Re: 2025-2026 Child Care/Preschool Immunization Survey

Date: September 2025

---

The annual public and private **Child Care/Preschool Immunization Survey** is conducted by the Massachusetts Department of Public Health (MDPH) Immunization Division. The purpose of this survey is to identify children entering Child Care/Preschool who are not protected against vaccine-preventable diseases and to ensure that they are properly immunized according to state requirements. These data are publicly available on the [Immunization Division website](http://www.mass.gov/dph/imm).

Regulations established by the Department of Early Education and Care (EEC) and the Department of Public Health require that:

- 1) Licensees must maintain immunization records for all children enrolled in their program.
- 2) All children must be age-appropriately immunized to attend unless they have a medical or religious exemption.

These regulations are designed to prevent illness and disruptions caused by diseases.

**School Immunization Requirements**

The following immunizations are required for children 2 years and older entering early education and care programs or preschool:

- 4 or more doses of DTaP vaccine
- 3 or more doses of polio vaccine
- 1 dose of MMR vaccine

- 1 to 4 doses of Hib vaccine (depending on the age when doses are received)
- 3 doses of hepatitis B vaccine
- 1 dose of varicella (chickenpox) vaccine or physician-certified history of chickenpox disease

### **Recommended Vaccines**

- 1 dose of influenza vaccine for the current influenza season
- 1 dose of updated COVID-19 vaccine
- 4 doses of PCV vaccine (PCV15 or PCV20)
- 2 doses of hepatitis A vaccine
- 2 to 3 doses of rotavirus vaccine (depending on vaccine formulation)

While the Child Care/Preschool Immunization Survey focuses on children 2 years and older, attendees <2 years should still be immunized for their age according to the [ACIP Recommended Immunization Schedule](#).

For additional details, see the MDPH [2025-2026 School Immunization Requirements](#) document.

### **Adult Staff Guidelines**

Following EEC regulations, all early education and care staff must provide proof of immunity to measles, mumps, and rubella. Questions regarding staff immunity to measles, mumps, and rubella are included in the annual immunization survey. Information and instructions about collecting and reporting this information are available on the [MDPH website](#).

### **Every Student Succeeds Act**

Please note that unimmunized or partially immunized children experiencing homelessness and children in foster care attending a public-school preschool program cannot be denied entry to public schools if they do not have immunization records. The federal Every Student Succeeds Act (ESSA) states that if a child or youth who is homeless or in foster care arrives lacking immunizations or medical records, the parent/guardian should be referred to the district's [homeless education liaison](#)/foster care point of contact. This individual is responsible for obtaining relevant academic records and immunizations or medical records and for ensuring that students who are experiencing homelessness or in foster care are attending school while the records are obtained. The student must be enrolled and permitted to attend public school in the interim. Additionally, EEC-licensed programs are allowed a 6-month grace period from the time of enrollment to obtain immunization records for any child who is experiencing homelessness or is in foster care at the time of entering care. If you have any questions about the Every Student Succeeds Act, please contact the Department of Elementary and Secondary Education (DESE) at (781) 338-3700 or [compliance@doe.mass.edu](mailto:compliance@doe.mass.edu).

### **Before- and After-school Programs**

Before- and after-school programs are not expected to complete the immunization survey if immunization records are on file at each child's school. If your program falls into this category, please disregard the survey invitation and contact the MDPH Immunization Data Assessment Unit at [ImmAssessmentUnit@mass.gov](mailto:ImmAssessmentUnit@mass.gov) to remove your program from our contact list. Although you do not need to complete the survey, you are still responsible for ensuring the immunization records are on file at each child's school.

### **Survey Deadline**

Your efforts in completing this survey contribute to protecting our children from vaccine-preventable diseases. The Child Care/Preschool Immunization Survey is due by **Friday, January 23, 2026**.

Refer to the [survey worksheets and instructions](#) to help complete the survey accurately. Please retain copies of the survey and worksheets to facilitate follow-up on children and staff not fully immunized. You may be chosen for a randomized audit of immunization records or be called to review your records by MDPH Immunization Division staff. If you have any questions, please email the MDPH Data Assessment Unit at [ImmAssessmentUnit@mass.gov](mailto:ImmAssessmentUnit@mass.gov).

### **Immunization Survey Results**

In 2024-2025, the immunization records of 94,528 Child Care/Preschool children from 3,306 licensed programs were reviewed. Immunization rates by program for programs reporting 30 or more children are available on the [Immunization Division website](#). Historical data can be found on our [Immunization Survey Archive](#) page.

#### **Immunization Survey of Children > 2 Years of Age Enrolled in Licensed Group Child Care/Preschool**

School Year	No. of Children	> 4 DTaP	> 3 Polio	1 MMR	> 3 Hib	3 Hep B	Immunity to Chickenpox*	Series Complete <sup>1</sup>	Medical Exemptions	Religious Exemptions
2024-25	94,528	96.5%	96.8%	97.6%	96.6%	96.7%	97.2%	94.2%	0.14%	1.02%
2023-24	88,674	96.5%	96.9%	97.7%	96.7%	96.7%	97.4%	94.4%	0.13%	0.93%
2022-23	78,672	96.6%	97.1%	97.7%	96.8%	96.6%	97.3%	94.5%	0.15%	0.88%
2021-22	80,329	96.2%	97.4%	95.9%	96.0%	96.8%	96.8%	93.4%	0.17%	0.77%
2020-21	54,941	97.3%	97.5%	98.3%	97.2%	97.0%	97.9%	94.9%	0.27%	0.97%

\*Immunity to chickenpox disease includes children with a documented physician-certified reliable history of chickenpox disease or 1 dose of varicella vaccine.

<sup>1</sup>4-3-1-3-3-1 Series: 4 DTaP, 3 Polio, 1 MMR, 3 Hib, 3 Hep B, 1 Varicella

### **Additional Resources and Information**

While the rate of religious exemptions has remained relatively steady in recent years, we encourage schools and programs to review their policies and practices regarding exemptions, including the recommendation to have families renew these annually.

The resources below are available to help improve communication with vaccine-hesitant parents:

- [Personal belief exemptions for vaccination put people at risk. Examine the evidence for yourself](#)
- [What if you don't immunize your child?](#)
- [Childhood vaccine information for parents and caregivers – a page of resources](#)

Massachusetts school immunization requirements have been very effective in preventing the outbreak of vaccine-preventable diseases. Continued enforcement of the immunization requirements is essential to the health of our children.
