

Regarding Clean Energy and restricting biomass::

- 1) The regulations must explicitly state that combustion-based technologies shall not be considered Clean Peak Resources – clean must be clean!
- 2) The draft regulations are incomplete because they refer to numerous Guidelines that DOER has not published, including a Guideline on Clean Peak Resource Eligibility.
- 3) DOER must post the draft Guidelines and extend the public comment period by at least 60 days for the public to review and comment on them
