

Route 20 Preferred Concept Plan

Centech Boulevard/Cherry Street Intersection

Issue	Recommendation
Several new development projects are planned for properties accessed by Centech Boulevard south of Route 20, including a proposed UPS Packaging Facility.	Provide multiple new travel and turn lanes to the streets approaching the intersection from the east, west, and south. The new travel and turning lanes at the intersection will accommodate the added vehicle trips without resulting in significant delay at the intersection. Timing of these improvements will be phased based on the construction of the planned new developments.
No pedestrian facilities along Route 20.	New sidewalk and shared-use path.
