonds because there are no interest costs. However, funds to be used for this purpose must be carefully planned in order to not impact the annual operating budget. For this reason, Pay as You Go capital projects are typically lower in value than projects funded by borrowing.
- Capital Outlay / Expenditure Exclusion: Expenditure Exclusion projects are similar to Pay as You Go, above, except taxes are raised outside the limits of Proposition 2 ½ and are added to the tax levy only during the year in which the project is being funded. As with a Debt Exclusion, Expenditure Exclusion funding requires approval by 2/3 vote of the local appropriating authority (Town Council or Town Meeting) and approval of majority of voters participating in a ballot vote. Prior to the vote, the impact on the tax rate must be determined so voters can understand the financial implications. Capital outlay expenditures may be authorized for any municipal purpose for which the town would be authorized to borrow money.

<sup>&</sup>lt;sup>6</sup> A debt exclusion is different from a property tax override in that a debt exclusion is only in place until the incurred debt has been paid off. An override becomes a permanent part of the levy limit base.

- Capital Stabilization Fund: Local officials can set aside money in a stabilization fund outside of the general fund to pay for all or a portion of future capital projects. A 2/3 vote of town meeting is required to appropriate money into and out of this fund.
- Sale of Surplus Real Property: Pursuant to Massachusetts General Laws, when real estate is sold, the proceeds must first be used to pay any debt incurred in the purchase of the property. If no debt is outstanding, the funds "may be used for any purpose or purposes for which the town, town or district is authorized to incur debt for a period of five years or more...except that the proceeds of a sale in excess of five hundred dollars of any park land by a town, town, or district shall be used only by said town, town, or district for acquisition of land for park purposes or for capital improvements to park land" (MGL Chapter 44, Sec. 63).
- Enterprise Retained Earnings / Stabilization Fund: Enterprise operations, such as water, and sewer, are able to maintain an operating surplus that can be utilized for future enterprise fund costs. These funds can be used to stabilize the user rates, apply to annual budget needs, and/or invest in capital replacement and expansion.
- Free Cash: Free Cash is the difference between annual revenues and expenditures and is certified by the Commonwealth each year. After certification, free cash is available for appropriation for any municipal purpose, including capital projects.
- Town of Chatham Public, Educational, and Government (PEG) Access TV Channel Special Revenue Fund:
   The Town, as an issuing authority for the cable television license pursuant to State law (MGL C166A), receives certain revenues from the licensee, a portion of which is restricted for cable-related expenditures.
- Special Purpose Funds: Communities also have established numerous "Special Purpose Accounts" for which the use is restricted for a specific purpose, some of which may be investment in department facilities and equipment. There are numerous state statutes that govern the establishment and use of these separate accounts. Examples include ambulance funds, recreation funds, the sale of cemetery lots and off-street parking fees accounts.
- Community Preservation Act Funds: The CPA allows a community to establish a fund to support open space, historic preservation, outdoor recreation, and community housing. Monies for the fund come from a percentage surcharge on residents of the Town and matching dollars from the State.

#### Federal, State, and Private Grants and Loans

Special revenue sources include grants or loans from federal, state, or private sources. Examples include:

• Massachusetts Chapter 90 Roadway Funds: Each year, the Massachusetts Department of Transportation (MassDOT) allocates funds to cities and towns for roadway construction, maintenance, or improvement. Funds may also be used for other work incidental to roadway work, such as the construction of a garage to house related vehicles, or the purchase of related vehicles, equipment, and tools. Chapter 90 is a 100% reimbursable program. Funding is accomplished through the issuance of transportation bonds and apportioned to municipalities based on three factors: 1) accepted road miles, 2) population, and 3) total

employment within the municipal borders. Road miles is the most heavily weighted factor at 58.33%; the others are each weighted at 20.83%. A total of \$200 million is available in FY2018.

- Massachusetts Department of Environmental Protection's State Revolving Fund (SRF) Loan Program: The
  Clean Water State Revolving Fund (CWSRF) provides financing for sewer and drainage projects intended to
  reduce sewer overflows and the Drinking Water State Revolving Loan Fund (DWSRF) provides financing to
  improve the quality of the drinking water system. The CWSRF and DWSRF programs typically offer a mix of
  low or no interest loans and grant funds. Repayment does not begin until two years after the monies have
  been borrowed.
- **Federal Aviation and MassDOT Aeronautics Grants:** The Airport Improvement Program (AIP) airport grant program under the FAA funds airport infrastructure projects such as runways, taxiways, airport signage, airport lighting, and airport markings. The grants are intended to strengthen aviation infrastructure. Airports are entitled to a certain amount of AIP funding each year, based on passenger volume.

Many state departments also offer annual grant opportunities that are available to municipalities typically through a competitive application process. State grant programs including, but not limited to: Green Community grants (project to improve sustainability), Parkland Acquisitions and Renovations for Communities grants (PARC), and the Mass Works Infrastructure Program.

#### CAPITAL PLANNING PROCESS (FY2020-FY2024)

The Town of Chatham hired the Edward J. Collins, Jr. Center for Public Management at the University of Massachusetts Boston to facilitate preparation of the Town's five-year Capital Improvement Plan (CIP) for FY2020 to FY2024. The project team met with leadership of all Town departments to explain the process to be followed and discuss types of projects that would be eligible for funding in the capital plan. Departments were provided with the Center's Capital Improvement Project Request Form asking them to describe their proposed project(s), the justification for why each project was needed, the priority placed on the project by the department, and the fiscal year or years in which the funds were needed. In addition, departments were asked to indicate if outside funds might be available to support the project and to anticipate the impact of the project on the Town's operating budget. In particular, departments were asked if any savings could be realized, for example, if the purchase of new equipment could reduce the cost of annual repairs. Department directors were encouraged to contemplate needs over multiple years and to be ambitious with their proposals. Particular attention was paid to equipment needs with a goal of developing a regular replacement schedule that would reduce, if not eliminate, emergency replacement and costly repairs.

The project team also worked with the Town's staff, financial advisor and bond counsel to get an understanding of the Town's current debt service profile and the revenues available that could be used for capital projects. Information gathered included official financial statements, bond rating agency reports, the debt schedule for existing debt, and present and proposed borrowings, among other sources.

#### **Project Requests**

Overall, 143 project requests were submitted, totaling almost \$66 million across all funds. Fifteen project requests exceeded \$1M and are listed by funding source on page 25. This study did not physically inspect the infrastructure to validate the urgency for replacement of buildings, vehicles or equipment, but accepted the department head's submission and attempted to organize the projects based on their merits in such a way as to facilitate decisions as to the proposed spending plan.

Departments with the highest total dollar value of project requests include Sewer (\$20.9 million), Water (\$11.5 million), Facilities (\$11.1 million), DPW (\$9.5 million), and the Transfer Station (\$7.4 million). The year with greatest dollar value of project requests was FY2021 (\$25 million).

Several of the projects did not meet the Town's adopted definition of a capital expenditure: most notably that the project must be greater than \$10,000 in cost, have a life expectancy of greater than 5 years, and be able to bond to pay for the expense. A draft of Chatham's Capital Financing Policy is found in Appendix 5. The projects deemed not to be capital expenses were moved to a separate tab in the master project spreadsheet as they still may be valid operational needs.

#### **Capital Planning Evaluation Criteria**

After reviewing each project request to determine if it was complete and CIP-eligible, the project team then evaluated the proposed projects based upon a series of criteria. The categories included:

Preserve or enhance Town assets – Does the proposed project maintain or improve an existing facility?
 What is the anticipated useful life of the investment? Does the proposed project replace a piece of equipment needed to provide public services? Is the vehicle beyond its reasonable life? Is the acquisition

part of a scheduled replacement plan that will keep vehicles operational and preclude major repair costs?

- Increase efficiency and effectiveness of government Does the project reduce operating costs (e.g., eliminate costly repairs) or increase the effectiveness of government? Does the project reduce potential legal liability (e.g. repair of a broken sidewalk) or threats to operations (e.g., replacement of a needed street sweeper before it breaks down completely)? Does it improve customer service or provide a new, needed service?
- Be a good steward of public resources Does the project increase revenues? Are outside grant funds available to cover a portion or all of the cost?
- Specific impacts on operating budget What types of ongoing savings might be realized from the project? Does the project increase operating costs?

In addition, each project was evaluated to see how it would influence a series of key policy areas. These included:

- Aesthetics / Historic Preservation
- Cultural and Recreational Opportunities
- Utilization by Community
- Contextually Appropriate Economic Opportunity
- Youth and Families
- Environmental Sustainability
- Public Health
- Public Safety

These categories were weighted based on the Town's values and priorities, infrastructure replacement criteria, or financial considerations. Points were awarded based on each project's details. Using final project scores, the project team ranked the projects to create a prioritization. The scoring methodology relies on complete and accurate data from department heads in order to accurately reflect a project's merits. A project with a modest score may be the result of missing or incomplete information about the project and its justification. Such situations underscore the importance of a submission of comprehensive data for each project in order to best reflect the level of importance it deserves. That said, there were still occasions that a high scoring project was delayed in its planned funding or a low scoring project was advanced in its funding, based on the Town's determination of need and resource availability.

#### **Managing the Plan in Future Years**

Annually, it is anticipated that the capital plan will evolve by removing those projects that were funded in the current year, adding additional projects that are forecasted to be needed in the 5<sup>th</sup> year, and reassessing the scope, timing, and cost of other projects in the current plan. The project prioritization model is adaptable for future years as conditions or priorities of the Town change. In such a case, the evaluation criteria and/or weighting of categories can be adjusted to reflect the change.

Based on the level of capital investment demonstrated in this plan, the Town may wish to further evaluate the creation of enterprise funds for sewer and/or storm water. As the sewer system expands, it may prove advantageous to separate sewer costs that could be paid out of separate revenues based on sewage usage. By charging sewer fees, these funds could be applied to maintaining the sewer system and alleviate some of the financial pressure on the tax levy. Similarly, the same could be established to maintain storm water infrastructure as several communities in the Commonwealth have successfully demonstrated.

Due to the scope and complexity of the capital investments in Chatham, it would be advisable that the Town Manager appoint a lead person to manage the capital project database on an ongoing basis throughout the year. As it is anticipated that the condition of the assets and the urgency of each capital need will continue to evolve, this would ensure the coordination of on-going capital expenditures across all departments as well as monitoring and close-out of active capital projects. Assigning clear responsibility will allow greater familiarization with the prioritization model and the capital requests. It may be advisable not to include a department head who has a significant number of capital needs in order to maintain the highest level of impartiality in assessing the priorities across the spectrum of capital needs.

#### **RESOURCES AVAILABLE AND SPENDING PLAN**

In recent years, the Town has spent over 10% of the general fund tax levy on capital investment, and the recommendations implemented in this plan were to 1) clearly distinguish between operating and capital expenditures and 2) limit funding from the general fund to a maximum of 9% of general fund tax levy. The draft capital financing policy is found in Appendix 5. Using the 9% expenditure cap and calculating existing debt/commitments, the maximum available funds for new capital investment each fiscal year is shown below in the table. There is an assumed growth rate in the town levy of 3%, as well as accounting for debt drop-off of current leases and existing borrowing, to calculate the "New Capital Investment" available for each future fiscal year, shown in the table below. As it is the Town's policy to consider excluded debt for projects larger than \$1,000,000, those projects that met this criterion were included in the fiscal year requested by the department head. The final determination for timing and funding of these projects will be made by Town officials and approval of the voters. The Center recommends the Town weigh the tax implications of these projects and the requested timing to determine the most appropriate schedule.

#### Town of Chatham – General Fund Capital Spending Plan (9% Alternative)

#### FY2020-FY2024 CIP PROJECT PLAN

A total of 142 projects are included in the FY20-FY24 capital improvement plan. These capital investments will continue Chatham's commitment to maintaining and improving its facilities, equipment, and public infrastructure. Only one project, a new storage facility for the Harbormaster (\$575,000) was not funded. This project will be re-evaluated during next year's CIP process along with all the projects included in the plan for FY21-FY24, in the event that circumstances has changed.

#### **Total Spending by Funding Source**

The summary of all expenditures by funding source is shown in the table below. In overview it is helpful to note the large commitment necessary to finance those 15 projects which exceed \$1M in cost. These include:

#### Facilities:

- Feasibility, design and construction of a new Council On Aging (COA) facility (est. \$8.1M) \*
- Envelope Improvements to Eldredge Public Library (\$1M) \*
- Design and construction of Transfer Station Improvements (\$7.15M) \*
- Replacement of the Highway Dept. Salt/Sand Shed (\$1.6M) \*

#### Roadwork:

• Main Street Improvements in the Business District (\$1.4M)

#### Sewer:

- Replacement of the Sewer Filter Press and Sludge Holding Tank (\$2.5M)
- Lining of 8" Sewer Asbestos Concrete force main pipes (2 each for \$4.45M)
- Sewer system expansion design and construction (\$7M)

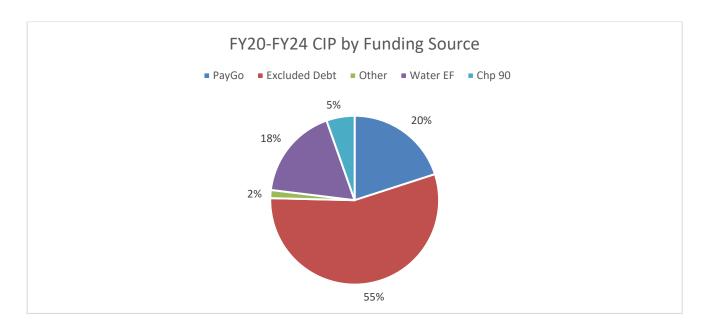

#### Water:

- Water main replacements (3 each for \$3M)
- Repair and repainting of the Water Storage Tank/Tower (\$1.68M)
- Construction of Mill Hill Wells #10 & #11 Chemical Feed Buildings (\$1.18M)
- Construction of a Supplemental Water Storage Tank (\$3.3M)

It is the Town's policy to seek voter (ballot) approval for debt funding of projects outside the normal tax levy (i.e. excluded debt) for projects that exceed \$1M which do not have an alternate source of revenue. These projects are marked with an asterisk in the list above and include all the facilities projects. These projects account for more than half (55%) of the total 5-year capital investment.

#### **Spending by Funding Source and Fiscal Year**

|               | FY20          | FY21          | FY22          | FY23         | FY24         | Grand Total   |
|---------------|---------------|---------------|---------------|--------------|--------------|---------------|
| PayGo         | \$ 2,332,745  | \$ 2,222,245  | \$ 2,563,578  | \$ 3,204,745 | \$ 2,789,745 | \$ 13,113,058 |
| Excluded Debt | \$ 9,450,000  | \$ 18,800,000 | \$ 4,450,000  | \$ 3,575,000 |              | \$ 36,275,000 |
| Other         | \$ 40,000     | \$ 310,000    | \$ 666,667    |              |              | \$ 1,016,667  |

| Chp 90        | \$ 2,170,000  | \$ 343,392    | \$ 343,392    | \$ 343,392   | \$ 343,392   | \$ 3,543,568  |
| Grand Total   | \$ 16,023,245 | \$ 25,010,637 | \$ 11,508,637 | \$ 8,542,137 | \$ 4,433,137 | \$ 65,517,793 |

#### **Spending by Department and Fiscal Year**

As indicated by the table below, it is significant that almost 75% of the 5-year investment falls under the management of two departments: the Public Works Department (which manages DPW, Water, Sewer, and Transfer Station) with over \$38M (58%) in capital projects, and the Facilities Department, which manages all the Town buildings, with over \$11M (17%) of the total investment. This appears to be the result of aging infrastructure and equipment inventory.

|                    | FY20          | FY21          | FY22          | FY23         | FY24         | <b>Grand Total</b> |

| Sewer              | \$ 7,000,000  | \$ 2,950,000  | \$ 5,442,000  | \$ 4,730,000 | \$ 820,000   | \$ 20,942,000      |
| Shellfish          |               | \$ 25,000     |               | \$ 64,000    |              | \$ 89,000          |
| Town Clerk         |               |               | \$ 64,000     |              |              | \$ 64,000          |
| Transfer Station   | \$ 650,000    | \$ 6,500,000  |               | \$ 240,000   |              | \$ 7,390,000       |
| Water              | \$ 2,030,500  | \$ 3,335,000  | \$ 3,485,000  | \$ 1,419,000 | \$ 1,300,000 | \$ 11,569,500      |
| <b>Grand Total</b> | \$ 16,023,245 | \$ 25,010,637 | \$ 11,508,637 | \$ 8,542,137 | \$ 4,433,137 | \$ 65,517,793      |

Also of note is the fact that the sewer infrastructure requires almost \$21M worth of investment, which is putting a strain on the funds available from the tax levy for other capital needs. Going forward, it may make sense to continue to fund the expansion of the sewer system town-wide on the tax levy, as is currently done, given that the entire Town derives a benefit. However it may be prudent to evaluate the creation of a Sewer Enterprise Fund (like the Water Enterprise Fund) to ensure a reliable funding source for the operation and maintenance of the existing system.

#### **Spending by Asset Type and Fiscal Year**

By looking at the distribution of funding by asset type, it reveals the large investment in the sewer system (\$20.9M), almost one third of the 5-year investment. This compares to a similar investment of over \$20M in facilities. The commitment to maintaining the roads and sidewalks are evident by the expenditures of over \$4M in the next five years.

|                       | FY20          | FY21          | FY22          | FY23         | FY24         | Grand Total   |

|          |           |                                                 | Reconstruction of OMBY in 2017, including upgrades to the plumbing in the Upweller Facility. caused unintended adverse drainage issues in Tanks 3 & 4&. An additional drain line was retrofitted to help relive the drainage issues but was unsuccessful. The once functional tanks currently and consistently overflow and do not fully drain (necessary) without completely shutting off all pumps. To address the problem new tanks will need to be elevated and reconstructed to accommodate and 8-inch drain line, similar to that under the other 4 tanks. After investigating whether the current tanks could be "lifted" it was determined the condition of the current tanks and logistics would make it cost-prohibitive, therefore new tanks will need to be constructed. As this is a specialty project no cost estimates have been determined at this time, though a contact with expertise in upweller tank construction has been identified (Nauset Marine in Orleans). Pre-Constructed tanks for the Town of Mashpee (ordered and delivered from Canada) were \$15,000 per tank (total \$30,000), we believe custom -made tanks |                 |       |
| SH10     | Shellfish | Upweller Tank Replacement                       | will be significantly lower cost.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               | \$<br>25,000    |       |

#### **Financing Capital Improvements**

#### Background:

The Town of Chatham has extensive capital needs due to its environmentally sensitive location, the need to provide services to an extraordinary influx of summer residents and visitors and provide access to, preserve, protect, and patrol its extensive waterways and beaches. The policy below provides spending parameters around general fund capital expenditures and does not include spending from the Water Department special revenue fund, Community Preservation Act funds, Land Bank or Chapter 90 funds. Similar to an enterprise fund, it is assumed that the Water special revenue fund will cover all of its capital and debt service needs separately. School department and Sewer department capital needs are included in the general fund, although sewer system build-out expenses are financed separately through debt exclusions and not included as Sewer department capital costs.

The policy affords a comprehensive view of general fund capital spending by including all capital spending, including debt service and capital lease payments, as well as pay-as-you go financing. The use of debt is an important tool to finance larger capital needs and is an equitable financing mechanism for taxpayers in that the benefits the asset provides matches well with the costs of the annual debt service.

For the purpose of this policy, the following definitions shall apply:

- <u>Projected Net Revenue</u> Gross projected revenues, less debt exclusions, Community Preservation
  Fund revenues, enterprise and water special revenue fund revenues and appropriations from
  available funds (e.g., free cash, stabilization, Land Bank and overlay surplus).
- <u>Net Capital Investment</u> Gross costs from local debt, less Proposition 2 ½ debt exclusion amounts, plus the cost of capital leases, direct capital expenses (e.g., "pay-as-you-go capital) funded from free cash, the capital stabilization fund and the general fund, and other local amounts approved as part of the capital budget.
- <u>Capital Investment as a Percent of Net Revenue</u> The Net Capital Investment divided by the projected Net Revenue for that year.

#### **Policy:**

The Chatham capital improvement program shall be prepared and financed in accordance with the following policies:

 Outside Funding – State, federal, or private grant funding shall be pursued and used to finance the capital budget wherever possible.

- <u>Capital Project</u> A capital project shall include the purchase of equipment, acquisition of assets or the building of or improvements to town facilities that exceed \$10,000 in cost and may be borrowed for under Massachusetts General Laws.
- Net Capital Investment as % of Projected Net Revenues The annual Net Capital Investment target is 6-9 percent of the projected Net Revenue for that year. Annual capital investment may take the form of debt service, capital leases or pay-as-you go capital outlays, but shall not exceed the 9 percent target, except in extraordinary circumstances as determined by the Town Manager and Board of Selectmen.

#### **ABOUT THE CENTER**

The Edward J. Collins, Jr. Center for Public Management in the McCormack Graduate School of Policy and Global Studies at the University of Massachusetts Boston was established in 2008 to improve the efficiency and effectiveness of all levels of government. The Center is funded by the Commonwealth and through fees charged for its services.
