

We have these hopes for the final draft of the Clean Peak Regulations:

1) The regulations must explicitly state that combustion-based technologies shall not be considered Clean Peak Resources – clean must be clean!

2) The draft regulations are incomplete because they refer to numerous Guidelines that DOER has not published, including a Guideline on Clean Peak Resource Eligibility.

3) DOER must post the draft Guidelines and extend the public comment period by at least 60 days for the public to review and comment on them.

Thank you, Ken Kipen, Chair, PATE (People Against Toxic Effluents) Ashfield MA
