FROM: Beth Waldman, Medicaid Director

RE: Community Health Center Manual (2007 Healthcare Common Procedure Coding System

(HCPCS) Coding Update)

This letter transmits revisions to the service codes and descriptions in Subchapter 6 of the *Community Health Center Manual*. CMS (Centers for Medicare and Medicaid Services) has revised the Healthcare Common Procedure Coding System (HCPCS) for 2007 that is used for MassHealth billing.

For dates of service on or after January 1, 2007, service codes that have been discontinued by the Centers for Medicare and Medicaid Services (CMS) and deleted by the American Medical Association *Current Procedural Terminology (CPT)* for 2007 are **not** payable by MassHealth. Services described by these codes may be billed with replacement codes. Replacement codes are Level I and Level II HCPCS codes from any year, including 2007, that replace the 2007 deleted codes. MassHealth will pay only for new 2007 HCPCS code additions that are replacing the 2007 deleted codes.

MassHealth is **not** adopting any other 2007 HCPCS code additions at this time. MassHealth will review the rest of the 2007 HCPCS code additions and changes and will determine coverage policies and other requirements at a later date. Providers will receive another transmittal letter and updated Subchapter 6 of the *Community Health Center Manual* when the final review of 2007 HCPCS code additions has been completed. Prior-authorization requests may be submitted to MassHealth for any medically necessary service for a MassHealth Standard or CommonHealth member younger than 21 years of age.

The 2007 HCPCS deleted codes are listed below in this letter. The 2007 HCPCS additions that are payable for dates of service on or after January 1, 2007, are found in the revised Subchapter 6 of the *Community Health Center Manual*. In accordance with MassHealth regulations, payments are subject to the terms and conditions of 130 CMR 405.000 and 450.000.

Payment for most of the new 2007 HCPCS codes that can be directly cross-walked to the deleted 2006 HCPCS code will be the same rate as the 2006 deleted code in accordance with Division of Health Care Finance and Policy (DHCFP) regulations. Some new 2007 codes will be determined through individual consideration (I.C.) until DHCFP establishes specific rates and these rates are incorporated into the appropriate regulation. For more information regarding payment, you may download the Division of Health Care Finance and Policy Informational Bulletins at www.mass.gov/dhcfp.

#### PATHOLOGY AND LABORATORY

#### **ORGAN OR DISEASE-ORIENTED PANELS**

These panels were developed for coding purposes only and should not be interpreted as clinical parameters. The tests listed with each panel identify the defined components of that panel. These panel components are not intended to limit the performance of other tests. If one performs tests in addition to those specifically indicated for a particular panel, those tests should be reported separately in addition to the panel code.

#### **DRUG TESTING**

The following list contains examples of drugs or classes of drugs that are commonly assayed by qualitative screen, followed by confirmation with a second method.

Alcohols

Amphetamines

Barbiturates

Benzodiazepines

Cocaine and metabolites

Methadones

Methaqualones

Opiates

Phencyclidines

Phenothiazines

Propoxyphenes

Tetrahydrocannabinoids

Tricyclic antidepressants

Confirmed drugs may also be quantitated.

Use 80100 for each multiple drug class chromatographic procedure. Use 80102 for each procedure necessary for confirmation. For chromatography, each combination of stationary and mobile phase is to be counted as one procedure. For example, if detection of three drugs by chromatography requires one stationary phase with three mobile phases, use 80100 three times. However, if multiple drugs can be detected using a single analysis (e.g., one stationary phase with one mobile phase), use 80100 only once.

For quantitation of drugs screened, use appropriate code in Chemistry section (82000-84999) or Therapeutic Drug Assay section (0150-80299).

80100	Drug screen, qualitative; multiple drug classes chromatographic method, each procedure
80101	single drug class method (e.g., immunoassay, enzyme assay), each drug class
80102	Drug confirmation, each procedure
80103	Tissue preparation for drug analysis

#### **Molecular Diagnostics**

The series of codes 83890-83912 is intended for use with molecular diagnostic techniques for analysis of nucleic acids. These services are coded by procedure rather than analyte. Code separately for each procedure used in an analysis. For example, a procedure requiring isolation of DNA, restriction endonuclease digestion, electrophoresis, and nucleic acid probe amplification would be coded 83890, 83892, 83894, and 83898.

83890	Molecular diagnostics; molecular isolation or extraction

The following codes (86602-86804) are qualitative or semiquantitative immunoassays performed by multiple step methods for the detection of antibodies to infectious agents. For immunoassays by single step method (e.g., reagent strips), use code 86318. Procedures for the identification of antibodies should be coded as precisely as possible. For example, an antibody to a virus could be coded with increasing specificity for virus, family, genus, species, or type. In some cases, further precision may be added to codes by specifying the class of immunoglobulin being detected. When multiple tests are done to detect antibodies to organisms classified more precisely than the specificity allowed by available codes, it is appropriate to code each as a separate service. For example, a test for antibody to an enterovirus is coded as 86658. Coxsackieviruses are enteroviruses, but there are no codes for the individual species of enterovirus. If assays are performed for antibodies to coxsackie A and B species, each assay should be separately coded. Similarly, if multiple assays are performed for antibodies of different immunoglobulin classes, each assay should be coded separately.

#### <u>Code</u> <u>Service Description</u>

Codes 88141-88155, 88164-88167 are used to report cervical or vaginal screening by various methods and to report physician interpretation services. Use codes 88150-88154 to report Pap smears that are examined using non-Bethesda reporting. Use codes 88164-88167 to report Pap smears that are examined using the Bethesda System of reporting. Within each of these three code families choose the one code that describes the screening method(s) used. Codes 88141 and 88155 should be reported in addition to the screening code chosen when the additional services are provided.
