

I am a citizen of Massachusetts. My comments on the proposed Clean Peak Standard are:

- 1) The regulations must explicitly state that combustion-based technologies shall not be considered Clean Peak Resources – clean must be clean!
- 2) The draft regulations are incomplete because they refer to numerous Guidelines that DOER has not published, including a Guideline on Clean Peak Resource Eligibility.
- 3) DOER must post the draft Guidelines and extend the public comment period by at least 60 days for the public to review and comment on them.

Thank you for this opportunity to help determine the future of our climate.
